

## JIRA Issues Report

=====

Issue Key: PL-2074

Summary: From PL-2069 - Yard Management Report - Highlighting Dwell, Expired Transactions in Yard Management Report Export

Description: We want to add the green / yellow highlights to the export as well (to match expired / dwell transactions in the portal).

Current:

[^yard-management-report-08-07-2024-083023-18374.xlsx]

Can we make this match the portal highlights:

!Screenshot 2024-08-07 at 3.42.40 PM.png|width=83.33333333333333%,alt="Screenshot 2024-08-07 at 3.42.40 PM.png"!

!203437de-1e43-4a2a-91e3-24cd983e77af.png|width=83.33333333333333%,alt="203437de-1e43-4a2a-91e3-24cd983e77af.png"!

-----

Issue Key: PL-2073

Summary: From PL-2069 - Yard Management Report - Dwell - Changing Logic for Dwell Transactions With Updated Transactions While Maintaining Same Seal #

Description: However, there is one last logic change until I believe this feature will be completed. Trailers that are considered “Dwell” no longer show up as “dwell” if an updated transaction occurs, if the seal # is not updated / remains the same as expected.

For example, Trailer “tr1” is currently shown as a “Dwell” trailer as expected:

!Screenshot 2024-08-07 at 3.28.37 PM.png|width=986,height=742,alt="Screenshot 2024-08-07 at 3.28.37 PM.png"!

!Screenshot 2024-08-07 at 3.28.55 PM.png|width=990,height=748,alt="Screenshot 2024-08-07 at 3.28.55 PM.png"!

This trailer had a seal # of "newsealtr1". Now, if a transaction were to occur today with the same seal #:

**\*Currently\*:**

This trailer is no longer considered "Dwell" so it is not highlighted green / shows up when the "Dwell" feature is used.

**\*Desired\*:**

If an updated transaction occurs with the same trailer # & seal #, then this trailer should still be considered "Dwell" & highlighted green.

\* Please note that this means that trailers can be both expired / dwell, or only dwell,

only expired, neither, etc.

-----

Issue Key: PL-2072

Summary: Removing Product Barcodes, Disabling Asset-Checkbox for Following Products - clemicolpro

Description: Operations is doing this as we are still experiencing issues with the Asset-Checkbox products. So instead of using this option, operations will be injecting the Radio barcodes as a product, then issuing / returning these radios through SZ for clemicolpro.

Operations went in & adjusted a lot of the Radios in this system by:

# Removing the Asset Checkbox option

# Removing the product barcodes

However, there are a few radio products that cannot be edited by operations. Would it be possible to disable the Asset-Checkbox toggle for the following products in clemicolpro?

\* Butt 2 Motorola Radio

\* Cryo A 2 Motorola Radio

\* Cryo B 2 Motorola Radio

\* Dry Dock 1 Motorola Radio

\* Loin Boning 2 Motorola Radio

\* Main Break 3 Motorola Radio

\* Main Break 5 Motorola Radio

\* St Louis 1 Motorola Radio

Issue Key: PL-2065

Summary: CLONE - Lost Changes - Foreign Materials Report

Description: Currently in the FM report, users are able to mark / return products as lost, as well as found (unlost). However, we want to make the following changes in the FM report's Lost functionality:

\* When the checkbox is selected for a lost asset, we get this popup:

!IMG\_1759.PNG|width=1668,height=2224,alt="IMG\_1759.PNG"!

Can we:

# Change the "Approve" Text to say "Found"

## When this new "Found" button is selected, we want for this product to be returned with the time that "Found" was selected & returned with a "Found" return reason

# Next, can we change the "Remove" button functionality to only remove the "Lost" status & check this product back out at the original time of issuance? So if "Remove" is selected

## The Product should be checked back out & show as "Out" in all reports

## The product should be no longer highlighted red in reports, return inventory

## This remove functionality should work as if the “Lost” return / status was never assigned

Issue Key: PL-2059

Summary: From RN-2291 - Extending Character Limit for Attribute Titles Displayed in Attribute Zone, Company Admin

Description: The UI is much improved now for the Attribute Zone Attribute names. However, we are still wanting to extend the name of the Attributes that are shown in Attribute Zone beyond what is available in the application & company admin. It appears that the Attribute names are cutoff still, though this looks like a backend adjustment may be required:

!Screen Recording 2024-07-24 at  
3.13.03 PM.mov|width=2880,height=1800,alt="Screen Recording 2024-07-24 at  
3.13.03 PM.mov"!

Would it be possible to allow for longer attribute titles to be shown in the company admin & Attribute Zone?

Currently Shown in the company admin & Attribute Zone:

“Here is going to be a really long attribute name. I want to see what this UI will look like in Attri” (100 characters)

Desired (or similar): 150 characters

[~accountid:5e60790cab60320af8f87101],

Do you think it would be possible to extend the character count to 150 or would this cause potential issues in the admin, app, UI, etc.?

-----

Issue Key: PL-2058

Summary: CLONE - From RN-2271 & PL-2024 - Lost Changes to Asset Scan Report - Backend

Description: In  
[https://izhips.atlassian.net/browse/RN-2271|https://izhips.atlassian.net/browse/RN-2271  
|smart-link] &  
[https://izhips.atlassian.net/browse/PL-2024|https://izhips.atlassian.net/browse/PL-2024|  
smart-link], we addressed the following:

Currently, when products are marked as lost, then returned from either the FM report, employee return inventory, then returned, the “Lost” status does not appear in the Asset Scan report. We want to change this logic so that even if a product has its “Lost”

status removed, we want there be a record showing that this product was once marked lost, then found / unlost.

However, we also wanted to make the following changes to those two tickets:

However, I wanted to see if it would be possible to change the logic slightly for when assets are marked as “lost”, then returned? Currently there is an entry on the Asset Scan Report, which is displayed like a Sharpening once a product is returned after being “Lost”, but it does not say “Lost”.

When an asset is issued → Then marked “Lost”, the following is shown on the Asset Scan report (which is good & we want to keep):

!Screenshot 2024-07-24 at 2.04.21 PM.png|width=83.33%,alt="Screenshot 2024-07-24 at 2.04.21 PM.png"!

However, the issue occurs once the “Lost” asset is marked as unlost / found & is returned with a normal return reason. Now the Asset Scan report looks like:

!Screenshot 2024-07-24 at 2.05.09 PM.png|width=83.33%,alt="Screenshot 2024-07-24 at 2.05.09 PM.png"!

Can we change the “Product Name” in the second picture to match the first image? So this text would go from “NOT IN SYSTEM (NOT IN SYSTEM)” → “Returned: Lost”. The second Image would then look like:

!Screenshot 2024-07-24 at 2.09.59 PM.png|width=83.33%,alt="Screenshot 2024-07-24 at 2.09.59 PM.png"!

Issue Key: PL-2055

Summary: farinvinpro - Issues with TCP Daily Audit Report

Description:

In

[<https://izhips.atlassian.net/browse/PL-1979>]<https://izhips.atlassian.net/browse/PL-1979> smart-link], we discussed a use-case that was deemed not necessary to adjust regarding the TCP Daily Audit report.

h1. Products with Asset # when checked out and returned and when issued to the next employee-the employee name is not showing up on the reports:

Steps to recreate-

# Issue a product with Asset # in the cart screen to Employee1.

# Return that asset and perform a Confirm audit in the FM report.

# Issue the same product with Asset # to Employee2.

# Now perform Confirm Audit and check the TCP daily Audit Report.

# The audit count falls in the same Employee 1.

# Expected behaviour- A second entry with Employee 2 needs to be shown

h1.

Farbest is experiencing a similar issue with non-unique products being issued to several employees, as only one of the employee's data is shown in the report / export, even though audits were performed when these products were issued to several employees, but only the information for a single employee is often shown. Would it be possible to adjust the logic for this report so that all audits for all employees are shown, instead of the audits for redundant products showing up for only a single employee in the TCP

Daily Audit report?

Here is an email sent to the Farbest team to explain this issue more in-depth (please see attached as well):

----

Mike,

Good afternoon! Thank you for letting us know that the report is still showing an

inaccurate # of audits. I've gone through the report once again and it appears that the report is not showing the full list of employees that are being assigned a particular asset / are adding the audits of each employee in possession of a single asset and assigning all of these audits to a single employee.

For example, product "CLIPBOARD" with Asset # "CLIPBOARD" shows up in the TCP Daily Audit report as having a total of 14 audits performed today by Nathan Fidler, though only 4 audits are visible on the export:

!cid:185689\*image001.png@01DAD842.D773E9B0|alt="A screenshot of a data report

Description automatically generated"

!cid:185689\*image002.png@01DAD842.D773E9B0|alt="A screenshot of a computer

Description automatically generated"

However, it appears that this same product / asset was assigned to several other employees today as well:

!cid:185689\*image003.png@01DAD842.D773E9B0|alt="A screenshot of a computer

Description automatically generated"

Do you know whether any audits were performed for any other employees who were in possession of this same "CLIPBOARD" product by chance? It appears as though these audits may be shown under the employee who last had this product issued to them. In most cases, assets are unique products & are not issued to multiple employees, however, I'll provide this information to our dev team, who should be able to get the other employees / their audits to be displayed on the report as well, which appears to be what is causing the discrepancies in the # of audits shown & the audit timestamps.

Best regards,

Summary: From PL-1933 - Changing Logic for Generic SZ Products So These Products Are Not Moved to "Removed" in Expiration Report if Expiration Reset Option Enabled

Description: I think we may want to change the logic for the generic SZ products being moved to the “Removed” section of the EXP report once returned, but we can add this change into a new ticket in the backlog. Otherwise, the new logic is working as expected! Thank you for your help!

Moving issue to done.

Issue Key: PL-2044

Summary: Product Issues - tysncmontoop

Description: [~accountid:5e60790cab60320af8f87101],

Please see the bottom for tl/dr.

tysncmontoop reached out last week to let us know that they are still facing issues with several products, which have the following barcodes:

0023587

0023599

0023582

\*0023604\*

When these products were scanned, they were being issued as the generic SZ products, rather than the product barcode:

!Screenshot 2024-07-11 at 2.28.17 PM.png|width=658,height=716,alt="Screenshot 2024-07-11 at 2.28.17 PM.png"!

However, I was able to fix these issues by making sure these products were returned and updating the product details. However, one of these products, 0023604, still isn't returnable, even if I can issue this product, then go straight into Quick Return, and can even issue this barcode over & over, but it does not appear on the reports:

!Screen Recording 2024-07-11 at 10.23.11 AM.mov|width=2880,height=1800,alt="Screen Recording 2024-07-11 at 10.23.11 AM.mov"!

Additionally, I can even issue this barcode over & over, even though this product has the Asset Checkbox selected w/ a QTY of 1:

!Screen Recording 2024-07-11 at 10.26.41 AM.mov|width=2880,height=1800,alt="Screen Recording 2024-07-11 at 10.26.41 AM.mov"!

I then went into the product details, changed the barcode & I was able to issue the product as expected. However, I then reverted back to the old barcode after returning

the product, but still ran into the same issue, where I could issue this product over & over, but it would not feed reports & could not be returned.

----

Would it be possible to either:

# Remove the history on this product / asset (0023604) so that this product can be issued out correctly or

# Identify / fix the issue causing this product to be issued out as either a generic SZ product or not feeding the reports?

I have been able to fix all of the other assets except this one. Fixing this scanner is a high priority. Please let me know on this if you need more info, etc.

Issue Key: PL-2040

Summary: Expiration Products Sent to "Removed" Section of Expiration Report -  
Jbscactxtrain

Description: jbscactxtrain is still experiencing an issue with new transactions including expiration products being moved to the "Removed" section of the Expiration report. We had a similar issue in [https://izhips.atlassian.net/browse/PL-1968|https://izhips.atlassian.net/browse/PL-1968|smart-link].

It appears that new transactions are sent to the “Removed” section:

!Screen Recording 2024-07-09 at 7.28.02 PM.mov|width=75%,alt="Screen Recording 2024-07-09 at 7.28.02 PM.mov"!

To better show this, I used employee “ASHRAF WISAL” who had a transaction conducted today that only shows under the “Removed” section:

!Screen Recording 2024-07-09 at 7.34.12 PM.mov|width=75%,alt="Screen Recording 2024-07-09 at 7.34.12 PM.mov"!

In

[<https://izhips.atlassian.net/browse/PL-1968>]<https://izhips.atlassian.net/browse/PL-1968> smart-link], it was stated:

Yes, the logic remains unchanged, and the items are not physically removed. Upon reviewing the logs for this particular transaction, we encountered exception errors twice initially, but subsequently, the same parameters were successfully updated in the system. We attempted to replicate the issue on the stage server but were unsuccessful. We are continuing our efforts to recreate this issue on our end.

I'm assuming this issue is the main cause of these transactions feeding only the removed section. Is this the same issue faced in [https://izhips.atlassian.net/browse/PL-1998|https://izhips.atlassian.net/browse/PL-1998|smart-link] as well? If we are not able to identify what is causing this issue, do you think we should clone this company and see if that resolves the problem?

-----

Issue Key: PL-2034

Summary: CLONE - From RN-2151 & PL-1864 - Yard Management Report - Dwell

## Functionality Changes - Backend

Description: However, I think we would want to make the following changes to the Dwell Functionality

- \* Currently, only the trailer ID #s are green for all “Dwell” trailers. Can we highlight the entire trailer / transaction green?

- \* Additionally, when “Dwell” is selected, even trailer ID #s or transactions that have recent seal # changes show up, such as:

\*\*

!Screenshot 2024-06-25 at 4.05.44 PM.png|width=50%,alt="Screenshot 2024-06-25 at 4.05.44 PM.png"!

- \*\* Can we change this logic so that only trailer ID #s with Seal #s that are older than 96 hours old show up when “Dwell” is selected?

- \*\* This is currently the logic for “Expired” trailers IDs / transactions (only trailers with transactions older than 6 hours show up)

- \* Additionally, when a Trailer iD has a Seal # that shows as null and has not been changed in 96 hours, then is updated, the text still shows as green:

\*\*

!Screen Recording 2024-06-25 at 4.10.34 PM.mov|width=50%,alt="Screen Recording 2024-06-25 at 4.10.34 PM.mov"!

\*\*\* Expected: This trailer ID # would have black text for the Seal # & not show up when the “Dwell” filter is used (but would still show up when “On Yard” alone is used

\*\*\* This same issue occurs when a new seal # is given for an older trailer ID # - The Seal # still displays as green, even for new transactions with updated seal #s.

Issue Key: PL-2033

Summary: Aramark Daily Return Report - Adding + Functionality for Employee Details

Description: The + functionality still does not seem to be updated on this report, but we can address next after the data is confirmed in this report from above. The data included under the employees' names is good! However, we want to hide this data unless a + under the employee name is pressed if possible!

So when users navigate to this report / run it, it would look similar to:

!922bfa3d-c325-42e0-8017-17ed937200b1.png|width=75%,alt="922bfa3d-c325-42e0-8017-17ed937200b1.png"!

Then, if the + button is pressed, it would look something like:

!b377988a-8d94-4c61-b8b9-c9e8dd221c88.png|width=75%,alt="b377988a-8d94-4c61-b8b9-c9e8dd221c88.png"!

Would this be possible to implement?

Issue Key: PL-2017

Summary: Wrong \$ Totals Showing in Weekly Transactions Report - csbidkuntoob

Description: csbidkuntoob is showing a discrepancy in the Weekly Transactions Report for two products, "HARVEST SLEEVE YELLOW ACID CR 6-MIL 18" and "HARVEST GLASSES SAFETY ANTI-FOG" in January 2024. When the totals are pulled, it shows like:

!Screenshot	2024-06-27	at
4.05.45 PM.png width=83.33333333333334%,alt="Screenshot	2024-06-27	at
4.05.45 PM.png"		

So, the total \$ amount for “HARVEST SLEEVE YELLOW ACID CR 6-MIL 18” is \$6,090.00, even though this product has a unit price of \$0.96 & only 42 were issued in this time period (expected would be \$40.32)

The total \$ amount shown for “HARVEST GLASSES SAFETY ANTI-FOG” is \$8,500.00, even though the unit price is only \$3.40 and a QTY of 25 were issued (expected amount = \$85.00).

However, after more investigation, I see that the above products are sold by “EA”, while there are similar products with a UOM of “CS”:

!Screenshot 2024-06-27 at 4.11.13 PM.png|width=83.33333333333334%,alt="Screenshot 2024-06-27 at 4.11.13 PM.png"!

The CS (cases) of these products have the same model #s, except with an “h” added to

the end, and these are much more expensive. Is it possible that the price has changed for the “HARVEST SLEEVE YELLOW ACID CR 6-MIL 18” and “HARVEST GLASSES SAFETY ANTI-FOG” products, causing this issue? Or could the EA & CS different products be getting merged somehow? Please let me know if more info is required!

Issue Key: PL-2016

Summary: Unable to Export Weekly Transaction Report for tlp for 06/16/24 - 06/22/2024 (All Products)

Description: Hi Team,

I have been experiencing issue with Tyson Logansport portal, I can't export the data under Weekly Transaction report ([<https://tlp.izhips.com/report/weeklytransaction>|<https://tlp.izhips.com/report/weeklytransaction>|smart-link] ) for specific date range 06/16/2024 - 06/22/2024. It just keeps on loading:

!Screenshot 2024-06-27 at 2.37.58 PM.png|width=1440,height=900,alt="Screenshot

2024-06-27 at 2.37.58 PM.png"

[~accountid:5e60790cab60320af8f87101],

In addition to investigating this issue, would it be possible to export this data so that we can send it to the customer?

Issue Key: PL-2015

Summary: Payroll Report Not Exporting - jbsilbeaprop

Description: [~accountid:5e60790cab60320af8f87101],

Members of our team reached out to let us know that they are having trouble with exporting the Payroll report for jbsilbeaprop. The report is accessible and data generates once the report is run, however when you try to export the report, the portal will spin infinitely:

!Screenshot 2024-06-26 at 3.33.08 PM.png|width=1425,height=859,alt="Screenshot 2024-06-26 at 3.33.08 PM.png"!

I tried different date ranges and am still facing this error. I thought this may be due to moving this company over to e8.9.0, but I did not face this issue in ccdemo or any other companies or any other reports. Would it be possible to investigate this issue?

Issue Key: PL-2010

Summary: From RN-2129 & PL-1843 - Manual Entry & Products Report Changes

Description: \* Would it be possible to make the following slight adjustments to the Products Report, as well as the Manual Entry Report?

a. When the report is filtered for “Injection Zone”, there are brackets around the injected assets. Can we remove these?

b. When this report is filtered for “Sharpening Zone”, then only the employee’s first name is displayed, then the Employee ID. Can we add the last name, then the employee / barcode below the first & last name?

c. When Kits are issued, it appears that there is a separate line for each product issued in a Kit. For example, Kate Ranger was issued kit “Test Kit1” below. This Kit had 3 products in it, which in turn shows 3 lines in the new Products report. However, would it be possible to include each product name in the “Product Name” column as well?

Issue Key: PL-2007

Summary: PL-1972 - Adding New UI so Users Can Use Either / Or "Asset #" or "Equipment #s" - Back-End

Description: In  
[<https://izhips.atlassian.net/browse/PL-1972>|<https://izhips.atlassian.net/browse/PL-1972>]  
smart-link] &  
[<https://izhips.atlassian.net/browse/RN-2228>|<https://izhips.atlassian.net/browse/RN-2228>  
|smart-link], we gave users the ability to use Asset #s, as well as Equipment #s  
simultaneously on a single product. Additionally, we want to have the ability to use  
Work Order #s as well, if toggled on.

In this ticket, would it be possible to create a new UI so that users can choose to use either “Asset #s” and/or “Equipment #s” as well? This would look like:

!Screenshot 2024-06-20 at 2.19.40 PM.png|width=91.66666666666666%,alt="Screenshot 2024-06-20 at 2.19.40 PM.png"!

Additionally, we would be able to enable Work Order #s as well, which will be turned on / off by the following in the company admin:

!Screenshot 2024-06-20 at 2.49.27 PM.png|width=75%,alt="Screenshot 2024-06-20 at 2.49.27 PM.png"!

So, if Asset #, Equipment #, and Work Order #s are all enabled for Tool Zone, we would want to see:

!Screenshot 2024-06-17 at 5.14.45 PM.png|width=452,height=594,alt="Screenshot 2024-06-17 at 5.14.45 PM.png"!

Summary: CLONE - Customer Admin - Asset# Label Settings - Dev Request - Back-End

Description: Colton-

Please add ticket for following dev request. "Customer Admin - Asset# Label Settings"

It seems like this is a glitch in the system, but I am sure we just didn't connect the logic. In the Company Admin, \*Company Tab>Other Settings>Label Settings\* the user can change the "Asset#" label and the cart adjusts for our Zone transaction process, but it is not adjusting for the Attribute Zone cart screen. (Screen shots below)

I want the title to change on the cart the same way.

Issue Key: PL-2001

Summary: CLONE - Adding Logic Changes From RN-2220 & PL-1955 to New Work Order Report - Back-End

Description: In  
[<https://izhips.atlassian.net/browse/RN-2220>]<https://izhips.atlassian.net/browse/RN-2220>  
[smart-link] &  
[<https://izhips.atlassian.net/browse/PL-1955>]<https://izhips.atlassian.net/browse/PL-1955>  
[smart-link], we changed the logic for the ISP report so that non-SZ transactions would  
feed the ISP report. Can we implement this same logic for the new Work Order report as  
well?

We also have other developments needed for this new report to work properly, including

[<https://izhips.atlassian.net/browse/RN-2228>|<https://izhips.atlassian.net/browse/RN-2228>  
|smart-link] &  
[<https://izhips.atlassian.net/browse/PL-1972>|<https://izhips.atlassian.net/browse/PL-1972>  
smart-link].

These together should allow users to:

- \* Issue products via the cart screen with both asset & equipment #s, as well as Work Order #s
- \* Have these cart screen transactions feed the Work Order Report

Issue Key: PL-1993

Summary: Expiration Alert Emails Not Triggering

Description: Hey Karthiyayini Muthuraj, Do you have a way of verifying whether expiration emails are being sent out by chance? Fritxfriser reached out to let us know that they haven't been receiving any expiration alerts to notify them that a product is set to expire in x amount of days. Do you have a way of seeing whether these are being sent by chance? I checked them in my system also, but didn't receive any of these alerts.

I've set up several of these alerts to be triggered in ccdemo, but I have not received any of the alert emails.

Summary: From PL-1921 - Daily Report Additions

Description: In  
[<https://izhips.atlassian.net/browse/PL-1921>|<https://izhips.atlassian.net/browse/PL-1921>|  
smart-link], we created a new Aramark report, the Daily Return Report. We now want to  
make the following additions / changes to this report:

# Can we change logic for this report so that all “Issued” garments (from Data Hoops)

will also show up in this report, with an “Out” status on this report, and if the scans are included from the feed, we would show those garments as “In”? And can we also include an “In / Out” Status filter to the top of the report?

# For only the “In” garments on this report, can we add under comment Comment “Soil Scan”?

# Lastly, would it be possible to remove the extra data under employee name (employee ID, etc.) and have + dropdown that when selected, shows these details.?

Issue Key: PL-1987

Summary: Errors in zackyardmanagement

Description: Hey Karthiyayini Muthuraj, would it be possible to see if migrations may be necessary for a new system, zackyardmanagement? Zack cloned his ymp system and this new clone is:

- \* Highlighting all transactions as yellow in Yard Management report

- \* Not allowing editing to the text in the Yard Management report in the portal for Vent Seal #s, then changing the Trailer ID# instead

- \* The "Auditor" button the in the application says "Aramark Inspector"

Lots of other odd things...Just thought I'd ask!

Issues with editing text values in prod:

!Screen Recording 2024-06-11 at  
5.00.45 PM.mov|width=1920,height=1080,alt="Screen Recording 2024-06-11 at  
5.00.45 PM.mov"!

Aramark Inspector shown instead of "Auditor":

Issue Key: PL-1979

Summary: TCP Daily Audit Report- Products with Asset # when checked out and returned and when issued to the next employee-the employee name is not showing up on the reports

Description:

!20240605181051.mp4|width=960,height=720,alt="20240605181051.mp4"!

!20240605181309.mp4|width=960,height=720,alt="20240605181309.mp4"!

!Screenshot (4445).png|width=1920,height=1080,alt="Screenshot (4445).png"!

Steps to recreate-

# Issue a product with Asset # in the cart screen to Employee1.

# Return that asset and perform a Confirm audit in the FM report.

# Issue the same product with Asset # to Employee2.

# Now perform Confirm Audit and check the TCP daily Audit Report.

# The audit count falls in the same Employee 1.

# Expected behaviour- A second entry with Employee 2 needs to be shown

Issue Key: PL-1978

Summary: Missing transactions for the Tyson Storm Lake location (should be on the TSLP tab in the excel file)

Description: [Thursday 6:31 PM] Marco Chiesa

Karthiyayini Muthuraj We are investigating the stores issue/return report that we generate and send to Tyson every 15 minutes. Tyson says it is missing transactions for the Tyson Storm Lake location (should be on the TSLP tab in the excel file)

The file name would be like stores-issue--return-report-05-30-2024-190000.xlsx the timestamps in the filename appear to be in Eastern so we are trying to look in the 1500 files since we know there was activity today around 3pm Eastern.

[Thursday 6:34 PM] Marco Chiesa

We can find data on one or two tabs in the files, but nothing on the TSLP tab (for Storm Lake).

Anyway, the excel files are being generated and sent (no errors in database queue, we can find the files in S3 iz-edi-outgoing bucket. But, we can't find data on the TSLP tab.

So, maybe it is a backend code bug with the query that generates the file? Can you help us investigate this?

Issue Key: PL-1972

Summary: CLONE - Create Ability to Use Both Asset # & Equipment Numbers  
Simultaneously - Back-End

Description: Currently, it appears that the Asset # & the Equipment #s are the same. However, we want to have the ability to assign Asset #'s & Equipment numbers to a single product. We will likely need to separate these values so that they are not synonymous:

----

I checked the RN build with Karthi, and currently, we can gather equipment numbers through the admin menu. The `iz_equipment_book` table holds both the equipment and their numbers. We can choose to display either the asset or equipment number in transactions on the admin settings app checkout screen. This allows us to obtain `asset_no`. When dealing with an equipment zone, the numbers are fetched from `iz_equipment_book`. Once a number is selected, it's sent as `asset_no` to the backend. Therefore, the asset and equipment numbers are synonymous.

For these changes, we need to address both the backend and app sides to display equipment and asset numbers separately.

Issue Key: PL-1971

Summary: Adding a New Toggle for the CO2 Tracking Report - "Other" Toggle

Description: We want to add another toggle in the product details from the company admin, called “Other”. This additional checkbox will function exactly like the “Non-Returnable” checkbox for the CO2 Tracking report, but will also allow for products to be returnable. The UI should look similar to:

!Screenshot 2024-05-30 at 3.44.13 PM.png|width=91.66666666666667%,alt="Screenshot 2024-05-30 at 3.44.13 PM.png"!

And, similarly to the non-returnable toggle, when products are issued with this checkbox selected, they should have the “In” and “Out” times displayed at the same time, as well as feed the “Other” status on the CO2 report, however, products with this checkbox should be returnable (unless non-returnable is also selected).

Status: Done

Issue Key: PL-1969

Summary: Clemicolpro - Returning Asset-Checkbox Radios

Description: In  
[https://izhips.atlassian.net/browse/PL-1938|https://izhips.atlassian.net/browse/PL-1938|  
smart-link], we needed to have several radios returned as they were often re-issued as  
generic SZ product, knives. Would it be possible to return these products once more?

!clemicolproreturns.xlsx|thumbnail!

When I try to return these Knives (radio assets issued as knives), I get this error:

!IMG\_1732.PNG|width=1668,height=2224,alt="IMG\_1732.PNG"!

Additionally, there are a few radios checked out currently as Radios, which also need to be returned:

!clemicolproloanerreturns.xlsx|thumbnail!

Would it be possible to return all of these products as well? Once all of these radios are returned, then all radios in this system (all say Motorola) should be returned with a QTY of 1 shown. Hopefully this will be the last time we need to adjust this for this company!

Status: Done

Issue Key: PL-1968

Summary: Expiration Transactions Not Feeding Expiration Report - jbscactxtrain

Description: jbscactxtrain is facing issues with expiration attributes / products not feeding the Expiration report. A few examples of this occurring happened with product "ROUND CHAIN SUPERVISOR", which was issued yesterday to "JAIME GONZALEZ SR". Here is the product details:

!Screenshot 2024-05-29 at 3.09.04 PM.png|width=1920,height=1040,alt="Screenshot 2024-05-29 at 3.09.04 PM.png"!

And this product feeds the Manual Entry, Employee Inventory reports:

!Screenshot 2024-05-29 at 3.08.15 PM.png|width=982,height=956,alt="Screenshot 2024-05-29 at 3.08.15 PM.png"!

However, the Expiration report is not showing this product / transaction:

!Screenshot 2024-05-29 at 3.08.36 PM.png|width=1139,height=678,alt="Screenshot 2024-05-29 at 3.08.36 PM.png"!

Is this issue possibly related to the issue described in  
[https://izhips.atlassian.net/browse/PL-1964|https://izhips.atlassian.net/browse/PL-1964|  
smart-link]?

We will need to create a hotfix release for both this issue, as well as  
[https://izhips.atlassian.net/browse/PL-1964|https://izhips.atlassian.net/browse/PL-1964|  
smart-link] &  
[https://izhips.atlassian.net/browse/PL-1895|https://izhips.atlassian.net/browse/PL-1895|  
smart-link] if possible!

Issue Key: PL-1960

Summary: BackEnd - GS1 Codes - Research / Testing

Description:

#

"[+5.6603.15/21/A000000001+|https://victorinox.com/ch/01/7611160503817/22/5.6603.15/21/A000000001] +-- Able to show in station zone+

# If eliminate process - No slowdown will occur

# If mixing of scanning - Will remove only URL contains

Or Can right align in SZ, reports, doublestack, etc.

----

I had a meeting with Karthi last night regarding the GS1 codes and the capabilities within our application and I think it went really well! Regarding the visibility of these longer codes within our application, we have several options, such as:

\* Eliminating the URL in both Station Zone (SZ) and in the reports. So for example, if code

"[https://victorinox.com/ch/01/7611160503817/22/5.6603.15/21/A000000001|https://victorinox.com/ch/01/7611160503817/22/5.6603.15/21/A000000001|smart-link] " is scanned, in both the SZ screen UI and in the reports, we just have this code show up as only

"[7611160503817/22/5.6603.15/21/A000000001|https://victorinox.com/ch/01/7611160503817/22/5.6603.15/21/A000000001]" or

"[5.6603.15/21/A000000001|https://victorinox.com/ch/01/7611160503817/22/5.6603.15/21/A000000001]", or even

"[A000000001|https://victorinox.com/ch/01/7611160503817/22/5.6603.15/21/A000000001]"

\* Or, we could also right align these codes in the SZ UI, so any codes over x characters will be right aligned, so the end of the asset will show up

\* Or, we can even add a second line within the SZ UI so the entire code would be shown

\* Basically, he said he can implement any rule so we can have any portion of the GS1 codes above visible or ignored in both the UI and/or in the reports.

Issue Key: PL-1959

Summary: Issues With Asset-Checkbox Scanners - tysncmontoop

Description: tysncmontoop is once again facing issues with several of their scanners, which are all asset-checkbox products.

Somehow, they are still able to issue / return these items multiple times, such as scanner "SCANNER - 0023612". Today, they reached out because they could not return these scanners and were getting an error stating that these scanners had already been returned. Upon investigation, I also noticed that these radios had been returned several times today:

!Screenshot 2024-05-22 at 11.19.53 AM.png|width=1439,height=854,alt="Screenshot 2024-05-22 at 11.19.53 AM.png"!

However, these radios should not be able to be returned multiple times. Is there a way we could add an additional verification for the asset-checkbox products, like we have in SZ currently?

Issue Key: PL-1943

Summary: Attribute Zone - Use the Asset # as the Trailer ID # in YMP Reports

Description: In  
[<https://izhips.atlassian.net/browse/RN-2188>][<https://izhips.atlassian.net/browse/RN-2188>  
|smart-link] &  
[<https://izhips.atlassian.net/browse/PL-1915>][<https://izhips.atlassian.net/browse/PL-1915>  
|smart-link], we changed the logic for Attribute Zone so that transactions from this zone  
will also feed the Yard Management & Truck Zone report.

Can we also have all Attribute Zone transactions with “Asset #” feed these reports as the Trailer ID #?

So, any asset #'s entered in attribute Zone would also feed the Trailer ID # fields in the reporting:

Issue Key: PL-1941

Summary: CLONE - From RN-2184 + PL-1913 - C02 Tracking Report - When an Asset / Product is Returned, Remove the Product From the "At Facility" Status

Description:

In

[<https://izhips.atlassian.net/browse/RN-2184>|<https://izhips.atlassian.net/browse/RN-2184>  
|smart-link] &  
[<https://izhips.atlassian.net/browse/PL-1913>|<https://izhips.atlassian.net/browse/PL-1913>  
|smart-link], we made some changes to the C02 Tracking report (adding an "Other" status, Changing the logic for the "Asset # Filter). However, we want to make one more change to this report. This next change will be to remove the "Returned" transactions from the "At Facility" status.

So if a product / Asset # is issued, then this product / Asset # should show up in the "At Facility" status. Then, if that product is then returned, then the product / asset should be moved to the "Returned" status and no longer show up in the "At Facility" status.

Currently, if asset / product "VAT SCANN" is issued, it currently shows up when filtered to "At Facility" status (this is fine):

!Screenshot 2024-05-15 at 4.15.12 PM.png|width=889,height=549,alt="Screenshot

2024-05-15 at 4.15.12 PM.png"

Then, if this product is then returned currently, this product shows up in the “Returned” status as expected, however, it still shows up when “At Facility” is selected also:

!Screenshot 2024-05-15 at 4.16.37 PM.png|width=892,height=552,alt="Screenshot 2024-05-15 at 4.16.37 PM.png"

Still “At Facility”:

!Screenshot 2024-05-15 at 4.15.12 PM.png|width=889,height=549,alt="Screenshot 2024-05-15 at 4.15.12 PM.png"

Desired:

# This product / Asset # is issued & shows up as “At Facility”:

# When Returned, this product / asset shows up only as “Returned” and is no longer visible is “At Facility” is selected

1

!Screenshot 2024-05-15 at 4.15.12 PM.png|width=75%,alt="Screenshot 2024-05-15 at 4.15.12 PM.png"!

#

!Screenshot 2024-05-15 at 4.23.40 PM.png|width=79.95878452993144%,alt="Screenshot 2024-05-15 at 4.23.40 PM.png"!

So, each of these assets should only be listed in either “At Facility” or “Returned” (Unless Asset # filter is used, in which case we would want the entire asset history to show up).

Issue Key: PL-1938

Summary: Clemicolpro - Issues with Loaner / Asset-Checkbox Products

Description: Clemicolpro is facing an issue with issuing & returning their loaner products, which are also asset-checkbox products. When they try to issue or return several products, they are getting an error saying product is either already checked out or checked in.

It appears that a lot of these products have been issued out as a generic SZ product

(KNIFE), which I believe is also contributing to these issues. I will get more details, but I think we may need to do a similar adjustment to this company as with Swaggertys in [https://izhips.atlassian.net/browse/PL-1923|https://izhips.atlassian.net/browse/PL-1923|smart-link], but may need to:

- \* Remove / Return all “Knife” issuances / returns with the asset #s

- \* Update product QTYS to show = 1 if not issued, or = 0 if currently issued (we can do this at a later time if necessary)

Issue Key: PL-1935

Summary: Adding "Loaner" Title to Products in Previous Transactions

Description:

In

[<https://izhips.atlassian.net/browse/PL-1916>|<https://izhips.atlassian.net/browse/PL-1916>|  
smart-link], we added "Loaner" to the product names and model #'s for all products in  
the [[afd.izhips.com](http://afd.izhips.com)|<http://afd.izhips.com>] system with the "Loaner" checkbox selected.

Would it be possible to do the same thing for these products in the web / app reports  
also? So for example, any products issued or returned before making this "Loaner" text  
adjustment still do not have this text added in the reports, such as:

!Screenshot 2024-05-12 at 7.14.39 PM.png|width=786,height=780,alt="Screenshot  
2024-05-12 at 7.14.39 PM.png"!

Can we add the Loaner text to all past transactions involving the products with the Loaner checkbox selected, so in the same example, it would now look like:

!Screenshot 2024-05-12 at 7.17.35 PM.png|width=612,height=570,alt="Screenshot 2024-05-12 at 7.17.35 PM.png"!

Issue Key: PL-1934

Summary: Not in System Transaction - AFD

Description: [Afd.izhips.com|http://Afd.izhips.com] faced another “Not in System” transaction. This occurred with asset # “0012724452”, however instead of the correct product shown as issued, only a “Not in System” product was issued:

[^manual-entry-report-05-10-2024-070319-10051.xlsx]

Would it be possible to update this transaction, as well as the others so that the product issued shows up instead of “Not in System”? Here are all of the “Not in System” transactions:

[^manual-entry-report-05-13-2024-121940-13133.xlsx]

Oddly, this seems to have only occurred with one product, even though many products were issued. It looks as though the process that caused this issue was:

Return previously-issued product from Inspect & Return feature, then immediately reissue this same asset. I'll continue to see if I can recreate this issue without having to adjust the Expiration attribute dates in the admin, as Ashwin was able to do in a previous ticket. However, identifying & resolving this issue is a very high priority.

Issue Key: PL-1924

Summary: CLONE - csbidkunprob - Attached Images in Truck Zone Not Displaying in the Truck Zone Reports

Description: We are having an issue in csbidkinprob with attached images to Truck Zone transactions not showing up in the Truck Zone report in either the web portal or the application:

!Screen Recording 2024-05-09 at  
1.53.06 PM.mov|width=1920,height=1080,alt="Screen Recording 2024-05-09 at  
1.53.06 PM.mov"!

Here are a few examples of transactions where this issue happening:

[^truck-zone-report-05-09-2024-065349-10613.xlsx]

This is a high priority fix, so we need to solve as soon as possible. It does appear that this issue is from a single user / iPad as well, but I’m not finding too much in the logs. However, I’m working to get as much information about this issue as possible & will update in this ticket.

Issue Key: PL-1923

Summary: Swaggertys - Data Pull & Update

Description: [~accountid:5e60790cab60320af8f87101],

Previously, Swaggertys was having issues with asset-checkbox products not showing up, not being able to return, etc., so we implemented new logic for these products in [https://izhips.atlassian.net/browse/RN-2167|https://izhips.atlassian.net/browse/RN-2167 |smart-link], [https://izhips.atlassian.net/browse/RN-2160|https://izhips.atlassian.net/browse/RN-2160 |smart-link], [https://izhips.atlassian.net/browse/PL-1873|https://izhips.atlassian.net/browse/PL-1873| smart-link]. However, they are still having some issues with a few of their asset-checkbox products. However, I don't think this is due to the same issues, but due to the fact that a lot of these products have a QTY of 1 when they should be 0, or a QTY

of 0 when they QTY should be 1.

For this ticket: Is there a way we can pull a list of all asset-checkbox products with:

- \* Whether that product is currently issued (in / out)

- \*\* Verify that these products are not issued multiple times

- \* The current QTY of each of these asset-checkbox products

Then after we have this data, either myself or Ops can go in and manually adjust these products so that:

- \* if issued currently, the QTY = 0, or

- \* if not currently issued, QTY = 1.

I think this should be the last step in this process! What are your thoughts on this? Is this possible?

Issue Key: PL-1922

Summary: Returning Items for Frisco PD (fritxfriser)

Description: Frisco PD is facing a few issues with some of their products. Specifically, they are having issues with:

- \* Ticket Printers

- \* Digital Camers

- \* Ticket Writers

- \* Lidars

So, they are wanting us to return all of the above products, except any of the above products listed in bin "Patrol - Assigned to Deployment", which should be "Ticket Printer 33", "Ticket Writer 42". So for these two products, we do not want to return.

Lastly, once done, we will need to email [jinnmon@friscotexas.gov|mailto:jinnmon@friscotexas.gov] (which I can do!).

Issue Key: PL-1921

Summary: New Aramark Report - Daily Return Report

Description: We are wanting to make a new report for Aramark. This report will be available in both the portal, as well as an export. This report:

- \* This report won't close the loop on transactions. Instead, the “In” scan will come from scans from handhelds in the parking lot. We receive these parking lot scans currently via EDI.

- \*\* We want to Show these parking lot scans like a pseudo transaction (like sharpenings, these scans won't affect actual transactions / issuance / returns).

- \* We will also show issuance scans also, which come from the Data Hoops.

Other data points we want on this report are:

- \* RFID

- \* Size & Type

- \* Associate Employee ID

Issue Key: PL-1917

Summary: CLONE - AFD - More Not in System Transactions

Description: In  
[<https://izhips.atlassian.net/browse/PL-1912>|<https://izhips.atlassian.net/browse/PL-1912>|  
smart-link], we adjusted a lot of the “Not in System” transactions. However, we are  
once again facing this issue, even though each of the assets are being used as product  
barcodes currently. Would it be possible to update each of the attached assets so that  
they show up as the correct product, instead of “Not in System” products?

Here are the additional Not in System products that need to be adjusted:

[^manual-entry-report-04-25-2024-080301-16322.xlsx]

However, we also need to see why this issue may still be occurring. The same iPad is being used to return / issue these products, and it appears that most of the “Not in System” issued have been much better lately. Do you have a way to determine why this issue may be occurring for these products? This is a very high priority item. Please let me know if there’s any other information or anything else I can provide to help solve this problem. I will also try to recreate this issue once again using the afdtestprod company and post any results here.

Issue Key: PL-1913

Summary: CLONE - From RN-2119 & PL-1834 - CO2 Tracking Report - Changes -

## Back-End

Description:

In

[<https://izhips.atlassian.net/browse/RN-2119>|<https://izhips.atlassian.net/browse/RN-2119>

|[smart-link](#)]

&

[<https://izhips.atlassian.net/browse/PL-1834>|<https://izhips.atlassian.net/browse/PL-1834>|

[smart-link](#)], the C02 report was created. I tested this new report with Zack and he wanted to make the following changes:

# Currently, all Non-Returnable products show up in this report with the “At Facility” status. We want to remove this logic and create a new Status, which will be called “Other”. All of the Non-Returnable products should show in this new “Other” status and only these products. So both the “In” and “Out” times should show up in this report with the Status set to “Other”.

# Can we change the logic for the “Asset #” filter so that when an asset is entered here, we will:

## Grey Out the Dates / Status / Product Title filters,

## Show the entire history of this product, like in the Asset Scan Report

We will also want to make an adjustment to the Image & Comments columns in this report, as we want to have the ability to have images at the time out issuance, as well as the ability to have images / comments at the point of returning each of these products. However, we need to determine the best way to do this. For this last point, I will create a separate ticket for the image / comments changes within this report.

## Summary: AFD - More Not in System Transactions

Description: Eastland reached out after talking with AFD, and they let us know that they are seeing a lot more “Not in System” transactions, though each of the assets are being used as product barcodes currently. Would it be possible to update each of the attached assets so that they show up as the correct product, instead of “Not in System” products?

Here are the Not in System products that need to be adjusted:

[^afdnotinsystem.xlsx]

However, we also want to see why this issue may still be occurring. The same iPad is being used to return / issue these products, and it appears that most of the “Not in System” issued have been much better lately. Do you have a way to determine why this issue may be occurring for these products?

Also, I know for two of these products, shl00246 and shl00019, this issue occurred due to the scanned assets being lowercase, while the expected barcodes / assets are capitalized. However, we still need to investigate the other products in the list & fix these as well.

Issue Key: PL-1904

## Summary: Payroll Report - Issue with Date Range Selections for Some Companies

Description: We are experiencing an issue with some older, larger companies with the Payroll report. When we try to pull this report for a previous date range (ending before the current day), the current transactions still often pull up, or are included within the data that is generated. This results in users needing to refresh this page and retry to pull this data a few times. One company this is happening in is [harrisonpoultry.izhips.com|http://harrisonpoultry.izhips.com].

This issue occurred for a few users & I received the following email:

The total for 4.7 - 4.13 should come out to \$\*5,128.91\* for the week. There is glitch when you click the date selection and it doesn't always pull for the dates selected. I had to change the seconds on 4/13 and update my search 6-7 times for it to truly show transactions only from 4.7 - 4.13. Otherwise, it was only pulling transactions for today (4/16) when I just tried pulling the report.

Issue Key: PL-1901

Summary: From PL-1668 - Syncing Adjustment Optimization

Description: This ticket is to be used to research / see if there is a way to decrease the delay in sync time with this new process:

We implemented a fix to sync data between two devices concurrently, but encountered an error when attempting to sync data for different companies simultaneously. The updated fix involves locking the basedb file for writing until one device completes its

operation and then releasing the lock for the other device. However, this fix may introduce a delay in processing time.

Status: Done

Issue Key: PL-1897

Summary: CLONE - Ability to Use the “Expiration Date” Attributes with the Generic Station Zone Product

Description: In

[<https://izhips.atlassian.net/browse/RN-2162>|<https://izhips.atlassian.net/browse/RN-2162> smart-link], we fixed the issue that occurred when the generic SZ products were issued, which was even if the Loaner checkbox was selected, these products did not feed the Loaner report. In this ticket, we want to make a similar adjustment, but in this ticket, we want to ensure that when the generic SZ products have an expiration attribute selected, when they are issued, they feed the Expiration report.

Colton-

I have been building out a new system for Cactus to track Motor Warrantys. In this program the motors have a unique asset number and require a 3 year expiration to be added at the point of issue. I thought it would be great if I could use the "Expiration Date" attribute in the SZ default product to avoid creating individual products or injecting each asset number in Injection Zone, but it isn't working.

Can you have the dev team hot fix this like the Loaner check box?

I need it as quickly as possible.

Issue Key: PL-1895

Summary: TCP Daily Audit Report Issue - farinvinpro - # of Audits Incorrect for This Location

Description: farinvinpro is facing an issue with the TCP Daily Audit report. The audits seem to be going through fine, but they are concerned with the “# of Audits” showing up in both of portal and export.

Here is the original email:

\_Good afternoon, Austin. We just realized when running the TCP daily audits report that it is not giving the correct number for “number of audits” and it doesn’t seem to be showing all of the audits that were performed. I have attached a report from yesterday, typically our auditors do 5 checks a day, this is only showing one for many of them but then the “number of audits” shows a much higher number. Any help or ideas to fix this would be appreciated! Thanks!\_

\_Michael Daggett\_

\_Lead Supervisor\_

\_Farbest Foods Inc.\_

\_Vincennes, Indiana\_

Here is the # of Audits shows much higher than the expected number of audits performed for a few products:

!Screenshot 2024-04-11 at 4.43.17 PM.png|width=75%,alt="Screenshot 2024-04-11 at 4.43.17 PM.png"!

Now, if we look at the export, we see a much lower number of audits performed with the "X":

!Screenshot 2024-04-11 at 4.46.01 PM.png|width=100%,alt="Screenshot 2024-04-11 at 4.46.01 PM.png"!

Here is the export for better viewing:

[^tcp-daily-audit-report-04-11-2024-094540-11972.xlsx]

I looked into this issue a bit and I assume that this issue is likely stemming from the fact that the products showing up on the FM report are hazard products, but these products have an unlimited QTY and are not uniquely issued to a single employee. These assets are not unique, so I think this may be causing the issue with the # of audits showing up:

!Screenshot 2024-04-11 at 4.48.42 PM.png|width=983,height=739,alt="Screenshot 2024-04-11 at 4.48.42 PM.png"!

!Screenshot 2024-04-11 at 4.49.19 PM.png|width=1920,height=962,alt="Screenshot 2024-04-11 at 4.49.19 PM.png"!

!Screenshot 2024-04-11 at 4.49.06 PM.png|width=983,height=957,alt="Screenshot 2024-04-11 at 4.49.06 PM.png"!

That being said, I'm not sure where the # of Audits is coming from. Would it be possible to confirm this scenario?

Issue Key: PL-1890

Summary: CLONE - From RN-2160 & PL-1873 - Implementing New Logic For Asset Checkbox Products

Description: The issue occurs in the 2 devices:

Asset Product: \*PRODUCT 1 (Quantity 1)\*

{color:#bf2600}\*Device 1\*{color}: Check out the product through the cart screen  
(\*ONLINE\*)

Admin quantity changes to \*0\*

{color:#bf2600}\*Device 2\*{color} Check out the product through the cart screen  
(\*ONLINE - WITHOUT SYNC\*)

Admin quantity changes to \*1\*

We discussed and have the solution for this issue:

**\*ONLINE\* \*Scanrario\*:**

we will add the validation if the asset product has the available quantity. (Only Asset product).

**\*OFFLINE\* \*Scanrario\*:**

Will not allow to checkout the asset product in the offline mode. (Only Asset product).

Issue Key: PL-1874

Summary: From PL-1857 - Aramark Reporting - modifying the logic in our query to disregard the existing behavior of return reasons configured by the admin

Description: There are two potential solutions to address the issue with the L & R report query count:

\* Option 1 is to include the Damaged return reason in the data dictionary through the admin interface. This would ensure that the L & R report query includes Damaged transactions in its count (no dev required).

\* Option 2, modifying the logic in our query to disregard the existing behavior of return reasons configured by the admin. Instead, we can calculate the count directly from the

{{iz\_order\_returns}} table based on return reasons. It's a code change requires a release.

Issue Key: PL-1873

Summary: From New Issue - RN-2160 - Pulling Product Data for Swaggertys

Description: I've created a new ticket for an issue we're seeing at Swaggertys  
[<https://izhips.atlassian.net/browse/RN-2160>]<https://izhips.atlassian.net/browse/RN-2160>  
[smart-link].

Swaggertys is having an issue with several products not showing up in their iPads, even after syncing, checking Jobzone details, QTY in stock, etc. All of the products they are having issues with are asset-checkbox products and are not currently issues, have a QTY of 1, and even show up on our team's iPads when we log into the system.

I believe this is the same or a similar issues that is occurring for tysncmontoop in [<https://izhips.atlassian.net/browse/RN-2125>]<https://izhips.atlassian.net/browse/RN-2125> [smart-link] as well.

For this ticket, would it be possible to pull product data (when created, edited, etc.) for the following products within the Swaggertys' system:

- \* Product Title: L1 2nd Op

- \* Product Title: L1 2nd Comp

- \* Product Title: Receiving 2nd

- \* Product Title: Line 6 PM Thermometer

\* Product Title: #5 Box Cutter

We are trying to identify whether maybe the QTY values were edited at some point, or if these are newer products, etc. Ultimately, we just want to determine why these asset-checkbox products are not showing up for users, even after syncing the iPads. Interestingly, when I logged into their system, I was able to see these products fine, but we don't want to have to have the Swaggertys team need to perform a CRN reset before issuing an Asset-Checkbox each time.

Issue Key: PL-1868

Summary: From PL-1826 - Changing "Completed" Order so Transactions Sorted by Completed Date & Time

Description: However, one point - The "Not Completed" transactions are ordered as expected, however, this order remains in place, even for "completed" transactions. So for example, if these two transactions were done & ordered in "Not Completed", they show up correctly:

!Screen Shot 2024-03-25 at 5.25.18 PM.png|width=50%!

However, even if order 00006092 was completed first, then 00006091, then 00006092 would still show up on the top of the "Completed" list, even though 00006092 was done after 00006091:

!Screen Recording 2024-03-25 at 5.28.09 PM.mov|width=50%!

In other words, we want to keep the the functionality for the “Not Completed” transactions the same as in this ticket, but can we have the “Completed” transactions be sorted by “Date & Time Completed”, so that the newest transactions feed on top of the report when the report is filtered to “Completed”? I can create a new ticket for this change alone for the “Completed” transactions.

!Screen Shot 2024-03-25 at 5.31.49 PM.png|width=50%!

-----

Issue Key: PL-1865

Summary: CLONE - New Development - Variance Attribute - Back-End

Description: Zack wanted to see if it would be possible to get an estimate on a potential

development requested by Wayne-Sanderson. To describe this development, they are wanting to create an attribute that will trigger alerts if a variance of more than x degrees between the “Set Temp” and “Temp” attributes for Trailers.

Currently, we have these created attributes for Wayne-Sanderson:

!image001.png|width=1096,height=328,alt="image001.png"!

Which are viewed like:

`!image002.png|width=879,height=778,alt="image002.png"!`

Now, these are currently unrelated textbox attributes. What we are wanting to do is create a way to trigger alert emails if the difference between the “Temp Set” and “Temp” numbers are larger than something like 5 or 10 degrees. In the picture above, the Temp set is -10, while the actual temp is 2.7 degrees. Since this is +larger+ than 10 degrees, we would want to have an alert email triggered.

Here is a rough outline of how Zack wanted me to explain this new attribute. This new attribute would actually be two tied-in attributes together and would look something like this when created:

`!image003.png|width=949,height=444,alt="image003.png"!`

When created, there would be two pieces that must exist together. The top “0” would always only be set to 0. We can just grey this out so the “0” cannot be edited:

!image004.png|width=965,height=465,alt="image004.png"!

Users would be able to change the name of both of these parts, here:

!image005.png|width=949,height=461,alt="image005.png"!

And the variance (difference between the two attributes needed to trigger alert emails) should be set here:

(Please note: only 1 value would be entered, such as “10”)

!image006.png|width=946,height=428,alt="image006.png"!

In the application, both parts of this single attribute should just show up like it was two different attributes, but both should always only be shown together:

!IMG\_1706.PNG|width=1668,height=2224,alt="IMG\_1706.PNG"!

Additionally, the email setup should be in the product details in the same way that Exp 2 attributes are set up:

!Screen Shot 2024-03-27 at 4.01.43 PM.png|width=100%,alt="Screen Shot 2024-03-27 at 4.01.43 PM.png"!

Issue Key: PL-1864

Summary: CLONE - New Feature - Yard Management Report - Dwell Functionality - Back-End

Description: We want to add a new feature for the Yard Management report, which will be similar to the current "On Yard" functionality, which will be called "Dwell".

\* If on Yard - If Seal # doesn't change after 4 days, want to change the color of the "seal #" text (green)

\* "Dwell" - May add status ---> Need way to sort by dwell trailers only, & another way to search for trailers not adjusted in 6 hours (highlighted yellow)

\* Add dropdown checkbox with "Dwell" and "Expired" = but this dropdown should only be available when "On Yard" status is enabled.

\*\* Grey out if not "On Yard" & add dropdown underneath "status"

\* Expired = after 6 hours & is highlighted yellow

\* Dwell option shows all trailers where seal # has NOT been changed in 4 days (96 hours)

Issue Key: PL-1854

Summary: From PL-1808- Changing Logic for Yard Management Report So That New  
Attributes Feed Report

Description:

In

[<https://izhips.atlassian.net/browse/PL-1808>]<https://izhips.atlassian.net/browse/PL-1808> smart-link], we changed the label settings for the Yard Management report, such as:

We want to make two more additional changes to the Yard Management report only:

# We want to change Independent Attribute "Lock Seal Inspected" change to "Trailer Damage"

Current:

!MicrosoftTeams-image (30).png|width=110,height=63!

Desired:

!MicrosoftTeams-image (31).png|width=110,height=63!

# We also want to change Independent Attribute "Load#" change to "Vent Seal#"

Current:

!MicrosoftTeams-image (32).png|width=91,height=63!

Desired:

!MicrosoftTeams-image (33).png|width=102,height=63!

h2.

----

However, we now want to change the logic for these two columns, so that the two new attributes feed in place of the "Lock Seal Inspected" and "Load#" so that:

In the previous release, we changed the "Lock Seal Inspected" text to "Trailer Damage" & changed the "Load#" to "Vent Seal#" (<https://izhips.atlassian.net/browse/PL-1808> | <https://izhips.atlassian.net/browse/PL-1808> | smart-link ). However, Zack is wanting to use two new attributes for this report, "Trailer Damage", which will be a dropdown (yes, no options) and "Vent Seal#", which will be a textbox, instead of "Lock Seal Inspected" & "Load#":

!Screen Shot 2024-03-18 at 8.36.39 PM.png|width=50%!

!Screen Shot 2024-03-18 at 8.37.16 PM.png|width=50%!

!Screen Shot 2024-03-18 at 8.44.44 PM.png|width=50%!

These attributes can be manually made & as long as they feed, that should be fine for now (so, we don't have to add them as a default attribute in every system, such as "Load #", etc., at least for now).

This adjustment should only be for the Yard Management report (not the Truck Zone report), and these two attributes should replace the "Lock Seal Inspected" and "Load #" columns in the portal, app & export & feed the report when entered as attributes on products from the application.

Summary: Pulling Aramark Usage, Lost & Ruin Reports - arajbsgrane

Description: Barrett reached out as one of the Aramark team members is needing a data pull sent to him for a presentation tomorrow. We attempted to pull this data for arajbsgrane, but were unable to export the data, even in smaller chunks.

The Aramark team is needing the data from the following two reports from the arajbsgrane location:

- \* Aramark Usage Report - Dec 1 2023 - Feb 29th, 2024

- \* Lost & Ruin Report - All Missing / Damages from all of 2023 (Jan - Dec)

Would it be possible to pull this data, then send it (via email) to: [sear-christopher@aramark.com|mailto:sear-christopher@aramark.com] by 2:00 AM CST? If possible, can you also send to myself & Barrett? This is the highest priority ticket

Summary: New Employee / Locker Information - Aramark Bulk Upload - gmspringhill

Description: [~accountid:5e60790cab60320af8f87101],

Is it possible to upload these new employees / employee information into the gmspringhill system?

----

I have to get all of our new paint suit lockers set up in Innova Zone. I am working on the spreadsheet with the name, size, locker number. If I get this information, are you able to export it into Innova Zone so I don't have to key all of the information in there?  
Thanks.

Issue Key: PL-1847

Summary: Tyson Storm Lake Department Change

Description: [~accountid:5e60790cab60320af8f87101],

Austin & the Tyson team are doing an audit and are wanting to move a lot of employees

to different departments for tslp. Initially, they wanted to do this at the employee level, but we found an easier way to make the required changes.

For this ticket, there are several department names, such as "A-Cut", as well as "A-Cut1:", "A-Cut2", etc. What we are wanting to do is to combine all of the departments with numbers at the end to the main department. So we would combine all "A-Cut1", "A-Cut2", etc., into "A-Cut".

Another example of departments we want to combine is "A-Harvest 1", "A-Harvest 2", "A-Harvest 3" all into "A-Harvest"

I've attached a list of departments we want to combine & into what department.

[^Tslpdepartmentchange.xlsx]

Would it be possible to make this change for tslp? They are wanting this completed by

tomorrow, if possible for an audit, but if this is not feasible, let us know as this is not much notice for this.

Issue Key: PL-1843

Summary: CLONE - From RN-2078 / PL-1768 - Additional Changes to Products Report -

Back-End

Description: # Do we also need the latest Manual entry report [PL 1613] changes in this new Report? {color:#bf2600}→ Yes, but these can be added in a future ticket, if easier!{color}

# +‘Save’ Checkbox behavior+: Currently for the Sharpening, Inspection & Injection zone - the checkbox functionality is not available even in the Manual entry reports.

Do we need them to work for these zones as well in both reports ? {color:#bf2600}→ Yes, we will need to add these at some point, but this may be outside the scope of this ticket (unless it’s easier to add now). However, I can create a ticket for these changes to both reports and put it in the backlog also.{color}

# The ‘Save’ action performed in the Manual Entry report is reflected in this new Products Report and vice versa {color:#bf2600}→ Yes, this is fine for this new report / the current Manual Entry report.{color}

Issue Key: PL-1842

Summary: CLONE - Issue Scanning QR Codes at Bottom of Printed Receipts in the Payroll 2 Report

Description: We are having an issue with the Payroll 2 Report when the “Order #” scan feature is used. This issue is occurring in both the iOS app as well as the Android application, as well as in different systems also. When the QR on the bottom of the Payroll transactions is scanned, it pulls up a long readout and does not pull up the correct transaction in the Payroll 2 report. Here is an example of this issue occurring in robertsmp:

!MicrosoftTeams-image (36).png|width=1815,height=2420!

!MicrosoftTeams-video (2).mp4|width=540,height=960!

And here is the current readout for the QR codes:

!MicrosoftTeams-image (34).png|width=1668,height=2224!

I wasn't sure if this in RN or PL related, but hopefully is only app-related.

Issue Key: PL-1841

Summary: Safety Incident Report - Ability to Edit Expiration Attributes

Description: Zack is wanting to add the ability to edit the expiration attributes in the portal for the Safety Incident report. This will be a similar functionality that was done to the 

Trailer	ID	#'s	in
---------	----	-----	----

 [https://izhips.atlassian.net/browse/PL-1759|https://izhips.atlassian.net/browse/PL-1759|smart-link].

We want to move the Expiration attributes from this column:

!Screen Shot 2024-03-12 at 10.28.26 PM.png|width=739,height=614!

And move them to their own column, which we can call “Expiration Date”, which can be inserted here (betwen “Attribute” and “Confirm Signature”:

!Screen Shot 2024-03-12 at 10.28.46 PM.png|width=744,height=782!

We also want to add this same column to the export of this report, which should look similar to:

!Screen Shot 2024-03-12 at 10.34.10 PM.png|width=1437,height=641!

----

[Yesterday 10:13 PM] Colton Carver

Karthiyayini Muthuraj,

Would it be possible to let me know on this:

Zack is wanting to add the ability to edit Expiration date attributes in the Safety Incident report, similarly to the way users can edit the Trailer ID# entries in the Yard

Management report, except this will now be for an Expiration attribute (date), instead of a textbox attribute. And wanted to know: +Would this be easier to do if we moved the "Expiration Date" to its own individual column away from the other attributes? Or should be leave it as current and just add the ability to edit this attribute alone?+ What are your thoughts on this?

[Yesterday 10:40 PM] Karthiyayini Muthuraj

Colton Carver yes

We could create a dedicated column for the expiration date, enabling us to modify the expiration date attribute independently, similar to how we handle the trailer ID.

like 1

[Yesterday 10:53 PM] Colton Carver

Sounds good, thank you Karthiyayini! Would it be possible to get a rough dev estimate for this change by chance?

[Yesterday 10:55 PM] Karthiyayini Muthuraj

3 to 4 hours of development work needed

like 1

Issue Key: PL-1837

Summary: Vault application multiple CRN usage

Description: Barrett installed the new Windows vault application at the Aramark Amarillo market center this week. They handle garments for JBS Cactus and Seaboard

So, they need a way to switch between performing inspections for garments for JBS Cactus and Seaboard

We never discussed using the vault application to perform inspections for more than one company/database/CRN. However, this setup also happens at other market centers

that we will need to support in the future, ex: the Toledo, Ohio market center processes garments for 6 different General Motors CRNs

### **\*UI design\***

It wouldn't be a good user experience to switch between the different CRNs if they need to close the application, reopen the application, log in to the other CRN

Better and probably sufficient for the first implementation would be to just use the logout button, then log in to the other CRN

Maybe even better would be if at these market centers that handle multiple CRNs if there was an additional drop down (above the current 3 drop downs), that would let the user pick between the different CRNs that are handled at that market center (picking would reload the current 3 drop downs) - but this is a larger change and can wait for a future iteration.

### **\*Problems\***

Currently we store the company database name in the 'database' column in iz\_hoop\_mappings for the entry for a particular vault software installation.

```
{noformat}mysql> select * from iz_hoop_mappings where id=79;
```

id	hostname	database	market_center	company_search_string	created_at	updated_at	deleted_at	location	config_toml	scanned_product_ids	root_category_ids	product_name	return_reason	return_inspector
----	----------	----------	---------------	-----------------------	------------	------------	------------	----------	-------------	---------------------	-------------------	--------------	---------------	------------------

79	vr-31af6a	arajbscactx	285	NULL	NULL	NULL	NULL							
		JBS Cactus	-	Vault PC		serverURL	=							

"https://datahoop-2.aramarkinnovazones.com/api"

readerHost = "10.5.4.68" | 165d8d6a-1985-0951-39fd-645a6bb3d5d0 |  
00000000-0000-0000-0000-000000000001 | Frock | Passed Inspection | Inspector  
Joe |

```
+---+-----+-----+-----+-----+-----+-----+
-----+-----+-----+-----+-----+-----+
-----+-----+-----+-----+-----+
-----+{noformat}
```

This links the vault application installed on a computer at the market center to only one company database, because currently the back end uses the value in the 'database' column to find the company database to record transactions.

*\*Minimal changes needed for first implementation\**

Probably don't need to change UI (can just log out, then log in to the other CRN). But, the backend API will probably need to change to determine the correct company database name based on the CRN login.

*\*Priority\**

Eventually the users at the Amarillo market center are going to realize they can't process inspections for Seaboard garments properly and then this feature will become very important.

Issue Key: PL-1836

Summary: Hotfix \*\* e8.8.1 Issue with Syncing - Production Enterprise App

Description: [~accountid:5e2115034092800cb1e9157e],

We began facing an issue today with syncing, which occurs with the 4.80.1 bundle v146 App Store build in multiple companies. When the Sync button is selected, the device will spin for a while, but no “Sync Complete” message is ever observed.

This syncing issue also occurs in the clerk login screen as well and occurred in every system tested.

Here is a video of this issue occurring in ccdemo:

[^RPreplay\_Final1709762411.MP4]

[^RPreplay\_Final1709762370.MP4]

I’m not sure whether an app or backend issue, but please let me know if any more information is required!

----

UPDATE: This issue resolved itself after ~2 hours. This issue began at approx 1:30 PM CST, and ended at ~ 4:40 PM CST, though these times are not exact. Since the syncing began working for all systems again, I assume this may be due to a spike usage across the Innova Zones system. So, will move this to backend.

[~accountid:5e60790cab60320af8f87101], would it be possible to attempt to determine what caused this error and try to prevent this issue from occurring moving forward?

Here are the logs for my iPad showing this error:  
[https://service.us2.sumologic.com/ui/#/search/create?id=1vmYq56q2avNzgonT7EAk8KvCaCZn3Vc9k4jxUrF|https://service.us2.sumologic.com/ui/#/search/create?id=1vmYq56q2avNzgonT7EAk8KvCaCZn3Vc9k4jxUrF]

Issue Key: PL-1823

Summary: Assets Being Issued as as Generic SZ Product, Instead of Asset-Checkbox Product - butarozaser

Description: Company butarozaser is having an issue with assets being issued out as the generic SZ product, “Radio”, even though each of these assets should be product barcodes for several Asset Checkbox products. This is happening for several products

within this system.

For example, asset “446TTB1986” has been issued out several times as a “Radio”, though this asset is a barcode for an existing asset-checkbox product, “RADIO - 446TTB1986”.

!Screen Shot 2024-03-05 at 2.55.08 PM.png|width=977,height=780!

!Screen Shot 2024-03-05 at 2.55.20 PM.png|width=1440,height=779!

Would it be possible to:

# Associate each of the attached barcodes as the corresponding product?

# Would it be possible to update the QTYs, so that if not currently issued QTY =1, if issued QTY = 0?

Here are the assets being issued out as SZ products, instead of the actual asset-checkbox product:

Summary: CLONE - Frisco PD - Active Shooter Kits Request - Remaining Employees

Description: Colton-

Good afternoon! I have a two-part dev ticket that I would like to submit for Frisco Police Department

(<https://fritxfriser.izhips.com/admin><https://fritxfriser.izhips.com/admin>[smart-link](#) ). In order, here is what we need help with:

# Active Shooter Kit - Bulk Upload

# I've attached a spreadsheet with the products that need to be uploaded into the system

# The expiration dates I need associated with each product are also listed within the spreadsheet (There are two type 2 expirations)

# I will need 180-day expirations tied to these products, with the following emails attached

## [+SMiller1@friscotexas.gov+|mailto:SMiller1@friscotexas.gov]

## [+JDicksa@friscotexas.gov+|mailto:JDicksa@friscotexas.gov]

# Associating Active Shooter Kits to Frisco PD Employees

# I've attached a spreadsheet that displays which product I would like associated to each employee by first and last name. They were not able to provide ID# information..

# When associated, the Expiration that is tied to the product will go into effect

If the dev team cannot locate some of the employee names, please have them send me a list so we can collect information.

If you have questions, please reach out.

Thanks,

Issue Key: PL-1818

Summary: Foster Farms Turlock TCP - Delete Transactions

Description: Colton-

I have been reviewing reporting in the Foster Farms Turlock TCP system and identified 118 transactions that need to be deleted. (see attached)

[<https://foscaturtoo.izhips.com/report/foreignmaterial>|<https://foscaturtoo.izhips.com/report/foreignmaterial>|smart-link]

Can you process this request and delete the transactions?

Thanks,

{adf:display=block}

Issue Key: PL-1815

Summary: GL Accounts Being Added to the SAP Report - jbsilbeaprop

Description: jbsilbeaprop is facing an issue with GL Account numbers that do not exist being added to the SAP report. These GL accounts include "5298a0b9cf3-6" and "529e5c04021-0". I tried to see if these numbers exist anywhere in this system, but was unsuccessful in doing so.

Would it be possible to see if you would be able to determine why this may be occurring?

Here is the SAP report showing these GL Accounts:

[^sap-transfer-report-02-29-2024-025832-13868.xlsx]

Please let me know if there is any other information I can collect to help! I think this may have to do with migrations / updates, but I'm not too sure about why this would occur.

Issue Key: PL-1814

Summary: Migrate RDS T2 instance types to T3

Description: TL;DR - we have a couple of T2 instance type RDS instances. We should migrate them to T3

Summary of email received from AWS

In June 2023, RDS deprecated M4, R4, and T2 database instance types.

Starting March 11, 2024, RDS will prevent creation of instances running on M4, R4, or

T2 instance types.

starting on June 1, 2024, RDS will begin upgrading instances running on M4, R4, or T2 instance types to equivalent size M5, R5, or T3 newer generation instance type, if available.

Recommendation: Upgrade T2 instance to T3 instance or higher

Summary: Frisco PD - New Ballistics - Bulk Upload / Association

Description: Colton-

Since I am unable to add different expiration dates to the bulk upload, I have to submit another upload request for Frisco PD ([<https://fritxfriser.izhips.com/admin>|<https://fritxfriser.izhips.com/admin>|smart-link] ). And since I'm doing that, I may as well have what's uploaded, associated with whom it belongs to. You'll find these attachments above:

# Bulk Upload Ballistic Vests

# I've attached a spreadsheet with the vests that need to be uploaded into the system (New Ballistic Vests)

# The expiration date I need associated with each product is also listed within the spreadsheet

# I will need 180-day expirations tied to these products, with the following emails attached

## [+SMiller1@friscotexas.gov+|mailto:SMiller1@friscotexas.gov]

## [+JDicksa@friscotexas.gov+|mailto:JDicksa@friscotexas.gov]

# Associating Ballistic Vests to Frisco PD Employees

# I've attached a spreadsheet that displays which product I would like associated to each employee by ID number (New Associations Sheet)

# When associated, the Expiration that is tied to the product will go into effect

If you have questions, please reach out.

Issue Key: PL-1801

Summary: From PL-1769 - Changing Logic for Inspect & Return Products Only Issued to Lion Total Care

Description: Hey Karthiyayini! I think we can continue with the current logic for: [\[https://izhips.atlassian.net/jira/software/c/projects/PL/boards/6?selectedIssue=PL-1769\]](https://izhips.atlassian.net/jira/software/c/projects/PL/boards/6?selectedIssue=PL-1769) <https://izhips.atlassian.net/jira/software/c/projects/PL/boards/6?selectedIssue=PL-1769> smart-link] , as clerk name would make since! However, Eastland wanted to see if it would be possible also to get an estimate for the dev to change the logic for products not issued previously, before being issued to only Lion Total Care, to show "No Previous Owner" text? So any products only issued to Lion Total Care -> Then Inspected for AFD would show "No Previous Owner" as the employee name. If we wanted this change, we will add an additional ticket to the backlog!

→ 2 to 3 hours it would take

Issue Key: PL-1797

Summary: MySQL on-disk temp tables for enterprise prod database

Description: In the 'Recommendations' section for RDS - we're getting periodic notices about excessive creation of on-disk temporary tables for the enterprise prod database (izhips). This can impact performance.

"When temporary data can't fit in memory, the database uses on-disk temporary tables. These tables can decrease performance, increase the duration of scheduled upgrades, and increase the IOPS rate"

"Operations involving on-disk tables are significantly slower than in-memory temporary tables"

\*Metrics\*

```
{noformat}SET @sys.statement_truncate_len = 1000;
```

```
select * from sys.`statements_with_temp_tables`;{noformat}
```

```
{noformat}mysql> SHOW GLOBAL STATUS LIKE 'Created_tmp%';
```

+-----+-----+	
Variable_name	Value
+-----+-----+	
Created_tmp_disk_tables	560635
Created_tmp_files	1947
Created_tmp_tables	943619
+-----+-----+{noformat}	

## RDS Performance Insights metrics

\* Created\_tmp\_disk\_tables

\* Created\_tmp\_tables

\*Cause\*

This is likely due to 1) complex queries and/or 2) not enough memory configured for temporary tables. It doesn't point to any specific related queries so it would probably be a lot easier to configure more memory for temporary tables rather than analyze all queries trying to find what might be causing this.

Here's a link covering related information

[<https://docs.aws.amazon.com/AmazonRDS/latest/AuroraUserGuide/proactive-insights.temp-tables.html>|<https://docs.aws.amazon.com/AmazonRDS/latest/AuroraUserGuide/proactive-insights.temp-tables.html>|smart-link]

**\*Query investigation\***

check if your database is indexed properly, specially for sorting, joining and group by columns. Proper indexing reduces temp table creation

Optimize your queries to return less data by selecting only necessary columns.

Rewrite your queries to avoid `{{BLOB}}` and `{{TEXT}}` columns. These columns always use disk

Some conditions prevent the use of an in-memory temporary table, in which case the server uses an on-disk table instead, which increases write I/O. These conditions are the following:

- \* Presence of a BLOB or TEXT column in the table.
- \* Presence of any string column in a GROUP BY or DISTINCT clause larger than 512 bytes for binary strings or 512 characters for nonbinary strings. (Before MySQL 5.6.15, the limit is 512 bytes regardless of string type.)
- \* Presence of any string column with a maximum length larger than 512 (bytes for binary strings, characters for nonbinary strings) in the SELECT list, if UNION or UNION ALL is used.

\* The SHOW COLUMNS and the DESCRIBE statements use BLOB as the type for some columns, thus the temporary table used for the results is an on-disk table.

\*Memory configuration -\* tmp\_table\_size, max\_heap\_table\_size

[<https://aws.amazon.com/blogs/database/best-practices-for-configuring-parameters-for-amazon-rds-for-mysql-part-1-parameters-related-to-performance/>][<https://aws.amazon.com/blogs/database/best-practices-for-configuring-parameters-for-amazon-rds-for-mysql-part-1-parameters-related-to-performance/>][smart-link] (search for section on tmp\_table\_size)

The max size for in-memory temporary tables is defined by the tmp\_table\_size or max\_heap\_table\_size value, whichever is smaller. When this maximum size is reached, MySQL automatically converts the in-memory internal temporary table to an InnoDB on-disk internal temporary table. The default value for both of these parameters is 16,777,216 bytes (16 MB)

Neither of these parameters are set in the RDS parameter group used by the izhips database (master-copy-enable-slow-query) so it's just using the default value.

```
{noformat}mysql> show variables like "tmp_table_size";
```

+-----+-----+	
Variable_name	Value
+-----+-----+	
tmp_table_size	16777216
+-----+-----+	

```
mysql> show variables like "max_heap_table_size";
```

+-----+-----+	
Variable_name	Value

+-----+-----+

| max\_heap\_table\_size | 16777216 |

+-----+-----+{noformat}

We could:

# Set these values in the RDS parameter group

# Set globally just for the izhips database

I think these parameters are dynamic (not static) so a restart isn't required, but they would only take for newly created sessions

{noformat}SET GLOBAL tmp\_table\_size = 1024 \* 1024 \* 64;

SET GLOBAL max\_heap\_table\_size = 1024 \* 1024 \* 64;{noformat}

Status: In Progress

Issue Key: PL-1796

Summary: Yard & Truck zone report - Once Product is Returned, the modified Trailer ID is updating back to its original value

Description: App: AppStore build. Bundle v144

Company: wayaldecwyp in Stage

codebase: e8.7.13-RC1

Scenario:

# Issue the product with Trailer ID [Eg: trail100]

# Now, update the trailer id as "trail101" from Yard mgmt report

# Functionalities are working fine as expected till now.

# Now, RETURN the product from the Return inventory

# In the Yard mgmt report, the \*trailer ID is again updated back to "trail100"\*

\*In App Return inventory - even after sync new trailer ID is Not displayed.\*

Since the Trailer ID is updated back to its Original value, the OnYard filter now fetches records based on the available trailer ID.

Description:

In

[<https://izhips.atlassian.net/browse/PL-1793>]<https://izhips.atlassian.net/browse/PL-1793> smart-link], we faced an issue with a new company, tystxsheser, which was looked at last night. While after the adjustments made last night, we were able to log into the admin / portal for this db, we were still unable to log into this company in the application. So, we ended up needing to recreate this company and did not face the same issues, fortunately! But, we wanted to see if we could do the following:

# We want to delete the company facing the issues in [<https://izhips.atlassian.net/browse/PL-1793>]<https://izhips.atlassian.net/browse/PL-1793>

smart-link]: \*tystxsheser\* While we would normally do this ourselves, the employee database is tied with tystxshepro, so we were unsure whether we could delete this company without affecting tystxshepro's employees. If there is no issue with this, we can delete \*tystxsheser\* ourselves.

# tystxshestfy is the new version of the company we want to use & provide to the customers instead. Can we also update the company contact information for tystxshestfy so that the company email / company contact email is: [christopher.sutherland@tyson.com|mailto:christopher.sutherland@tyson.com]? This email is being used in \*tystxsheser\*, so we are unable to reuse this email for tystxshestfy.

# Would it also be possible to change the subdomain from "tystxshestfy" to "tystxshesfty"?

As I know a lot of these names are similar, here's a quick tldr:

\* \*tystxsheser\* = the company having issues that we ultimately want to delete

\* \*tystxshestfy\* = the updated company that we created today due to the issues found when we tried to create the Sherman Safety Walk program yesterday. This is also the company we want to update the email information for & change the subdomain for (if possible).

Status: Done

Issue Key: PL-1794

Summary: From PL-1778 - Remaining Patrol Helmet ID#'s for Frisco PD

Description: In  
[<https://izhips.atlassian.net/browse/PL-1778>|<https://izhips.atlassian.net/browse/PL-1778>|  
smart-link], we did the following:

----

We had a two-part dev ticket that I would like to submit for Frisco Police Department ([<https://fritxfriser.izhips.com/admin>|<https://fritxfriser.izhips.com/admin>|smart-link] ). In order, here is what we need help with:

# Bulk Upload Patrol Helmets

# I've attached a spreadsheet with the helmets that need to be uploaded into the system (Patrol Helmet Product Upload)

# The expiration date I need associated with each product is also listed within the spreadsheet

# I will need 180-day expirations tied to these products, with the following emails attached

## [+SMiller1@friscotexas.gov+|mailto:SMiller1@friscotexas.gov]

## [+JDicksa@friscotexas.gov+|mailto:JDicksa@friscotexas.gov]

# Associating Ballistic Vests to Frisco PD Employees

# I've attached a spreadsheet that displays which product I would like associated to each employee by first and last name. They were not able to provide ID# information..

# When associated, the Expiration that is tied to the product will go into effect

----

However, there were some employees not found were compiled into a list & I received the following from Eastland:

I've added ID numbers with the Patrol Helmets you couldn't associate in the Frisco PD system (fritxfriser). Can you please add a ticket so dev can take care of this tonight?

Thanks,

Issue Key: PL-1792

Summary: CLONE - From RN-2070 / PL-1754 - Weekly Issuance Limit - Changing Logic so Error Prompt Only Occurs When Set Issuance is Exceeded - Back-End

Description: +Current behavior:+ This prompt appears if Quantity \*EQUALS\* the weekly limit for each employee separately.

Kindly check if this is expected or needs to be changed {color:#bf2600}→ We want to change this logic so that this message only appears if the weekly limit is actually surpassed, and for each time each employee attempts to exceed the weekly limit. So, each time products are issued out to the same employee and they go over the limit for a product (or products), this message should appear, instead of the QTY equals the weekly limit for each employee (as current){color}

{color:#bf2600}Would it be possible to update this logic? So this error message would appear only if the weekly limit is surpassed? If easier, we can handle this in a separate ticket!{color}

However, everything else looks good, so will be moving to done.

-----

Issue Key: PL-1788

Summary: Move checklist report to enterprise portal

Description: We have discussed many possible improvements for reporting from the checklist app and how to increase integration with the enterprise reports.

For 'Phase 1' though, we want to just make a simple change. We want to move the Checklist report into the enterprise portal.

The goal for this change is just to improve the user experience so that users don't have to navigate to a separate portal (the checklist portal) just to see this report.

For implementation in 'phase 1' you are free to use whatever methods simplify the amount of work required. The idea is to do the least amount of work to achieve the goal of displaying this report in the enterprise portal

It is not necessary to add any APIs, or try to integrate the data models (enterprise and checklist). These things can be left until a future 'phase 2' after further discussions about goals/priorities.

For now you could just copy the code for the report into the enterprise portal. Perhaps you could just open a connection directly to the checklist database to feed the report if that is easiest.

Note: We will need a flag to control the display of this report in the enterprise portal so that it is only seen for select customers. Manually setting a flag in the database would be acceptable for now.

Issue Key: PL-1772

Summary: Yard Management Report - Additional Changes - Back-End

Description: In addition to the current version of the Yard Management report (<https://izhips.atlassian.net/browse/PL-1718><https://izhips.atlassian.net/browse/PL-1718> smart-link]), we want to make some additional changes in both the app & portal version of the Yard Management report. We want to:

# Change the “Inbound / Outbound” title to “Movement” in the search filters, column title & export:

!Screen Shot 2024-02-08 at 3.43.25 PM.png|width=1440,height=780!

!Screen Shot 2024-02-08 at 3.45.05 PM.png|width=1352,height=676!

!IMG\_1645.PNG|width=1668,height=2224!

2. We want to make the Carrier List a dropdown with check boxes, similar to the current “Destination” filter:

So, we want the “Carrier List” to be a checkbox dropdown, similar to:

!Screen Shot 2024-02-08 at 3.46.52 PM.png|width=989,height=546!

!IMG\_1644.PNG|width=1668,height=2224!

Summary: Yard Management Report - Adding Column to Export Containing Name of Employee Who Edited Trailer ID #

Description:

In

[<https://izhips.atlassian.net/browse/PL-1759>], we've given managers the ability to correct / change the Trailer ID #'s in the Yard Management report. We want to add a column to the export to show which employee made these changes. This column can be added to the end of the export and will be called "Edit By:" Then, we can list the email of the user (manager) who made the edit(s). For all others trailer ID #s (not edited), I think we can leave them blank. it should look similar to:

!Screen Shot 2024-02-08 at 3.33.14 PM.png|width=83.33333333333333%!

Do you think we would also be able to put a time in for when the edit was done? This is not necessary for this ticket, but may be helpful.

Issue Key: PL-1769

Summary: CLONE - Inspect & Return Feature - Issue if First / Only Employee is Lion  
Total Care - Back-End

Description: Currently with the Inspect & Return feature, the logic is to display the previous employee's name for each asset that is Inspected & Returned. So, the expected process will be:

# Issue asset to an employee

# Return asset from employee

# Issue asset to Lion Total Care

# Inspect & Return from Lion Total Care

This logic works well & this is the scenario most used by AFD. However, if an asset is not issued to an employee first, but instead is issued directly to Lion Total Care, the app just spins when “Inspect & Return” is attempted:

!Screen Recording 2024-02-08 at 3.05.31 PM.mov|width=2880,height=1800!

If this process is done with only Lion Total Care as the only employee who’s ever had this item, can we just use “Lion Total Care” as the employee in the reports? Or the clerk name completing the Inspection / Return?

Summary: NOT IN SYSTEM - AFD

Description: [~accountid:5e60790cab60320af8f87101],

AFD reached out & worked with Eastland to go through and perform the inspections / issuances for a lot fo their garments today. However, they had several “NOT IN SYSTEM” transactions today and this past week. These have come from both regular inspections / issuances, as well as with the new Inspect & Return feature. Oddly, this issue only happened to some of the assets, while others showed on the reports accurately.

One of the “NOT IN SYSTEM” assets is “0011227692.” This asset had been issued / returned several times correctly, until this morning where upon reissue, it was issued as “NOT IN SYSTEM”:

!Screen Shot 2024-02-08 at 2.05.05 PM.png|width=75%!

However, right after this transaction / process, other assets worked fine. One of the assets that was issued correctly was “0011055292”:

!Screen Shot 2024-02-08 at 2.07.53 PM.png|width=75%!

The issuances, inspections and returns were all completed on a single iPad and no letters were included in the barcode, so the caps logic should have caused these issues.

Would it be possible to:

# Determine why this occurred

# Prevent this issue from occurring in the future (whether there's an issue or gap with the development or the process)

# Fix all of the "NOT IN SYSTEM" transactions / associate the assets as the correct assets in AFD's system

Here is an email received from Eastland:

----

Colton-

We've had 17 more NOT IN SYSTEM transactions for AFD from 01/25 - 02/02 (Sheet attached). It looks like a lot of the serial numbers repeat themselves between issues and returns, but I figure I'd send you the entire file so you can consult with the dev team. As they're fixing the long-term issue at hand, can they also correct these transactions from NOT IN SYSTEM to the actual product?

Thanks,

!cid:image001.png@01DA5A84.1091E270|alt="signature\_1093561746"!

Issue Key: PL-1764

Summary: Truck Zone Report - On Yard Report Changes

Description: [~accountid:5e60790cab60320af8f87101],

I've worked with Zack and Robert a bit to better understand the "On Yard" functionality in the Truck Zone report. We've seen a lot of issues with trailers missing when the date filter is blank or if we use a past date in the date / time filter.

One of the issues we've found can be seen on Trailer # z9876 in wayaldecwyp. If we just search for this trailer # without using the "On Yard" filter and use today's date range, we can see this trailer has been in several transactions and the last transaction was "Inbound":

!image001.png|width=91.66666666666666%!

Now, if we do the "On Yard" filter:

!image002.png|width=91.66666666666666%!

The trailer # is not listed as "On Yard", even though the last transaction was an "Inbound" transaction. It appears that once a trailer has any "outbound" transactions, then the trailer will not show up on the report as "On Yard". As another example, if we search for trailer # "s5316296" with the date range set from 01/01/2024 - current, we see lots of transactions:

!Screen Shot 2024-02-05 at 8.33.30 PM.png|width=91.66666666666666%!

Additionally, if we set the “On Yard” filter & the date range from 01/01/2024, this trailer # does not show up, even though the last transaction was “Inbound”:

!Screen Shot 2024-02-05 at 8.34.36 PM.png|width=91.66666666666666%!

However, if we only use today’s date range with “On Yard” active, we are able to see this trailer #. Or, if we do any date range \_after\_ this trailer #'s outbound transaction, only then are we able to see this trailer # as “On Yard”:

!Screen Shot 2024-02-05 at 8.36.49 PM.png|width=91.66666666666666%!

We have made a list showing trailer #'s that do not show up / only show up as “On Yard” with specific date ranges:

[^V2\_On-Yard\_02-05-2024\_000000-091900.xlsx]

So, we want to make the following changes to the Truck Zone report (as well as the new Yard Management report also):

# If "On Yard" is selected, can we grey out the From / To Date options

# All trailer #s that show transactions other than "outbound" should show up as "On Yard", unless they last transaction is "Outbound".

# Only the most recent transaction with the trailer should show up once "On Yard" is selected (this is the current functionality, but we want to make sure this remains in place)

Please let me know if any clarifications required!

Issue Key: PL-1758

Summary: CLONE - Wayne Sanderson - Cap Logic - Back-End

Description: Colton,

Getting this on your radar because this may need to be a hot fix for Wayne-Sanderson.

If you outbound a trailer ID# that has previously been Inbounded or Yard Checked, there is no case sensitivity and it is properly removed from the On Yard status. This is a good thing and how we want it to work.

For example, if I inbound Trailer ID# f736 and then outbound Trailer ID# F736, it will be removed from On Yard status.

However, if you Inbound Trailer ID# f736 and then do a Yard Check for Trailer ID # F736, it displays both transactions as On Yard. Case sensitivity should not apply in this situation. What should happen is the Yard Check should be the only transaction showing for that Trailer ID# when you toggle the On Yard status. Only the most recent transaction for that Trailer ID# should be displayed.

This will help eliminate unnecessary duplicates when On Yard status is turned on.

Summary: CLONE - On Yard Glitch - Apply Fix to New Yard Management Report

Description: In  
[<https://izhips.atlassian.net/browse/PL-1755>]<https://izhips.atlassian.net/browse/PL-1755> smart-link], we found a glitch with the On Yard Filter on the current Truck Zone report and we want to implement this same fix for the new Yard Management report also.

----

Colton,

When I logged into [http://wayaldecwypm.izhips.com|http://wayaldecwypm.izhips.com|smart-link] , I noticed a glitch with the On Yard toggle.

When we pull up the Truck Zone Report and change the status to “On Yard”, it pulls up a total of 151 transactions that are ON YARD. This is functioning perfect and there is nothing wrong with this.

When I keep the On Yard toggle on and then add on another filter like "CONTENTS" or "CARRIER" in my search criteria, the On Yard logic is disregarded and the system pulls all historic transactions for the selected Contents or Carrier filter and excludes all outbound transactions.

When the On Yard Toggle + another filter (Ex: Contents and Carrier) is turned on simultaneously, the report should narrow down the results and pull from the 151 transactions that are generated from when the On Yard status is activated.

I've exported and attached the Truck Zone Report with On Yard Status (1<sup>st</sup> Tab). Each tab after that is what should populate when you have additional filters selected in addition to ON YARD.

1<sup>st</sup> TAB: On Yard status only turned on (151 Transactions Total)

2<sup>nd</sup> TAB: On Yard status turned on + Contents Green (Empty) selected (75 Transactions Total)

\* The report should only populate this and pull all Green (Empty) from 1<sup>st</sup> Tab. Instead it populates 478 Transactions

3<sup>rd</sup> TAB: On Yard status turned on + Contents Red (Loaded) selected (63 Transactions Total)

\* The report should only populate this and pull all Red (loaded) from 1<sup>st</sup> Tab. Instead it populates 232 Transactions

4<sup>th</sup> TAB: On Yard status turned on + Contents Blue (Dry Goods) selected (3 Transactions Total)

\* The report should only populate this and pull all Blue (Dry Goods) from 1<sup>st</sup> Tab. Instead it populates 32 Transactions

5<sup>th</sup> TAB: On Yard status turned on + Contents Black (Offal) selected (1 Transactions Total)

\* The report should only populate this and pull all Black (Offal) from 1<sup>st</sup> Tab. Instead it populates 10 Transactions

6<sup>th</sup> TAB: On Yard status turned on + Contents Yellow (Rework / Partial) selected (2 Transactions Total)

\* The report should only populate this and pull all Yellow (Rework / Partial) from 1<sup>st</sup> Tab. Instead it populates 32 Transactions

7<sup>th</sup> TAB: On Yard status turned on + Contents N/A (On Dock) selected (7 Transactions Total)

\* The report should only populate this and pull all N/A (On Dock) from 1<sup>st</sup> Tab. Instead it populates 60 Transactions

8<sup>th</sup> TAB: On Yard status turned on + CARRIER (Penske) selected (19 transactions total)

\* The report should only populate this and pull all Penske carriers from 1<sup>st</sup> tab. Instead it populates 52 transactions

We need to start by fixing the Contents Filter first and this needs to be fixed for both The Truck Zone Report and NEW Yard Management Report. After that, we can fix the Carrier search filter

I'm happy to walk you through this if you need any further clarification.

Thanks,

\* The report should only populate this and pull all N/A (On Dock) from 1<sup>st</sup> Tab. Instead it populates 60 Transactions

8<sup>th</sup> TAB: On Yard status turned on + CARRIER (Penske) selected (19 transactinons total)

\* The report should only populate this an dpull all Penske carriers from 1<sup>st</sup> tab. Instead it populates 52 transactions

We need to start by fixing the Contents Filter first and this needs to be fixed for both The Truck Zone Report and NEW Yard Management Report. After that, we can fix the Carrier search filter

I'm happy to walk you through this if you need any further clarification.

Thanks,

-----

Issue Key: PL-1754

Summary: CLONE - From RN-1769 + PL-1409 - Logic Changes for the Weekly Issuance Limit - Back-End

Description: \*Currently\*, the weekly limit applies to all employees, instead of individual employees.

So for example, if the weekly limit for a product is set to 3, such as:

!Screen Shot 2024-01-30 at 3.45.20 PM.png|width=83.33333333333334%!

If employee “Jimmy Lock” is issued 2 pairs, then employee “Jimmy Rogers” is also issued two pairs, the second employee will get the prompt saying that the weekly limit has been reached:

!IMG\_1639.PNG|width=50%!

\*Desired logic:\*

If both employees from the example above each get 2 pairs, they should not get this prompt. The Weekly Limit should apply to individual employees, not all employees in this system. So if we use the same example from above - If employee “Jimmy Lock” is issued 2 pairs, then employee “Jimmy Rogers” is also issued two pairs, the second

employee should \_not\_ get the prompt saying that the weekly limit has been reached.

This prompt should not appear unless a single employee gets more than the weekly limit. So if “Jimmy Lock” were to get 4 Safety Glasses, or “Jimmy Rogers” gets more than 3 Safety Glasses then only the prompt should pop up.

I will create separate tickets for this logic change and place these tickets into the backlog!

The other points by Ashwin are fine for now & should be okay. We only need to make the logic change above.

Summary: Frisco PD - Quantity Adjustments

Description: Colton-

System: [<https://fritxfriser.izhips.com/admin>|<https://fritxfriser.izhips.com/admin>|smart-link]

During the association process with Frisco PD, we associated incorrect quantities with three different products. Could you please have the development team take the attached spreadsheet and adjust the quantities from what they're currently issued as (Column F), to the new quantities you see in column G (highlighted yellow)?

Could you please let me know what timeline we're looking at after the dev team has reviewed this? This team wants timelines with everything moving forward.

Thanks,

Issue Key: PL-1751

Summary: Frisco PD - Product Association Request

Description: Colton-

You'll find two documents attached for Frisco Police Department  
([<https://fritxfriser.izhips.com/admin>|<https://fritxfriser.izhips.com/admin>|smart-link] ):

# Frisco – General Issued Items (Product Upload)

# Frisco PD – Employee Information

I've already uploaded the product list into the system, and now I'm needing to associate +\*1\*+ \*of\* everything in the bulk upload sheet to each employee listed in the other spreadsheet.

There wasn't an easy way to package this information, hopefully this will work.

Reach out if you have any questions! Also, a timeline for this task will be asked of by Frisco PD.

Thanks,

!cid:image001.png@01DA545F.B19AF600|alt="signature\_1093561746"!

Issue Key: PL-1750

Summary: Frisco PD - Additional Employees

Description: Colton-

A few weeks ago, there were several employees Karthiyayini was not able to associate product with because they weren't in the system (fritxfriser). That has since been resolved. You'll find the additional employee's we've added into this system attached above.

Can you please have all remaining products associated with these individuals (including O.C. Sprays)?

Thanks,

Issue Key: PL-1749

Summary: Pending Data / Syncing Issue - wayaldecwypm

Description: Wayne Farms Decatur has had an issue with an iPad having syncing issues / pending data issues for the past couple of days. CRN resets help this issue temporarily, but we've had the same issue with this iPad for three days in a row.

The system is wayaldecwypm and the iPad is: Serial GG7YQ263JF89 / UUID: 96C2FA7B-2C3A-4F87-8E4C-D280CF28104E.

CRN resets have to be triggered from the company admin, as users are unable to do so from the app, due to a pending data error. However, this location is also having a trouble with devices infinitely spinning.

I deleted / redownloaded the application today to see if it would help, but I also collected the logs, which can be found here:  
[<https://service.us2.sumologic.com/ui/#/search/create?id=HajhJdwXihRpG1L3xpIUk5SC1G63gdePOhnQtCKy>]  
[<https://service.us2.sumologic.com/ui/#/search/create?id=HajhJdwXihRpG1L3xpIUk5SC1G63gdePOhnQtCKy>]

I'm not seeing anything particularly peculiar, but I did see the following though, I'm not

sure if it would have any bearing on the sync / pending data issues:

-----

Issue Key: PL-1746

Summary: e8.7.9 - Hotfix Release

Description: After talking with operations, we are needing to get a release out as soon as possible (and before e8.7.10). This release should include:

#

[<https://izhips.atlassian.net/browse/PL-1741>]|<https://izhips.atlassian.net/browse/PL-1741>|  
smart-link] - As mentioned, this functionality is requested by Zack / Foster Farms

#

[<https://izhips.atlassian.net/browse/PL-1745>]|<https://izhips.atlassian.net/browse/PL-1745>|  
smart-link] - This feature was inadvertently removed & identified

#

[<https://izhips.atlassian.net/browse/PL-1612>]|<https://izhips.atlassian.net/browse/PL-1612>|  
smart-link] This new functionality is needed by Eastland + AFD. However, this issue is not fully QA tested, but needed to get out this week if at all possible.

Status: Done

Issue Key: PL-1745

Summary: "Delete All Employees" Feature Not Available for jamjmmcctoo

Description: Eastland reached out as he is needing to have all employees removed from the Jamaica Broilers Group system (jamjmmcctoo). However, the "delete all employees" option is not visible for this company:

!Screen Shot 2024-01-29 at 2.46.35 PM.png|width=1440,height=859!

The "Delete Employee" toggle is also missing from the toggle settings also:

!Screen Shot 2024-01-29 at 2.47.09 PM.png|width=1440,height=630!

Would it be possible to:

# Delete the employees from this system (high priority)

# Determine why the delete employees functionality is not visible (whether migrations, etc.) and let us know if this can be fixed for prod companies also? If necessary, we can create a separate ticket for this fix if necessary!

Status: Done

Summary: Frisco Product - Need Min and Max - Removing Asset Checkbox From Product

Description: Colton-

Stephen at Frisco PD (fritxfriser) is trying to set a min/max on the attached product, but the item is tagged as an asset and is currently checked out, so it's preventing him from setting a min max.

Can we have the dev team uncheck the Asset checkbox for this item? Trying to figure out the best solution.

Thanks,

Summary: Safety Incident Report - Adding Attribute Column In Portal, Changing Column

## Order to Match Export - Backend

Description: [~accountid:5e60790cab60320af8f87101],

We are wanting to expand on the changes made to the Safety Incident report in [https://izhips.atlassian.net/browse/PL-1662|https://izhips.atlassian.net/browse/PL-1662|smart-link], by adding an attribute column & changing the column order to match the app & export in the web portal.

Would it be possible to ad this attribute column & change the column order for the Safety Incident report to match this:

- \* Order Number

- \* Status

- \* Date & Time Out

- \* Employee Name

\* Employee ID

\* Product Title

\* Attributes

\* Confirm Signature

\* Incident Images

\* Incident Cert

\* Date & Time Completed

\* Completed By

Issue Key: PL-1733

Summary: Frisco PD - Ballistic Vests Request

Description: Colton-

Good afternoon! I have a three-part dev ticket that I would like to submit for Frisco Police Department ([<https://fritxfriser.izhips.com/admin>|<https://fritxfriser.izhips.com/admin>|smart-link] ). In order, here is what we need help with:

# Deleting out existing Ballistic Vests

## I've attached a spreadsheet with the products that need to be deleted (Frisco PD Products to Delete)

# Bulk Upload new Ballistic Vests

## I've attached a spreadsheet with the new ballistic vests that need to be uploaded into the system (Frisco PD Ballistic Product Upload)

## The expiration date I need associated with each product is also listed within the spreadsheet

# Associating Ballistic Vests to Frisco PD Employees

## I've attached a spreadsheet that displays which product I would like associated to each employee by ID#

i. The ID#'s are the updated 3000 numbers

ii. I've also included employee names

# When associated, the Expiration that is tied to the product will go into effect

-----

Colton-

I forgot one detail with this task! Could you please add a 6 month expiration alert for each of these ballistic vests when they're uploaded? Here are the emails that need to be tied with this alert:

\* [+SMiller1@friscotexas.gov+|mailto:SMiller1@friscotexas.gov]

\* [+JDicksa@friscotexas.gov+|mailto:JDicksa@friscotexas.gov]

Thanks,

If the dev team cannot locate some of the employee ID#'s, please have them send me a list so we can collect information.

This is very similar to the requests I've put in for AFD in times past, but if you have questions, please reach out.

Thanks,

Issue Key: PL-1731

Summary: NOT IN SYSTEM Transactions - AFD

Description: [~accountid:5e60790cab60320af8f87101],

AFD ([afd.izhips.com|http://afd.izhips.com]) is once again having an issue with “NOT IN SYSTEM” transactions. Would it be possible to:

# Determine why these assets are being issued as “NOT IN SYSTEM” assets, instead of the product they were associated as?

# See what steps we should make in the future to prevent this issue from occurring in the future?

I know we are working on adjusting the app, so assets / barcodes will no longer be case sensitive in [https://izhips.atlassian.net/browse/RN-2046|https://izhips.atlassian.net/browse/RN-2046 [smart-link]], but it appears that we are having issues with products even when the correct product barcode is issued.

However, it also appears that when an asset that is associated with a product is issued to one employee, then returned, then issued to another, the asset is showing as “NOT IN SYSTEM”, instead of the correct product:

!Screen Shot 2024-01-23 at 4.05.19 PM.png|width=983,height=772!

Here are the transactions that will need to be adjusted:

[^NOT IN SYSTEM TRANSACTIONS.xlsx]

Is there an update query we can do to each of these products or any other adjustments we can make to fix this problem moving forward?

----

Colton-

I am continuing to find NOT IN SYSTEM transactions for AFD with items that are actual items in the system. They'll go from being issued and returned as a product to all the sudden issued as NOT IN SYSTEM.

These “NOT IN SYSTEM” transactions will also need to be adjusted accordingly.

Thanks,

!cid:image001.png@01DA4E0A.BB2FEA50|alt="signature\_1093561746"!

Any unauthorized review, use, disclosure or distribution is prohibited. If you are not the intended recipient, please contact the sender by reply email and destroy all copies of" } ] } ] }

smart-link].

However, we want to make the following changes to the employees in this system:

# Can we remove the “password” for all employees? Each employee is currently unable to sign in without using a password, but there should be no password required

## To fix this, we can go into the employees profile & select “remove password”, however we are wanting to do this for all employees in this system:

## !Screen Recording 2024-01-19 at 3.01.31 PM.mov|width=2880,height=1800!

2. Next we are wanting to make all employees currently in this system clerks / give all employees a clerk status (so that any manual changes will not be reverted)

3. Finally, we want to remove the “E0” from each employees' barcode. The employees' barcodes are currently “E0” + “employeeID”, but we want to just use the employeeID for the barcode field.

\* \_So for example, in the file we are receiving, for employee "Vera Fleischman" the employee ID is currently "01040049" and we are adding the leading "E0", making the current barcode for this system "E001040049".\_

\_Would it be possible to remove the leading "E0" from the barcode field. So, the barcode would be exactly the same value as the Employee ID (column A)? So, from the example from above, we would want the barcode field to simply be "01040049" \_

[~accountid:5e60790cab60320af8f87101],

Issue Key: PL-1722

Summary: New Development - Yard Management Report - On Yard Status Selected, Transactions Over 6 Hours Need to be Highlighted in Yellow

Description: In  
[https://izhips.atlassian.net/browse/PL-1718|https://izhips.atlassian.net/browse/PL-1718|smart-link],  
[https://izhips.atlassian.net/browse/PL-1719|https://izhips.atlassian.net/browse/PL-1719|smart-link], &  
[https://izhips.atlassian.net/browse/PL-1720|https://izhips.atlassian.net/browse/PL-1720|smart-link], &  
[https://izhips.atlassian.net/browse/PL-1721|https://izhips.atlassian.net/browse/PL-1721|smart-link], we've created and modified a new "Yard Management report."

Now, we want the On Yard Status selected, transactions over 6 hours need to be

highlighted in yellow.

So, if the On-Yard filter is selected:

!Screen Shot 2024-01-18 at 4.05.55 PM.png|width=995,height=956!

Then, we want for all inbound transactions that have not had either an “outbound” status or “Fuel Check” in the past 6 hours to be highlighted yellow:

Issue Key: PL-1717

Summary: CRN Reset Prompt Not Working - Getting a "Something Went Wrong Error"

Description: When users attempt to trigger a CRN reset via the company admins, we are now getting this error:

!MicrosoftTeams-image (22).png|width=1403,height=671!

This was first seen in jbscactxtrain, but is happening in other systems as well, such as ccdemo, tlp, etc.

Here is a video of the issue:

!Screen Recording 2024-01-18 at 9.37.25 AM.mov|width=2880,height=1800!

I was hoping we saw this error, but it still worked, but iPads are not being triggered to reset. I'm not sure if this is an issue with [izhips.com|http://izhips.com], AWS, or a part of the backend release e8.7.7 / e8.7.8 (however, this feature was working earlier this week).

Issue Key: PL-1714

Summary: Friso Police Department Request

Description: Colton-

I have a dev request for the Frisco PD system ([<https://fritxfriser.izhips.com/admin>|<https://fritxfriser.izhips.com/admin>|smart-link]). The attached items were uploaded as individual products with the Asset Checkbox, but we've come to find that these items are common and not unique. Would it be possible for dev to adjust these products to unlimited?

We thought we could go in and return the one product from whomever it was checked out to and adjust the admin, but these items with a quantity of 1 were still associated with several employees. In turn, we'd have to return these items from all the current employees they are associated with, adjust the admin, and re-issue them.

I know that this might be a confusing request, let me know what other details you need from me.

Thanks,

Issue Key: PL-1700

Summary: Updating Truck Zone Transactions for wayaldecwypm

Description: Zack called to see if it would be possible to update transactions for wayaldecwypm. They are wanting to use the “On Yard” functionality (which is working fine), however they used the wrong attribute title for “Inbound” attribute.

On the selected transactions, they used “INBOUND”, instead of “Inbound”. They have since corrected the attribute name so everything is working now. However, they want

to see if we can fix this past transactions by changing “INBOUND” to “Inbound”, which should then hopefully work with the “On Yard” functionality.

Is it possible to change the attribute name so that these historical transactions work with the “On Yard” functionality?

Status: Done

-----

Issue Key: PL-1699

Summary: NOT IN SYSTEM Transactions for AFD

Description: [~accountid:5e60790cab60320af8f87101] ,

In AFD's new enterprise system ([afd.izhips.com|http://afd.izhips.com]), there are currently 9 NOT IN SYSTEM transactions:

!Screen Shot 2024-01-09 at 3.58.10 PM.png|width=91.66666666666666%!

[^manual-entry-report-01-09-2024-095753-19495.xlsx]

However, each of the "NOT IN SYSTEM" assets exist & should be associated as a different product. For instance, one of the assets issued out as a "NOT IN SYSTEM" product is "Is000355758". However, when this product is either issued / returned in Station Zone, it should be product "LS000355758-12M-BOOTS":

!Screen Shot 2024-01-09 at 4.01.34 PM.png|width=1438,height=728!

Each of these 9 NOT IN SYSTEM transactions should be associated / show as actual products, but they are issuing / returning as “NOT IN SYSTEM” products. Would it be possible to:

# Update the current product information from “NOT IN SYSTEM” to the correct product

# Ensure that moving forward, the products are issued out / returned as the correct product?

## I believe we updated this logic / ran a query to update all of these products, but I can't remember exactly.

Please let me know if more information is required or if you have any further questions!

Issue Key: PL-1697

Summary: Onboard checklist app users through the enterprise app

Description: We would like to allow customers that use the checklist app to add users (for the checklist app) through the enterprise app (rather than using the checklist portal to add users).

When adding users through the enterprise app, then only data point not currently collected that would be needed for creating a checklist app user is the 'email'. So, it would be necessary to add a field on the enterprise app to collect the new user's email when 'onboarding' users.

When the enterprise app submits information for the new user to the enterprise backend, then backend should make an API call to the checklist backend to trigger the creation of the new user in the checklist system

Status: To Do

#### Assignee Changes History:

No assignee changes found.

-----

Issue Key: PL-1695

Summary: Allow Dexter to change hoop injection product from customer report portal  
Front End component

Description: Add new section 'Manage Injection' (between 'Manage App Employees' and 'Manage Reports'), for a new page to set/change the product for injection from data hoops/boards.

The new section/page should only display for this customer for now. In the future we may make this section/page available to more (but not all) customers. So, in the future it may be necessary to be able to control the display of this section/page per customer (master admin portal, etc). But for this POC it only needs to display for this one customer so the condition to display it can be hard-coded, manually set in the

database, etc.

The new page needs to allow setting the product for injection from data hoops/boards at that location. The employees at Dexter will need to change a data hoop/board between different products (10-20 product types total) during the day as they inject different products into the system and they need to be able to switch the configured product for that data hoop/board by themselves without contacting Innova Zones support.

The idea for controls on the page are:

# drop down to select amongst data hoops/boards currently configured for injection mode at the location (no need to include hoops/boards using other app modes)

# drop down to select the product types configured at that customer location

# submit button to send the device and product information to the backend

Both drop downs should default to a 'blank' option to force the user to explicitly choose an option. After the information is send to the backend (via the submit button), the drop downs should reset to the 'blank' option.

A success or failure message should display after sending the information to the backend, so that the user has some indication of what happened. Something like: vr-123456 is now configured to inject gloves

Issue Key: PL-1693

Summary: Frisco PD - Product Association Request

Description: Colton-

Attached, you will find a spreadsheet for the Frisco PD system (fritxfriser). We would to associate the product (column B) and expiration date (column c) listed to the employee in column A.

Let me know what other details you need. The two products (1.47oz O.C. Spray / 3oz O.C. Spray) already have an expiration date associated in the attributes.

Thanks,

Issue Key: PL-1692

Summary: Migrate Enterprise database to MySQL 8

Description: We need to start migrating our databases from MySQL 5.7 to 8. Starting with the enterprise system databases

We should start with the stage/qa databases:

prod-restore-4-qa

prod-restore-4-stage-mar-19

prod-restore-4-stage-june-25-2021

stage-read-only-replica

We will need to thoroughly test with the app, report, customer admin, master admin portals to ensure proper and performant operation, before we move the enterprise production database to MySQL 8

Status: IN STAGE

Issue Key: PL-1691

Summary: Allow Dexter to change hoop injection product from customer report portal Backend API

Description: Add new section 'Manage Injection' (between 'Manage App Employees' and 'Manage Reports'), for a new page to set/change the product for injection from data hoops/boards.

The new section/page should only display for this customer for now. In the future we may make this section/page available to more (but not all) customers. So, in the future it may be necessary to be able to control the display of this section/page per customer (master admin portal, etc). But for this POC it only needs to display for this one customer so the condition to display it can be hard-coded, manually set in the database, etc.

The new page needs to allow setting the product for injection from data hoops/boards at that location. The employees at Dexter will need to change a data hoop/board between different products (10-20 product types total) during the day as they inject different products into the system and they need to be able to switch the configured product for that data hoop/board by themselves without contacting Innova Zones support.

The idea for controls on the page are:

# drop down to select amongst data hoops/boards currently configured for injection mode at the location (no need to include hoops/boards using other app modes)

# drop down to select the product types configured at that customer location

# submit button to send the device and product information to the backend

Both drop downs should default to a 'blank' option to force the user to explicitly choose an option. After the information is send to the backend (via the submit button), the drop downs should reset to the 'blank' option.

A success or failure message should display after sending the information to the backend, so that the user has some indication of what happened. Something like: vr-123456 is now configured to inject gloves

Issue Key: PL-1686

Summary: JobZone Bug - Master Admin

Description: [~accountid:5e60790cab60320af8f87101],

I’ve had several recent complaints recently regarding JobZones from another company feeding another company. For example:

JobZone “FRISCO POLICE DEPARTMENT” is showing up in alaalaalbing:

!Screen Shot 2024-01-04 at 3.48.53 PM.png|width=1919,height=619!

And this same JobZone is also present in the Frisco Police Department (fritxfriser):

!Screen Shot 2024-01-04 at 3.48.33 PM.png|width=1920,height=654!

This same issue is occurring in multiple other systems as well, such as:

\* “Belgravia Processing” (should be only for Foster Farms Belgravia systems) is showing up in Caviness’s system (cavtxhertoob).

I assume that this likely not really a bug and occurred as a result of someone selecting the “Innova Zones” jobzone in the master, then changing the JobZone name. However, I wanted to see if this was the case and if would be possible to change the jobzone name in each system or get a list of all jobzones for each company to correct this.

Issue Key: PL-1679

Summary: FD Checklist App - Portal - Something Went Wrong Error Message

Description: [~accountid:5e60790cab60320af8f87101],

AFD has reached out with an issue they are seeing when trying to pull multiple days of reports in the FD Checklist App's portal. If more than 3-4 days is selected and tried to be exported, this error pops up:

!Screen Shot 2024-01-02 at 4.36.05 PM.png|width=1440,height=859!

Here is the full video of this happening (which I am able to reproduce):

Is it possible to increase the amount of data pulled without receiving this error? It seems to occur when more than ~500 transactions are attempted to be exported.

Issue Key: PL-1678

Summary: Adding sizes/colors into the product title and model number for

afd.izhips.com

Description: Colton-

As I was demonstrating AFD's new system on Thursday, they made a good point about the lack of visibility with sizes/colors on some of their PPE Products.

To resolve their issue, I would like to add sizes/colors into the product title and model number ([<https://afd.izhips.com/admin>|<https://afd.izhips.com/admin>|smart-link]). Attached, you'll find a sheet that displays the current product/model number titles (red highlights), followed by what I would like to change these product/model number titles to (green highlights).

Let me know if you need further information, sorry for this inconvenience!

Thanks,

Issue Key: PL-1675

Summary: Logansport Employee Addition

Description: In  
[<https://izhips.atlassian.net/browse/PL-1661>]<https://izhips.atlassian.net/browse/PL-1661> smart-link], we removed all Logansport employees not found on the list. This was completed as desired, but now Tyson is wanting us to add all associates that were “clerks” back into this system. Also, it appears that there were some associates that were on this list to keep in this system, but were removed / soft deleted yesterday. Examples of these employees include:

\* Brandi Baez - 385518

\* Tyler Shipley - 1096395

Can we add all clerks + employees that were on this list back into the system?

Issue Key: PL-1672

Summary: AFD - Product Upload & Association

Description: [~accountid:5e60790cab60320af8f87101],

I recieved the following for AFD. This should hopefully be the last thing we need to do for them, as we will try to have all other products, associations, etc. completed manually from now on. However, can we do one last upload / association for afd? This will be in their new system, [<https://afd.izhips.com/admin>|<https://afd.izhips.com/admin>|smart-link]. Please see the attached email / email below for more information:

----

Colton-

Attached you will find two spreadsheets that I've built for my new Amarillo Fire Department system

( [<https://afd.izhips.com/admin>|<https://afd.izhips.com/admin>|smart-link] ):

\* Product Bulk Upload Sheets

\* Product Association Sheets

Each document has a worksheet for each product I'm wishing to upload and associate.

Here are a few notes for each document:

\*\_Product Upload\_\*

\* All Products: The picture I would like associated with each product is at the top left of each upload

\* All Products: Next to the Product Description, I listed the categories I want each product dropped into (All in PPE Zone)

\* All Products: Next to the Product Description, I listed all the attributes I would like tied to each product. Here's a few notes for each:

\*\* Asset Checkbox: ON for every single product

\*\* Loaner Checkbox: This will be checked on for all cells that say YES

\*\* Loaner Attribute: The option "YES" will need to be checked on for all cells that say YES

\*\* \*Warranty Expiration (Coats & Pants Only):\* If a cell says N/A, leave that expiration unchecked in the admin

\*\*\* Let me know if this needs further clarity

\*\_Product Association\_\*

\* These sheets should be self-explanatory. I've listed the employee's information, followed by the product I would like associated with each employee ID#

Here is the logic I would like to apply with the product upload:

\* ALL Coats and Pants Type 1 Expiration will be +12 months+

\*\* ALL Coats and Pants must have the “Sharpening Zone Reset” associated to the type 1 Expiration

\* ALL PRODUCTS: I would like the following emails to receive “Expiration Days” emails from the Product Details screen \*30 days\* prior to expiration

\*\* [+Kyle.Joy@amarillo.gov+|mailto:Kyle.Joy@amarillo.gov]

\*\* [+Ariel.Crocker@amarillo.gov+|mailto:Ariel.Crocker@amarillo.gov]

\* For all products associated, the quantity for that particular product will need to go from 1 to 0 in the Admin

\* Turn on every Jobzone with each product

\* All associations need to feed each report as if they were transactions

Reach out to me if you or the dev team has any questions! Also, if you wouldn't mind providing me with a timeline once dev takes over, I would appreciate it.

Thanks,

Issue Key: PL-1671

Summary: CLONE - FD Checklist App - PPE Checklist - Adding "NA" Toggle - Back-End

Description: AFD has notified us that they want the option to be able to “skip” products in the PPE Checklist in the FD Checklist app. We want to create a toggle that will allow users to skip PPE Products, by hitting an “N/A” option under the Checklist title. This button should be similar to the button currently found in the app for the additional coat / pants options:

!IMG\_9449.PNG|width=828,height=1792!

The secondary Coat / Pants N/A button should be unaffected by this toggle / should remain present if this option is toggled on.

We want the toggle to look similar to:

!f13998d6-ba76-4526-a0e2-e3ff7686564b.png|width=91.66666666666666%!

Issue Key: PL-1670

Summary: Firefighter Inventory Report - Addition

Description: Colton-

What would it look like to add logic to the description column, where it separates the data points into their unique columns? I used a “Text To Columns” formula on the description column, and was able to separate it in seconds:

!image002.png|width=100%!

I need to get feedback from AFD, but could you submit this to see how long it would take to add this potentially?

Thanks,

Issue Key: PL-1667

Summary: CLONE - New Logic - If Product Issued Out With Asset via Zone Screen, We Want to Make This Product an Asset (Able to Returned Via Quick Return) - Back-End

Description: We want to change the logic for the system so that if a product is issued via the Zone / traditional cart screen with a value in the “Asset” field:

!IMG\_1612.PNG|width=1668,height=2224!

[^RPreplay\_Final1702654918.MP4]

Then we want these products to issue out as “assets.” so they would:

\* Fill Reports as Assets

\* Have the ability to be returned via Quick Return / in Station Zone

Status: To Do

2024-03-01T09:38:46.964+0530: Karthi Nalliyappan -> Karthiyayini Muthuraj

-----

Issue Key: PL-1666

Summary: CLONE - From PL-1587 & PL-1574 - Audits from FM & Area Audit Report Add Duplicate Rows on TCP Daily Audit Report - Back-End

Description: Previously, we integrated the FM and Area Audit reports into the Daily TCP Audit report. However, currently on the Daily TCP Audit report, these audits are not combined / each of the audits on the two reports will create their own line / the audits are not cumulative.

This was addressed in  
[<https://izhips.atlassian.net/browse/PL-1587>|<https://izhips.atlassian.net/browse/PL-1587>|  
smart-link] with the following:

\* Currently, any audits completed in the Area Audit report are duplicated on the TCP Daily Audit report separately, instead of showing up the same in this report:

[^tcp-daily-audit-report-12-13-2023-100912-18761.xlsx]

!Screen Recording 2023-12-13 at 4.17.53 PM.mov|width=50%!

For this ticket (and [\[https://izhips.atlassian.net/browse/RN-2006\]](https://izhips.atlassian.net/browse/RN-2006)[\[smart-link\]](https://izhips.atlassian.net/browse/RN-2006)), we are wanting audits from both the FM report as well as this report to show up exactly the same (and on the same lines) in the Daily TCP report.

**\*Current:\***

For example, if asset “TCPaudit001” was issued out, then an audit was performed in the FM report, it would look like this on the Daily TCP Audit report:

!Screen Shot 2024-01-10 at 2.30.16 PM.png|width=989,height=394!

Then, if we did an audit from the Area Audit report, it +currently+ would add another line for this same asset and look similar to:

!Screen Shot 2024-01-10 at 2.35.48 PM.png|width=700,height=515!

So, even though this is the same asset / product issued to the same employee, Audits from the FM report and the Area Audit reports each have their own line / no of Audits currently.

**\*Desired:\***

Instead, of audits from the FM report & audits done on the Area Audit reports showing up separately on the Daily TCP Audit report, if an audit is done on the same tool from both of these reports, we would want the report to have only 1 line in this report per each asset, with only the number of Audits increasing. So, it would look like:

!Screen Shot 2024-01-10 at 2.39.43 PM.png|width=1244,height=782!

Issue Key: PL-1660

Summary: Updated Dept. Numbers - Wayne Enterprise SMP

Description: Colton,

For the system Wayne Enterprise SMP (CRN# WAYALENTSMP & [http://wayalentsmp.izhips.com|http://wayalentsmp.izhips.com|smart-link] ), I need employee's department numbers updated. Some employees have moved to different departments over the past 6 weeks.

Attached is a list of updated department #'s associated with the employee ID.

For all employee ID's on the attached list, the associated department # on the attached list should match the department # for these same employee ID's in our admin. If the department # does NOT match, the employee profile in the admin needs to be updated with the corresponding department # on the attached list.

Please let me know if you have any further clarification. I need this done as soon as possible, preferably in the next 48 hours.

Thanks,

Summary: AFD Request

Description: [~accountid:5e60790cab60320af8f87101],

I recieved the following email from Eastland, but am working to get more details for this:

----

[@Colton Carver|mailto:colton.carver@innovazones.com]-

Unfortunately, AFD cannot and will not be able to send me an export for their coats/pants through their old system. Therefore, they're wanting to use our information in the current system for my new system build.

I wanted to see if the dev team could take the attached spreadsheet, and add all attributes tied to the attached products (it should just be the expirations).

If it's easier, you could submit a ticket to have all product information exported for the following bin locations:

\* COAT

\* LOANER COAT

\* PANT

\* LOANER PANT

Call if you have any questions! If possible, it would be great to have this back by tomorrow morning.

Thanks,

Summary: Foster Farms Belgravia - SMP - Delete Transactions

Description: [~accountid:5e60790cab60320af8f87101],

I received the following email from Zack:

\_Colton-\_

\_This happened again yesterday. Please see attached spreadsheet.\_

\_The clerk was completing a transaction in Station zone around 9:08AM and it started spinning and wouldn't stop. When I came in the room (around 11:04AM), I force closed the app and reopened it. Then it was working fine but the transactions you see had populated in the employee report and she said they didn't happen.\_

\_She said she didn't force close the app earlier because I was in the building, and she thought I was doing something in the machine.\_

\_Thanks, \_

Would it be possible to delete the attached transactions from foscabelpro? I'm not sure what happened app-side, but I will try to get more details here so that we can hopefully avoid this issue in the future!

-----

Issue Key: PL-1648

Summary: CLONE - Changing Safety Incident Report Date / Time Filter Logic - Back-End

Description: We want to see if we can change the logic on the Safety Incident report so that for:

- \* Completed Status - We want to sort by completed date / time

- \* Not Completed Status - We want to sort by “out” date / time

- \* If default status / no status selected - We want to search by expiration date

I know logistically, we determined that we may run into issues regarding filtering all transactions on the Safety Incident report by “completed” date / time. But if we broke it down by status, would it be possible to implement these changes?

Status: Done

Issue Key: PL-1647

Summary: ISP Report Not Visible in Master Admin Settings - afd.izhips.com

Description: [~accountid:5e60790cab60320af8f87101],

We are recreating Amarillo Fire Department's system. The new system will be [http://afd.izhips.com|http://afd.izhips.com|smart-link] . However, after we created this new. company, we found two small issues, which are hopefully easy to fix:

# The ISP report is not available to toggle on for this company in the master admin

# The “Knife Sharpening Report” and “Employee Sharpening Reports” are not updating / changing to reflect the name changes made to “Inspection Zone”. \*\*\*However, I believe this may be due to needing to turn on “Sharpening Zone”, not Inspection Zone & changing the name of the original Sharpening Zone, which I can check tomorrow after I get confirmation to turn regular Sharpening Zone on for this new company.\*

Would it be possible to investigate why the ISP report is not available for this new company?

Issue Key: PL-1645

Summary: Enterprise production database High CPU usage

Description: Today (Dec 5, 2023) from about 19:00 UTC to about 21:00 UTC the CPU usage stayed around 99% (CloudWatch CPUUtilization graph). This is very unusual

behavior. Normally the CPUUtilization graph is spikey (up and down) running around 40% or lower with occasional period that drive up to 60% or 80%. But, today the CPUUtilization graph looks like a plateau, stuck at 99% for about 2 hours.

During this time we received reports from Zack (onsite at Foster Farms Belgravia) that the app performance was very slow - likely caused by the database's high CPU usage.

Could you look at the application server log and see if it is obvious what could cause the database CPU usage to stay at basically 100% for 2 hours. Maybe reports being run over and over, or something with the S3 resets?

Issue Key: PL-1634

Summary: Zone Log Export Changes - Data Changes

Description: Exporting the complete company list zone log is a time-consuming task, as it involves dynamically connecting to and processing data for each zone. The entire process takes approximately 50 minutes to generate an Excel file, which is attached. To expedite this, we can optimize the process by applying filters to select specific

companies for export. This targeted approach will significantly reduce the processing time.

→ We will need to be adding a filter / way to eliminate the long processing time. Ideally, we are wanting to have this log feed an online Excel document each day.

Issue Key: PL-1632

Summary: From PL-1553 - We want to change the Product Image on the PDF Export for the Safety Incident Report to Image(s) Taken & Attached to Product

Description: Zack wanted to see if it would be possible to include attached images to the export, instead of the product image in the PDF/certificate.

For example, if we export the certificate for the following transaction:

!Screen Shot 2023-12-12 at 11.00.04 PM.png|width=1440,height=861!

It would look like this currently (if no product image, or with the product image listed at the bottom):

!Screen Shot 2023-12-12 at 11.02.25 PM.png|width=821,height=725!

Would it be possible to have all attached images (or at least the first image taken / attached to the particular transaction) to show up on the PDF certificate? So, it would look something like:

!Screen Shot 2023-12-12 at 11.05.29 PM.png|width=615,height=543!

We would remove the product image (if any selected in the admin), or just add the attached image so that all certs look like above.

Issue Key: PL-1631

Summary: From PL-1566 - Changing Barcode Export Logic So Barcodes Print According to Product Order (If Selected)

Description: We want to change the logic for the product QR code export in this ticket. There shouldn't be any UI changes, just a logic change.

We want to maintain the current functionality / UI, however we want to add a slight change only. IF the products contained in the export have an order listed, we want to

have the product order on the export the same as in the company admin.

However, if there is no product order listed, we can maintain the same functionality / logic as current.

So for example, if we wanted to print the following category:

!Screen Shot 2023-12-21 at 2.48.17 PM.png|width=100%!

We would want the product barcode export to list these products in the following order:

# CAP,V-GARD GRAY

# CAP,V-GARD ORANGE

# CAP,V-GARD GRAY TEST

# CAP,V-GARD TAN...

However, currently they would only print in the same order as in the admin.

Summary: Frisco Police Department - Bulk Upload & Association

Description: [~accountid:5e60790cab60320af8f87101],

Eastland sent the following to be uploaded / associated for  
[https://fritxfriser.izhips.com/admin|https://fritxfriser.izhips.com/admin|smart-link] .  
However, I want to see if we can bulk upload these products first, so this ticket can wait  
until 8.7.5 rolled out to all companies.

----

Colton-

Attached you will find two documents for our new customer at Frisco Police Department  
([<https://fritxfriser.izhips.com/admin>|<https://fritxfriser.izhips.com/admin>|smart-link] )

# Bulk Upload Sheet

## Within the bulk upload sheet, I've listed which items need to have the Asset  
Checkbox turned ON for

## All these products belong to the “Frisco PD Products” Category (the only category)

## Can we add the “Text Box” quantity options to the items that have a quantity higher than 1?

i. This quantity value has already been added in their system.

# Product Association Sheet

## We do not have employee IDs for this sheet unfortunately, so the dev team will have to associate these products based off their first and last names.

i. For items that have a quantity of 1, we would like for their quantities to change to 0 if associated (Out of Stock)

Please reach out if you or the dev team has any questions.

Thanks in advance for your help!

Summary: FD Checklist Export Issues - Prod & QA

Description: During testing for  
[<https://izhips.atlassian.net/browse/PL-1559>], I found a few small issues in both the QA and prod server report exports for the Checklist App.

As far as testing, I did find a couple of issues (mostly with the export)

# Can we remove "Drag Rescue Device" from the export

## !Screen Shot 2023-11-27 at 5.08.33 PM.png|width=50%!

# The Advanced Cleaning Type, Reason for Advanced Cleaning, Advanced Cleaning Findings and Other Notes for Advanced Cleanings are not showing up on the exports:

!Screen Shot 2023-11-27 at 5.19.45 PM.png|width=50%!

Is this due to migrations, or should I place more tickets in to resolve these issues?

Issue Key: PL-1620

Summary: CLONE - From PL-1553 / RN-1919 - Urgent Fixes for Safety Incident Report - Backend

Description: As mentioned in  
[https://izhips.atlassian.net/browse/PL-1553|https://izhips.atlassian.net/browse/PL-1553|  
smart-link], there are two urgent fixes that we would like to change on the Safety  
Incident report:

# In both Web & App Reports Date & Time Search is based on the Expiration date range  
and not the Completed Date & Time.

[\_currently working same as Expiration report\_] {color:#bf2600}→ We want to change  
this to the Completed Date, instead of the Expiration Date range{color}

2. Expi 2 current behavior when the same product is issued twice before Returning

\* Now, Expi 2 is mapped to the latest transaction and Expi 2 details are Not available  
for the first transaction.

[\_currently working same as Expiration report\_]

What is the expected behavior in the Safety Incident report for this? {color:#bf2600}→  
We want to change this logic for this report alone. We need to be able to complete the previous product transactions, but currently we are unable to do so. {color}

{color:#bf2600}For example, I issued product “General Repair” three times for employee “JEROME E DRERUP”, which looked like this in the Safety Incident Report:{color}

!Screen Shot 2023-11-27 at 4.09.04 PM.png|width=83%!

{color:#bf2600}However, in the application, the checkboxes for the first two transactions with this product are already checked and I am unable to complete the first two issuances of this product / I am {color}{color:#bf2600}\*only\*{color}{color:#bf2600}able to “complete” the last issuance of this same product currently. Here is what is is looking like currently:{color}

!IMG\_1583.PNG|width=1668,height=2224!

{color:#bf2600}Desired / Expected:{color}

!Screen Shot 2023-11-27 at 4.13.46 PM.png|width=418,height=544!

{color:#bf2600}Above, I would be able to complete these three transactions / expirations in any order.{color}

### 3. Completed Checkbox usage from the "Completed" filter result

In Web Reports - Able to perform completed checkbox action from the completed filter result page

In App Reports - Upon clicking the checkbox - the New Approve box opened and If Approved - No Response. Records are not moved anywhere {color:#bf2600}→ Can we ensure that all “completed” transactions are ticked & unable to be edited?{color}

\* In the Completed Filter search result,

Web reports - The completed checkbox is Ticked

App reports - The completed checkbox is Not Ticked {color:#bf2600}→ We want to make sure the “completed” checkbox is ticked also in the App{color}

----

Zack is wanting to begin using this report next week, so these two changes will need to be made ASAP, if possible. We can release 8.7.5 with the current version of this report, then do subsequent releases to address these issues or include these changes in 8.7.5, if easier?

Issue Key: PL-1619

Summary: Return Hooks FMP

Description: Colton,

I was looking to finalize the return of hooks that were checked out at JBS Cactus during our last pilot, and when doing so I found a few employees that are not in the system anymore. I am now not able to return these hooks, so I was wondering if you could have the dev team go in and remove these, so I have a clean report.

I have attached the FMP report with the 3 hooks that need to be returned so if this is something the team can do, please let me know. The system is [jbscactus.izhips.com](http://jbscactus.izhips.com)

Thanks,

Summary: Bulk Product Feeding Stores Report - tlp.izhips.com

Description: [~accountid:5e60790cab60320af8f87101],

[Tlp.izhips.com|http://Tlp.izhips.com] is having an issue with a product that is marked as bulk feeding the Stores report. The product is GREEN RUBBER GLOVES FOR EMPLOYEE ISSUE (1=1EA) and is marked as bulk, but still feeds. Would it be possible to look into why this may be occurring / maybe this product was just marked as bulk?

Below is the email I received regarding this issue and here is the Store's report with this product:

[^stores-issue--return-report-11-27-2023-092428-15329.xlsx]

----

Colton,

It looks like we are still running into the same problem with the Tyson Logansport system.

!image002.png|width=83.33333333333333%!

The product (IPI501656) that is having an issue transferring into stores is a bulked item and should not feed the stores report.

Let me know your thoughts.

Thanks,

Summary: New Aramark Report - "Vault Scan Log" Frontend

Description: Colton,

Can you please request the hours it would take for a new Aramark report to be built? I assume Karthiyayini can give us the estimate?

This will be based on the same data on the “Aramark Usage Report”. This is just the vault scans. They want it to show a time stamp of each “batch” scan completed? More of less a log of each cart pushed into the vault.

Showing something like this. And then it would be exportable like a log.

* Vault Scan	10:31am	331 Garments	Passed Inspection
* Vault Scan	10:34am	412 Garments	Passed Inspection

\* Vault Scan10:38am78 GarmentsDamaged

----

\*Task Details:\*

Frontend - New Report Component: 3 Hours

Backend - New Report API: 2 Hours

Backend – Export API: 2 Hours

[~accountid:5e60790cab60320af8f87101] Could you please confirm if we need to include any additional filters, such as a date range → {color:#bf2600}Only filter needed would be Damaged/Passed Inspection dropdown and a date filter{color}

-----

Issue Key: PL-1613

Summary: CLONE - From PL-1486 / RN-1881 - Further Changes to Manual Entry Report - Back-End

Description: Please see answers below regarding the following:

# Only KNIFE Sharpening & Inspection are fetched in the Manual Entry report with Employee as N/A for respective job zone filters.

- Asset product, Normal product via SZ, Injected products - if sharpened, +they are not fetched in manual entry →+ {color:#bf2600}We want to have these records fetched as well. Would it be possible to have these records updated with the missing information? {color}

- Part Name is displayed as the sharpening product only → {color:#bf2600}We would also want to maybe add a duplicate field to display the product name of product being sharpened, along with the sharpening zone product names. {color}

- Employee as N/A always [r name is available in the existing Sharpening reports] → {color:#bf2600}Would it be possible to have all employee names added to the Manual Entry report as well? For each of these first few items, we are wanting a way to pull historical employee sharpening data, which isn't currently feasible with the existing sharpening reports. We implemented some similar logic to the Dynamic report previously, in

{color}[<https://izhips.atlassian.net/browse/PL-1167>|<https://izhips.atlassian.net/browse/PL-1167>|smart-link]{color:#bf2600} and are planning to eventually expand this same logic to the Dynamic report fully (as seen in {color}[<https://izhips.atlassian.net/browse/PL-1348>|<https://izhips.atlassian.net/browse/PL-1348>|smart-link]{color:#bf2600}).{color}

{color:#bf2600}Here is some context from those tickets, which we'd also want to implement for the Manual Entry report as well:{color}

{color:#bf2600}Ideally we would be able to implement this logic:{color}

{color:#bf2600}-If Sharpenings transaction type alone is selected->  
{color}{color:#bf2600}\_All\_{color}{color:#bf2600} sharpenings would show up,  
including:{color}

\* {color:#bf2600}Issued products{color}

\* {color:#bf2600}Non-Issued products{color}

\* {color:#bf2600}Injected Products{color}

\* {color:#bf2600}Non-Injected products{color}

{color:#bf2600}And users would not need to select any other transactions in order to  
show the sharpenings only (would not need to select FM, Injections).{color}

{color:#bf2600}And with selecting sharpenings only, we want to be able to pull the  
following data points:{color}

\* {color:#bf2600}Employee Name (NA if not issued){color}

\* {color:#bf2600}Employee ID (NA if not issued){color}

\* {color:#bf2600}Product Title (knife if not injected, or injected tool name){color}

\* {color:#bf2600}Asset No{color}

\* {color:#bf2600}Tote # (Sharpening product){color}

# KIT zone - Individual entries are made for each product from the KIT but with the same KIT Name.

For eg: if KIT has 5 products -- Then 5 entries are made with the same KIT name.

Expected: {color:#bf2600}I also same this same issue in testing (only the kit zone is repeated the same number of times as each product in each kit is issued. Can we update this logic so that now when a kit is issued, only 1 entry is made in the Kit Zone

section of the manual entry report, regardless of the number of products issued? For example: {color}

{color:#bf2600}For eg: if KIT has 5 products & is issued:{color}

{color:#bf2600}\*Current: {color}{color:#bf2600} Then 5 entries are made with the same KIT name {color}

{color:#bf2600}\*Desired: {color}{color:#bf2600} There is only {color}{color:#bf2600}\*1\* {color}{color:#bf2600} Entry with the Kit Name. If two different Kits are issued, there would be two Kit names listed.{color}

# The above changes are not available in APP Reports as of now.

\* Need confirmation on whether these changes have to be done to App Reports as well

→

{color:#bf2600}For now, this is fine. We can add a backlog ticket to implement this same logic to the App reports if necessary in the future, but for now PL alone is fine.{color}

Would you guys want to address these in a separate backlog ticket or handle within these tickets?

Summary: CLONE - New Development - Inspect & Return Button - Inspection Zone - Back-End

Description: Colton-

Here's a mock-up for the Inspect & Return feature. The most important part of this is that the inspection doesn't reflect on the employee's name it is checked out to at the time, but the previous employee instead (ISP Report functionality). We have to do this

in order to show that Joe Bob got an inspection on their coat/pant, and not Lion Total Care.

Reach out if you have any questions!

Issue Key: PL-1610

Summary: From PL-1553 - Changing Logic for Safety Incident Report So Products Only  
Move From "Not Completed" to "Completed" If Manually Completed in App or Portal /  
Portal UI Change

Description: However, would it be possible to change the logic for this report so that if an employee checks out multiple of the same product, the first product will NOT automatically be moved to “completed”?

For example, if employee “Marcus Gonzalez” checks out product “Parking Lot Repair”, it currently shows on the report as “Not Completed”. However, if this same employee issues out the same product again, “Parking Lot Repair”, then the first issuance now automatically moves to “Completed”:

!Screen Recording 2023-11-20 at 3.38.51 PM.mov|width=91.67%!

Can we have this first product NOT move to completed if an employee issues out multiple of the same product? We want to change the logic for this report only, so that products / expirations will only move from “Not Completed” to “Completed” if a user checks the “Completed” box in the app / portal. Otherwise, these expirations / products should remain in “Not Completed”.

----

Also, would it be possible to make a small change for the UI in the portal:

PL-

Is it also possible to center the “Completed Images” Camera Icon?

!Screen Shot 2023-11-20 at 3.55.14 PM.png|width=50%!

I will create a backlog ticket for this change, which we can release in a subsequent backend release (maybe 8.7.6).

Issue Key: PL-1595

Summary: Amarillo Fire Department - Bulk Upload

Description: Colton-

AFD (amatxamafd) wants to upload a good number of products into the system, but the new bulk upload additions aren't published yet. Could you please submit the attached bulk uploads to the dev team, and have them upload these products?

Next to the Description column (last current column), I've included all other necessary attributes and type 2 expiration with how they're titled in the system.

They are wanting to check out some of these items this week, so is there a chance the dev team could upload these tonight?

Thanks,

Summary: Data Pull - JBS Cactus - SAP Report

Description: Colton,

John at JBS Cactus (jbscactxtoob) is trying to export over 50,000 transactions in the SAP Transfer Report, but it looks like it is too big to actually download.

Is it possible for the team to export the SAP Transfer Report transactions from 12/26/22 - 11/13/23?

Please let me know if you are able to get this sent over.

Thanks,

Issue Key: PL-1593

Summary: Expiration Report Logic Change - Search by Model # OR by Expiration 2

Attribute Name

Description:

In

[<https://izhips.atlassian.net/browse/PL-1338>], we changed the logic for the Expiration report so that when users used the “Product” search filter, the results were actually searched by model #'s. We also want to tweak this logic a bit further so that users can search by either model #'s in the “Product” search filter (like in PL-1338), or users can search by the name of the Expiration 2 attribute names. Ex. In amatxamafd, users can search for “Manufacturer Expiration” or “Warranty Expiration”.

Issue Key: PL-1592

Summary: Investigate Aramark report slowness

Description: Barrett reported that the Aramark reports are running slow. While we are concerned with all the aramark companies, the example we showed was for Grand Island (arajbsgrane) Lost and Ruin report. Perhaps the report queries could implement a 12 month cutoff in the condition so that they use less historical data and hopefully run quicker

Please start your investigation with the Lost and Ruin report query, but the reports of interest are:

# The Lost and Ruin report

# Unissued Garment report

# The Uniform Zone report

# The Aramark Usage report

Issue Key: PL-1587

Summary: From PL-1434 / RN-1792 - Changing Logic on Area Audit Report So That Defective & Disposal Products Update the "In" and "Out" Filters - Backend

Description: \* The “IN” filter is not updating with products returned as “disposal” or “defective” return reasons. We want to change this logic so that any products returned as “Returned” “Defective” or “disposal” update the counter on this report, so they would go from showing as “out” on this report to “IN? However, we can keep the same logic for the “Lost” returned items (still show as “Out”, even if returned as “lost”)

\*\* This logic may need to be changed on other reports (Area, etc.). I will test to see if this needs to be updated elsewhere as well.

\*\* This should also fix the issue with the popup missing any data (except for Lost products, however for these items alone this is okay).

Issue Key: PL-1586

Summary: From PL-1577 - Updating Old Python Vault Code To Fix Missing Size / Type Data

Description: The root cause has been determined:

The missing transactions were created with the old vault Python code. The recent changes in the new vault code inadvertently overwrote the logic for Python vault transactions. The new logic consistently looks for data in the gts data table. However, the old Python vault code also considers the product code and size in the historical latest transactions.

For cases where RFID tags lack values in the gts data table, the entry was updated as null. I have addressed this by rewriting the logic. The SDK and Python transactions will now prioritize the gts data table. If no data is available in the gts table, the system will then check the historical data's latest transactions for product code and size for the RFID. Even if these transaction details are not present, the system will update them as null in the respective fields.

To implement this fix, we need to release an update to the vault backend code. However, before proceeding, thorough testing is necessary in the stage environment to ensure the resolution works effectively.

As of now, I've addressed the missing product and size data in the production company by updating the query. If applicable, please share the hostname or company details that are utilizing the Python vault transactions. I will then apply the query to those companies as well.

Issue Key: PL-1585

Summary: Updating "Not in System" Products for AFD (amatxamafd)

Description: We are seeing a lot of products that were associated to employees in amatxamafd, which are now showing up as "Not in System" products. However, these assets should be associated as products, not "Not in System" products.

Is it possible to:

# Adjust these products so that they show up correctly / will still show up as the correct product even if returned, reissued, etc.

# With future Fire departments, we may have this same issue (a lot of associated products, which are then returned, issue out as a generic SZ product, not as the associated product, etc. Is there a solution we could implement to avoid this issue moving forward?

Issue Key: PL-1584

Summary: Product Expirations Not Found on Expiration Report - AFD

Description: [~accountid:5e60790cab60320af8f87101],

Eastland worked with the AFD team (amatxamaprob) and did an audit with their system compared to ours and they had an issue with multiple product expirations not showing up on the Expiration Report. To help discover what may be occurring, Eastland put together this spreadsheet, where:

\* GREEN = Product Expirations found in both AFD's separate system, as well as in the Innova Zones system (no research required)

\* RED = The product with the Expirations do not exist in our system at all (so wouldn't show up on Expiration report...No problem / no work needed)

\* BLUE = These are the ones we need to focus on. Each of the products highlighted Blue are found within our system (& AFD's independent system), but these product's expirations are not showing up on the Expiration Report

[^Copy of 2024 Expiring PPE - Discrepancies.xlsx]

Would it be possible to determine why these products' expiration dates are not showing

up? It doesn't appear that any of the products in this spreadsheet were ever associated, but issued via the application.

Issue Key: PL-1581

Summary: Injection zone - Qty not updated in admin & App Category screen if Product issued via SZ with Injected asset no

Description: Confirmed as Bug post discussion with Colton

Reproduced in AppStore build

Company: JBSDemo in Production

## Steps:

1. Go to the Injection zone and map a product to Asset no.

2. Ensure the Product has Quantity set in product admin [Eg: 10]

3. Now go to SZ and issue the Mapped Asset no.

Expected:

The Injected product is issued.

Quantity values should be reduced once issued.

In Admin, the Qty should be reduced

In App Category screen, the SOH value should be updated.

Once returned, quantity value should be updated back to admin and app screens based on the return reasons.

[~accountid:611fdca928ae75006af11099] kindly validate the expected result and let us know for any specific behaviour.

Actual:

The Injected product is issued. But Quantity values are not getting updated.

In Admin, the Qty stays same

In App Category screen, the SOH value is not updated.

Issue Key: PL-1580

Summary: CLONE - FD Checklist App - New Zone - Advanced Inspection Toggle -  
Back-End

Description: We want to add another Zone to the FD Checklist app, which will be called  
“Advanced Inspection”. This option should be visible, just above the SCBA Management  
Tab in the main screen of the app, when toggled on:

!Screen Shot 2023-11-08 at 3.41.22 PM.png|width=226,height=479!

This ticket is for the required work to add the toggle in the FD Master Admin, corresponding to the ability to toggle on / off this new Zone.

We want the toggle to be similar to:

!Screen Shot 2023-11-08 at 3.55.06 PM.png|width=100%!

And the order in the app when toggled on should be:

# PPE Checklist

# Routine Cleaning

# Advanced Inspection

# SCBA Management

----

The Advanced Cleanings then have several additional pages, including:

!Screen Shot 2023-11-08 at 3.46.37 PM.png|width=463,height=806!

Then,

!Screen Shot 2023-11-08 at 3.47.35 PM.png|width=587,height=806!

Then,

!Screen Shot 2023-11-08 at 3.47.46 PM.png|width=412,height=811!

Issue Key: PL-1577

Summary: Aramark / JBS Grand Island - IZ Reporting - Lots of Missing Size & Type Data for arajbsgrane

Description: [~accountid:5e60790cab60320af8f87101], Barrett was notified by the Aramark team that arajbsgrane reporting has a lot of missing size / type data. Here are the reports they are referencing:

[^JBS Grand Island IZ Reporting WE 10.28.23.xlsx]

Would it be possible to run the query to update the size / type data to see if that helps? Also, would you happen to know why we'd be missing this data for this company by chance?

Issue Key: PL-1575

Summary: Updating the Model #'s for JBS Green Bay - Products With Sizes

Description: [~accountid:5e60790cab60320af8f87101] ,

In

[<https://izhips.atlassian.net/browse/PL-1538>|<https://izhips.atlassian.net/browse/PL-1538>|  
smart-link], we updated the Model #'s by removing the "-". While this worked for most  
of the products, all products with different sizes were not updated. Is it possible to  
update these model #'s for products with different sizes fro this company, jbsgrewitooob  
as well?

For instance, the "GLOVE MESH USM (1=1EA)" has multiple size options, which were  
not updated:

Issue Key: PL-1574

Summary: From PL-1434 - Total OUT counter is not updated for the first transaction alone

Description: \*Steps\*:

1. Choose an Area for which Transactions are not Performed.
2. Goto SZ and select the Area name. [Eg: Area Line B]
3. Issue 3 assets to the Area

4. Check the Area Audit Report

5. OUT Counter will be 3 as expected

6. Now, Return 1 asset and check Area Audit Report

7. OUT Counter will still be 3 -{color:#ff5630} {color}{color:#ff5630}\*ISSUE\*{color}

8. In Pop-up view only 2 assets are displayed which is expected.

\*Expected\*: The OUT Counter should be updated as expected

\*Actual\*: This issue occurs only at the First transaction for the specified Area.

From Second Transactions functionality is working fine as expected.

\*First Transaction:\*

!1434-First Transaction.mov|width=58.33333333333336%!

\*Second Transaction:\*

!1434 - Second transaction.mov|width=58.33333333333336%!

Issue Key: PL-1573

Summary: STF Sioux City Knife Email - Knife sharpening data mismatch - 11/04/2023

Description: Colton,

It looks like the problem with the knife sharpening reports not lining up has returned.

Please see the email below.

Thanks,

!Screen Shot 2023-11-07 at 11.37.55 AM.png|width=83.33333333333333%!

[~accountid:5e60790cab60320af8f87101], The Sharpening reports for seaiasiotoo are not matching for the range of 10/29 - 11/04. Would it be possible to determine why this

may be occurring? I thought it may be from some assets that were never issued, only sharpened, but I still don't think this should cause this issue.

Here are some assets that look to be sharpened without ever being issued:

[^employee-sharpening-report-11-07-2023-030331-15988.xlsx]

Issue Key: PL-1571

Summary: CLONE - If asset marked as Lost & tried to be returned again, add "product marked as lost. Return Lost Product?" Message with an "okay" only option - Front-End - Back-End

Description: IN  
[https://izhips.atlassian.net/browse/PL-1532|https://izhips.atlassian.net/browse/PL-1532|smart-link] &  
[https://izhips.atlassian.net/browse/RN-1878|https://izhips.atlassian.net/browse/RN-1878|smart-link], we wanted to update the logic for “Lost” products that are being returned. However, in those tickets, we wanted to have a prompt popup to let them know that these products were “lost”, but not let auditors return these tools. We want to build on this logic / update this logic:

If asset marked as Lost & tried to be returned again, add "product marked as lost. Return Lost Product?" Message with an "okay" only option & we want these products to be allowed to be returned.

This will allow Lost products to be returned, but we want to give inspectors this message to let them know that they “found” / are returning a product that was marked as lost previously.

Issue Key: PL-1564

Summary: Rework expiration date update to reduce database load

Description: The current implementation of the expiration date update (RN-1282) is

querying iz\_order\_items database table in a loop. According to RDS performance insights this query on iz\_order\_items is causing a large amount of load on the database.

[~accountid:5e60790cab60320af8f87101] had an idea that it may be possible to rework the feature so that it doesn't need to execute this query so often so that we can reduce load on the database

This ticket is for investigation/discussion on what changes may be needed in the back end code and in the iPad application to accomplish this

Issue Key: PL-1560

Summary: iPads Running Slowly / Not Processing Transactions

Description: We've had several customers call us today stating that their transactions were either:

- \* Taking a very long time to process (lots of spinning over several minutes or hours)

- \* Or, timing out after a while and they eventually get a "Sorry, Something Went Wrong"

error message.

It seems that Station Zone transactions are most affected, but other Zones are running slowly for a few customers as well. Locations facing this issue include:

- \* csbidkunprob (reported long spinning issue for all transactions for all iPads, as well as the “sorry, something went wrong” error)
- \* jbsiaottprop - Reported long spinning times
- \* jbsiamarprop - Reported long spinning times
- \* alaalalbymp - Reported long spinning times

Additionally (may or may not be related), the Master Admin seems to be running very, very slowly today. The company search is taking a much longer time (sometimes 10 minutes) to filter for a single company. Also, S3 resets took a very long time (over 20 mins for some companies). Here are a couple of examples of the Maser Admin Issue:

!Screen Recording 2023-11-02 at 5.07.49 PM.mov|width=2880,height=1800!

!Screen Recording 2023-11-02 at 4.38.02 PM.mov|width=2880,height=1800!

There were several other locations calling about this issue, but these are the ones I managed to work with & get details for. S3 resets (if they ever went through) and CRN resets did not resolve this issue for these locations.

Issue Key: PL-1556

Summary: Pending Data Issue, Even After Completing Sync - izstoreroom (smp)

Description: In [izstoreroom.izhips.com|http://izstoreroom.izhips.com], I was able to reproduce a pending data issue with both 4.80.1(71), as well as with the current App Store build.

To reproduce (in this company, though I'm not sure if caused by company only or by something else):

Here is a short version of the issue:

- \* Try to issue an asset that has already been checked out via SZ (and has been checked out many times, so will get error)
- \* Return the asset (though many more are still checked out)
- \* Try to issue this same asset again (will get error message) in SZ
- \* Clear SZ cart
- \* Try to CRN reset

[^RPreplay\_Final1698332019.MP4]

Here is way to reproduce as soon as logging into this company:

[^RPreplay\_Final1698332585.MP4]

Another video:

[^RPreplay\_Final1698332444.MP4]

To reproduce this issue, I used this barcode / asset:

GOGGLES

Here is the asset history:

[^asset-scan-report-10-27-2023-022659-10757.xlsx]

Please let me know whether this may be why a lot of companies are having pending data issues (or at least the cause of some of the issues).

Issue Key: PL-1553

Summary: CLONE - New Report - Safety Incident Report Construction - Back-End

Description: We want to create a new report, called the "Safety Incident Report". We want to start by cloning the Expiration Report and making a few changes to this new report.

After the cloning is complete, in this new report we want to remove the following columns

\* Clerk

\* Model #

In addition, we want to make the following changes:

- \* Alphabetize employee name dropdown (same to be done to Expiration report in <https://izhips.atlassian.net/browse/PL-1453>[|https://izhips.atlassian.net/browse/PL-1453](https://izhips.atlassian.net/browse/PL-1453) smart-link], <https://izhips.atlassian.net/browse/RN-1900>[|https://izhips.atlassian.net/browse/RN-1900](https://izhips.atlassian.net/browse/RN-1900) smart-link]

- \* Create a Product Dropdown (Not currently found on regular Expiration report)

- \* Change Logic from current Expiration report so that the same product can be issued to employees without removing previous expiration date / adding a new one (In other words, change the logic so that the only way expiration dates / transactions can be removed is if they are manually remove from either the app or the portal).

- \* We also want to change the “Removed” text in both the column & filter status to “Completed”

- \* Then, we want to add 3 columns (these values will come with logic implemented in future tickets).

- \*\* “Completed By” - Will show what user removed a transaction (will only have a value

for removed transactions)

\*\* Date & Time (will show when transaction / expiration was removed)

\*\* Completed Image (will show images uploaded by user when “remove” option is approved)

-----

Issue Key: PL-1545

Summary: CLONE - Lost Functionality - Adding "Lost" Return Reason in Area Report, Alert Email Sections - Back-End

Description: Though we removed the “Lost” return reason from showing up in Station Zone (which we want to keep removed!) in [https://izhips.atlassian.net/browse/RN-1732|https://izhips.atlassian.net/browse/RN-1732] and other tickets, we lost the ability to:

# See the “Lost” products in the Area Report

# Set up alert emails for products returned as “Lost” (from either the employee inventory as well as from the FM report).

We would like to add “Lost” as a return reason in the area report (all lost SZ products should show up here), as well as be able to see the “Lost” return reason in the Alert email section of the company admin.

Desired:

#

!IMG\_1552.PNG|width=1668,height=2224!

(Will have all returned reasons in system + lost return reason in Area report)

2. We also would like the ability to set up alert emails for all products returned / marked as “Lost” from either the FM report or the employee inventory here in the company admin:

Current:

!Screen Shot 2023-10-26 at 1.51.44 PM.png|width=1920,height=529!

Desired:

!Screen Shot 2023-10-26 at 2.00.56 PM.png|width=1331,height=335!

This alert option (when checked) should send alerts for all products returned as lost / marked as lost from either the employee inventory or from the FM report.

Summary: Foster Farms Livingston TCP - Delete Transactions

Description: Karthiyayini,

Similarly to  
[https://izhips.atlassian.net/browse/PL-1535|https://izhips.atlassian.net/browse/PL-1535|  
smart-link], Zack is wanting to delete the attached transactions in  
[https://focalivtoo.izhips.com/|https://focalivtoo.izhips.com/|smart-link] .

I will investigate why these may be happening and see if we may need to make more  
adjustments app-side to prevent this issue from occurring in the future.

----

Colton-

I am having the same issue that we saw in Kelso in Livingston. There are lots of fictitious scans in their data. I pulled everything for 2023 and found 74 transactions. Please see attached file.

Can you have the DEV team delete these 74 transactions?

[<https://foscalivtoo.izhips.com/>|<https://foscalivtoo.izhips.com/>|smart-link]

Issue Key: PL-1541

Summary: FW: Tyson Sherman Weekly Transactions Report - Products Showing Up As Station Zone Products

Description: Colton,

After reviewing the Weekly Transaction Report for Sherman, I wasn't sure which category we were using for our products, so I looked in the system and ran both categories in the report. It turns out that all of the products are in Supply Zone, but there are still transactions pulling up in Quick Check Zone.

For example, I have included two images below. The first will be of the Weekly Transactions Report. In this image I have pulled the Weekly Transactions Report for Quick Check Zone and it shows product “1430096136” as the top product. However, what you will see in the second image is when I pull up this product in the Admin, it shows this products is in “Supply Zone”.

!cid:image012.png@01DA05C2.81F5E0E0|alt="A screenshot of a graph

Description automatically generated"

!cid:image013.png@01DA05C2.81F5E0E0|width=50%,alt="A screenshot of a computer

Description automatically generated"

Could you please get with the team to figure out why this product is showing up in the wrong category?

Thanks,

Issue Key: PL-1540

Summary: Department Bug Tyson Storm Lake

Description: Colton,

As discussed, please see the below bug in the Tyson Storm Lake system (tslp).

[<https://tslp.izhips.com/admin/>][<https://tslp.izhips.com/admin/>smart-link]

Transaction in the employee report. This employee does not have a department attached.

!image002.png|width=91.66666666666666%!

Employee List in the Admin (tslp). The employee does not have a department attached.

!image004.png|width=91.66666666666666%!

This is the employee list exported. You can see that the employee has a department attached.

!image005.png|width=100%!

When I looked, all of the employees in the system had a department attached. I am not sure if these transactions are feeding the Store's Inventory Report which is what feeds the inventory to the entire plant.

Could you please look into this and get back to me with what you find?

Thanks,

Issue Key: PL-1534

Summary: Merging Duplicate Employee Profiles - jbsgranetoob

Description: In jbsgranetoob, multiple employees have multiple profiles. This is also likely causing a lot of the products issued by each employee to not show up in the app, as only one of the multiple profiles shows up (we fixed this same issue before in [<https://izhips.atlassian.net/browse/PL-1413>]<https://izhips.atlassian.net/browse/PL-1413>|smart-link]).

Can we merge these employee profiles as well for jbsgranetoob?

Issue Key: PL-1532

Summary: CLONE - Lost Functionality - Adding New "Item Been Marked as Lost" Error If a Product is Scanned In Station Zone That Has Previously Been Marked / Returned As Lost

Description: Lost Functionality - If a Product is Scanned In Station Zone That Has already Been Marked / Returned As Lost, Then Rescanned in SZ to be Issued, we want to add a new error message that says "Product has Been Marked as Lost", instead of the generic "Item has not been checked out yet...". However, this will only show for products that have already been issued, marked / returned as "Lost", then was scanned again in SZ in an attempt to be re-issued.

For this case currently, we see:

Issue Key: PL-1526

Summary: From PL-1441 - if a product from another company is issued via Injection ID, then the same can be returned only via the Station zone screen

Description: We want to add to this logic change by so if a product from another company is issued via Injection ID, then the same can be returned not only via the Station zone screen, but also the Return Inventory.

Currently (From PL-1441):

If such a product (injected via another system only) is returned via Return Inventory,

- \* The Product details are removed from Inventory even if marked as LOST

- \* The Issued & Returned details are removed from Reports too.

Desired:

If such a product (injected via another system only) is returned via Return Inventory,

- \* The Product details are not removed from Inventory even if marked as LOST

- \* The Issued & Returned details are shown on all relevant Reports too.

Issue Key: PL-1515

Summary: CLONE - Application Facing Long Loading Times / Long Time to Process Station Zone Transactions

Description: Today, I had two customers reach out to let us know that they were experiencing a noticeable delay in the amount of time it takes to process Station Zone transactions. These customers are foscabelpro and foscaltivpro. This Station Zone issue occurs when the user presses "Done" or "Done and Exit". Once one of the Done buttons is selected, there is a long spinning occurring before the transactions are finally processed (between 5 - 10 seconds) each time.

I was also able to recreate this issue in ccprod (on 8.7.2) as well as ccdemo (8.7.1) and with the current App Store build, along with other builds, such as 4.80.1 (39), which is from [ticket \[https://izhips.atlassian.net/browse/RN-1835|https://izhips.atlassian.net/browse/RN-1835|smart-link\]](#).

This issue seems to have only begun today (Monday) and was not reported Friday.

Here are recreations / examples of the mentioned spinning issue in different scenarios:

App Store build (bundle v131) in ccprod (8.7.2):

[^RPreplay\_Final1696390785.MP4]

App Store build (bundle v131) in ccdemo (8.7.1):

[^RPreplay\_Final1696390907.MP4]

Build 4.80.1 (39) in ccprod (8.7.2):

[^RPreplay\_Final1696390423.MP4]

Build 4.80.1 (39) in ccdemo(8.7.1):

[^RPreplay\_Final1696390580.MP4]

Issue Key: PL-1512

Summary: Setup for tysondemo

Description: We recently created a new company in the admin, which is [tysondemo.izhips.com|http://tysondemo.izhips.com]. Zack will be going on-site on Wednesday and had a few requests to have this ready to go for Tyson Amarillo. For this company would it be possible to:

# Run 8.7.2 migrations

# Delete CC# for departments (no there will be no CC# for departments)

# Upload all products from tabp and add into tysondemo (can either go into one

category "QC Products" or can go into same categories as tabp, whichever is easiest).

Here is the product list from [tabp.izhips.com|http://tabp.izhips.com]. Would it be possible to import all products into this new company so it is the same as tabp?

[^product-list-10-02-2023-081812-11882.xls]

Please let me know if any other info is required!

Issue Key: PL-1511

Summary: Vault app 1.1.0 release

Description: I guess we can call the version of the vault client application that Manoj prepared yesterday for Aramark version 1.0.0 since it will be the first version to be used for 'live' scanning

So, on this ticket we want to gather ideas for improvements for the next release - let's call it 1.1.0 (naming open to discussion if anyone wants different).

1) Now that the vault is 'live' they are using it to scan hundreds of tags at once and it takes several seconds when the tags are submitted before the application receives the response from the server. So for safety the submit button should be disabled for the time between request and the successful response or error. Once today the user wasn't sure if the application had hung and clicked the submit button a second time and submitted all the tags again

2) Also to improve the user experience when the submit button is clicked there should be some activity indicator until the successful response or error is received from the server

3) Finally, after the tags are successfully submitted, the submit button should be removed, the scanned tags should be cleared from memory locally, and the message that displays above the scan button stating how many tags were read should be removed. Note: For 'live' use we won't want to resubmit the same tags a second time

Of course if an error is received from the server when submitting the tags, then don't clear the scanned tags from memory or the message showing how many tags were scanned and the user can use the submit button to try again

Issue Key: PL-1510

Summary: AFD: Re-Association Project

Description: [[~accountid:5e60790cab60320af8f87101](#)],

Eastland is wanting to change the product / transaction data for amaxamaf by disassociating current helmet, hood, boots and glove products and then bulk upload each of these as a unique product.

Below, there is a three step process listed out. I will create this ticket to track this work, but we can separate into three separate tickets if easier?

Please see below / email for more information.

----

Colton-

I have an intricate request for Amarillo Fire Department (amatxamafd). Earlier this year (May), the development team associated Helmets, Hoods, Boots, and Gloves to the AFD team. Since doing this, AFD has informed us that they need all sorts of attributes associated with these items. In conjunction, we've decided internally to upload each of

these accessories as a unique product. Therefore, here is the request I would like the dev team to compete (In Order):

# Dissociate all accessories from employee inventories and reports (Gloves, Boots, Hoods, Helmets)

## \*\*LEAVE COATS AND PANTS ALONE\*\*

# Upload Bulk Uploads from attachment "BULK UPLOAD SHEETS"

## Bulk Uploads include attributes as well that I would like associated

i. All listed attributes have been added into the admin as options already

ii. These items will have a Manufacturer

Expiration tied to them (type 2 expiration)

# Bulk Uploads include the picture I would like associated with each upload

# Associate products with all listed attributes to necessary employees from the attached document "ASSOCIATIONS SHEETS"

## Attributes that need to be associated with each transaction are listed

## I did not list the expiration date because I figured it was hard coded with the bulk upload

i. Let me know if you'd like this included

Issue Key: PL-1509

Summary: Aramark Reporting - Transaction Order & Missing Size & Type Data for arabutmounc

Description: With the new vault project launch in arabutmounc, after launching we

noticed a couple of issues.

# The transaction order for this system is reversed in the portal. Instead of the latest transactions feeding at the top of the report, they are feeding at the back:

!Screen Shot 2023-09-27 at 9.48.24 PM  
(2d9e8ad3-ef16-4268-9db9-77b6d8d57fa5).png|width=1433,height=734!

!Screen Shot 2023-09-27 at 9.48.13 PM.png|width=1440,height=783!

However, the export is ordered fine.

2. Also, there is no size & type data. Is this something we can update via query or do we need to integrate EDI data for this?

Issue Key: PL-1502

Summary: Butterball mount olive vault demo

Description: Barrett is on site testing the vault reader application for butterball mount olive, but unfortunately there are some problems.

Currently we want to understand and fix:

# locations - the entries in the location drop down

Where do the locations pull from - what database tables/columns?

How do we get a correct location set - can we update the database, or modify the client application, or do we have to change something in the hoop backend code?

We want something like 'Butterball mount olive' to appear in the locations drop down

# submit button → send scan data to server gives error message "Internal server error". looking in client application code TransactionProcessor.cs CreateTransaction method, this means something other than a 200 response code was received. NOTE: I do not see the request/response cycle in the server laravel log.

# We haven't seen this behavior before, but today, the client application was hanging after Barrett pushed the 'scan' button. It hangs forever until Barrett force closes the client application.

# Since the client application crashed without 'stopping' the read, when Barrett restarts the client application and clicks the 'scan' button he receives error 'error connecting to reader a client connection already exists'. So, then Barrett has to power cycle the reader. This problem will probably go away if we fix issue 3) since this problem is likely happening since the application crashed without 'stopping' the read

Issue Key: PL-1500

Summary: Unmerging Shared Database Between tysiastotoo & tslp.

Description: Karthiyayini Muthuraj, do you think it's possible to split a merged database? Hypothetically, if we were to split the employees for Storm Lake systems tslp, tysiastotoo, could we do this?

----

Is it possible to remove the link between [tslp.izhips.com|http://tslp.izhips.com] and tysiastotoo? We are wanting to move tslp out and not have these employees linked with tysiastotoo anymore. So if employees are added into tysiastotoo from now on, we do not want these employees to automatically be updated in tslp. So, we really would like to separate tslp away from tysiastotoo, but keep tysiastotoo info the same.

Do you think this is possible?

Summary: FD Checklist App - Pass All Button Toggle - Backend

Description:

In

[<https://izhips.atlassian.net/browse/RN-1853>|<https://izhips.atlassian.net/browse/RN-1853> smart-link], we created a new toggle, which is for the new “Pass All” button functionality that will be added to several pages in several zones. We are wanting to add a toggle for this development as well in the izfire master admin. This toggle should look similar to:

!Screen Shot 2023-09-25 at 3.35.22 PM.png|width=784,height=451!

If this toggle is enabled, we would want the Pass All button to be on in all relevant zones & show in the app similar to:

!Screen Shot 2023-09-25 at 3.36.12 PM.png|width=777,height=453!

!Screen Shot 2023-09-25 at 3.23.47 PM.png|width=188,height=435!

If this toggle is off, this button should not be present anywhere in the app and the app should look like:

!IMG\_8943.PNG|width=828,height=1792!

Issue Key: PL-1498

## Summary: CLONE - FD Checklist App - New Functionality - Pass All Button

Description: We want to add a new functionality to the Application, which will be a “Pass All” button. We are wanting to add this to the top of each page for the following FD Checklist Zones:

- \* PPE Checklist

- \* Air Tank Management

- \*\* Air Tank Refill

- \*\* Air Tank Cleaning

- \* SCBA Management

When this “Pass All” button is selected, every option on the current page should be passed (the pass option should be selected)

Current UI for PPE Checklist:

!IMG\_8943.PNG|width=828,height=1792!

Desired:

!Screen Shot 2023-09-25 at 3.23.47 PM.png|width=188,height=435!

This will be on the same spot of every page of the PPE checklist, as well as the other mentioned areas.

When this button is selected, it should be as if the user went through on this page and selected "Pass" for each option, like this:

!IMG\_8945.PNG|width=828,height=1792!

Lastly, operations is wanting to create a toggle for this development in the [izfire.com|http://izfire.com] admin, which can be found linked as well.

Issue Key: PL-1490

Summary: Payroll File Total \$ Mismatch - Harrison Poultry

Description: Here is the ticket for Harrison Poultry ([<http://harrisonpoultry.izhips.com>|<http://harrisonpoultry.izhips.com>|smart-link] ) payroll issue as discussed. Below is the initial contact info we got from the payroll associate at Harrison who receives these automated files:

\_Evan,\_

\_Would you please verify the total purchase transactions for the pay period of 9/3-9/9?

In checking this week's payroll deduction file, I am seeing a total amount of \$1159.70 in Innova Zone yet the payroll file generated is only totaling \$743.45. Was there a day that was missed in the file generation?\_

\_Please verify ASAP as we need to process payroll by tomorrow morning.\_

\_Thank you, \_

{quote}\*Colton Carver (External)\*

Hey Karthiyayini Muthuraj, one more (last) thing: Were you able to find anything about the Harrison payroll report that we send? "also, do you know anything about a payroll file that we send to Harrison Poultry? I believe it's automated, but I hadn't heard anything about it until today & they s...{quote}

Colton Carver I checked in the backend code, Yes we have the API for Harrison poultry payroll reports, and it was lastly generated on Nov 9, 2020 . I don't see any API invoke call in lambda and S3 files, the code itself the generating files are stored in the system uploads directory: /var/www/html/app/public/uploads/harrisonpoultry/edi\_payroll

Issue Key: PL-1484

Summary: New Development - Cloning Employee Inventory Report - Adding Product Description Column

Description: We have made several recent changes to the Employee Report, such as:

\*

[<https://izhips.atlassian.net/browse/PL-1448>|<https://izhips.atlassian.net/browse/PL-1448>|  
smart-link]

\*

[<https://izhips.atlassian.net/browse/PL-1449>|<https://izhips.atlassian.net/browse/PL-1449>|  
smart-link]

\*

[<https://izhips.atlassian.net/browse/PL-1420>|<https://izhips.atlassian.net/browse/PL-1420>|  
smart-link]

In addition to these changes, we want to clone the Employee Inventory report (with the above additions included) to create a new report. This report will be called the “Firefighter Inventory Report” and will include all of the above additions, as well as a new column in the portal and the export, which will be called “Product Description”. This will use the data from the “product description” box in the product details of each product in the system:

Issue Key: PL-1480

Summary: AFD Dev Request

Description: Colton-

We have another adjustment we would like to make in the AFD system (amatxamafd). You'll find two worksheets within the document attached (coats/pants).

NOTE: The numbers in the documents are the product's "Barcode" numbers. These numbers match existing products within the system. We are simply wanting to adjust the following items within the system:

\* Product Details

\*\* We need the Loaner Checkbox turned on for these items

!image002.png|width=79,height=28!

\*\* We need the Bin Locations changed

\*\*\* Coats Worksheet = LOANTER COAT

\*\*\* Pants Worksheet = LOANER PANT

\* Attributes

\*\* We also want the Loaner Attribute turned on in case the customer traditionally issues this item

!image003.png|width=94,height=88!

Let me know if you need further details.

Thanks,

Issue Key: PL-1477

Summary: CLONE - New Development - Injection / Sync Options for Non-Injected /  
Non-Product Barcode Scans in Station Zone - Injection Toggle - Back-End

Description: Previously, in  
[https://izhips.atlassian.net/browse/RN-1786|https://izhips.atlassian.net/browse/RN-1786  
|smart-link] &  
[https://izhips.atlassian.net/browse/PL-1422|https://izhips.atlassian.net/browse/PL-1422|  
smart-link], we created a toggle to disallow any non-injected, non-asset checkbox, or  
non-product barcodes from scanning.

However, we are now wanting to expand on this option with two new toggles to give  
users more options. In addition to the Quick Check / SZ Asset Toggle, we want to give  
users two new abilities when unidentified assets are scanned in SZ, which will be a sync  
\_or\_ an Inject option on the app.

Here are more details for these two new related developments:

[^Station Zone Sync or Inject prompts.xlsx]

In addition to these two developments, we want to have the app prompt users that  
asset is not injected, a product barcode, or an asset checkbox product as soon as the

asset is scanned. Currently, users are not prompted / notified until “Done” or “Done and Exit” is selected. Is it possible to change this logic for these two new developments?

Issue Key: PL-1468

Summary: Add Partial Search Results to Remain After Navigating Off of Page -

## Employee List in Company Admin

Description:

In

[<https://izhips.atlassian.net/browse/PL-1340>|<https://izhips.atlassian.net/browse/PL-1340>|smart-link], we added the ability for partial text / search results to remain in the product page once a user navigates into a product, then back into the main product page. Can we do the same with the Employee page?

Currently when search, then go into one of the employee profiles, the text is removed when navigate back to the employee page:

!Screen Recording 2023-08-24 at 3.04.55 PM.mov|width=1920,height=1080!

Desired:

When search, all relevant data populates:

!Screen Shot 2023-08-24 at 3.05.18 PM.png|width=1920,height=966!

Then, when the user goes into an employee profile, makes changes, views, and hits “Cancel”, or “Save and Close” -->

Search text remains & data results still filtered:

!Screen Shot 2023-08-24 at 3.05.18 PM

Issue Key: PL-1465

Summary: Amatxamafd Not in System Product Updates- Want to Change assets from "Not in System" to Product Name

Description: Similarly to [https://izhips.atlassian.net/browse/PL-1423|https://izhips.atlassian.net/browse/PL-1423|smart-link], there are a lot of "Not in System" products issued in AFD's system, however a lot of these "Not in System" products are assets that should be associated as a specific product. We are wanting to see if we could update the assets in the attached sheet so that they show up as the correct product, instead of "Not in System".

For instance, asset "0008691152" was originally issued as 0008691152-52XXL-COAT

\*(0008691152-52XXL-COAT)\*, then returned and reissued to another employee, but was reissued as "Not in System":

!Screen Shot 2023-08-23 at 4.55.03 PM.png|width=657,height=447!

!Screen Shot 2023-08-23 at 4.55.20 PM.png|width=1440,height=775!

Is it possible to once again update these assets so they are associated with the correct products? Here are all of the assets that would need to be updated:

Issue Key: PL-1462

Summary: FD App reports - Entries are repeated in Reports Export document

Description: Steps:

Perform transactions from Each checklist [PPE, Routine Pant & Coat]

Go to the Department portal

Export records without any specific filter criteria.

Actual:

\* If we export without any filters - each record is repeated once again in the exported document. [2 entries are there for each transaction] - {color:#ff5630}\*ISSUE\*{color}

\* If we export with Employee filter - same as above - {color:#ff5630}\*ISSUE\*{color}

\* But, If we export with Checklist type filter -- Working fine. Each record is exported only once as expected

Summary: Changing Associated Products Assets Are Injected As - creksarktoob

Description: In creksarktoob, there are a lot of assets that were injected as a “Small Tool” via the Data Hoop. However, we want to change the product name for these to “Hook”. Is it possible to change these attached assets to show as “Hooks” instead of “Small Tools”?

[^Hooks to be Injected.xlsx]

----

Colton,

As we discussed I have attached the file of the hooks that need to be injected. I am unsure if there are any more that I missed but this will be a good start.

Thanks,

Issue Key: PL-1459

Summary: Company Admin - Product Bulk Upload Logic Changes & Additions - Bulk Upload Page

Description: In  
[<https://izhips.atlassian.net/browse/PL-1443>]<https://izhips.atlassian.net/browse/PL-1443> smart-link] &  
[<https://izhips.atlassian.net/browse/PL-1452>]<https://izhips.atlassian.net/browse/PL-1452> smart-link], we want to make several changes to the bulk upload process. In this ticket, we want to also make some changes to the bulk upload page in the company admin.

We want to add:

\* Missing Type 2 Attributes - Independent Attributes (Add to Selections in the Product Bulk Upload Screen)

\*\* Expiration Date

\*\* Expiration 2 attributes (if created)

\* Alert Emails Section (Add to Selections in the Product Bulk Upload Screen)

Any alerts / attributes selected at this time should be applied to all products in the current bulk upload.

Here is the current bulk upload sheet:

Issue Key: PL-1454

Summary: Pulling Tool Information - PILNCSANTOO

Description: Colton,

Attached is a working document of approximately 500 unique assets from Pilgrims Sanford.

The reporting website and CRN is PILNCSANTOO.

I simply need the Time/Date of the first transaction for each asset#, as well as the Time/Date of the last transaction for each asset#. The last two columns need to be completed for each Asset#.

Keep me posted on the dev team's ability to complete this for me.

If they are not able to do this, I will need to hand this off to iSupport or Allocate 6-8 hours myself to complete this for the customer.

Thanks,

Issue Key: PL-1452

## Summary: Product Creation - Bulk Upload Sheet Changes & Additions

Description: This ticket is for the additions to the bulk product upload sheet that we use. Below, there are several recommendations requested by Zack. This ticket encompasses only the additions to the bulk upload sheet, which are:

- \* Category and Zone Selections (Add to the upload spreadsheet)
- \* Asset Check Box (Add to the upload spreadsheet)
- \* Hazard Items Check Box (Add to the upload spreadsheet)
- \* Confirmation Signature Check Box (Add to the upload spreadsheet)
- \* Loaner Check Box (Add to the upload spreadsheet)

Here is what the new Bulk Upload sheet should look like / contain:

[^ProductSamplemockup.xls]

[<https://izhips.atlassian.net/browse/PL-1459>|<https://izhips.atlassian.net/browse/PL-1459>|  
smart-link]. holds the changes required changes made to the bulk upload page in the  
company admin, while  
[<https://izhips.atlassian.net/browse/PL-1443>|<https://izhips.atlassian.net/browse/PL-1443>|  
smart-link] describes the desired logic change to the bulk upload process so that  
products will be uploaded into the Zone / Category based on the upload document.

----

Colton-

Thanks for sending the mock-up to review. After looking through all the details and reviewing with Eastland, I understand what the team is trying to accomplish. Before we build an entire new zone in the system, I would like you to investigate our “Bulk Upload” functionality for products in the customer admin. I am seeing a few challenges that would need to be addressed if we wanted to go this route. My suggestions below.

\*Adjustments:\*

Category and Zone Selections (Add to the upload spreadsheet)

Missing Type 2 Attributes - Independent Attributes (Add to Selections in the Product Bulk Upload Screen)

**\*Additions:\***

Asset Check Box (Add to the upload spreadsheet)

Hazard Items Check Box (Add to the upload spreadsheet)

Confirmation Signature Check Box (Add to the upload spreadsheet)

Loaner Check Box (Add to the upload spreadsheet)

Alert Emails Section (Add to Selections in the Product Bulk Upload Screen)

I believe this is the better solution to our customer's challenge and will create a better feature for the rest of our system builds for our team and future fire department system additions/new system builds. I believe we start with adjusting the Product Bulk Upload to help all of team with builds and I believe it will satisfy AFDs request. If it doesn't satisfy AFD, then we will revisit the Product Creation Zone dev request.

Please give us your thoughts on my suggestion and have the dev team look at this dev request to give estimates.

Thanks,

Issue Key: PL-1446

Summary: New Feature - Barcode or QR Code Generator for Quick Check Products in Company Admin

Description:

Colton-

I'm submitting a mockup that would allow our team/customers to export product QR Codes with one click through our customer admin. Let me know if you have any questions as you review this.

Thanks,

----

Eventually, we would like to have the ability to create a "Product Barcodes" button in the Products section of the company admin, which users can select, and that will print

either barcodes or QR codes (preferred) for each of the product barcodes, along with the product title, picture, etc. Ideally, these QR codes would automatically generate and open in an Excel workbook, which can easily be printed and used for Quick Check / SZ issuances.

Building on this idea (once POC completed), we would want users to have the ability to select all products they want to include in this workbook want - hit the barcode creator button - make sheets of QR or barcodes - make PDF with 8-10 on a page. Have -QR creator by barcode - select all, select few products - could have pic, title, QR code...\*first\*: hit export, select which ones want to export - > PPE zone, export only selected - just add another column and will be a barcode / QR code.

-----

Issue Key: PL-1443

Summary: Company Admin - Product Bulk Upload Logic Change - Zone / Category Selection

Description: We want to be able to bulk upload products into desired Zones / categories. So, that when these products are uploaded, they automatically go into the correct Zones (this will be alternative to uploading all products into category selected by the upload picker.

In order for this to work, we will likely need to have the Zones already exist before being able to bulk upload products into a company, but we want for categories to be automatically added, even if they don't exist (if this is possible).

Currently, using the existing bulk upload process, products are all added to one category, which is determined by this loader below:

!Screen Shot 2023-08-17 at 3.54.10 PM.png|width=1920,height=972!

Then, once all products are uploaded, operations will go in and change the category / zone if necessary. However, we are wanting to add the Zone / Category options to the bulk upload sheet (along with other items from [https://izhips.atlassian.net/browse/PL-1452|https://izhips.atlassian.net/browse/PL-1452|smart-link]), and this zone / category selection should automatically upload all products

into the correct zone / category. Here is an example of the sheet:

[^ProductSamplemockup.xls]

Is it possible for the logic to be: If the Category loader option is left to the default “Select Category” option, the bulk upload sheet will be referenced to determine which Zone / Category each product is loaded into? If category is not selected in the admin or in the bulk upload document, can we only then throw an error and require one to be filled out?

Issue Key: PL-1441

Summary: Injection Zone Logic Change

Description: [Tuesday 4:04 PM] Colton Carver

Hey Karthiyayini Muthuraj, I'm not too sure if you remember, but a long time ago we wanted to have the ability for items injected into one system as a certain product to feed all other systems with the same injection data. I believe this was the ticket: [\[https://izhips.atlassian.net/browse/PL-690\]](https://izhips.atlassian.net/browse/PL-690)[|https://izhips.atlassian.net/browse/PL-690](https://izhips.atlassian.net/browse/PL-690)[|smart-link](#)]

Operations wants, for instance, if asset no "54321" was injected as a "no cut glove" in ccprod via Injection Zone, we want that same asset to register as a "no cut glove" when scanned in other systems via the app, such as smp, jbsdemo, etc. So we want to share injection data for products across systems & I wanted to see whether we have this capability, or what we need to do to change this logic (add to next release, handle in a new ticket, etc.)?

Colton Carver We need to change this logic

[8:04 AM] Colton Carver

Karthiyayini Muthuraj, okay. I will put a ticket in for this. Will it be backend changes only / do you have any estimate by chance?

[8:05 AM] Karthiyayini Muthuraj

Yes backend changes only . The estimate would be 2 hours on development and 1 hour

for testing

like 1

Issue Key: PL-1439

Summary: Store Aramark vault location code

Description: We need to store a 'location code' that Aramark will provide for each vault. This location code needs to be included in the CSV we will create with vault scan information for Aramark ([EDI-157|https://izhips.atlassian.net/browse/EDI-157]).

Maybe this can be done without any need for a schema change to the database.

The location code could be set using Retool in the config\_toml column of the iz\_hoop\_mappings table. If the vault transactions in the database already store the hostname, then the EDI script could use the hoop mappings table to map the hostname to the location code for each transaction.

Issue Key: PL-1438

Summary: Aramark vault takeover - config support

Description: The next step for the new vault software is to pull the config from the server (iz\_hoop\_mappings table).

This should include (from the config\_toml column so it can be set using retool):

IP address for the reader

server URL for submission of tag scans

vault hostname

vault location code - provided by Ararmark

Issue Key: PL-1434

Summary: CLONE - New Development - Area Audit Report

Description: We are wanting to create a new App report called the “Area Audit Report”. This report will work similarly to the current Area report, but will also include the ability to perform audits (like the FM report), which will then also feed the Daily TCP Audit report. This report:

- \* Should have “Confirm Audit” and “Send report” buttons on the bottom
- \* Should organize area first by date, then by area alphabetically
- \* Have areas with all issued products turned in highlighted as gold:.

So this report should look like the following:

!image001.png|width=373,height=535!

Additionally, we want to add a hyperlink / popup functionality for the “out” products (see above). These are the red text and the popup would come up and show the following items:

- \* Date Issued

- \* Employee Name

- \* Product Title

- \* Asset No.

The popup:

!Screen Shot 2023-07-31 at 2.54.18 PM.png|width=432,height=621!

There doesn't need to be a popup for the "Total In" column at this time.

Issue Key: PL-1429

Summary: CLONE - Emp Inventory report Return - Facing issue when returning few qty's out of fully issued quantities

Description: \*Steps:\*

# Issue a product with a Quantity as 4

# Now, go to the Emp. Inventory report and Return 1 Qty alone

[~accountid:611fdca928ae75006af11099] Please check and confirm the expected results

\*Issue 1:\*

+with 4.79.9(229) build & Normal Products:+

The Product is removed from Employee Inventory Report and Emp. Return inventory screen even when only 1 Quantity is returned out of 4.

**\*Expected:\***

1. User should be allowed to return the same product via Emp. inventory report after returning once with a different qty value.
2. Product should be removed from the Employee inventory Report only after ALL Issued quantities are Returned.
3. Product should be removed from the Employee Return inventory screen only after ALL Issued quantities are Returned.
4. User should be able to return a few Quantities from the Employee inventory report and the remaining from the Return inventory screen.

!Emp inventory report - v229 build with production --  
issue.mov|width=1920,height=976!

\*Expiration functionality tested with 4.79.9(299) with PL 1176 branch:\*

\*Issue 2\*: If the Product has Expiration 1 & 2 Attributes and is returned, Then as expected

\* Expi 2 attributes is updated NA

\* Expi 1 attribute is moved to Removed status

But, the changes are happening even if 1 Qty is returned out of 4 issued.

\*Expected\*:

Expiration 1 & 2 changes should be updated in the expiration report after all quantities are returned.

Currently, the same scenario is working fine when returned from Employee Return inventory.

After All Quantities are returned, based on the Return reason Expi 1 & 2 attributes are updated.

Issue Key: PL-1424

Summary: CLONE - UNLOST - Facing issues when Multiple Quantities are involved in the transaction. Added 2 such use cases

Description: Explained the scenarios to Colton and the expected result has been confirmed.

\*Issue 1:\* Unable to perform UNLOST for more than 1 Qty

Steps:

1. Issue 4 Qty's of same product from Zone screen
2. Mark all 4 Qty's are LOST from Employee return inventory
3. Reports are updated as expected.
4. Now, Try to perform UNLOST for more than 1 Qty

Actual:

The user is allowed to perform UNLOST for only 1 Qty

Once marked as UNLOST - Report is updated with the 1 returned qty details and the previously returned 3 Qty details are missing.

Expected:

The user should be able to perform UNLOST for more than 1 Qty.

Based on the new return reason, the reports should be updated.

Admin Qty should be updated based on the return reason.

!Issue - 1 product - multi qty marked as LOST and trying to UNLOST.mov|width=1920,height=976!

\*Use Case 2:\* When UNLOST is performed, the other return quantity details are missing from the report.

## Steps:

1. Issue 4 Qty of the same product from the Zone screen
2. Return all 4 Qty by returning 1 Qty for each Return reason.
3. Reports are updated as expected. [Eg: Quantity details at Employee reports populated for all return reasons] Return = 1, Defect = 1, Disposal = 1, Lost = 1
4. Now, Try to perform UNLOST for that 1 Qty

## Actual:

Once marked as UNLOST - The report is updated with the 1 Returned Qty details alone and the previously returned details are missing

## Expected:

The Return quantity should be updated as per the latest details.

Admin Qty should be updated as expected

Eg: In Employee Report - Return = 2, Defect = 1, Disposal = 1, Lost = 0.

!Issue - Same product multiple quantity return and 1  
Unlost.mov|width=1920,height=976!

Will try to add 1 more scenario if possible.

Issue Key: PL-1423

Summary: Amatzamafd Not in System Product Fixes - Need to be Changed from "Not in System" to Correct Product

Description: [~accountid:5e60790cab60320af8f87101],

Is it possible to associate each of these assets as products they were currently issued out as?

Each of these assets were first issued out as a defined product, then returned, then reissued. However, when they were reissued they were reissued as “NOT IN SYSTEM”, instead of the previous product.

For example, in [amatxamafd.izhips.com|http://amatxamafd.izhips.com], asset “0010382412” was first issued as “0010382412-36R-PANT (0010382412-36R-PANT)”, then returned. However, they product was reissued as a “NOT IN SYSTEM” product instead of the Pant:

!Screen Shot 2023-07-27 at 2.41.26 PM.png|width=665,height=465!

Is it possible to change each of the attached products to reflect the correct product instead of “NOT IN SYSTEM”?

Please see email for more details

Issue Key: PL-1422

Summary: CLONE - New Development Idea - Non-Injected & Non-Product Barcodes or Non-Asset Numbers Block Toggle

Description: We are wanting to create a toggle that, when enabled, will not allow users to issue the generic SZ product...In other words, products either have to be injected, asset checkbox products, or be a product barcode in order to be issued.

We want the toggle to be similar to:

!Screen Shot 2023-08-17 at 4.41.51 PM.png|width=1113,height=601!

When this is enabled, all asset # issuances should be disallowed. Instead, if a scanned asset is not an asset checkbox product, a product barcode, or an injected product, then an error message should popup similar to:

!image003 (73bb9da5-9b02-4e52-a5e1-2739848babd1).png|width=1668,height=2388!

(Except this will be in Station Zone).

We will likely add other functionality to this filter later, but want to start with the asset block.

----

Colton-

We met with Brian on Thursday, and he wants me to produce a development that will prevent Amarillo Fire Department from scanning non-products through their system. They currently do this quite a bit, and it will really hinder our growth if we don't fix it now.

My development idea stems from the pop-up we have in Sharpening Zone when a knife

that isn't associated is scanned:

Master Admin Toggle:

!cid:image002.png@01D9B8BF.BD332410|thumbnail!

Application Pop-Up:

!image004 (e57f6b87-ce12-4c64-ae44-785834db4c7f).png|width=553,height=794!

Would there be a way we could create something similar to this through quick check issuance/return that would alert users of “non-product” scans? If the system doesn’t match to a product “barcode” field that has an Asset Checkbox toggled on, then it would give a similar pop-up as seen below:

!image003 (ccef6e5f-d31f-410a-b852-18fca321483d).png|width=1668,height=2388!

I may need help brainstorming ways to accomplish this.

Summary: Images From Portal Missing - csbidkunprob

Description: csbidkunprob has several images attached to transactions that are not showing up in the portal. In particular, this below transaction shows that there are images attached, but they are not visible in the portal:

!Screen Shot 2023-07-21 at 4.28.30 PM.png|width=1440,height=790!

!Screen Shot 2023-07-23 at 10.25.48 PM.png|width=984,height=717!

!Screen Recording 2023-07-23 at 10.25.11 PM.mov|width=2880,height=1800!

So, we wanted to see:

# Why this issue may be occurring (app or PL)

# If it would be possible to retrieve these images in some way? This customer is having an audit soon and wants to use these images.

Summary: New Project - Innova Zones Vault Takeover -Integration .NET

Description: Colton,

Please see the document attached. This is the next project we will do with Aramark. I want to get this in front of the developers(I assume Karthiyayini?). I need to get some

feedback on suggestions and hours. This will be billed to Aramark, so the hours and scope of the entire project is very important.

Looking forward to your thoughts on the doc.

Thanks,

Issue Key: PL-1413

Summary: Merging Duplicate Employee Profiles in Several Systems

Description: In  
[<https://izhips.atlassian.net/browse/PL-1394>|<https://izhips.atlassian.net/browse/PL-1394>|  
smart-link], one of our customers was facing the issue of having multiple employee profiles showing up in the reports.

We have several other locations facing this issue, such as jbsoupatoob & pilflivpro:

!Screen Shot 2023-07-20 at 2.37.57 PM.png|width=1440,height=859!

!Screen Shot 2023-07-20 at 2.38.57 PM.png|width=1440,height=859!

Is it possible to merge these employee profiles once more for these companies?

Issue Key: PL-1412

Summary: Changing Logic for Asset Checkbox Products, so These Products Feed the SZ Reports

Description: We want to change the logic for all asset checkbox items, so that they feed the Station Zone reports, such as the area report, Employee Asset Return, etc.

We made a similar change to all injected products previously, which are issued via Station Zone, so that they would be considered SZ products also.

Issue Key: PL-1411

Summary: Non-Hazardous products are displayed in TCP Daily audit report Upon  
Confirm Audit from FM report - Production issue

Description: Non-Hazardous products are displayed in TCP Daily audit report Upon  
Confirm Audit from FM report - Production issue

## Use Case:

- \* KIT having both Haz & Non-Haz products is issued
- \* Perform Confirm Audit in FM report - FM Report shows only Hazardous products as expected.
- \* Check TCP daily audit - The other Non-haz products from KIT is \_also\_ fetched with Audited details:

## Example:

This Kit was issued, which had all non-hazard items, except for the "SLEEVE,22" CUT RESIST":

!Screen Shot 2023-07-19 at 3.18.50 PM.png|width=1269,height=943!

And only the one hazard item showed up on the FM report (as expected), along with the other hazard items:

!Screen Shot 2023-07-19 at 3.19.35 PM.png|width=1266,height=763!

Then, we did one “Confirm Audit” in the FM report and now in the TCP Daily Audit report, the other products in the Kit, which are non-hazardous, are now showing up on the TCP Daily Audit report also:

!Screen Shot 2023-07-19 at 3.21.05 PM.png|width=890,height=564!

!Screen Shot 2023-07-19 at 3.23.52 PM.png|width=845,height=343!

Issue Key: PL-1409

Summary: CLONE - New Development - Weekly Issuance Limit - Backend

Description: Colton,

I have a new development request that I want us to explore.

I imagine our customer's having the ability to go into product details of any item in the admin and set the parameters ("Weekly Issuance Limit") for that specific item. For example, you could set blue apron to a "weekly issuance limit" of 5. When you log in that employee and quick scan the item or select "Issue" button for that item on the 6<sup>th</sup> issuance, a pop up box would appear and say, "Employee has reached weekly limit for this product."

The clerk can select "OK" and move on. It's up to the clerk to decide whether they still hand it out, charge the employee, etc. I don't want our system to lock them out of receiving the item and processing the transaction if they truly need it.

I think we set the “Week” timeframe from Sunday morning at 00:00:00 to Saturday night at 23:59:59 by default. If a customer wants the ability to set the time frame, then maybe we make that an option down the road, but I don’t think it’s necessary for now.

I believe this feature would really help drive down usage even further and it’s a great selling point for SMP. I hear all the time from superintendents and supervisors that employees should only receive “X” amount of certain products each week, and this feature would help enforce that.

Correct me if I’m wrong, but the only way a clerk can validate how much product a user has received for the week is to get to the cart screen and click the clock in the top right corner. I believe this process is too time consuming. Other than that, clerks are going

off of memory on who is abusing what. There may be a quicker method to validate usage on a certain item, and if so, let me know.

I've seen this feature in other storeroom systems, such as what is used at Allen Harim Foods. I'm bringing this up because I've had a couple customers ask about this in the past. Coastal Processing just asked if we could start exploring this because it's a feature they would love to see in the Storeroom Program that they want to launch in August. They don't have the expectation of us to have anything developed by then, but they would love for us to explore this development.

Thanks,

{color:#ffffff}Robert{color}-

I think this would be a great feature! I've had several customers ask for this over the years.

I don't think you would need to develop anything from a timeframe perspective, as we already have the "Week Start Day" in each customer admin:

!cid:image003.png@01D9B8C9.C2BE29C0|alt="A screenshot of a computer

Description automatically generated"

I'll let Colton answer the rest, but I think this would be helpful for us and our customers.

Thanks,

Summary: UNLOST - Red Highlight is not removed from FM Web report alone for 1 particular Use case

Description: Explained the scenario to Colton and confirmed the expected result.

Step:

# Issue an asset/product and

# Mark them as LOST from FM App report

# Then, goto Employee Return inventory

# Perform UNLOST with any other return reason

Actual:

Red Highlight is not removed from FM Web Report alone. [\_Status is updated as IN and Return reason is also populated as expected.\_]

The same is working fine in FM App Report.

If 1st version is marked as LOST from other screens and then Unlost is performed, this issue is not occurring.

Expected:

FM Web Report should be updated the same as the FM App report.

Issue Key: PL-1402

Summary: ISP Date Range Bug - amatxamafd

Description: In [amatxamafd.izhips.com|http://amatxamafd.izhips.com], the ISP report is having an issue pulling for certain date ranges. When this report is pulled from 06/01/2023 - Current day (July 13th), no data shows on the report. However, if the report is pulled from 05/01/2023 - current day, then only data populates when the report is ran:

!Screen Recording 2023-07-13 at 9.09.03 AM.mov|width=2880,height=1800!

!Screen Shot 2023-07-13 at 9.10.57 AM.png|width=1440,height=734!

!Screen Shot 2023-07-13 at 9.11.10 AM.png|width=1440,height=739!

However, we would expect data to generate from running the report from 06/01/2023 - 07/13/2023, as there is transaction data from this range:

!Screen Shot 2023-07-13 at 9.11.27 AM.png|width=1440,height=731!

Issue Key: PL-1399

Summary: From PL-1329 + PL-1386 - Changing Count Logic for Zones

Description: # KIT Zone - For Each KIT zone transaction - The Counter is updated to its respective Zones. [Eg: If KIT has all PPE Products, then the counter will get added to PPE Zone only {color:#bf2600}--> This is fine{color}]

So, Currently, the KIT Zone counter will always be 0 irrespective of the actual transactions made via KIT

# If Injected products are issued - The Counter will still add only to the Station zone counter. Not the injected products' actual zone --> {color:#bf2600}We want to change this so that the counter shows for the injected product's actual zone{color}

# If Asset-Products are issued - The Counter will again add only to the Station zone {color:#bf2600}--> Once again, we want to change this logic so that the counter shows for the injected product's actual zone{color}

Issue Key: PL-1388

Summary: iPads Automatically CRN Resetting Daily - tabp

Description: Susan at [tabp.izhips.com|http://tabp.izhips.com] (tystxamaprob) called to let us know that for the last couple of weeks, her iPads are CRN resetting daily between 4:30 PM - 5:00 PM. This happens whether they are idle, or in the middle of transactions. I'm not sure if this would be an app issue vs something with the lambda and as of right now, this seems to be the only location facing this issue currently (though it's possible it's happening at other places also).

One of the iPads having this issue is UUID: \_29C6F063-80D8-49DC-A325-41423FCB2995\_. I am working to get more information for this also.

Issue Key: PL-1387

Summary: Bulk Item Feeding the Stores Issue / Return Report - tlp

Description: [~accountid:5e60790cab60320af8f87101],

In [tlp.izhips.com|http://tlp.izhips.com], there was an issue where multiple sizes of a bulk product were feeding the Stores Issue / Return report. The product was "POLAR GLOVE FOR EMPLOYEE ISSUE (1=1EA)". When I tried to test whether bulk items fed this report in my demo system, I did not have this issue reoccur. I tried to issue via Zone screen, SZ, PPE Zone, etc., but it did not occur in my system. Here are the gloves, which are marked as bulk:

!Screen Shot 2023-07-03 at 4.00.18 PM.png|width=1440,height=733!

Here are the Friday transactions for tlp that fed this report:

[^stores-issue--return-report-06-30-2023-024823-16247.xlsx]

[^stores-issue--return-report-06-30-2023-024250-18842.xlsx]

And here is the Polar Gloves shown feeding this report:

[^polargloves-stores-issue--return-report-06-30-2023-024250-18842.xlsx]

I have also attached emails that have more information. I asked whether this was a new product / a recently-edited product, but it seems that it is not.

Issue Key: PL-1385

Summary: CLONE - Products Marked as "Lost" for swaggertyssausage

Description: In  
[https://izhips.atlassian.net/browse/PL-1371|https://izhips.atlassian.net/browse/PL-1371|  
smart-link], we had in [tlp.izhips.com|http://tlp.izhips.com], as well as in  
[swaggertyssausage.izhips.com|http://swaggertyssausage.izhips.com], several products  
showing as “lost” in both of these systems. However, these products seem to have  
been marked as “lost” previous to the 4.79.9 bundle v122 release went out.

Currently still in s[waggertyssausage.izhips.com|http://swaggertyssausage.izhips.com],  
there are still a few products showing as “Lost”:

!IMG\_1739.PNG|width=1668,height=2224!

!Screen Shot 2023-06-28 at 11.03.18 PM.png|width=992,height=648!

Is it possible to adjust these transactions to “disposal” as well / remove them as “lost” products?

Summary: Changing Logic for Expired Expiration 2 Inventory Attributes, So Users Can Remove These Exp 2 Dates from the Expiration Report

Description: We want to change the Logic for Expired Expiration 2 Inventory Attributes, So Users Can Remove These Exp 2 Dates from the Expiration Report.

IN order to be able to be removed, we want that Exp 2 attributes to be:

- \* “inventory” products (not issued)

- \* Expired

All other Expiration 2 dates should still be unable to be removed.

With this logic, only the two last products would be able to be removed from the following video / report:

Issue Key: PL-1369

Summary: Research for Scandit - Pulling Number of Devices using Scandit

Description: [5/3 11:49 PM] Colton Carver

Hey guys,

Good morning! We are working with the Scandit team to renew the licensing and during this, they are saying that we've had ~1,000 active devices (mostly Android) that are currently using Scandit / have used it over the course of the past 12 months. However, we only have ~490 devices in Meraki and while some devices are managed by the customers, there are not very many (we estimate there are certainly less than 100 devices).

So, I wanted to see if you guys thought it would be possible to pull a list of all devices that have used Scandit over the course of the last 12 months? I'm not sure if you have a way to do this, but I thought I would ask. No action is required now, Barrett and I just

wanted to see if this was a possibility.

-->Scandit is saying that we have more than 1,000 devices using Scandit, but we only have ~500 managed iPads + Android devices. Is it possible to pull this information?

Issue Key: PL-1356

Summary: CLONE - Missing Employee Data

Description: Team,

It appears that we are having the missing employee data for cavtxhertoob for a lot of the charged transactions.

Is it possible to:

# Try and diagnose this issue

# Recover as much of the data from these transactions for cavtxhertoob

I will get more information and add to these tickets as well!

Here is the email:

Colton,

Please look at the attached excel spreadsheet. It seems that our problem with the missing employees is back. This seems to be a growing problem with many of my buildings. This week alone it has happened to Clemens, Caviness and Logansport. Could you let me know if someone is able to look into this issue?

Also is there anything we can do to get the employee data attached to the knives for Caviness, or is the data gone? I would like to know what can be done and let their team know, before Caviness finds out.

Thanks,

Summary: Pulling Clemens New Employee Info Again

Description:

[~accountid:5e60790cab60320af8f87101],

Phil & Zack wanted to know if there is any way we can get the team to pull the same month by month transaction data, but this time include all of the In & Out knife transactions for that time period? This will be similar to the data pulled in [https://izhips.atlassian.net/browse/PL-1285|https://izhips.atlassian.net/browse/PL-1285|smart-link] and will once again be for c[+lemicolpro.izhips.com+|http://clemicolpro.izhips.com/].

This will be 09/01/22 - 01/31/23 & broken down again month-by-month, but will be for all in \_and\_ all out transactions.

Please see below / attached email for more details.

Colton,

Unfortunately, I am going to have to circle back to this project once again. Zack and I were reviewing the data you supplied us, and everything looks good on the PPE side of things, but when we were looking at the knives it looks like the data is only showing us the knives that have been issued out and not the ones that have been returned.

Please see examples of two employees who had the most knives below:

+\*Data Provided by IZ (12.1 – 12.30) – Top 5 Employees\*+

!cid:image013.png@01D99540.71510140|alt="A picture containing text, screenshot, number, parallel

Description automatically generated"

+\*Daniel Aburto – 4 Knives in Data, 8 Knives in Reporting\*+

!cid:image014.png@01D99540.B85ABC20|alt="A screenshot of a computer

Description automatically generated with medium confidence"

+\*Adner Andrice – 3 Knives in Data, 5 Knives in Reporting\*+

!cid:image015.png@01D99540.F08369D0|alt="A screenshot of a computer

Description automatically generated with low confidence"

Is there any way we can get the team to pull the same month by month transaction data, but this time include all of the In & Out knife transactions for that time period?

Please let me know when you get a chance.

Thanks,

Issue Key: PL-1348

Summary: From PL-1167: Dynamic Report – Tote# / Sharpenings Logic Updated

Description:

Colton Carver

last month

[~accountid:61d2692c9ee70a00684b5520] [~accountid:5e60790cab60320af8f87101],

I see what you are saying. Ideally we would be able to implement this logic:

-If Sharpenings transaction type alone is selected-> \_All\_ sharpenings would show up, including:

- \* Issued products

- \* Non-Issued products

- \* Injected Products

- \* Non-Injected products

And users would not need to select any other transactions in order to show the sharpenings only (would not need to select FM, Injections).

And with selecting sharpenings only, we want to be able to pull the following data points:

- \* Employee Name (NA if not issued)

- \* Employee ID (NA if not issued)

- \* Product Title (knife if not injected, or injected tool name)

- \* Asset No

- \* Tote # (Sharpening product)

Would it be possible / practical to allow this to happen, or will users continue to need to select multiple transaction types? I tested with 4.79.9 bundle 120 in [ccdemo.stageizhips.com|http://ccdemo.stageizhips.com/]. Please let me know if any other things needed for testing.

Currently:

- \* Non-Injected tools have product name of sharpening product, instead of Station Zone generic product name
- \* Issued items that are sharpened only show when FM transaction type is selected

However, NA logic seems to be good!

Issue Key: PL-1339

Summary: Change Logic so if a Zone is Toggled Off in the Master Admin, This Zone Will Not Show Up in the Company admin

Description: If zone turned off master company list & platform / category- we want to hide this Zone in the company admin.

Currently:

When a Zone is turned on, it is still visible in the Categories of the company admin:

!Screen Recording 2023-06-19 at 12.01.30 PM.mov|width=1920,height=1080!

!Screen Recording 2023-06-19 at 12.02.56 PM.mov|width=1920,height=1080!

We want for Zones that are toggled off to not be shown in the company admin at all. So if Tool Zone is toggled off in the company details:

!Screen Shot 2023-06-19 at 12.08.41 PM.png|width=1920,height=969!

Then we do not want this zone, any categories within this zone, or products to be shown in the customer admin:

!Screen Shot 2023-06-19 at 12.06.08 PM.png|width=1920,height=974!

If this creates issues, is it possible to require that all categories / products within a zone must be removed before being turned off, or can we just hide all categories / products for Zones that are not enabled via the Edit company page?

Summary: Deleting / Removing Issued Asset - pilgrimsathensdbone

Description:

In

[pilgrimsathensdbone.izhips.com|http://pilgrimsathensdbone.izhips.com], the asset "PURPLE APRON" was issued as product "White Plastic Apron" for employee "JASON FIELDS".

However, we cannot currently issue this asset as a product barcode because it was issued previously. This asset can also not be returned because this employee was deleted.

Is it possible to delete or return this asset so that it can be used as a product barcode for the Purple Apron product in this system?

Issue Key: PL-1335

Summary: CLONE - Quick Check Charged Product Signature Ability

Description: When users use the Quick Check Payroll Deduct Feature, we want a signature box to pop up, like with the new confirm signature ability from [\[https://izhips.atlassian.net/browse/RN-1054|https://izhips.atlassian.net/browse/RN-1054|smart-link\]](https://izhips.atlassian.net/browse/RN-1054), [\[https://izhips.atlassian.net/browse/PL-799|https://izhips.atlassian.net/browse/PL-799|smart-link\]](https://izhips.atlassian.net/browse/PL-799).

So, when the Quick Check Payroll Deduct is enabled and the charge button is pressed in SZ, we want a signature box to pop-up:

!Screen Shot 2023-05-25 at 4.14.25 PM.png|width=1440,height=791!

!IMG\_1238.PNG|width=1668,height=2224!

So, it would look like this:

!Screen Shot 2023-05-25 at 4.24.36 PM.png|width=404,height=551!

However, I am getting details on whether toggle needed for Quick Check signature / if

we should disable this feature if confirm signature is enabled on a product as well.

Issue Key: PL-1334

Summary: Removing Clerk Status For All Employees in pilgacarpro

Description: In [pilgacarpro.izhips.com|http://pilgacarpro.izhips.com], we had an issue with the EDI previously, so we bulk uploaded the employees & gave them all clerk status so they would not be deleted / altered.

However, we want the feed to update employee details moving forward, but want Manoj to run code from [https://izhips.atlassian.net/browse/EDI-142|https://izhips.atlassian.net/browse/EDI-142|smart-link] to this company before removing this status.

Once this is completed, we will want to remove the clerk status for all associates that \_only\_ have the clerk status. So, if an employee in pilgacarpro has more statuses, we want to keep the clerk status for that employee.

So, we would keep the clerk status for these types of employees:

!Screen Shot 2023-05-25 at 3.50.02 PM.png|width=1439,height=789!

And remove the clerk status for these employees:

!Screen Shot 2023-05-25 at 3.50.18 PM.png|width=1440,height=789!

Issue Key: PL-1330

Summary: AFD - Dev Request - Loaner Tag Additions

Description: [[~accountid:5e60790cab60320af8f87101](#)],

Operations is wanting to see if we can do the following:

We have another request for the Amarillo Fire Department system ([amatxamafd](#)). Attached you will find workbook with two sheets. Essentially, the products listed (column A) were personal items, but have just been converted to a loaner item. Therefore, we're looking to do the following things with the dev teams help:

# Return all listed items (utilizing column A) back into inventory

## There may be items that have already been returned

# With each product listed (utilize column A), we would like to add the Loaner Checkbox to each item ()

# We would like to add 'LOANER' in front of the current bin location description

## Before: COAT

## After: LOANER COAT

Let me know if these would be easy adjustments from a development standpoint. If it's risky, let me know and we'll find someone to do this manually for us!

[^Coats-Pants File.xls]

Is it possible / easy to make these adjustments? If not, as stated above, we can do this manually.

Summary: New Development - Daily Zone Log - Transaction by Zone from Master Admin

Description: Colton-

Here is the spreadsheet I built from the Company Section export in the Master Admin.

Let me know what the team says.

Thanks,

[^Daily Zone Log.xlsx]

[~accountid:5e60790cab60320af8f87101], we want to be able to create a breakdown from each system, showing how many transactions were conducted by each zone each day.

We were thinking about an export button, like this one:

!Screen Shot 2023-05-22 at 3.12.32 PM.png|width=1440,height=790!

That would provide us with a list similar to this for each company:

!Screen Shot 2023-05-22 at 3.13.22 PM.png|width=1437,height=601!

Or, we wanted to see if there is a way to send this data to a spreadsheet that updates each day. We want to be able to see the amount of transactions at each location (in each zone), as this gives us an easy tool to see how usage is going for each of our customer locations.

What are your thoughts on this? Do you think we could have this data sent to a live document, or can we create another report?

Summary: Change Logic of Quick Return, So it Will Show Up When Toggled On, Even with Just Station Zone Enabled.

Description: Currently, the Quick Return functionality will only show up in Station Zone is enabled with another zone (Injection, Sharpening, Inspection), but we want to change this logic so that Quick Return will show up, even if Station Zone is only enabled & Quick Return is enabled in the admin.

So, if Station Zone is on alone and this toggle is enabled:

!Screen Shot 2023-05-22 at 2.06.37 PM.png|width=1440,height=792!

We would like Quick Return to be turned on.

Issue Key: PL-1325

Summary: Removing Obsolete Zones - Robert's Demo system

Description: [~accountid:5e60790cab60320af8f87101],

Is it possible to remove the following zones from view from [https://rsmp.izhips.com/admin/product|https://rsmp.izhips.com/admin/product|smart-link] ? They are visible for users in the admin & the sales team is wondering if we can hide these zones from the admin.

Please see below:

Colton,

Is it possible to have the dev team delete out the following zones?

Driver Zone - We no longer sell this

Uniform Zone - Not needed in this system

Uniform + Zone - Not needed in this system

Injection Zone - This is in my separate TCP system

Inspection Zone - Obsolete

Cintas Zone - Obsolete

Truck Zone - This is in my separate YMP system

Trailer Zone - This is in my separate YMP system

This system has just become crazy and I'm trying to simplify it for myself and for any other future sales reps that need their own sales demo system.

If deleting any of these make quick check stop working, I do not want it deleted.

Thanks for your help. This will pay dividends to get this system cleaned up well for future sales.

Issue Key: PL-1323

Summary: TCP Daily Audit Report Adjustments - Adding Product Name, QTY, & # of Audits Columns to Export, # of Audits Also to Portal Report

Description: Colton,

I wanted to submit a few adjustments for the TCP Daily Audit Report. After reviewing with Zack, we have decided that we want to move forward with adding the following 3 columns:

- \* Product Name

- \* Quantity

- \* # Of Audits

I have attached a mockup of the report that will show the new additions, as well as show where we would like these columns to be placed. Please review the following adjustments and let me know if you need anything else.

Thanks,

[^TCP Daily Audit Report (Additions).xlsx]

These columns should only be added to the export, not the portal. However, we also want to add a “# of Audits” column to the portal as well!

Issue Key: PL-1311

Summary: Fixing "Not in System" Transactions for AFD

Description: As mentioned in [https://izhips.atlassian.net/browse/PL-1296|https://izhips.atlassian.net/browse/PL-1296|smart-link], Amatzamafd had lots of "Not in System" generic SZ products issued with the same asset #'s as a lot of asset checkbox products in their system. However, we will be adding a validation to the backend API to fix this issue moving forward. But for now, we wanted to see if we could change the "Not in System" product issued / returned by AFD's employees to the correct product with the same barcode value.

Sp for instance, a "Not in System" product with asset 0009667802 was returned by Total Lion Care:

!Screen Shot 2023-05-11 at 10.55.41 AM.png|width=1440,height=598!

Can we adjust this to show that this was actually this product:

!Screen Shot 2023-05-11 at 10.55.16 AM.png|width=1440,height=736!

However, once this product with this same asset was supposed to be checked in by Total Lion Care, we want to keep it issued to this employee:

!Screen Shot 2023-05-11 at 10.58.47 AM.png|width=962,height=731!

So, we just want to basically change the history of this product, not necessarily the current status of the product.

Issue Key: PL-1302

Summary: Adding Bulk Return Option - Employee Inventory Report - Portal

Description: [`~accountid:5e60790cab60320af8f87101`],

In the application, we have the ability to select all relevant products after pulling report (and applying all desired filters), then “bulk returning” these products. We want to have this same ability in the Employee Inventory report in the portal.

In

[<https://izhips.atlassian.net/browse/PL-1165>]<https://izhips.atlassian.net/browse/PL-1165> smart-link], we added the return column to this report:

!Screen Shot 2023-09-25 at 4.25.49 PM.png|width=1038,height=686!

Would it be possible to make the “Return” clickable, so that when this return is selected:

!Screen Shot 2023-09-25 at 4.46.30 PM.png|width=670,height=429!

Then, once the “Return” Button is pressed, is it possible to have a menu pop up similar to:

!Screen Shot 2023-09-25 at 5.17.24 PM.png|width=823,height=562!

From the menu above, the user can only select YES or NO, and only one of the Return Reasons. If no is selected, the user should not be able to select a return reason and can hit “save” to exit. Or, they could just hit cancel.

Is this possible to do?

Summary: Clemens New Employee Info - Creating Spreadsheet with Employee Products for Outlined Employees By Month

Description: [[~accountid:5e60790cab60320af8f87101](#)],

Operations is wanting to pull the products in the inventories for new employees for [c\[lemicolpro.izhips.com|http://clemicolpro.izhips.com/\]](http://clemicolpro.izhips.com/), once again. Essentially, they are wanting to have a spreadsheet similar to the Employee Inventory report for each of the employees listed in the attachment. Except this time, can we break it down month-by-month for the attached employees?

[[^Clemens New Employees.xlsx](#)]

Below is the email:

Colton,

I'm going to apologize once again but after talking with Zack, he would like me to get the data for these Clemens employees separated out month by month, so could you please have the team get me the data for these same employees but break them down by the dates below:

+\*Dates\*+

9/1 - 9/30

10/1 - 10/31

11/1 - 11/30

12/1 - 12/31

1/1 - 1/31

Let me know if you need anything else.

Issue Key: PL-1296

Summary: Duplicate "Not in System" Assets Checked out for AFD (amatxamafd)

Description: AFD has several assets that are being checked out twice. One of these duplicate assets scanned are an asset checkbox product barcode, while another asset is a generic SZ product scan (called "Not in System" for this company).

There are multiple examples of these duplicate asset issuances, such as with asset "0009667802". This asset was issued out twice and as two different products:

!Screen Shot 2023-05-03 at 8.02.56 AM.png|width=981,height=791!

[^asset-scan-report-05-03-2023-010332-19708.xlsx]

However, the system should not allow the same asset to be checked out multiple times and this asset should only be for product "0009667802-36L-PANT"

!Screen Shot 2023-05-03 at 8.04.46 AM.png|width=1438,height=793!

Another example of this is seen with asset “0008695012”. Here is the history of this asset:

!Screen Shot 2023-05-03 at 12.07.29 PM.png|width=1920,height=809!

It was somehow issued as a barcode / SZ generic product instead of “0008695012-38XL-PANT” once it was returned + issued again. However, this product should be:

!Screen Shot 2023-05-03 at 12.08.57 PM.png|width=1920,height=971!

Additionally, Eastland shared a document of all of the “Not in System” product assets that should actually be asset checkbox products, but are showing up as “Not in System” products instead.

[^Not In System Transactions.xlsx]

It appears that a lot of these products on this Excel were not ever issued to employees, or issued as assets and not product assets, but are not linked to a product. For instance, asset “0007003672” shows as:

!Screen Shot 2023-05-03 at 8.13.28 AM.png|width=994,height=540!

However, this should be product “0007003672-40L-PANT”

!Screen Shot 2023-05-03 at 8.14.11 AM.png|width=1440,height=790!

I will update more information to this ticket for investigation.

Issue Key: PL-1295

Summary: Price Change Investigation: [tlp.izhips.com](http://tlp.izhips.com)

Description: [[~accountid:5e60790cab60320af8f87101](#)],

Is it possible to look into a product in [[tlp.izhips.com](http://tlp.izhips.com)|<http://tlp.izhips.com>] to see if we can find out who changed the price of the product during the date range of 04/14-04/19 of this year?

Colton,

I was looking to see if we would be able to see who/when the product below was updated? This product is in \*tlp\* system and the model number is PI501087 (2XL Polar Gloves):

!cid:image002.png@01D97C1D.E53DF900|alt="Graphical user interface, application

Description automatically generated"

!cid:image003.png@01D97C1D.E53DF900|alt="Graphical user interface, application

Description automatically generated"

The price is supposed to be \$5.49 and the item was changed to \$230 sometime between 4/14 – 4/19.

Let me know if you are able to find out anything.

Thanks,

Summary: Amarillo Fire Department - Boot Association - Again

Description: [~accountid:5e60790cab60320af8f87101],

Would it be possible to associate the boots mentioned in the attachment to the employees mentioned as well?

Colton-

We have another request for the Amarillo Fire Department (amatxamafd). Attached, you will find a sheet with five data points. Through PPE Zone, we would like to tie the “BOOTS” products by +\*size\*+ (column D) to each ID# attached, while assigning an Asset#, as well as an expiration 1 expiration date.

Example Employee (Nathan Baker – ID# 487989)

!cid:image002.png@01D967AF.04E933B0|thumbnail!

Return Inventory After Dev Upload:

!cid:image003.jpg@01D967B0.056FAC50|alt="Graphical user interface, text, application

Description automatically generated"

NOTE: The serial numbers with leading zeroes in the spreadsheet must have 10 total digits.

NOTE: Each size (Column D) in the spreadsheet is its own product in a size dropdown menu. Let me know if you need further information on this.

Reach out if you have any questions.

Summary: Once Again - Clemens New Employee Info - Creating Spreadsheet with Employee Products for Outlined Employees

Description: [[~accountid:5e60790cab60320af8f87101](#)],

Would it be possible to pull this same information for the attached employees for [c\[+lemicolpro.izhips.com+|http://clemicolpro.izhips.com/\]?](#)

However, this time would it be possible to pull from the date range: 9/1/22 - 1/31/23

[^Clemens New Employees.xlsx]

Hey Colton,

Sorry to do this again, but I am just curious to see what the numbers are for this time period compared to what you provided me below.

Could you please get the team to provide me with transaction information for the same employees except make the timeline 9/1/22 - 1/31/23?

Thanks,

Issue Key: PL-1284

Summary: Adding Products to Loaner Report - swaggertyssausage

Description: [`~accountid:5e60790cab60320af8f87101`],

Would it be possible to add the following items to the Loaner report?

Each of these products were issued previously to being marked as “loaner” items. However, would it be possible to keep these products issued out, but also add them to the loaner report as well?

Colton,

Attached is the list of Swaggerty's Loaner Items that need to be added to the Loaner Report.

These have all been tagged as "Loaner" post issuance to the employee.

These all show "OUT" on the In/Out Report, but do not currently show up in the Loaner Report.

If these could be added to the Loaner Report using the time stamp on the IN/OUT Report, that would be awesome.

Issue Key: PL-1279

Summary: Changing Logic of Trailer Zone So That When "Empty Trailer" is Selected in the Trailer Zone Report, the Inventory Adjustment Report Also Shows This Adjustment

Description: [Tuesday 6:14 PM] Colton Carver

Hey guys,

Currently, when users empty the Trailer Inventory report, this does not feed the Inventory Adjustment report. However, it looks like this development was done previously:

[<https://izhips.atlassian.net/browse/RN-207?jql=text%20~%20%22empty%20trailer%22>  
|<https://izhips.atlassian.net/browse/RN-207?jql=text%20~%20%22empty%20trailer%22>  
|smart-link]

[<https://izhips.atlassian.net/browse/PL-126>|<https://izhips.atlassian.net/browse/PL-126>|smart-link]

Is this feature already released? If not, how much work would it take to re-implement this to prod?

[Tuesday 10:42 PM] Karthiyayini Muthuraj

PL-126 has not yet been released to production; the code was developed in legacy code; we must change the legacy code to Laravel 8 version code. However, it would not take long to re-implement.

-----

Issue Key: PL-1277

Summary: CLONE - Check In & Inventory Functionality - Front-End

Description: This new development includes a new “CHECK IN & INVENTORY” button in the Station Zone return screen. This new button will be controlled by a toggle in the master admin and (only) when this toggle is enabled, the “CHECK IN” button will be replaced with a “CHECK IN & INVENTORY” button in Station Zone.

In addition to this new button, instead of returning the scanned assets in SZ, then directing users immediately back to the “Quick Return” screen to return assets (“CHECK IN” button function). This feature will instead return the scanned assets in the SZ cart, then pull up a list of all remaining hazard items in the employee’s inventory (all currently issued hazard items).

The toggle in the master admin should look something like this:

!image009 (a0518c2a-4c5e-4ea4-af0f-bd26f894a84f).png|width=256,height=146!

And when this new toggle enabled, the “Check In” button should be replaced with another button looking something like this:

!image003 (2ea1830e-c241-4a9c-82a7-782620b12d7f).png|width=50%!

Then, if the “CHECK IN & INVENTORY” button is selected with assets in the cart, The assets in the cart should be checked in, then a popup menu listing the remaining hazard items in the employee’s inventory should pop up and look similar to:

!image004 (8568cea2-69a6-44ad-a6f8-685fa0801d0f).png|width=358,height=515!

Then, once the “DONE” button is selected (above), the menu will close and the app should return to the SZ return screen:

!image005 (15dc383f-cd34-4dfb-9cb9-a4b7d688eb17).png|width=50%!

For an example of this new functionality, let’s say the “Check In and Review Inventory” toggle is enabled and employee “Bob Wills” had 3 assets issued to him, “7765”, “1876” & “1234.” Then, “7765” & “1876” were scanned in “Quick

Return” to be returned:

!image006 (c94ecb01-8c4d-44bd-b1d1-a862df38c861).png|width=50%!

Then, the clerk selects “CHECK IN & INVENTORY”:

!image007 (1023fae4-f13a-407c-aef1-d0af4cd1741b).png|width=50%!

In this new development, we would want “7765” & “1876” to be retuned and then a popup menu showing all of the remaining hazard items in this employee’s inventory should then pop up, such as:

!image008 (246f3ebd-7043-4885-9ba3-f204be5e3f6b).png|width=361,height=513!

Additional note: If the “Check In and Review Inventory” toggle is enabled in the Master Admin, The “CHECK IN & ISSUE” and “CHECK IN & EXIT” functionality should still

remain the same as currently in production.

Lastly, if multiple assets are returned that belong to multiple employees, we would want the inventory menu to show the employee inventory information for all employees

Summary: Adding GL Account to Payroll Report in Portal, Export

Description: Hey Colton,

I wanted to reach out to you and see what I would need to do in order to put in a request to add a column or two to the Payroll Report. I am curious because JBS Green Bay is looking for two columns to get added to the report that would be helpful to them.

The first column I would like to add is going to be a department column. We have the department on the report online, but not on the exported version. I feel that this should be an easy one. \*The second column I would like to add is GL account. This is tied to the product so I don't think it would be extremely hard to do, but please let me know your thoughts and what I should do to get this submitted.\*

Thanks,

Issue Key: PL-1271

Summary: Clemens New Employee Info - Creating Spreadsheet with Employee Products for Outlined Employees

Description: [[~accountid:5e60790cab60320af8f87101](#)],

Operations is wanting to pull the products in the inventories for new employees for [c\[lemicolpro.izhips.com.\]http://clemicolpro.izhips.com\]](#)

Essentially, they are wanting to have a spreadsheet similar to the Employee Inventory report for each of the employees listed in the attachment.

Would it be possible to pull this information?

Colton,

As discussed, attached is the file containing the employees at Clemens added throughout the pilot phase of our system. We would now like to collect all the transactions associated with these employees.

If you could please get with the team to help them gather this information, that would be great. If there is any further information you need, please let me know.

Thanks,

[^Copy of Clemens New Employees.xlsx]

Summary: Weekly Transactions Report - Products Not Showing Up - jbstolaztoob

Description: [~accountid:5e60790cab60320af8f87101],

jbstolaztoob has an issue with several products not showing up on the Weekly Transactions report. I investigated this issue a bit and believe I've found the problem. The products in question are in the "Payroll Deduct" product category and each have a model number of either "1" or "0", but also do not have size options:

!Screen Shot 2023-04-18 at 3.22.28 PM.png|width=1429,height=719!

This brings two questions:

# Is there a way to block customers from using model #1 with no sizes selected

# If we correct these model numbers would you be able to retroactively add these transactions to the weekly transaction report?

Please see email for more information.

Issue Key: PL-1269

Summary: FD Checklist App - Adding 2nd Pants Page / Product

Description: We want to add an optional 2nd Coat (PL-1268) and Second Pair of pants (this ticket) to the FD Checklist application. The secondary coat product in this ticket should be on a new page immediately after the current “Coat” page and before the “Pants / Trousers” page in the Checklist app.

The functionality should remain mostly similar, so that users will have the same pass / fail options, ability to scan + manually enter new product barcodes, etc. However, there should be an “N/A” button below the Coat #2 title, which when pressed, will allow the

user to skip this entire page.

!Screen Shot 2023-04-17 at 2.14.12 PM.png|width=280,height=632!

So, when the above “N/A” button is pressed-> Users should move to the next page in the app (Pants / Trousers) and in the reports, all options should have an “NA” for the pass / fail options, if skipped. Otherwise, if not skipped and filled out-> the results in the reports should feed as normal.

In the reports, we would also want two new columns added for each of the newly added products (Coat #2, result & Pants / Trousers #2, results):

Issue Key: PL-1257

## Summary: FD Checklist App - Structural Coat Advanced Cleaning - New Report

Description: Here is the new addition operations wants to add to the FD Checklist app.

We want to add another zone / Checklist type to the main screen below PPE Checklist.

This should be called “Advanced Cleaning”:

!Screen Shot 2023-04-20 at 9.57.07 PM.png|width=238,height=499!

Then, once “Advanced Cleaning” is selected, the app should take them to a page that gives them two options, “Advanced Cleaning: Coats” or “Advanced Cleaning: Pants”:

!Screen Shot 2023-04-20 at 9.59.03 PM.png|width=237,height=505!

Now, whether either “Advanced Cleaning: Coats” or “Advanced Cleaning: Pants” is selected, the user should then be taken to a page that has the following options:

!Screen Shot 2023-04-20 at 10.02.04 PM.png|width=225,height=568!

!Screen Shot 2023-04-20 at 10.02.20 PM.png|width=224,height=581!

!Screen Shot 2023-04-20 at 10.02.30 PM.png|width=227,height=425!

All of the above 3 pictures should be on 1 page only (please see sheet 2 of attachment for full page:

[^Advanced Cleaning.xlsx]

So, from the home screen, if Advanced Cleaning is Selected-> User to select either "Advanced Cleaning: Coats" or "Advanced Cleaning: Pants"-> Will complete the one Advanced Cleaning page.

**\*\*If Advanced Cleaning: Pants is selected, the title at the top of the Advanced Cleaning Page should be “Advanced Cleaning: Pants”.**

Other than this, the two long cleaning pages should look the same.

Additionally, users should be able to manually add and/or scan new product barcodes the same way as in the PPE Checklist. However, users should be able to select multiple of the scanned / manually entered products that are added in.

\*We are also still waiting on confirming what the report export will look like in the portal, but this should also be updated soon.

From an upload perspective, here are the features we need toggled on that aren't included in the bulk upload sheet:

\* Asset Checkbox

\* Sharpening Box Next to Expiration 1 Attribute

\*\* Lion Total Care Checked On

\* This picture with each uploaded product

!cid:image002.jpg@01D967C3.12358000|alt="A picture containing clothing

Description automatically generated"

From an association perspective, let me know if there are any other data points you'd need.

PLEASE call if you have any questions at all with this, this is the most complicated upload/association request yet, and I want to make sure everything's done correctly.

Thanks,

[^Final Coat Association Upload.xlsx]

Summary: Amarillo Fire Department - Boot Association

Description: Colton-

We have another request for the Amarillo Fire Department (amatxamafd). Attached, you will find a sheet with five data points. Through PPE Zone, we would like to tie the “BOOTS” products by +\*size\*+ (column D) to each ID# attached, while assigning an Asset#, as well as an expiration 1 expiration date.

Example Employee (Nathan Baker – ID# 487989)

!cid:image002.png@01D967AF.04E933B0|thumbnail!

Return Inventory After Dev Upload:

!cid:image003.jpg@01D967B0.056FAC50|alt="Graphical user interface, text, application

Description automatically generated"

NOTE: The serial numbers with leading zeroes in the spreadsheet must have 10 total digits.

NOTE: Each size (Column D) in the spreadsheet is its own product in a size dropdown menu. Let me know if you need further information on this.

Reach out if you have any questions.

Thanks,

-----

Issue Key: PL-1242

Summary: Expiration 1 Reset - If "Inspection Zone" Reset Selected, Expiration 1 Dates Do Not Reset Unless Scanned Through Inspection Zone

Description: In the new Inspection Zone, if the sharpening zone option selected:

!Screen Shot 2023-04-02 at 8.21.18 PM.png|width=775,height=303!

we want to have Expiration 1 dates not reset unless scanned through this zone. Even if an employee returns the product, then it is issued to another employee, we want this date to remain the same.

For example, if "Bob" gets a helmet and it has a 12 month expiration 1 date...And he keeps it for 6 months, then returns it, and someone else gets it, the expiration date will have 6 months left, (unless it's inspected via inspection zone).

Currently, if a product has the inspection zone reset enabled, the Expiration 1 date will reset fine (as desired). However, if the product with the Expiration 1 attribute is returned and reissued, the Expiration 1 date will then reset. We want to change this functionality.

Issue Key: PL-1232

Summary: CLONE - FD Checklist Application - Creating a New Page for FD Checklist App

Description: We want to create a new page in the FD Checklist Application. It will be identical to the "Pants / Trousers" page, but will be titled "Coat".

Everything else will be the same on this product. This new "Coat" tab should be the first page that opens after PPE Checklist. The new page / product should look like this:

!Screen Shot 2023-03-28 at 11.48.31 AM  
(fba01396-a8a8-4c0c-ab07-d7e70721316d).png|width=358,height=498!

So, the new order of the application from the beginning should be:

!Screen Shot 2023-03-28 at 11.28.27 AM.png|width=560,height=807!

Then:

!Screen Shot 2023-03-28 at 11.48.31 AM.png|width=358,height=498!

Then

!Screen Shot 2023-03-28 at 11.28.44 AM.png|width=564,height=809!

Then:

Gloves, Helmet, Hood, Footwear, Drag Rescue Device.

So, the only change is the addition of a new first page, titled “Coats”. The rest of the app functionality / order will remain the same.

We also need to add this new page / product to the web reports, so that the new “Coat” product + page is added to the web exports as well. This should look similar to:

!Screen Shot 2023-03-28 at 11.38.43 AM.png|width=1440,height=633!

!Screen Shot 2023-03-28 at 11.38.16 AM.png|width=1440,height=650!

Summary: New Development - Ability to Edit Quick Return Logo

Description: Even though Quick Return for SZ is part of SZ, we wanted to see if we could have an option to edit the Zone Logo for Quick Return that is different from SZ.

[~accountid:5e60790cab60320af8f87101],

Can we do something like this:

!Screen Shot 2023-04-05 at 3.58.19 PM.png|width=962,height=555!

This “Quick Return Image” should only be available for Station Zone. The Platform / Category settings for all other zones should not change.

Additionally, if no image is selected for the “Quick Return Image”, we want to have the current logic, so that both SZ and Quick Return will have the same image.

Is it possible to do this for Station / Quick Return only?

Summary: Truck Zone Report - Driver Name Not Showing on Report

Description: Originally found in csbidkunprob. In the Truck Zone report, the Driver Name input is not showing up. However, the Driver Name text is being filled out app-side, as can be seen on the Product Breakdown report. This issue seems to be affecting all companies and all historical Truck Zone transactions:

Issue Key: PL-1224

Summary: CLONE - Creating the Ability to Use Equipment Zone Without Needing to Select Equipment

Description: In equipment zone currently, even if this toggle is disabled, users still have to select an equipment number to be able to check out in Equipment Zone:

!Screen Shot 2023-04-24 at 2.17.21 PM.png|width=50%!

However, we want to change the logic so that if the equipment number is not enabled, users would not have to select an equipment number in order to check out.

Currently, when users try to check out of Equipment Zone, if the Equipment Zone toggle (above) is off, they are unable to do so:

!IMG\_1195.PNG|width=50%!

So, we want to remove this requirement if the mandatory toggle is disabled for Equipment Zone.

Also, currently, Equipment Zone makes users select an equipment number & replaces that CC with piece of equipment. We want to change this so that the CC#, GL, PR should go off of product details or employee department settings, when this mandatory

Equipment # toggle is not enabled for Equipment Zone.

Issue Key: PL-1219

Summary: SAP Transfer Report Adjustment Request\_Foster Farms Livingston - SMP  
System ONLY

Description: Karthiyayini-

I am at a customer location today training. Previously we had you change a column of data in the SAP Transfer Report for this customer. You changed the SLOC column from \*SL11\* to \*SL003\*. This was adjusted for this customer system only.

The system is:

Foster Farms Livingston - SMP

[<https://foscalivpro.izhips.com/report/sap-storeissue>|<https://foscalivpro.izhips.com/report/sap-storeissue>|smart-link]

!cid:image001.png@01D95C7A.D7B1CEA0|thumbnail!

I need the data in SLOC column to be changed from “\*SL003\*” to “\*0003\*”. In just this system. I forgot to tell Colton yesterday, so I am emailing you now in hopes that it can be done asap.

Is this possible?

Thanks,

Issue Key: PL-1203

Summary: Changing ISP Report Employee Filter Details (From PL-1157)

Description: While testing the combined 8.5.3+8.5.4 ticket (PL-1195),

The employee filter does not appear to be working in  
[lz.stageizhips.com|http://lz.stageizhips.com]

!image002.png|width=1026,height=662!

!image003.png|width=980,height=447!

\*Behaviour 2:\* Employee Search attribute behaviour in ISP report.

+\*Eg\*+: The total available records for tom David is 3 and let's say 2 assets are issued to Total Lion care and are mapped to tom David as he is the previous employee.

Search with Employee name as:

“tom David”: Fetched records = 1, It fetches only the assets which are directly issued to “tom David”

“Total Lion care”: Fetched records = 2, and in UI Employee name will still be Tom David. It fetches all assets issued to “Total Lion Care” and in UI we are displaying their respective Employee names.

!Screen Recording 2023-03-14 at 3.26.26 PM.mov|width=50%!

{color:#bf2600}→ For behavior 2, is it possible to change this? So, if in the above scenario:{color}

Scenario 1: The total available records for tom David is 3 and let's say 2 assets are issued to Total Lion care and are mapped to tom David as he is the previous employee

{color:#bf2600}--> Since Tom David would show in the UI for Total Lion Care, can we have all 3 records shown, even though 2 are actually issued to “Total Lion Care”?{color}

Scenario #2: “Total Lion care”: Fetched records = 2, and in UI Employee name will still be Tom David. It fetches all assets issued to “Total Lion Care” and in UI we are displaying their respective Employee names {color:#bf2600}-->Can we also keep this logic the same?{color}

{color:#bf2600}So, is it possible to make the change to scenario 1 without changing scenario #2?{color}

Summary: Pulling Aramark Data - For arajbsgrane, arajbsgrewi, arajbsgreco, arajbssoupa

Description: The Aramark team wants to have 3 reports pulled from our database. One will be of all tags that were last scanned as “Passed Inspection”, “Damaged”, and “Lost”. We only to have the last (most recent) scan for each asset, so assets should only appear on one of the three reports and no duplicate asset data is needed. Additionally, we would like to have these three reports for each of the following 4 locations from March 1, 2022 - Current:

Plants

\* Grand Island - arajbsgrane

\* Green Bay - arajbsgrewi

\* Greeley - arajbsgreco

\* Souderton - arajbssoupa

Would it be possible to pull this information?

Issue Key: PL-1183

Summary: Again Creating Spreadsheet with all remaining “unknown” garments (Greeley, Souderton, Green Bay and Grand Island)

Description: Like in  
[<https://izhips.atlassian.net/browse/PL-1143>]<https://izhips.atlassian.net/browse/PL-1143> smart-link], Barrett is requesting that we create a few spreadsheets to send over a spreadsheet to the Aramark team that they can use to update their garment information to reduce the amount of “unknown” garments in their system.

We are wanting to have an updated copy of the following:

\*Barrett Barker\*

1 hour ago

[~accountid:5e60790cab60320af8f87101] [~accountid:611fdca928ae75006af11099] I have a question/request. what happens to transactions that were scanned in the Vault, but never have seen a data hoop? Can I get a spreadsheet for each of these companies of any vault transaction that have never seen a data hoop scan and that is not in the master size and type database? We are now trying to understand the “unknowns” that have never made there way through a data hoop. Is this possible for us to run?

FROM PREVIOUS:

We received the following from Aramark and they want us to create 4 files with the details of all remaining “unknown garments” so that we can work to identify and reduce the number of unknown garments showing in the reports.

Ideally there will be one excel file for each site that contains tabs called frock hoop, scrub hoop and no hoop. All remaining “unknown” garments should populate one of these 3 tabs...so a total of 4 files (Greeley, Souderton, Green Bay and you should be able to give me Grand Island).

Each of the 4 sites should each have unknown “known” scrubs, unknown “known frocks” and truly unknown.

Issue Key: PL-1172

Summary: Equipment Zone – Show Cost Centers From Other Zones

Description: In equipment zone currently, even if this toggle is disabled, users still have to select an equipment number to be able to check out in Equipment Zone:

!Screen Shot 2023-04-24 at 2.17.21 PM.png|width=50%!

However, we want to change the logic so that if the equipment number is not enabled, users would not have to select an equipment number in order to check out.

Currently, when users try to check out of Equipment Zone, if if the Equipment Zone toggle (above) is off, they are unable to do so:

!IMG\_1195.PNG|width=50%!

So, we want to remove this requirement if the mandatory toggle is disabled for Equipment Zone.

Also, currently, Equipment Zone makes users select an equipment number & replaces that CC with piece of equipment. We want to change this so that the CC#, GL, PR should go off of product details or employee department settings, when this mandatory Equipment # toggle is not enabled for Equipment Zone.

Issue Key: PL-1165

Summary: New Development - Ability to Return Via Employee Inventory Report

Description: Do in portal and export...Add checkbox to the left side, check ->> then return box pops up.

[~accountid:5e60790cab60320af8f87101],

Would it be possible to add another column to the left side of the Employee Inventory Report called "Return"?

The column would look similar to this:

!Screen Shot 2023-04-05 at 4.25.40 PM.png|width=1081,height=586!

Within each row of this “Return” column, there would be a checkbox, similar to the application (see above).

When a checkbox is selected, we would want a pop-up box to show, similar to the application:

!Screen Shot 2023-04-05 at 4.26.15 PM.png|width=314,height=230!

Then, once this box pops up, we want the report screen to turn gray, so that the user would need to either hit “Save” (after returning items as Return, Defect, or Disposal), or “Cancel”:

!Screen Shot 2023-04-05 at 4.28.26 PM.png|width=875,height=468!

Then, if a QTY is selected to be returned and the user hits "Save", we want to have a check in the checkbox for that product:

!Screen Shot 2023-04-05 at 4.43.53 PM.png|width=983,height=536!

Lastly, instead of "Check in" or "Check in and Exit", we want to add a "Submit Returns" button...Once this is pressed, all selected products will be returned w/ the associated return reasons (Return, Defect, Disposal):

!Screen Shot 2023-04-05 at 4.37.46 PM.png|width=981,height=546!

Additionally, for SZ return reasons, we would eventually like to change the pop-up, just

as in the app, so that SZ return reasons show for SZ products:

!Screen Shot 2023-04-05 at 4.59.43 PM.png|width=869,height=469!

This UI can be changed as can development requirements. Do you think this is possible to create?

Issue Key: PL-1164

Summary: Having Expiration 2 Attributes Feed Expiration Report When Through Station Zone

Description: When product issued from Station zone, Expiration 2 attributes are not populating in Expiration report. [If issued from zone screen, they are fetching in reports] >>Products issued from Station Zone and the Expiration 2 attributes populate on Expiration report not yet implemented. As discussed with [~accountid:611fdca928ae75006af11099] , the new development will be created in new ticket.

Currently, only Exp 1 attributes feed Expiratio reports for products with EXP attributes issued from Station Zone. We also want to have the EXP 2 attributes feed the EXP report as well.

Issue Key: PL-1159

Summary: CLONE - Station Zone Change - Transactions in Station Zone Do Not  
Currently Include the Cost Center Value

Description:

From

[<https://izhips.atlassian.net/browse/PL-1147>|<https://izhips.atlassian.net/browse/PL-1147>]  
smart-link].

\*Karthiyayini Muthuraj\*

2 days ago

Edited

[~accountid:611fdca928ae75006af11099]

I went ahead and looked into this and I was able to find 13 transactions on the employee report and SAP report from 1/23 - 1/27; however, when I looked at the SAP Report I noticed that there were 3 transactions that did not have a cost center associated with them >> I reviewed the report again, and we can now see the 13

transactions for this model no. This problem has been fixed  
[https://izhips.atlassian.net/browse/PL-1123.|https://izhips.atlassian.net/browse/PL-1123  
.|smart-link]

I am not sure how these would end up without a cost center if they are using quick scan? >> Transactions in the station zone do not currently include the cost center value because we are not sending it at this time. We need to focus on app side development to address this. [~accountid:5e2115034092800cb1e9157e]

Issue Key: PL-1157

Summary: Changing Logic for ISP report

Description: I talked with Eastland and he wants to make only the following change:

If a product is issued to an employee, then returned, the issued to "Total Lion Care", in this situation we want to show the previous employee's name.

All other situations, we can leave the same logic, so current employee name displays.

Is it possible to make this change to the logic so that all products issued to "Total Lion Care" display previous employee name?

If easier, we can address in separate ticket. Everything else is working fine!

This will only affect employee "Total Lion Care".

Issue Key: PL-1156

Summary: Spinning in Employee Inventory Return Screen - Tysinlogprop

Description: When products are returned in tlp (tysinlogprop), the app spins infinitely until the app is forced closed. However, it looks like the returns are going through, but the screen keeps spinning:

!RPreplay\_Final1676414369.mov|width=720,height=960!

!IMG\_4160.jpeg|width=3024,height=4032!

This happened on-site with a customer iPad and I was able to reproduce this issue as well. I used product "GREEN RUBBER GLOVES FOR EMPLOYEE ISSUE (1=1EA)".

This item has sizes as well as is bulked, but does not seem to be happening in other systems.

Issue Key: PL-1154

Summary: Updating GL Codes And Model Numbers for JBS Locations

Description: The pork division has also made an adjustment to their model #'s in our system. Tom has provided with an updated list of all the information we need for each building.

[~accountid:5e60790cab60320af8f87101], JBS is updating their GL codes and wants to have them updated. However, they wanted to see if it could be done Sunday PM CST. Attached are the current GL codes as well as the updated GL codes.

Additionally,, they will be removing the dash from each of the model numbers for each product at these locations. So for instance, product 500-342542 should change to 500342542.

Is it possible to make these changes? They are wanting to make these two updates on Monday Feb 20th if at all possible.

Issue Key: PL-1152

Summary: Tool Zone Products Not Feeding SAP

Description: JBS Louisville is having a SAP Transfer report problem. I have checked the knives and none of them are marked as bulk. I checked all of the knives in the SAP Transfer Report and none of them showed up for today. Let me know if you are able to find something that I am missing. CRN: jbskylouprop

Thanks,

[~accountid:5e60790cab60320af8f87101],

This is happening at all SAP locations, such as Beardstown. The SAP should include all products except for hazard or bulked products. I went through and found a few model numbers to look at from [jbskylouprop.izhips.com|<http://jbskylouprop.izhips.com>], as well as the SAP and Manual Entry reports from 02/06-current.

[^manual-entry-report-02-15-2023-093044-13120.xlsx]

[^sap-transfer-report-02-15-2023-090516-18834.xlsx]

Product “500-184225” was issued several times in the manual entry report, but not on SAP. However, this product is neither marked as hazard or bulk. Another example is product “500-186059”, which is also neither bulk or hazard.

Issue Key: PL-1147

Summary: SAP Report Issue (JBS Beardstown)

Description: [~accountid:5e60790cab60320af8f87101],

Would you be able to determine why this issue is happening? It is occurring with product with the model #: \*500-287807\* in [http://jbsilbeaprop.izhips.com/]http://jbsilbeaprop.izhips.com/[smart-link] .

Here is more information:

I have another SAP Issue. This one has been noticed at JBS Beardstown. It seems that the product rattle paddles (1= 1EA) with the model #: 500-287807 is not showing up in the SAP Report.

I went ahead and looked into this and I was able to find 13 transactions on the employee report and SAP report from 1/23 - 1/27; however, when I looked at the SAP Report I noticed that there were 3 transactions that did not have a cost center associated with them.

I am not sure how these would end up without a cost center if they are using quick scan? Even if they are not using quick scan and going through the zone screen instead it should still have a default cost center that it goes to.

I have attached the SAP Report so you can see what I am talking about. Could you please have the team look into this and see what might be causing this issue?

Thanks,

[^JBS Beardstown SAP Report Issue.xlsx]

Issue Key: PL-1146

Summary: Android PDF Printed Receipts - Date / Time Information of Transactions is Being Cut Off Receipts

Description: When a user logs in to print a receipt for a charged transaction, most of the time there are no issues and the print out looks like this:

!IMG\_7553.HEIC|thumbnail!

However, if the product and department names are too long, the bottom of the receipt is being cut off & the transaction details are not visible:

!IMG\_7551.HEIC|thumbnail!

!IMG\_7552.HEIC|thumbnail!

We want to make sure all date/time information is added to the print out. If several products are charged, the receipts extend and all information is kept. But if department + Product information is too long (3 lines), the receipt print out leaves off the transaction date / time information.

-----

Issue Key: PL-1145

Summary: Release e 8.5.4

Description: This release will be a follow up for 8.5.2 release,  
[<https://izhips.atlassian.net/browse/PL-1148>]<https://izhips.atlassian.net/browse/PL-1148> smart-link] and will contain:

\* Station Zone Work order development

\* ISP Report

[~accountid:5e60790cab60320af8f87101],

We may move this release ahead of 8.5.3, but for now, this is the order I am being recommended to go by. I will update before building.

Issue Key: PL-1143

Summary: Again Creating Spreadsheet with all remaining “unknown” garments (Greeley, Souderton, Green Bay and Grand Island)

Description: [~accountid:5e60790cab60320af8f87101],

Like in  
[<https://izhips.atlassian.net/browse/PL-1104>|<https://izhips.atlassian.net/browse/PL-1104>|  
smart-link] and  
[<https://izhips.atlassian.net/browse/PL-1109>|<https://izhips.atlassian.net/browse/PL-1109>|  
smart-link], we are wanting to send over a spreadsheet to the Aramark team that they  
can use to update their garment information to reduce the amount of “unknown”  
garments in their system.

We are wanting to have an updated copy of the following:

\*Barrett Barker\*

1 hour ago

[~accountid:5e60790cab60320af8f87101] [~accountid:611fdca928ae75006af11099] I have a question/request. what happens to transactions that were scanned in the Vault, but never have seen a data hoop? Can I get a spreadsheet for each of these companies of any vault transaction that have never seen a data hoop scan and that is not in the master size and type database? We are now trying to understand the “unknowns” that have never made there way through a data hoop. Is this possible for us to run?

FROM PREVIOUS:

We received the following from Aramark and they want us to create 4 files with the details of all remaining “unknown garments” so that we can work to identify and reduce the number of unknown garments showing in the reports.

Ideally there will be one excel file for each site that contains tabs called frock hoop,

scrub hoop and no hoop. All remaining “unknown” garments should populate one of these 3 tabs...so a total of 4 files (Greeley, Souderton, Green Bay and you should be able to give me Grand Island).

Each of the 4 sites should each have unknown “known” scrubs, unknown “known frocks” and truly unknown.

\*Summary:\*

We want a spreadsheet for all 4 locations:

Each location we need to have RFIDs that:

\* Went through Frock hoop

\* Went through Scrub Hoop

\* Unknown, never gone through a data Hoop (Can I get a spreadsheet for each of these companies of any vault transaction that have never seen a data hoop scan and that is not in the master size and type database?)

Issue Key: PL-1142

Summary: CLONE - Print Ability in Station Zone

Description: We want to be able to print receipts through Station Zone when products are charged to employees (on Android devices only).

When products are charged through Quick Check, we want to have a QTY popup, like the  from  from [\[https://izhips.atlassian.net/browse/RN-1320\]](https://izhips.atlassian.net/browse/RN-1320)[|https://izhips.atlassian.net/browse/RN-1320](https://izhips.atlassian.net/browse/RN-1320) [\[smart-link\]](#)  & [\[https://izhips.atlassian.net/browse/PL-992\]](https://izhips.atlassian.net/browse/PL-992)[|https://izhips.atlassian.net/browse/PL-992](https://izhips.atlassian.net/browse/PL-992)[\[smart-link\]](#). This QTY message should pop up only for charged transactions and when “done” or “done and exit” are selected.

Each of an employees transactions should be on one receipt (if scanned consecutively) and each receipt should only contain the transactions by one employee.

We want the development to look something like this:

!Screen Shot 2023-02-23 at 2.24.47 PM.png|width=376,height=499!

In the above example, there was only one employee charging one product, so this is the only information that should print. In this example, if the user hit QTY 1, 1 receipt should print with this employee's single product transaction. If 3 QTY was selected, 3 identical receipts should print with only the one product charged to a single employee.

If an employee charged 2 products (see below), then each receipt should have 2 products:

!Screen Shot 2023-02-23 at 2.27.20 PM.png|width=372,height=499!

If a QTY of 2 is selected, then 2 identical receipts should print, each with the two products issued to the single employee.

If multiple employees purchase products, then a unique receipt should print for each employee. For example, if 2 employees got a total of 3 products and we wanted to use this new print feature, a unique receipt should print for each employee. So, there would be a total of 2 receipts, one with 1 product (Test Prod 03 for employee 8900, and another showing Test Prod 01 and Test Prod 02 for employee 20). → See below for more details:

Cart screen with these charged transactions”

!IMG\_1048.PNG|width=1668,height=2224!

Then, when done or done and exit selected:

!Screen Shot 2023-02-23 at 2.29.04 PM.png|width=377,height=499!

If above example continued, if “2” is selected, there should be 4 total receipts print.

There will be:

- \* 2 receipts for employee 8900, showing charge of Test Prod 03
- \* 2 receipts for employee 20, showing charge of Test Prod 01 and Test Prod 02

If "3" QTY is selected, there should be 6 total receipts print:

- \* 3 receipts for employee 8900, showing charge of Test Prod 03
- \* 3 receipts for employee 20, showing charge of Test Prod 01 and Test Prod 02

\*If 0 is selected, no receipt is to be printed.

\*The receipt for mat should remain the same as current Android receipts

\*Like current print functionality, the receipts will only print if “Receipt Print” enabled in master admin:

!Screen Shot 2023-02-23 at 2.45.17 PM.png|width=1437,height=731!

if this toggle is not enabled, then the functionality should remain the same as current.

Issue Key: PL-1139

Summary: Deleting Transactions From Several Pilgrims Locations

Description: [~accountid:5e60790cab60320af8f87101],

Would it be possible to please delete several erroneous transactions from a few different Pilgrims locations?

We already deleted some of the transactions in [\[https://izhips.atlassian.net/browse/PL-1137|https://izhips.atlassian.net/browse/PL-1137|smart-link\]](https://izhips.atlassian.net/browse/PL-1137), but we are seeing similar issues at other locations as well.

We need to delete the following transactions:

[^pilwvmooproMoorefieldemployee-reports-01-18-2023-055952-10035.xlsx]

[^pilgrimshickory-employee-reports-01-18-2023-055505-15001.xlsx]

I will also create a separate ticket to identify why this issue is occurring at Pilgrims locations, once I gather more information on the cause of this issue.

Please see attached email for more information.

Issue Key: PL-1138

Summary: Aramark Additions - Adding Garment Information to Database From Aramark-Generated Reports Again

Description: [~accountid:5e60790cab60320af8f87101],

We want to once again add more garment information into our DB, which is coming from Aramark. There are several reports that we've received from Aramark.

Once this garment information is in our system, we will need to then a report showing all RFIDs in our system by site that do NOT have a bar code associated with them, so that Aramark can then run one more update to finalize this clean-up (will create another ticket for the generating of files for each location that has all garments without barcode information).

Email:

Please see the attached files and run another update in your system ASAP! Then I need you to send me a report showing all RFIDs in your system by site that do NOT have a bar code associated with them so that I can run one more update to finalize this clean-up with one more sweep and we should be done with all of this. Can you please make this a TOP PRIORITY?

Please let us know if you have any questions or need more information!

\*There should be 6 files / reports that can be added to our db.

Issue Key: PL-1135

Summary: Asset Scan Report - Confirm Audit Addition

Description: Colton-

I'm wanting to make a potential addition to the {color:#ffffff}Asset{color} {color:#ffffff}Scan{color} Report. Essentially, if an application user selects "Confirm Audit" in the Foreign Materials Report, I'm wanting the {color:#ffffff}Asset{color} {color:#ffffff}Scan{color} Report to feed a new line for an "Audit". Example:

# I press "Confirm Audit" on knife 1234

# If I go to {color:#ffffff}Asset{color} {color:#ffffff}Scan{color} Report and {color:#ffffff}scan{color} knife 1234, it will have a new line item with an "Audit" timestamp

In your opinion, how reasonable of a development would this be? If you think it would be reasonable, I can mock something up and get it to you and Zack for review.

Thanks,

Issue Key: PL-1133

Summary: FD Checklist Master Admin - Create Arrow Button That Will Send User From Master Admin to Company Admin / Portal Page - Backend

Description: We wanted to see if it was possible to create a button in the Department list of the master admin of the FD Checklist App that will:

# Take users signed into the master admin directly to the company admin / portal site for a specific company

# Automatically log the user in using the credentials used to log into the master admin

So, the UI would look something like this:

!Screen Shot 2023-01-17 at 1.45.25 PM.png|width=1239,height=634!

Once the arrow next to the department name is selected, the user would be brought to this page of that department:

!Screen Shot 2023-01-17 at 1.48.56 PM.png|width=1440,height=735!

This would work for emails / Innova Zones that have “Admin” user type. This way, these users would be able to log into any department using the master admin. However, with each department having to have unique emails, would this be a problem? This would only work for the portal/company admin. To log into the app, users would have to have a unique email for each department.

Summary: Returning All "Out" Products for <https://whonefretoop.izhips.com/login>

Description: [[~accountid:5e60790cab60320af8f87101](#)],

Would it be possible to return all specified "out" products for [<https://whonefretoop.izhips.com/login>|<https://whonefretoop.izhips.com/login>|[smart-link](#)] ? Our operations team member, Reese, will send over an email with the products desired to be returned. All of these products should have return reason "End of Shift". They had trouble with issuing / returning today and it is a new launch, so this would help get their team on track.

Please see email (below and attached as well) for more information and please let me know if you have any questions.

Email:

Colton-

We have a special request for our new customer at Wholestone Farms Fremont ( [\[https://whonefretoop.izhips.com/](https://whonefretoop.izhips.com/)<https://whonefretoop.izhips.com/>[smart-link](https://whonefretoop.izhips.com/)] ).

Around 12:30am CST, Reese is going to send a Foreign Materials Report with a list of

Asset Numbers. Could you please have someone from the development team return these assets through the system? If they have to select a reason, they can use "End of Shift".

Let me know what other details this may require.

Thanks,

{adf}

Issue Key: PL-1125

Summary: Deleting Out Excess Categories, Products, Zones, from tabp.izhips.com

Description: [~accountid:5e60790cab60320af8f87101]

We want to clean out system [tabp.izhips.com|http://tabp.izhips.com]. They are not running most of these Zones and we want to clean up their system. Please see the email below:

I am needing help to clean out Tyson Amarillo's storeroom system. The subdomain is tabp. I am needing the following deleted:

\* Maintenance Zone:

\*\* All Products

\*\* All Categories

\* Equipment Zone

\*\* All Products

\*\* All Categories

\* Security Zone

\*\* All Products

\*\* All Categories

\* Cintas Zone

\*\* All Products

\*\* All Categories

+\*\_Please leave PPE and Tool Zone alone!\_\*+

There should be roughly 250 products left in her system after the clean out. I will be on-site tomorrow to make sure everything is going right. If this would be done tonight that would be great!

Let me know if you are needing any other information.

Thanks,

Issue Key: PL-1123

Summary: Product # 500-185720 Not Showing in SAP Transfer Report - jbsgranetoob

Description: [~accountid:5e60790cab60320af8f87101], product with model # 500-185720 is not showing up on the SAP Transfer report for [jbsgranetoob.izhips.com|http://jbsgranetoob.izhips.com]. I tried to log in to see if I could tell if anything was toggled on which would prevent it from showing up on the SAP report, but did not see anything (bulk, etc. not toggled on).

Would you be able to look into why this may be happening?

Please see the email from JBS Grand Island below. It looks like they are having an issue with the SAP Transfer Report and products that they are issuing out not showing up correctly.

I just looked at the product below and it does look like there is an issue. I show that this product was issued out 4 times last week in the Employee Report, but it didn't show up in the SAP Transfer Report.

I have attached the two reports in this message. Could you please take a look at these and let me know what could be happening?

-----

Issue Key: PL-1119

Summary: CLONE - Increasing Image Quality in Report Portal - Backend

Description: The main issue is in the portal, like the Expiration report for instance. When they take and attach pictures to transactions, the pictures are clear enough on the application. The issue is from retrieving images from the portal, if that helps. For example, this image is from the Expiration Report for JBS Cactus:

!image001.png|width=1440,height=734!

The problem is, is that it is hard to read the images uploaded from the portal.

However, if the issue is due to the app image uploading cap set to 60%, is it possible to raise this percentage? Hopefully this would resolve the problem. Do you have an estimate for what it would take to enhance the images uploaded from the app, so they are more clear in the portal reports by chance...if this is possible?

Please see emails for more information

Issue Key: PL-1110

Summary: Product Export Issue - Size Prices Showing \$0.00 on Export - 8.4.7

Description: When a product export is done for a company, each product size is shown on it's own line on the export (which is correct). However, the prices for the different sizes are all showing as "\$0.00," not the actual price of the product in the system.

For instance, in [tabp.izhips.com|http://tabp.izhips.com], the "BLUE RUBBER GLOVES GR BEEF (1=1DZ)" has two sizes,

!Screen Shot 2023-01-04 at 3.52.05 PM.png|width=91.66666666666666%!

!Screen Shot 2023-01-04 at 3.55.07 PM.png|width=91.66666666666666%!

One of these sizes is \$8.87, while the other is \$10.57. However, on the export, the prices for these products is shown to be 0.00:

!Screen Shot 2023-01-04 at 3.56.23 PM.png|width=963,height=761!

Is it possible to fix the product export so that these prices are reflected accurately?

Screen recording:

Issue Key: PL-1109

Summary: Investigating / Creating a Spreadsheet of Unknown Aramark Assets (which have never been scanned by a data hoop and that is not in the master table)

Description: From

[<https://izhips.atlassian.net/browse/PL-1104>|<https://izhips.atlassian.net/browse/PL-1104>]  
smart-link]:

\*Barrett Barker\*

1 hour ago

[~accountid:5e60790cab60320af8f87101] [~accountid:611fdca928ae75006af11099] I have a question/request. what happens to transactions that were scanned in the Vault, but never have seen a data hoop? Can I get a spreadsheet for each of these companies of any vault transaction that have never seen a data hoop scan and that is not in the master size and type database? We are now trying to understand the “unknowns” that have never made there way through a data hoop. Is this possible for us to run?

Issue Key: PL-1108

Summary: Aramark Usage Report - Export Bugs

Description: Companies on the new Aramark release, 8.0.1 are facing a couple of small issues in the export of the Aramark Usage report.

# The export column order has been changed

# The column header for “Inspector” is missing

Both arajbsgrewi and arajbscactx are facing these issues.

arajbssoupa is showing correctly still, as this company has not been moved over onto the new Aramark release.

The (correct) export looks like this for arajbssoupa:

!Screen Shot 2023-01-03 at 1.36.14 PM.png|width=1384,height=596!

However, the column order for arajbsgrewi and arajbscactx is currently:

!Screen Shot 2023-01-03 at 1.37.07 PM.png|width=1427,height=620!

!Screen Shot 2023-01-03 at 1.37.19 PM.png|width=1440,height=625!

Is it possible to change the column order for companies on the new release to match arajbssoupa, and add the “Inspector” column header to the export for this report on the new release as well?

Issue Key: PL-1104

Summary: Creating Spreadsheet with all remaining "unknown" garments (Greeley, Souderton, Green Bay and Grand Island)

Description: We received the following from Aramark and they want us to create 4 files with the details of all remaining "unknown garments" so that we can work to identify

and reduce the number of unknown garments showing in the reports.

"I need the data described in bullet 3 for each site. Ideally I get one excel file for each site that contains tabs called frock hoop, scrub hoop and no hoop. All remaining "unknown" garments should populate one of these 3 tabs...so a total of 4 files (Greeley, Souderton, Green Bay and you should be able to give me Grand Island). \*\_Can I get this by COB Friday, 12/23?\_\*

Each of the 4 sites should each have unknown "known" scrubs, unknown "known frocks" and truly unknown.

However, if we get the data for each location and are able to identify which category these garments to into, I can create the spreadsheets, so we only need the data to create these spreadsheets.

Issue Key: PL-1099

Summary: Aramark Additions - Adding Garment Information to Database From  
Aramark-Generated Reports

Description: [~accountid:5e60790cab60320af8f87101],

Aramark sent us 4 reports from (2 from MC 477 2 from MC 616) with lots of garment information. We are seeing a lot of unknowns, so we wanted to see if we could add the garment information into our db to reduce the number of unknowns we're seeing in the IZ reports?

I've attached the 4 reports and I talked with Barrett and he directed us to add any garment information into the database that we do not have already. This is a high priority, so is this possible to do tonight?

Please let me know any other information you may need!

Summary: Pulling Aramark Usage and Unissued Garment reports for 12/26/21 to 12/03/22 for arajbsgreco

Description: arajbsgreco wants to have the Aramark Usage and Unissued Garment report data exported into a CSV.

“Tiago,

This will be a giant file and probably have to be pulled by our Development Team from the database side. I will add it to the request list to be pulled and we will send once provided to us.

Colton - Can you please have the team pull both the Aramark Usage Report and Unissued Garment Report for the date range 12/26/21 to 12/03/22? XLSX or CSV. Please add it to the queue.

Thanks,"

Issue Key: PL-1096

Summary: Verifying Data Processed for Arajbsgreui

Description: \*\* Please see attached email for more information\*\*

We may have an issue. Looks like from 11/21 to 12/2 there was an issue with Scott sending and receiving both Transactional(vault) and Injections.

Can you please have Karthiyayini/Shadab validate we processed all data from that time period?

Real world issue I am seeing is with JBS Green Bay. Arajbsgrewi – I go and look at the API url and see lots of transactions(see below)

11/28 for an example day

[+https://securearamarkappleton.imdlive.com/innovazonesapi.php?requestDate=2022-11-28+|https://securearamarkappleton.imdlive.com/innovazonesapi.php?requestDate=2022-11-28]

!cid:image003.png@01D90FB5.9BB86330|alt="Text

Description automatically generated"

But when I go run the Lost and Ruin Report for that whole week(11/27/22-12/03/22), I see very little data..... If we did not run the data because it was back filled then we need to \*reprocess ALL locations vault and injection data for the time period 11/21 to 12/2.\*

Image from Reporting Portal - 3 transactions only.....

!cid:image004.png@01D90FB5.E1DBB5B0|alt="Graphical user interface

Description automatically generated"

We need to reprocess tonight so all data is in all the systems correctly... Once again not our fault, but we are the Customer facing portion so it looks like a direct issue on our

end!

Thanks,

Issue Key: PL-1092

Summary: New Development - Sharpening Zone - Expiration 1 Reset

Description: Goal: We want to add the ability for expiration 1 attributes to reset off an inspection (sharpening) scan, instead of when issued.

Functionality: If "Sharpening Zone" checkbox is selected, dropdown menu options will

unlock for selection. So, expiration 1 (regular) attribute(s) dates will reset when scanned through Inspection (Sharpening) Zone.

Development: We would add an “Sharpening (Inspection) Zone” checkbox into the Customer Admin product attribute details next to the Expiration 1 Attribute

Please see attachment for more details.

Issue Key: PL-1087

Summary: FD APP - Unique Email Login instead of CRN login

Description:

[<https://izhips.atlassian.net/browse/PL-1061?focusedCommentId=25109>|<https://izhips.atlassian.net/browse/PL-1061?focusedCommentId=25109>|smart-link]

we want to have each company to have a subdomain to access for the portal/company admin, but for the application we want user to be logged in based on their email, instead of having to use a CRN.

For instance, our current enterprise application requires that we put a CRN in before we can log in any users. We want to skip this step and have users logged into the correct system based on their email.

So, if I work for Dallas Fire Department (DFD) and we want to use this application, I will log my email in this system (DFD) in the company admin / portal...Then when I log into the application, we want to see if we can make it so that it will log me into the correct system based on this email.

Another example: Let's say my name is Aaron Soliz and I work for Amarillo FD. That system would be created by an Innova Zones operations team, as only the Innova Zones team has access to the FD Master admin. Then, they will create one manager who will have access to company admin / adding users. Then, when a user is added by the manager of the customer admin / report portal, they will have to enter a unique

email to log in:

So, when Aaron Soliz was added to the ADF system with the email "[aaron.soliz@amarillo.gov|mailto:aaron.soliz@amarillo.gov]", he should be the only user with that same email across all fire department systems (which will be the case). Once a user opens the FD App, there is no CRN option, only a login option. Even though we will have numerous FD systems eventually, we want to bypass the CRN completely and have the system recognize which system / database the user should be logged into based on their email. So, when [aaron.soliz@amarillo.gov|mailto:aaron.soliz@amarillo.gov] signs in, the system should recognize that user belongs to the Amarillo FD. If we had another system, like Dallas FD for example, and the email was [bob.jones@dallas.gov|mailto:bob.jones@dallas.gov], when Bob signs in, he should automatically be logged into the Dallas FD system.

Hopefully that helps? Do you think that would be possible to set up?

Issue Key: PL-1083

Summary: Changing SLOC Text for a New Customer

Description: [~accountid:5e60790cab60320af8f87101], we may be launching with a new company that uses the SAP report, like JBS and Pilgrim's. However, while JBS use "SL11" for the SLOC, this customer will be using a different SLOC number. This new company we will be changing this for is Foster Farms Livingston (focalivpro).

We want to change the SLOC number for only this customer, and keep all current JBS / Pilgrim's locations using SL11. Is it possible to change this only for the new customer? How difficult would this be? We need to ensure we do not affect any customers currently using the SAP and need to continue using SL11. So I believe we have two options:

# Manually changing the SLOC for only the new customer

# Cloning a new version of the SAP for only this new location to use

Zack wants this to be complete by Monday. What are your thoughts on this? Is it possible?

Description: Colton-

{color:#ffffff}+\*\*\*NOTE: Please don't submit this ticket until end of day Thursday or until notified. We're still working on completing Admin adjustments\*\*\*+{color}

I want to put in a dev ticket for Amarillo Fire Department ( [https://amatxamafd.izhips.com/admin|https://amatxamafd.izhips.com/admin|smart-link] ). We're in the process of adjusting the "Department" for each employee in the system, and we would like for historical transactions to carry their new "Department". Example Below:

I've adjusted Greg Herndon's department from "STATION 5" to "C-SHIFT":

!cid:image002.png@01D8F434.685FDFA0|alt="Graphical user interface, application

Description automatically generated"

We would like for this new department (Shift) to reflect on historical transactions (In/Out Report):

Current:

!cid:image003.png@01D8F434.685FDFA0|alt="Table

Description automatically generated"

Adjusted:

!cid:image004.png@01D8F434.685FDFA0|alt="Graphical user interface, application

Description automatically generated with medium confidence"

Thanks,

Issue Key: PL-1073

Summary: Cloning Sharpening Zone - Amarillo FD - Back-End

Description: We want to create a clone of Sharpening Zone. This clone will retain the same functionality as our current Sharpening Zone, but will also include the new

Expiration                      Reset                      development,                      described                      in

[<https://izhips.atlassian.net/browse/RN-1478>]|<https://izhips.atlassian.net/browse/RN-1478>

[smart-link],

[https://izhips.atlassian.net/browse/PL-1103|https://izhips.atlassian.net/browse/PL-1103|

smart-link], and

[https://izhips.atlassian.net/browse/PL-1092|https://izhips.atlassian.net/browse/PL-1092|

smart-link].

Our current Sharpening Zone should remain the same / not have this new expiration reset feature included.

Summary: Pulling the Aramark Usage Report for JBS Greeley from Jan 1 to August 31

Description: [~accountid:5e60790cab60320af8f87101],

Would it also be possible to pull the Aramark Usage Report for JBS Greeley from Jan 1 to August 31?

Can you please have Karthiyayini or someone on the Dev team pull the Aramark Usage Report for JBS Greeley from Jan 1 to August 31? I just need it in Excel or CSV format. I tried to pull it in portal, but it will be a GIANT file.

Thanks,

Issue Key: PL-1067

Summary: Creating Toggle to Disable Employees From Being Able to Change Jobzone -  
Back End

Description: We want to disable the ability to change an employee's Job Zone from the application. So, when a user is logged in, they will be able to view their Job Zone information as normal, in the following locations:

!Screen Shot 2022-11-11 at 2.41.50 PM.png|width=50%!

!Screen Shot 2022-11-11 at 2.41.58 PM.png|width=50%!

However, once they are viewing their employee details:

!IMG\_1707.PNG|width=50%!

they will not be able change Job zone information. \_When they hit “Job Zone”, we want nothing to happen.\_ Ideally, we want to fully take away the ability to edit Job zone information on the iPad and only allow this to be changed in the admin.

Would it also be possible to create a toggle that enable / disable this feature, such as:

!Screen Shot 2022-11-11 at 2.39.08 PM.png|width=50%!

If toggled off (default) - The app would function as normal & users will be able to edit Job zone data. If turned on, Job Zone data can only be changed in the admin.

Issue Key: PL-1056

Summary: Adding Barcodes for All Products in PPE and Tool Zone for TLCP

Description: We want to add a barcode to all products in PPE & Tool Zones for  
[<https://tlcp.izhips.com/admin/product>|<https://tlcp.izhips.com/admin/product>|smart-link].

The barcode should be the product title. Is it possible to make all products in these two zones have the product title as the barcodes?

Additionally, some of these products already have barcodes added, but they should also be the product title as well.

Please let me know if more information is needed.

I have also included an email as well.

Colton-

Attached is the product list for Tyson Louisa County. I am needing all of the items in tool zone and PPE zone to have the barcode uploaded. In the spreadsheet attached, all of the items have the Product title as the barcode. The upload only needs to be done for PPE and Tool zone. The subdomain is [<https://tlcp.izhips.com/admin/product>|<https://tlcp.izhips.com/admin/product>|smart-link]

Let me know if you have any more questions.

Thanks,

Issue Key: PL-1055

Summary: Expiration Date Adjustment - Amarillo Fire Dept ([amatxamafd.izhips.com](http://amatxamafd.izhips.com))

Description: We want to change the expiration date (auto-expiration date) placed on all products for the Amarillo FD (<http://amatxamafd.izhips.com>|<http://amatxamafd.izhips.com>|smart-link]). We want to change this auto-expiration date from 6 months to 12 months. Ideally, this would adjust items currently issued as well as products still yet to be issued. Is this possible [[~accountid:5e60790cab60320af8f87101](#)]? Please see attached email for more details.

Colton-

We need to make an adjustment in the Amarillo Fire Department system ( [<https://amatxamafd.izhips.com/admin> | <https://amatxamafd.izhips.com/admin> | smart-link] ). Currently, all pants and coats have an auto-expiration date of 6 months:

!cid:image002.png@01D8F2B6.409E8590|thumbnail!

We are needing to adjust this expiration date for all pants and coats in this system to a 1 year auto-expiration:

!cid:image003.png@01D8F2B6.9A8114B0|thumbnail!

When this adjustment is made, will it change all existing transactions to a 1-year auto expiration as well, or just for transactions after the adjustment? If it's the latter half, we may need to put in a second ticket to adjust historical transactions to a 1 year auto expiration.

Let me know if there are further details needed for this.

Thanks,

Issue Key: PL-1052

Summary: FD Application - Camera Product Addition - API Development

Description: We want to add a feature where associates would be able to tap a camera icon, then, the RN camera will open and allow users to scan a product barcode. Once the barcode is scanned by the RN camera, this product will be added to the application for that user only at the top of that checklist page. So if “Service Rep” scanned barcode “123456”, this product would be added to the top of whichever screen the user selected this option for (but only for this user). So if barcode “123456” was scanned in the “Gloves” screen, this product would appear on the “Gloves” screen for only that user. This product will stay in that user’s checklist until it is deleted (see attachment).

Other features requested:

\* When completing the checklist, at least one of the new items must be selected otherwise, the “Answer Required for Each Field” prompt should appear.

\*\* However, if no product / barcode is added, no prompt should appear

\* When completing the checklist with multiple barcodes / new products, only one should be allowed to be selected.

Please let me know what other information you may need!

Summary: Unable to Run L&R for <https://arajbsgrane.aramarkinnovazones.com/>

Description: Several users mentioned on Friday that they were unable to run the L&R report

for[<https://arajbsgrane.aramarkinnovazones.com/>]<https://arajbsgrane.aramarkinnovazones.com/>smart-link]

[<https://arajbsgreco.aramarkinnovazones.com/>]<https://arajbsgreco.aramarkinnovazones.com/>smart-link]. I also experienced this issue, and also found that I was not able to open

for  
[<https://arajbsgreco.aramarkinnovazones.com/>]<https://arajbsgreco.aramarkinnovazones.com/>smart-link]

Every time we try to pull the report, I got here and the report would time out:

Issue Key: PL-1047

Summary: Bulk Uploading Products (4 Spreadsheets) into amatxamafd.izhips.com

Description: [~accountid:5e60790cab60320af8f87101], Zack sent me four spreadsheets to upload into [https://amatxamafd.izhips.com/admin|https://amatxamafd.izhips.com/admin|smart-link ]. There are four different spreadsheets with different products that need to be uploaded with different types of attributes (columns P,Q,R,S).

Each of these products should have a Warranty & Manufacturing Expiration date, which already exist in this system. We need these uploaded with the dates specified for each of these products in the Excel documents.

Additionally, we want to add a normal expiration attribute attribute to each product that will be set to 6 months (auto-expiration date).

Some of these products also need to have the Loaner attribute turned on, with only the "Yes" attribute option turned on.

Lastly, each of these products should have the MFG attribute selected, which is a date attribute. These dates will be input through the application upon issuance by users. So we only need to have this attribute selected so it shows on the application upon issuance, but no date needs to be selected for this attribute.

I've attached the email sent to me by Zack.

Please let me know if you have any questions!

As discussed previously, I need the attached product lists uploaded into the Amarillo Fire Department System.

[<https://amatxamafd.izhips.com/admin>|<https://amatxamafd.izhips.com/admin>|smart-link  
]

I have added several columns of data to each product for independent attributes:

\*Warranty Expiration\*

\*Manufacturer Expiration\*

\*Expiration Date\*

\*Loaner\*

\*MFG Date\*

**\*Note:\***

**\*They are different in each spreadsheet!\***

**\*Expiration Date attribute should be set at 6 Months\***

**\*Loaner attribute should be YES\***

**\*MFG Date should be set as a Date Attribute\***

Let me know if you have any questions.

Thanks,

Issue Key: PL-1046

Summary: Expiration Report - Changing Expiration Two Dates Product Name to Name of Expiration Two Attribute

## Description:

After further discussing with Zack, we're wanting to make an adjustment to the Expiration Report for items with an expiration 2 date.

For products with permanent expirations, we are wanting to replace the Product Title with the title of that expiration 2 attribute in the Expiration Report.

Example: Product with a Expiration 2 attribute, "Manufacturer" expiration tied to it:

Currently:

!image002.png|width=614,height=99!

Adjusted:

!image004.png|width=614,height=97!

By doing this, we'll give our customer the ability to search for their warranty/manufacturer expirations in the Product Description field of the Expiration Report.

However, we do not want to adjust the product name of the regular expiration attributes.

Issue Key: PL-1044

Summary: Changing Logic for Expiration 2 Attributes So That All Expired Items Show Up on Top of Expiration Report

Description: Currently, expiration / expiration 2 attributes that become expired show up at the top of the Expiration report if issued to an employee. However, if the product is in inventory, expired items will show up as the first of the “inventory” items.

We want for all expiration / expiration 2 dates that are expired to move to the top of the report. However, we also want to keep the employee / inventory sorting, only moving the expired dates to the top of the report, regardless of whether issued or in inventory.

Currently, if an expired date for an attribute is issued, it shows at the top of the

expiration report (as desired).

However, if in inventory, this date only shows as the first “inventory” item. We only want to move the expired inventory items to the top of the report.

If issued to employee, already at top of the report:

Issue Key: PL-1042

Summary: Adding Products with Expiration Attribute 2 Dates in Amarillo Fire Department (<https://amatxamafd.izhips.com/admin>)

Description: [~accountid:5e60790cab60320af8f87101], Zack emailed me and wanted to see if we have the ability to upload 149 new products into [<https://amatxamafd.izhips.com/admin> | <https://amatxamafd.izhips.com/admin> | smart-link ]. Additionally, he would like to add two expiration 2 attributes to each of these products, which will be “Warranty Expiration” and “Manufacturer Expiration”. Both of these Expiration 2 attributes should be in this system already.

Lastly, for each of these new products, we would like to set the Warranty Expiration 2 attribute date to 9/1/2029, and the Manufacturer Expiration date to 9/1/2032.

So, all 149 products will have these dates set so when issued.

Please see email for more information.

Summary: Removing all Currently Issued Items in Tool Zone - Koch Foods Ashland

Description: We want to return all currently issued out Tool Zone items from Koch Foods Ashland (kochfoodsashland.izhips.com). (All Tool Zone Loaner items should be returned).

Colton,

I'm working on developing a loaner report auto email for Koch Ashland but the current loaner report is clogged with 4,400 items. Could we remove all currently issued items in Tool Zone?

Just wipe out everything issued before today 10/11 in Tool Zone. No need to touch PPE, Truck, Trailer, or Security Zones. I'd be happy to provide additional information if needed, just let me know if confusion arises\!

Thanks,

Issue Key: PL-1037

Summary: Changing "Sharpened" and "Not Sharpened" Text in Knife Sharpening Report, Employee Sharpening Report

Description: Similar to  
[https://izhips.atlassian.net/browse/PL-1032|https://izhips.atlassian.net/browse/PL-1032|  
smart-link] and PI-976, we changed the Sharpening Zone text. The next thing we want  
to customize is the “Sharpened” and “Not Sharpened” text that appears in the  
Employee Sharpening and Knife Sharpening reports, so that this text also changes to  
whatever text is placed in the “Sharpened” text field in the Platform/Category section of  
the master admin.

So, if “Sharpened” is changed in the platform / category section:

!Screen Shot 2022-10-13 at 4.29.25 PM.png|width=1440,height=790!

Then all “Sharpened” text should also be changed. The same logic should also be  
applied to the “Not Sharpened” text as well.

Employee Sharpening report should have all boxed “Sharpened” and “Not Sharpened”  
text updated:

!Screen Shot 2022-10-13 at 4.31.02 PM.png|width=1440,height=824!

Here is the same for the Knife Sharpening Report:

!Screen Shot 2022-10-13 at 4.30.06 PM.png|width=1440,height=825!

!Screen Shot 2022-10-13 at 4.30.33 PM.png|width=822,height=707!

!Screen Shot 2022-10-13 at 4.44.01 PM.png|width=763,height=266!

Issue Key: PL-1032

Summary: Changing Asset Scan Report Text for Products When Sharpened Through Sharpening Zone With Changed Text Name - Backend

Description:

In

[<https://izhips.atlassian.net/browse/RN-1299>][<https://izhips.atlassian.net/browse/RN-1299>]  
[smart-link] and  
[<https://izhips.atlassian.net/browse/PL-976>][<https://izhips.atlassian.net/browse/PL-976>][sm  
art-link], we developed the ability to change the name of Sharpening Zone.

Now, we want the ability to have the name of the product description to update from  
“Sharpened” to other text. The name of “Sharpened” should come from the  
“Sharpened” text from the master admin.

For example, if a user types “Inspection” in the “Sharpened” Text, this is what we  
currently show in the asset scan report:

!Screen Shot 2022-10-10 at 11.15.34 AM.png|width=1440,height=716!

Current:

!Screen Shot 2022-10-10 at 11.14.40 AM.png|width=596,height=812!

!Screen Shot 2022-10-10 at 11.17.32 AM.png|width=1440,height=791!

Desired (will change based on text placed into “Sharpened” text in admin):

!Screen Shot 2022-10-10 at 11.20.18 AM.png|width=584,height=655!

!Screen Shot 2022-10-10 at 11.21.56 AM.png|width=953,height=521!

Summary: Tool Control Report - Clerk Name Should Update to Return Clerk When Product is Returned

Description: My question is about the Tool Control Report. In the export, if an asset is issued but not returned yet it populates with the clerk who issued the knife. Once it is returned, the export should show the auditor who returned the asset not the auditor who issued the asset. Let's discuss when you get time.

!MicrosoftTeams-image (8).png|width=2040,height=234!

The above is from Logansport. I just don't see how Service Rep made this return, so I tested it in my system and it's not working correctly.

!MicrosoftTeams-image (9).png|width=2400,height=196!

I checked the asset out with Sharpener Paul.

([https://innovazones-my.sharepoint.com/personal/zack\_suther\_innovazones\_com/Documents/Microsoft[https://innovazones-my.sharepoint.com/personal/zack\_suther\_innovazones\_com/Documents/Microsoft[smart-link] Teams Chat Files/RPReplay\_Final1664380783.MP4)

I returned with Auditor Annie.

Issue Key: PL-1028

Summary: Pulling All Sharpenings From tysinlogtoop Again - Employee Sharpening Report Data

Description: [~accountid:5e60790cab60320af8f87101] would it be possible to pull the sharpening data for Tyson Logansport (tysinlogtoop) again, like in PI-1003? Zack wanted to add on to the other requested data, and wanted to see if you could also get another spreadsheet, similar to the previous one you created?

Zack also wants to have information as if you went into the Employee Sharpening report and pulled that data. However, he wants all of the employee information as well, without having to open each hyperlink in the report. Would this be possible?

Can I get another spreadsheet with all the sharpening Data from ^9/5/22 00:00:00 - current^ like it exports in the Employee Sharpening report with the following information?

Please see email for more information

Issue Key: PL-1019

Summary: New Report - Employee Inventory Report - Frontend

Description: We want to create an inventory report. This report should be similar to the Employee Report, but there will be no status / date filter. This report will be available in app, portal, and export.

We want the report to pull only a live look at the products' status. So, this logic change will have this report only show the current status of each product, whether currently issued, or unissued (previously returned, not yet issued). Any products not currently issued to an employee will not show up on the report.

\* The report shouldn't change based on the date selected. We only want to see the current status of each issued product. So we may need to determine how this would pull / how the information would show once the report is generated. We need this report to show similarly to the employee's inventory on the application if the product is issued out. So, when the report is pulled, any products issued out should show which employee currently the product is issued out to, and have:

\*\* Employee Info

\*\* Product

\*\* Product Costs

\*\*

\* For example, hypothetically, let's say that we are only looking at Tool Zone only for a company. And within Toolzone, there is a category called "Cell Phones". Within this category, there are 10 different products, each of the 10 products are cell phones, just with different model numbers. If 5 cell phones are issued out, and the remaining 5 are still unissued, we should have 5 cellphones as "out" with employee details (time in), and the other 5 cell phones should not show on this report.

The only listed filters include:

\* Employee Name

\* Department

\* Jobzone

\* Product

Operations would also like a "Total Cost" column for each employee.

Issue Key: PL-1016

Summary: Expiration 2 Attributes - All Expiration Two Attributes Should be Removed From Expiration Report When Product is Returned as "Disposal"

Description: Most things are now working as expected.

[~accountid:5e2115034092800cb1e9157e] [~accountid:5e60790cab60320af8f87101]

Only thing: When products are returned as “disposal”, the products should be removed from the expiration report. Currently, this is not the functionality:

!Screen Recording 2022-09-30 at 12.10.11 AM.mov|width=2880,height=1800!

!Screen Recording 2022-09-30 at 12.07.19 AM.mov|width=2880,height=1800!

!Screen Recording 2022-09-30 at 12.05.42 AM.mov|width=2880,height=1800!

Is it possible to fix this part only? So that when a product with expiration 2 attribute (or multiple expiration 2 attributes) is returned as “disposal”, they are removed from the expiration report?

Other than this, all functionality is working as desired.

I will create two new tickets for this (one PL / one RN).

[~accountid:61d2692c9ee70a00684b5520] \*As already DEV team mentioned, Kindly confirm whether Users should not be allowed to see the Images when the product is in Inventory status-->\* {color:#36b37e}I will work with operations to see if this is the desired functionality. For now, it is fine to keep the functionality the same as-is.{color}

Also, \*When Original Expiraiton date is current date, we are displaying it as Expired.\*

\*When Expiration 2 Date is set as Current date, we are displaying it as Not-Expired-->\*{color:#36b37e} {color}{color:#36b37e}This is fine for now as well. The dates will never be set this soon...as long as the products move from “Not-Expired” to “Expired” after the listed date, this is fine as well for now. However, it is something that will likely be addressed in the future. This appears to be the functionality currently:{color}

Issue Key: PL-1012

Summary: Adding JobZone 92 to All KitZone Products - Bird.izhips.com

Description: I wanted to see if it would be possible to add jobzone 92 to all products in all Kits in Kitzone in b[ird.izhips.com?|http://bird.izhips.com]

Brent had some employees move to jobzone 92, but several kits and products do not show up for users in jobzone 92, as the products are not enabled for this jobzone.

While I could add jobzone 92 to all products in the admin, each product has a specific set of jobzones that are tied to each product, so we are unable to simply add jobzone 92 to each product without affecting the currently selected jobzones. This feature in the admin turns off all pre-selected product jobzone data.

Would it be possible to only add jobzone 92 to each product within kitzone (or all products if necessary) without changing the current jobzone data for each product? This would be like going through each product and selecting JobZone 92 for each product in the product details:

!Screen Recording 2022-09-20 at 3.35.31 PM.mov|width=2880,height=1800!

However, it would need to be done for all products within each Kit in Kit Zone (or all

products in the system, if easier).

Summary: Arajbsgrewi Reports not fully loading

Description: For some reason the Lost and Ruin report for [+<https://www.arajbsgrewi.aramarkinnovazones.com>+|<https://www.arajbsgrewi.aramarkinnovazones.com/>] is not populating data after August. Please see image below.

There has 100% been scans in September but nothing is populating. Can you please take a look at it? At first glance it seems to be the only Aramark system with this issue.

Summary: Adjusting Pulled Data - All Sharpenings From tysinlogtoop - Employee Sharpening Report Data

Description: [~accountid:5e60790cab60320af8f87101] thank you again for pulling this sharpening data for this location. I talked with Zack today and it has helped a lot\!

However, Zack also wanted to see if you would be able to look at a couple things:

# A lot of the employees have their Employee number in the "Employee name" field instead of their last name. Do you have a way to add their last name / easily update in another spreadsheet? (This would help us put this data together). If not, we can add this.

# Zack also wanted to see if you would be able to verify / investigate some of the assets that were showed as sharpened. I have included the email from Zack, which has the attachment mentioned below:

"I highlighted transactions not showing up in the Asset scan report in yellow and transactions with questionable asset #s in red.

The red scans are the scans we get sometimes that don't match what we scanned or randomly popup when the iPad is just sitting there. Hopefully, the transaction data can help with an investigation."

Would you be able to look into some of these to see if these assets are seen anywhere else in the db?

Here are a few assets Zack mentioned:

\* 6335366

\* 90.858442

\* 90

\* 201616

\* 363640

\* ud^

\* XQK

I thought that maybe some of these assets may be due to either rogue scans of random barcodes, or maybe misreads from employee badges, as some assets are very close to existing employee badges...Or maybe due to an issue when data was pulled?

What are your thoughts on this?

Summary: Pulling All Sharpenings From tysinlogtoop - Employee Sharpening Report Data

Description: [~accountid:5e60790cab60320af8f87101], would it be possible to pull the sharpening data for Tyson Logansport (tysinlogtoop) again, except this will contain more employee information? Zack wanted to add on to the other requested data, and wanted to see if you could also get another spreadsheet, similar to the previous one you created with the sharpening data?

The last spreadsheet was great, and we gave all of the information as requested, but Zack also wants to have information as if you went into the Employee Sharpening report and pulled that data. However, he wants all of the employee information as well, without having to open each hyperlink in the report. Would this be possible?

Can I get a spreadsheet with all the sharpening Data from June 6<sup>th</sup> – Current date like it exports in the Employee Sharpening report?

Summary: Equipment Not Showing up Cart Screen of Application -  
jbssoupatoob.izhips.com

Description: In  
[http://jbssoupatoob.izhips.com|http://jbssoupatoob.izhips.com|smart-link] , we are  
unable to see the recently bulk uploaded equipment list. This is seen on several iPads

with app store version, as well as e4.79.8 bundle v100.

Also, would we be able to delete all of the equipment numbers out of jbsoupatoob?

We still need to figure out the reason why the bulk uploaded equipment numbers are not showing up, but operations wants us to simply delete these numbers so they can re-upload different equipment numbers...but still do not want to run into the same issue.

All of these can be removed:

Issue Key: PL-996

Summary: Aramark - Implementing S3 and Lambda Logic Change to Legacy Code

Description: Even though we want to move Aramark to Laravel 8, due to having issues logging into the Aramark application, we want to adjust the logic of the legacy code, so that customers are able to log into the application. Once this is completed and released, we will begin to work on Laravel 8 transition for Aramark.

For Aramark testing, the first step we have to implement the logic for s3 and lambda set up for aramark companies. We can either update this logic to legacy code or laravel 8 code...if legacy code we update the logic i have to check appropriate aws package for legacy version since aws sdk was updated not sure they supported laravel5, if we are implementing to laravel 8 code then we can reuse th enterprise files ..aramark laravel 8 we already deployed in the qa server arademo companies..more companies want to test we can set the rules for aramark qa server.

Ideally, we wouyld be able to fix this issue long enough for customers to log into Aramark app for a while, but then implement laravel 8 updates / changes.

Summary: Android Application - Adding Quantity Selection to Print Message

Description: Current pop-up menu from the cart screen:

!image001.png|width=75%!

Instead of a quantity dropdown menu Zack drafted these changes to the pop-up menu:

!image002.png|width=75%!

Functionality:

This prompt will only occur in the cart screen after charged transactions. We will remove the Yes / No options, and only give quantity input.

If select 0 -No receipts print.

If select 2 - two copies of the receipt print, etc.

Additionally, no changes should be made to Payroll report printing. Payroll functionality should be:

User opens the Payroll Report > Presses the print receipt button (for a specific transaction) > Receipt prints and returns to the Payroll Report (no qty option in payroll report currently).

Issue Key: PL-988

Summary: New Report - Employee Inventory Report - Backend

Description: We want to create an inventory report. This report should be similar to the Employee Report, but there will be no status / date filter. This report will be available in app, portal, and export.

We want the report to pull only a live look at the products' status. So, this logic change will have this report only show the current status of each product, whether currently issued, or unissued (previously returned, not yet issued). Any products not currently issued to an employee will not show up on the report.

\* The report shouldn't change based on the date selected. We only want to see the current status of each issued product. So we may need to determine how this would pull / how the information would show once the report is generated. We need this report to show similarly to the employee's inventory on the application if the product is issued out. So, when the report is pulled, any products issued out should show which employee currently the product is issued out to, and have:

\*\* Employee Info

\*\* Product

\*\* Product Costs

\*\*

\* For example, hypothetically, let's say that we are only looking at Tool Zone only for a company. And within Toolzone, there is a category called "Cell Phones". Within this

category, there are 10 different products, each of the 10 products are cell phones, just with different model numbers. If 5 cell phones are issued out, and the remaining 5 are still unissued, we should have 5 cellphones as “out” with employee details (time in), and the other 5 cell phones should not show on this report.

The only listed filters include:

- \* Employee Name
- \* Department
- \* Jobzone
- \* Product

Operations would also like a “Total Cost” column for each employee.

Issue Key: PL-983

Summary: Audit Report - Changing Logic So That Only Up-To-Date Information Populates

Description: Currently, the Audit report has the ability to pull for a selected date range. However, we want the report to pull only a live look at the products' status. So, this logic change will have this report only show the current status of each product, whether currently issued, or in inventory (returned, non-issued).

\* We do not need to see historical transaction data. The only transactional data should show for if a product is currently issued to an employee (as if looking in the Employee's return Inventory on the application), then we would only show the employee name, department, and Employee ID, for the employee that has this product, and the time out & quantity only.

\* If the product is returned / not yet issued (inventory status) the employee cells / fields with employee information should only show "inventory."

\* Rather, all of the products in the entire company should fit into two categories (from status filter mentioned above):

\*\* \*Inventory\* (if not currently issued out)

\*\* \*Issued\* (If currently issued out to an employee)

\*\* Due to this, the report shouldn't change based on the date selected. We only want to see the current status of each product. If issued, or in inventory. So we may need to determine how this would pull / how the information would show once the report is generated. So, we need this report to show similarly to the employee's inventory on the application if the product is issued out. So, when the report is pulled, any products issued out should show which employee currently the product is issued out to, or if products are not issued when the report is pulled, the product should just show as "inventory".

\*\* For example, hypothetically, let's say that we are only looking at Tool Zone only for a company. And within Toolzone, there is a category called "Cell Phones". Within this category, there are 10 different products, each of the 10 products are cell phones, just with different model numbers. If 5 cell phones are issued out, and the remaining 5 are still unissued, we should have 5 cellphones as "out" with employee details (time in), and 5 cell phones that have only "inventory" listed for the employee details since they are not issued out.

\*\* Second example, if the report shows that one of these 5 cell phones that are "issued", are currently issued to Service Rep, when the report is pulled, this exact cell

phone will show under “issued” and have Service rep’s info. But, as soon as Service Rep returns this cell phone and the report is pulled after this return, there will no longer be any employee information and the cell phone’s status is now “Inventory”.

Issue Key: PL-979

Summary: Expiration Two Attribute - Once Expiration Two Attribute is Selected With a Set Date, This Product Should Always Feed The Expiration Report.

Description: Once Expiration Two Attribute is Selected (and date is set via company admin, or through app the first time issued), This Product Should Always Feed The Expiration Report. Regardless if currently issued, returned, etc., any product with this attribute should feed the Expiration report.

If the product with this new attribute is issued, it should show on the Expiration report the same way it currently shows. However, if it is currently returned, or unissued, we want this product to remain on the Expiration report...but the under Employee Information, we want these fields / cells to simply say "inventory".

\* The +only way+ for this product to not feed the expiration report is if the product with this expiration 2 attribute is returned as "disposal".

\* As mentioned, the expiration 2 attribute will always feed the expiration report as soon as attribute is selected for this product. If this product is not issued, on the expiration report, the employee details should just say "inventory"

If product with expiration 2 attribute set, and is issued, the report should look the same in app / report portal:

**\*\*Please note, Status should NOT be inventory, but should remain “Not Expired / Expired (current functionality)\*\***

!IMG\_1502.PNG|width=50%!

However, if a product with expiration 2 attribute set, is not issued, the report should look similar to:

!Screen Shot 2022-08-16 at 4.15.56 PM.png|width=50%!

In portal:

If issued, should show up as normal on EXP report:

!Screen Shot 2022-08-26 at 11.50.01 AM.png|width=1212,height=787!

However, once the date is set in admin, or on first issuance via the app, and if product not currently issued, it should still show on the EXP report with “Inventory” showing for employee / clerk info:

!Screen Shot 2022-08-26 at 11.55.17 AM.png|width=989,height=636!

Issue Key: PL-977

Summary: Expiration Two Attribute - Creating Expiration Two Attribute

Description: \* Similar to Expiration Attribute, but able to edit name of attribute

\* Need ability to set expiration date in company admin (similar to auto-expiration), instead of time in months

\*\* Either enter in date with format mm/dd/yyyy, or be able to have a calendar popup to select the expiration date

\* If no date is set in admin, we need to be able to set the date on the iPad on first issuance (with date attribute)

Be able to Exit Expiration Two Name, like below:

!Screen Shot 2022-08-26 at 11.29.19 AM.png|width=1440,height=795!

When selected for a product, we want to be able to select a date from the admin, such as:

!Screen Shot 2022-08-26 at 11.38.52 AM.png|width=1305,height=469!

Or is possible:

!Screen Shot 2022-08-26 at 11.40.52 AM.png|width=1070,height=386!

If no date set in the admin, on the first issuance only, can set in the app:

!IMG\_1522.PNG|width=1668,height=2224!

Then, once expiration two attribute date is set, upon each issuance this date should show up in attribute screen, and be locked, similar to:

!IMG\_1523.PNG|width=1668,height=2224!

Status: Done

Issue Key: PL-976

Summary: Ability to Customize Sharpening Zone Text (Back-End)

Description: We want the ability to change the name of Sharpening Zone, so that we can use this zone for other things, such as audits, without having products checked in / out to a specific employee. We want to keep the same functionality of Sharpening Zone, but want the ability to change the name of this zone. There are two parts to the name change:

# Once Sharpening Zone is opened, even if the name change is applied in the company admin to this zone, the text at the top of the screen still says "SHARPENING ZONE". We want the Title of this zone to change / update to the new name of the Zone.

So, if I change the name of Sharpening Zone to “AUDIT SCAN ZONE”, currently:

Before Change:

!IMG\_1559.PNG|width=50%!

After Name Change (working fine):

!IMG\_1560.PNG|width=50%!

But in Sharpening Zone, the title at the top does not change:

!IMG\_1558.PNG|width=50%!

Instead, we want this name to change from “SHARPENING ZONE” to “AUDIT SCAN ZONE” in this example / to change to whatever name Sharpening Zone is changed to in the company admin.

2. The second part of this development is the ability to customize the names of the bubbles that show in the camera UI of Sharpening Zone:

!IMG\_1558 (a0574c04-0d65-4e74-8526-debbefcf28e3).PNG|width=50%!

These adjustments should be available in the master admin (platform / category list), and should look something like:

Current:

!Screen Shot 2022-09-02 at 11.01.52 AM.png|width=50%!

Desired:

!Screen Shot 2022-09-02 at 11.18.09 AM.png|width=50%!

The title changes made in each textbox in the admin should control the text that appears in the text boxes in Sharpening Zone in the application: (

!Screen Shot 2022-09-02 at 11.25.29 AM.png|width=50%!

Issue Key: PL-972

Summary: Fire Department - Master Admin Set up

Description: We want the ability to use the (not yet developed) master admin (PL-935) to create different companies. These companies should be clones of the original FD app (Amarillo FD), but not contain any report data or employee data. When a new company is added in this admin, we will input:

- \* Main company contact

- \* Department Name

- \* Images

Future Development (Not included in this ticket, only for information about about future desired use):

However, unlike our enterprise / Aramark application, we want to try and avoid using CRNs. Instead, once the company is created and main contact is entered, they will have the ability to add users (or even bulk upload), and will include login information to allow these users to access the reports / employee information URL (company URL).

Once users are created in the company URL's, we want the ability to automatically log that user into the correct company based on their email / login information. We will use

this information only to log in to the correct company rather than a URL.

Issue Key: PL-971

Summary: SAP Report showing the same items with a different UOM

Description: Please see Jean from JBS Louisville email below. It seems they are still having an issue with the SAP Report showing the same items with a different UOM. I did look into this and it looks like this is related to the issue we had a few weeks ago where the Product Name and Model #'s were not matching up in the reports.

I went ahead found these transactions in the portal, and I have attached two reports in this message. The first will be the Employee Report which shows the transactions made to this employee, and it will show that the product name is different on these two items but the model # is the same. The second attachment will be from the SAP Transfer Report, and it will show that the items issued to the employee have the same model #, but the UOM is different.

This seems like a recurring issue at JBS Louisville, and we need to get this resolved. Please have the Dev Team look into this when they can, and let us know what is happening, and how this can be fixed.

Thanks,

Issue Key: PL-970

Summary: Expiration Products Issued in Kit Zone Do Not Feed Expiration Report Correctly

Description: Found using current app store build, 4.79.8 bundle v 97. When items with

expiration dates are issued through Kit Zone, they show up as “expired” on the Expiration report. This occurs regardless of other attributes on the products. This happens whether or not using regular expiration date (set in app), or using auto-expiration.

!Screen Recording 2022-08-22 at 3.54.18 PM.mov|width=2880,height=1800!

Here’s a better example:

!Screen Recording 2022-08-22 at 3.58.59 PM.mov|width=2880,height=1800!

When the PDF is generated, the expiration date shows as “0”:

!Screen Shot 2022-08-22 at 4.02.50 PM.png|width=597,height=431!

!Screen Shot 2022-08-22 at 4.02.42 PM.png|width=590,height=406!

Issue Key: PL-962

Summary: Prod - JBS Louisville Payroll Issue

Description: From Attached Email:

Colton,

While onsite at JBS Louisville, the team brought to my attention an issue they saw in the Payroll Report. They noticed that an item was getting charged to employee with the wrong price, and when they looked into the Payroll Report it showed that the product title did not match the model #.

In the image below, you can see in the highlighted row that the product title should be “VR BOOT SHROUD 4-MIL 16” ONE SIZE BLUE (1=1EA)”, which means that the model # for this product should be 500-183783, not 500-330350 like it says in the report.

!cid:image002.png@01D8B149.60C8A200|thumbnail!

!cid:image003.png@01D8B149.F2283580|thumbnail!

This is the first time I've seen this issue, but it can become a real problem because this employee was charged more than they should have. Could you please have the Dev Team look into this and see if there was a reason that this might have happened.

[~accountid:5e60790cab60320af8f87101], it appears that the model number is tied to PUROFORT S/T SAFETY BOOT POLYURETHANE YEL (1=1PR), but on the report, it issued out a "VR BOOT SHROUD 4-MIL 16" ONE SIZE BLUE (1=1EA)". I'm not sure if it is the model # or product title that is having an issue. I'm collecting more information, but can you see any changes that may have been made to these products? Both model numbers in the payroll report (500-112787 & 500-330350) are tied to product "PUROFORT S/T SAFETY BOOT POLYURETHANE YEL (1=1PR)"

Here are the receipts for the transactions, as well as the export for the employee in question:

[^Payroll\_e86607b6-6aed-cc13-51b9-62fc106b8056.pdf]

[^Payroll\_527e003d-0dfe-c616-2bd4-62fc10154b76.pdf]

[^payroll-report-08-16-2022-095003-19592.xlsx]

I will try to get more information on this.

Issue Key: PL-961

Summary: "Expiration 2" New Attribute Type

Description: I had a meeting with Zack to develop the following type of new attribute:

\*Expiration 2 Attribute:\*

\* Copy of Expiration Attribute, but able to edit name of attribute

\* For use for product dates, such as expiration date (10 yrs / after 7 yrs).

\* Will be able to use alongside regular expiration attribute

\* Once set, we want this attribute to show in the product attributes in the application, but be locked. On the app, should have similar UI to products with auto-expiration in attribute screen

\* Once this expiration is selected for a product in the company admin, we want a date range to show up. This will be either a calendar, or a way to input an exact date with “month, day, year” format. This will be the expiration 2 expiration date.

\*\* Once this expiration date is set in the admin, it cannot be changed from the app. This date can only be changed if adjusted in the product details of the admin

\*\* If this attribute is selected, but no date is typed in, the on the first issuance only of this product, the expiration date can be set from the application (like with expiration attribute).

\* This expiration 2 attribute should also always feed the expiration report, even if not currently issued. Once the expiration date is set on the product (whether via admin, or app), this product should always show up on the expiration report.

\*\* The +only way+ for this product to not feed the expiration report is if the product with this expiration 2 attribute is returned as “disposal”.

\*\* As mentioned, the expiration 2 attribute will always feed the expiration report as soon as attribute is selected for this product. If this product is not issued, on the expiration report, the employee details should just say “inventory”

If product with expiration 2 attribute set, and is issued, the report should look the same in app / report portal:

!IMG\_1502.PNG|width=50%!

However, if a product with expiration 2 attribute set, is not issued, the report should look similar to:

!Screen Shot 2022-08-16 at 4.15.56 PM.png|width=50%!

\* Lastly, we need to be able to mass associate this attribute to several products.

Issue Key: PL-960

Summary: More Adjusting Transaction Comments for JBS Tolleson YMP (jbstolazymp)

Description: [~accountid:5e60790cab60320af8f87101], there are a few more transactions that we need to adjust for jbstolazymp. We have talked with the contact and let them know that we cannot keep doing this for them, and they should be making adjustments to prevent this from happening again. But if possible, would yiou be able to adjuyst the following transactions the same way in was done in [<https://izhips.atlassian.net/browse/PL-951>]|<https://izhips.atlassian.net/browse/PL-951>|smart-link]?

We need to change the comments to say “Notify Driver” (when fuel level options of “1/4” or “1/8” are selected). We only need to adjust the comments if possible for these transactions (attached):

Summary: FD App- Bulk Employee Upload Feature Not Working

Description: [~accountid:5e60790cab60320af8f87101], we are having trouble with bulk uploading employees into the FD system. Would you be able to add these employees into the system?

[^UserSample1.xlsx]

I'm not sure what is causing the error. I know that line 43 and 90 have the same name / email. However, we also changed this information and still had trouble bulk uploading these employees into the FD system. If we need to, we can delete one of these employees (which we also tried), but still faced an error.

Please let me know if you need anything else\!

Issue Key: PL-957

Summary: Allow remote monitor for data hoop

Description: The datahoop software listens on port 8080 to display badge/tag activity. This is currently only intended to be accessed by Chrome running on the datahoop itself and viewed on an attached monitor.

We would like to connect from Chrome running on a separate computer. Two initial use cases of interest

# Use a computer on the same network as external monitor when datahoop monitor breaks

# Use a computer on the same network as external monitor for data boards which don't support an attached monitor

Currently connecting to 8080 from a browser running on a separate computer opens the page, but the web socket won't connect.

-----

Issue Key: PL-945

Summary: Dynamic Report - Adding Certificate Filter

Description: We want to also add a “certificate” filter to the dynamic report. This filter should only add another column to the generated data, but should not include another filter at the top of the report (only a checkbox within the product category filter).

This filter should be placed under “Product” and can simply be called “Certificate”.

This filter should have the same functionality as the “Certificate” filter on the Expiration report.

!Screen Shot 2023-02-07 at 11.13.12 PM.png|width=850,height=511!

On the report, it should function similarly to the certificate column on the Expiration report, so when clicked, a PDF should be generated:

!Screen Shot 2023-02-07 at 11.14.16 PM.png|width=1437,height=788!

!Screen Shot 2023-02-07 at 11.09.20 PM.png|width=798,height=731!

Is it possible to generate a PDF with the included fields? If not, would it be easiest to include the enabled filters / fields?

Issue Key: PL-941

Summary: Product Alert Email - Wayne Farms Albertville YMP ([wayalalbprop.izhips.com](https://wayalalbprop.izhips.com))

Description: Wayne Farms Albertville ( <https://wayalalbprop.izhips.com/><https://wayalalbprop.izhips.com/>[smart-link] ) is receiving alert attribute email notifications for attribute options that are not selected to trigger email alerts. For product “Fuel Check”, these emails should only be sent when attribute option “1/8” is selected. However, alert emails have also been sent from selecting other attribute options, such as “3/4”.

I tried to troubleshoot, and make sure only "1/8" option was selected, and that only one alert attribute was in the system, and a few other things, such as turning all options off/reselecting the desired option only.

\*From attached email:\*

I went in and did a couple things:

# I deleted out everyone's email from the other fuel checks that used to get alerts

# I checked to make sure there are no other products with the "Fuel Level" attribute turned and the only product using this attribute is "Fuel Check"

# I made sure both iPads were synced by the customer to reflect the changes we made yesterday.

When I was in the Admin on my +iPad+, one thing I noticed is that the attribute alerts on the right hand column did not align with the attributes on the left. See picture of this below:

!cid:image002.jpg@01D8A8AE.7ED12040|alt="Graphical user interface, application

Description automatically generated"

Notice how 1/8<sup>th</sup> was aligned with +Select ALL+. Could this explain why we got alerts for all fuel checks completed in this last session?

What is also important to know is that we DO NOT get email alerts during EVERY fuel

check session. In fact, it's quite random. When we do get the alerts we get everything that was uploaded at once (1/8 all the way to 3/4). The most recent email blast we got was the fuel checks completed at 8 AM CST this morning. There were 7 fuel checks total.

What's very interesting is that I did not get an alert for all 7. I only got alerted for 6 out of the 7. Highlighted in RED is the transaction I did not get an alert on.

!cid:image003.png@01D8A8B0.7DF9C120|alt="A picture containing table

Description automatically generated"

Hopefully some of this helps. We need this resolved \*ASAP.\* This is our one and only Wayne Farms customer and we can't afford to have this drag out with them.

Please see email for more info.

Issue Key: PL-937

Summary: Re: Aramark / JBS Grand Island - IZ Reporting WE 7.23.2022

Description: We are seeing the number of "unknowns" sky rocket at JBS Grand Island the last 2 weeks..... See image below. We are usually less than 100 and the last two weeks we are way above 1,000.....

!Image.jpeg|width=1170,height=2532!

This is the only plant that uses our vault for ALL scanning and injects the garments directly with our vault. Hopefully this means it is an easy fix because it is all on our end.

We have never had issues with this plant before. This is our golden child and we need to get this fixed ASAP...

Can you please take a look at this ASAP?

JBS Grand Island

arajbsgrane

Thanks,

Barrett Barker

Issue Key: PL-932

Summary: Mass associate Asset #'s to its affiliated Employee ID# through Edge Zone for Tyson Logansport (Done Previously))

Description: We have done this same process before (PL-874).

We want to mass associate each Employee ID a "Knife", by using the employee's barcode in tysinlogtoop.

Please see the attached spreadsheet, we need to associate through station zone logic the asset # given in column B to the employee ID given in column A. We are issuing these asset #'s as the product "Knife" and we should only be creating the "Out" transaction.

We have done a similar association for another Tyson Location previously (linked issue). We need to do the same function for this company.

Please reach out if anyone has any questions with this request\!

I have attached the file + email to this ticket for more information.

Issue Key: PL-922

Summary: App Sync - Station Zone Query Review - Asset Scan / Addition to Cart-Backend

Description: With the transition from Aurora Serverless to the Lambda pulling data through RDS Proxy, with the addition of 200 units of provisioned concurrency and app build from

[<https://izhips.atlassian.net/browse/RN-1164>][<https://izhips.atlassian.net/browse/RN-1164> smart-link], the online version of our App Sync application is running much better than

when we first transitioned from Aurora. However, in [\[https://izhips.atlassian.net/browse/PL-823\]](https://izhips.atlassian.net/browse/PL-823)<https://izhips.atlassian.net/browse/PL-823>[smart-link](#) I detailed out that the area of the application we're still seeing the most latency is in Station Zone. I wanted to see if it would be possible to review the queries involved with the scanning of an asset, and the addition of this asset to the cart screen in Station Zone to see if we could optimize this query to reduce latency in the app sync app.

Our goal is to investigate if we can reduce latency in the app sync version of our application.

The process we want to look into is:

-----

Issue Key: PL-915

Summary: Injected Items Show Up as Checked Out to One Employee for "Out" Products on the Employee Report

Description: On the Employee report, items that are checked out / currently issued (status: out) in the Employee report all show up as being checked out to one employee on the Employee Report:

!Screen Shot 2022-07-15 at 10.33.58 AM.png|width=983,height=569!

!Screen Shot 2022-07-15 at 10.34.16 AM.png|width=1125,height=793!

Once the items are checked in, the Employee report accurately reflects each employee

transaction:

!Screen Shot 2022-07-15 at 10.35.24 AM.png|width=991,height=796!

However, we want to see if we would be able to fix that all issued “out” products are showing up as issued to one single employee, with only the quantity of injected items increasing for one single employee.

The FM accurately reflects each employee transaction.

This issue was discovered in  
[<http://jbsgreeley.izhips.com>|<http://jbsgreeley.izhips.com>|smart-link] , but can be seen  
in any system using Data Hoops to issue injected products.

Issue Key: PL-912

Summary: Dynamic Report Transaction Order - Latest Transactions Need to Show on Top Of Report

Description: From  
[<https://izhips.atlassian.net/browse/PL-870>]<https://izhips.atlassian.net/browse/PL-870>|smart-link].

However, one issue that I found, which is not necessarily related to this ticket:  
Transactions are not populating in order of transaction time:

!Screen Recording 2022-07-12 at 11.51.53 AM.mov|width=2880,height=1800!

In this video, you can see that Service rep conducted transactions at 12:30 PM, while “CCKnife Test” has transactions at 12:47 PM, but Service Rep’s transactions appeared ahead of the second employee. I can create another ticket for this in the backlog.

Regardless of transaction type, the latest data should show on top of generated data.

Here is another example on the Dynamic report of the same employee’s transactions populating slightly out of order:

!Screen Shot 2022-07-12 at 2.43.30 PM.png|width=897,height=704!

Issue Key: PL-906

Summary: New Report - Audit Report Back End

Description: We need to duplicate the “Product Breakdown Report”. Reporting portal only.

Call it the “Audit Report”.

Then add the “Description” data from the product data in the admin. This column will

be added to the portal screen and the export as well.

Then below the products that are currently issued out to employees on the exported report please put in all other items still sitting in “inventory” that are not issued out to employees. The employee column will just say “Inventory” because they are not issued to employees.

Thanks,

Issue Key: PL-904

Summary: Sanitizit Application - Transition to Fire Department Checklist App - Checklist Report Export

Description: For the one new report for the Sanitizit / Fire Department Checklist App, we want to also create an export as well. The export functionality should be the same as the current portal, so that the export generates after the “export” button is selected in [\[https://sanitizit.izhips.com/dashboard\]](https://sanitizit.izhips.com/dashboard)[|https://sanitizit.izhips.com/dashboard](https://sanitizit.izhips.com/dashboard)[|smart-link](#)

The export should have the following format:

[^Checklist Reportupdated) (7d8c2a8d-dd30-45af-9c88-c90b348d2d6d).xlsx]

Please note: If a comment is left by the user app-side on one of the screens, such as:

!Screen Shot 2022-07-07 at 2.28.37 PM.png|width=326,height=701!

or

!Screen Shot 2022-07-07 at 2.28.50 PM.png|width=321,height=720!

The comments should be visible under the section of the checklist in the export.

For example, if comment was:

!Screen Shot 2022-07-07 at 2.31.11 PM.png|width=321,height=657!

In the PPE Checklist → Equipment List, it should show up in the same section of the export:

!Screen Shot 2022-07-07 at 2.34.04 PM.png|width=75%!

Issue Key: PL-903

Summary: Sanitizit Application - Transition to Fire Department Checklist App - Report  
Addition to Portal

Description: First off, lets no longer call it the “Sanitizit App”, it is now the “Fire Department Checklist App”. I think it will help keep all of our communication more clear moving forward.

I have attached a few document we think y’all will need to get going.

- \* PDF of the new app. Showing the flow and required new questions on the application.

- \* Example of the report we need built. I would assume this will go in the Dashboard page?

URL

- [<https://sanitizit.izhips.com/dashboard>|<https://sanitizit.izhips.com/dashboard>|smart-link  
]

- \*\* \*First is the online portal view of the report (based on the existing IZ Employee Report)\*

- \*\* Second is the export of that report (Based on the existing IZ Product Breakdown Report)

\* You will also find the Amarillo Fire Department Logo in png form to adjust in the application

For this ticket, we want to change the report portal view.

Current:

!Screen Shot 2022-07-06 at 4.57.41 PM.png|width=75%!

Desired:

We want to add a “Reports” category to the menu on the left-hand side/in the

navigation menu.

!Screen Shot 2022-07-06 at 5.31.34 PM.png|width=75%!

Then, once the user selects the report menu, the font should turn red, like the “dashboard icon” in the first picture.

Once “Reports” is selected, the user will be navigated to this report page, which only contains the “Checklist” report:

!Screen Shot 2022-07-07 at 12.05.16 PM.png|width=682,height=560!

This report is based off of the employee report and contains only:

\* Employee information

\* Checklist type (PPE Checklist, or Vehicle Checklist)

\* Date / time completed

Issue Key: PL-893

Summary: Lost Functionality - When Lost Checkbox is Checked in the FM Report, Should have Same Functionality as if Returned Via Station Zone/Employee Inventory

Description: When a user selects the checkbox in the FM report on the app and designated item as lost, we want that item to be "Returned" as Lost.

This should be the same return process as returning through Station Zone or through Employee Inventory.

Once returned, should feed the same reports with same data points as if returned normally - So return quantity and date/time should be filled out on all relevant reports if checkbox selected in FM report.

However, the product should remain in the employee inventory. It will only feed reports

like it was returned (with “Lost” return reason).

Issue Key: PL-892

Summary: Creating Toggle That Would Enable / Disable Offline Functionality on the Application (Back-End)

Description: We want to create a toggle that if enabled, would allow customers to use iPad application online only. However, if the toggle is turned off, the customers would be able to use the Innova Zones enterprise application online, as well as offline.

This will allow the Ops team to test whether customer locations need offline capabilities, and give us the ability to disallow offline usage.

Toggle name: "Online Use Only"

Toggle UI:

We would also want this toggle default to be “off” so that would have to manually turn this setting on for each customer location if we wanted online use only.

Issue Key: PL-875

Summary: Add Quick Reset Ability With CRN System Without Static CRN Value Development

Description: We have recently developed the ability for CRN's to be randomly generated on a daily schedule if the CRN generation toggle is selected in the master admin. However, with this development, we are unable to use the Quick Reset functionality if an iPad was signed into a company with one CRN, stays logged in, and the CRN is then regenerated. The quick reset will only fill text for the old CRN, so the iPad will not CRN reset. So, we will need the text autofill to be updated to the current CRN.

Issue Key: PL-861

Summary: Non-Returnable Upload Bug

Description: We are having an issue with the product export where it flips the returnable and non returnable markers. For example, if something is marked returnable(1) in the admin whenever you export it, it shows it as non-returnable (0). I have attached the export for your viewing.

System where the export was pulled:

[<http://bird.izhips.com/admin>|<http://bird.izhips.com/admin>|smart-link]

System where products are allocated incorrectly:

[<http://birdmscolser.izhips.com/admin>|<http://birdmscolser.izhips.com/admin>|smart-link]

Status: Done

Issue Key: PL-860

Summary: Changing all Products in birdmscolser to Returnable

Description: In [<http://birdmscolser.izhips.com>|<http://birdmscolser.izhips.com>|smart-link]  
, all products were uploaded as “non-returnable,” but we wanted to see if it would be possible to change all products in this system to “returnable.” Is this something you

could do without having to manually change each product?

Also, there is an issue with the product export where it flips the returnable and non returnable markers. For example, if something is marked returnable(1) in the admin whenever you export it, it shows it as non-returnable (0). This is a bug that will need to be changed, which can be addressed in another ticket.

Issue Key: PL-855

Summary: Changing Dynamic Report UI / Structure

Description: We want to change the Dynamic Report's UI / Structure. We want to make these changes as we will be adding more and more filters, and eventually, we would simply run out of room in the portal to place these filters (Hazard filter, Loaner filter, etc.). While we want to make changes, we want to keep the functionality of this report the same.

Issue Key: PL-853

Summary: Adding "Employee Transactions" Filter Into Dynamic Report

Description: [~accountid:61f92965c6bd1a00691cd3d2], currently the Dynamic Report populates the same product information/transactions as the Employee Report. We want to add this "Employee Transactions" Filter that when selected, will show these same transactions as currently populate. But, if this filter is not selected, no transactions should show up on the Dynamic report.

The reason we are doing this is so that we can add “Loaner” “Foreign Materials” filters as well. When each of these is selected, all transactions for that type should populate in the report.

For instance, if only “Loaner” is selected, only the transactions using products with the loaner attribute should appear on the report.

Or, if only “Foreign Materials” is selected, only items marked as Hazard Items should appear on the report.

Current Problem: We have a lot of transactions that will currently populate on the report when “product title” is selected. Instead, with all of the transactions, we only want these transactions to populate if the “employee transactions” filter is selected. So, we need to create this filter, called “employee transactions” that when selected->all transactions (excluding loaner, foreign materials, expiration) show up on the report. We want to keep “product title” as a filter/column also. However, we want to control what data generates when the report is run.

Issue Key: PL-852

Summary: Adding Lost Product Functionality (Front-End)

Description: We want to add in a “lost product” functionality. This functionality hosts several changes:

- # “Lost” will be a return reason.

- # When item designated as “lost,” an alert email will be sent to specified users (in company admin)

- # Lost products will have “lost” checkbox checked in FM

- # On the FM report, lost products will also be highlighted in red

- # Lost products will remain in Employee inventory,

- # The lost products will show up with “0” or “NA” on “returned” or “in” columns in reports/ “Lost” on Employee Report.

- # Lost show up on station zone & employee return inventory return reasons? Can select

“lost” on the FM report too

# Will show on FM, and Employee reports.

|10|Laksha|Gale|0262994|Peco Sebastopol|0262994| | |

All of these employees are clerks and inspectors, and if we turn off the inspector check, then back on...then they will show up (I did this for Barbara). Similarly, if we go to app store build (without updating), then sign in as one of the missing employees, then update-> all of the missing employees show up...until a CRN reset is done. Then, they go missing again

Status: Done

Issue Key: PL-841

Summary: Cognex Feed - Employee Sharpening Report Adjustments

Description: Currently, the Employee Sharpening report shows “Employee Name” as “Robotic Sharpening” in systems using Cognex camera to capture sharpenings. However, the “Employee Name” field should populate with the employee name that each sharpened asset is issued to before the sharpening takes place (this is the logic in all other systems). If an asset is sharpened without being issued out, the employee name should read “NA.” Please note, the Cognex is only feeding [http://datahoopdemo.stageizhips.com|http://datahoopdemo.stageizhips.com|smart-link ] currently.

Current:

!Screen Shot 2022-05-18 at 3.59.46 PM.png|width=1917,height=896!

Since these knives were never issued out to an employee, the “Employee Field” should read out as “NA.” However, if the knife that was sharpened was issued to an employee previous to the sharpening, that employee’s name would populate here. For instance, if the knife was issued out to “Bob Jones” before the sharpening, the report should show:

!Screen Shot 2022-05-18 at 4.06.16 PM.png|width=1163,height=655!

Or, if a knife is sharpened without being issued out, the report should read as:

!Screen Shot 2022-05-18 at 4.06.39 PM.png|width=1279,height=650!

We want the logic of this report in this system using Cognex to keep the same logic as

the Employee Sharpening report in all other systems.

On this same report, we also want to change the employee name in the second part of the report (once the hyperlink is clicked). Additionally, in this second screen we want to change the “Test” value in the “Model #” and replace “Test” with “Robotic Sharpening.”

Current:

!Screen Shot 2022-05-18 at 4.09.09 PM.png|width=1153,height=797!

Issue Key: PL-837

Summary: Alert Email Changes - Min / Max Product Reason Email

Description: h2. Description

The ordering of the alert emails was slightly changed previously, and we added the date/time of the transaction that triggered the alert email (already done).

However, the format of the alert emails for Min / Max Product alert reasons has not yet been adjusted. We have not yet changed the following for any alert emails except for the alert emails for the alert attribute:

- \* Highlighting alert reason

- \* Moving alert reason to the top of the alert email for Station Zone returns

- \* Adding “Thanks, Innova Zones Automated Alert System” at the bottom of the email, instead of “Thanks, \[Company Name]”

We want to adjust the three above points for Min / Max product alert Emails.

Current:

!Screen Shot 2022-05-17 at 5.44.42 PM.png|width=832,height=719!

Desired (We want to make these changes so that the alert emails sent for return reasons look like the alert emails sent for products with the alert attributes):

!Screen Shot 2022-05-17 at 5.19.19 PM.png|width=661,height=527!

So, it would look like this:

!Screen Shot 2022-05-17 at 5.49.13 PM.png|width=1090,height=906!

Status: Done

Issue Key: PL-823

Summary: Switching the AppSync data source from Aurora serverless to Lambda pulling data through RDS Proxy

Description: Based on what I've heard from everyone and some searching for options, I wanted to suggest switching the AppSync data source from Aurora serverless to Lambda pulling data through RDS Proxy from our original MySQL instance (not Aurora).

Aurora serverless is interesting and switching to v2 engine (currently using v1) may solve some of the cold-start and unavailability during slow scaling issues likely contributing to performance issues mentioned by Karthiyayini when they allowed it to scale up/down. But, it wouldn't be just for AppSync queries and it seems moving our main backend databases to serverless may not be optimal

Regular RDS instances (non-Aurora) can use RDS Proxy to provide connection pooling for short-lived 'serverless' processes like Lambda functions (opening database connections is considered a comparatively resource heavy operation so they are usually re-used from a pool).

We could use a Lambda function as an AppSync data source and let it run the SQL from the VTL templates via the RDS proxy against our current (non-aurora) databases. I think the only additional work be the wrapper Lambda function to open the database connection and execute the SQL statement.

A similar setup is outlined in this [AWS blog post](#).

<https://aws.amazon.com/blogs/mobile/appsync-graphql-sql-rds-proxy/>

Issue Key: PL-818

Summary: New Zone - Repair Zone - Front End Development

Description: # \*Repair Zone\* - To create this, we need to duplicate Station Zone and rename this new zone to “Repair Zone.” Within this zone, we would need to duplicate our Foreign Materials Report and rename the report to “Repair In / Out Report”. It’s very important to note that transactions in Repair Zone will ONLY feed the Repair In / Out Report. None of the transactions in this zone should feed the Foreign Materials Report or any other reports from any other zones.

# The “Repair In / Out Report” will have one additional column placed on the very far right of the report. We can name this column, “Repair Count.” This column will simply total the amount of times that the unique asset# in the row has been ISSUED OUT in

Repair Zone ONLY.

There will be two clones of the FM report, one called "Repair In / Out Report," which only has Repair Zone transactions, and a second report, called "Mesh In / Out Report" which only has transactions done via Mesh Zone. Both Mesh Zone and Repair Zone transactions should not feed any other report anywhere else (if this is possible). Mesh Zone transactions -> Only feed 'Mesh In / Out Report' and Repair Zone transactions -> only feed "Repair In / Out report"

Issue Key: PL-811

Summary: Notification for Asset# Association Toggle in Master Admin Will Not Enable in App

Description: Even after the Notification for Asset# Association toggle is turned on in the Master Admin, this functionality does not turn on in the app. The toggle is:

!IMG\_0543.PNG|width=1668,height=2224!

Desired functionality: If a tool is not issued out/checked out to an employee, when this tool is sharpened in Sharpening Zone, it will show a popup alert to notify the user that the asset is not checked out. However, the app should still allow that tool to be sharpened (this was previous functionality):

!IMG\_0543.PNG|width=1668,height=2224!

Current: Even when the toggle is enabled, the message is not showing up in Sharpening Zone when a tool that is not issued to an employee is sharpened:

!53adcf09-b99b-4568-b59b-c93b112d20c8|width=1440,height=1920!

Interestingly, if a company had this toggle enabled before, and I did not adjust this toggle (left it on-did not turn off), the functionality still worked:

!ad9473c9-3ab5-4ea5-b041-5696e2396499|width=1440,height=1920!

However, for some companies that had toggle previously enabled, I tried to turn off, then back on. This feature would not turn back on. In this case, the desired functionality did not reappear, this message would not come back on (tried sync, CRN resets).

I also tested to see if other settings in the “Company Settings” tab would be applied after a sync, which they were.

Issue Key: PL-809

Summary: Creating Alert Email For When A New iPad Attempts to Log Into a System

Description: While we have developed a way to filter devices for each system from the Device Master List in the Company Admins, we need to have a way to be alerted when a new iPad attempts to log into a system. The best way to do this will be to have an email sent out to a selected few recipients. Information we will need on these emails is:

\* iPad info (UUID)

\* Time of attempted login

\* What company an iPad is attempting to log into.

I do not believe we need to add a list of emails that will be receiving these emails (it will not change frequently). For now, is it possible to send only to my emails:

[colton.carver@innovazones.com|mailto:colton.carver@innovazones.com]

Dev Team can also have this email sent.

For the email, it can be very simple, such as:

Issue Key: PL-808

Summary: Adding Products That Were Issued Back Into JBS Cactus Reports

Description: In [<http://jbscactxtoob.izhips.com>]<http://jbscactxtoob.izhips.com>[smart-link], they had a few products that were issued out, but the iPad got stuck in a loop and was unable to sync, although it would say “sync successful” after pressing sync button. These transactions still would not show up on reports and when we tried to CRN reset iPad, it gave us the “Pending Data: Sync iPad error,” even after we would press sync. To get them back up and running, we had to delete and reinstall the IZ app. This led to a few transactions being deleted. Is there a way we can add one of these transactions into this system so they will show up on reports?

The only transactions:

!image001.png|width=624,height=471!

The only item we need to add on our end is this product:

!Screen Shot 2022-05-02 at 3.32.04 PM.png|width=1365,height=634!

It should be issued to:

|RICARDO|GALVAN|526565|AS-BF Cactus TX|7099808|

If possible, we will need to backdate this transaction to 02/05/2022.

Please let me know if it is possible to add this transaction in. If not, I will let the contact know.

Issue Key: PL-807

Summary: Adding the Ability to Have More Than One Item in Station Zone

Description: Due to the issues observed in [\[https://izhips.atlassian.net/browse/PL-801\]](https://izhips.atlassian.net/browse/PL-801)[|https://izhips.atlassian.net/browse/PL-801](https://izhips.atlassian.net/browse/PL-801)[|smart-link](#)], we want to have the ability to add more than one product in Station Zone. We will be injecting items via Injection Zone that will be different types of knives/tools, which will be sharpened and need to populate on the Employee Sharpening report (without saying “NA”), the Area report, and the Knife Sharpening report. Currently, we can only have one item in Station Zone that is functional. The current logic for the default item will be the first listed item. For instance:

!Screen Shot 2022-05-01 at 9.16.52 PM.png|width=1361,height=562!

“Knife” will be the default Station Zone product for items that are not injected into the system, because it is listed as #1. But if we change this:

!Screen Shot 2022-05-01 at 9.18.57 PM.png|width=1365,height=574!

Now all un-injected items scanned through Station Zone will read as “Tool.” This is the current logic and we want to keep this logic. However, we need to be able to inject items as multiple types of Station Zone items and ensure that they feed all of these reports (as well as the Manual Entry, FM, Employee, etc.).

Issue Key: PL-802

Summary: Creating New CRN System Without Static CRN Value -Back End

Description: We want to enhance security by changing our current CRN system. Currently, to log into a system, we go to the admin and simply type in the CRN for that system, which always stays the same. For example, for izstoreroom, we simply type “smp” into the iPad for the CRN.

However, we want to have the CRNs change daily, so that a user must use the master admin to get the current numerical CRN to log into a particular system.

These CRNs should change daily. We already have a CRN randomizer in the master admin:

!Screen Recording 2022-04-20 at 3.52.53 PM.mov|thumbnail!

We simply want existing CRNs to change on a daily schedule, so that the CRN for each

system changes daily. We should have a toggle next to each CRN that we want to change daily, which would look like this:

Current:

!Screen Shot 2022-04-20 at 3.52.06 PM.png|width=1887,height=944!

!Screen Shot 2022-04-20 at 3.52.16 PM.png|width=936,height=116!

Desired:

!Screen Shot 2022-04-20 at 4.02.36 PM.png|width=1101,height=132!

When this toggle is selected, the CRN will change daily, so that the CRN for this same

system from yesterday will not allow users to log into this system today.

Issue Key: PL-801

Summary: Employee Issues in ZTCP (Cloned Company)

Description: In [<https://ztcp.izhips.com>]<https://ztcp.izhips.com/login>], we are having issues with employee transactions in Edge Zone. These issues began after we changed the badge numbers for a few of the employees. This is a cloned company, and the issues are likely due to the fact that this is a cloned company. Issues are occurring

after enrolling a new employee or changing a current employee's badge number. When this happens:

- \* The Employee name is not listed in the Employee Sharpening Report (listed as NA), even though knives was issued to this changed employee when sharpened.
- \* The Foreign Materials report is showing knives that are returned, but these returns are not populating ion the Employee Asset Return report
- \* The Area report for these companies is not displaying issuances or returns of these knives.

These issues are seen when issuing through Edge Zone, involve Sharpenings via Sharpening Zone, and there are issues with both returns via Edge Zone, as well as via an employee's inventory.

Zack is using this company as his personal company and has spent a long time setting up this company exactly as he wants it, so he does not want transactions occurring in this company. Thus, I have created another clone of iztcpk (which this company was cloned from: cctcpk. Please feel free to do transactions in this company. I have also

changed the badge numbers for “Troy Aikman”, and “Barry Sanders”.

There are no issues unless employee badge numbers are changed, OR new employees are added. When the info is changed, Edge Zone, Sharpening zone, and the reports are having issues.

I created company, cctcpk to recreate this issue, but I was not able to do so:

I also did not have these issues with iztcpk company.

Here are some attachments and pictures of the issues seen in the reports of ztcp:

Issue Key: PL-799

Summary: Adding Signature Ability in Station Zone Check out- API

Description: We want to create a signature functionality in Station Zone. We want to do this by keeping the current Station Zone functionality the same, except for when a product is scanned that has confirm signature toggle enabled, a pop-up signature box will appear on the screen. For example: When an employee walks up and taps their badge:

!IMG\_0454.PNG|width=1668,height=2224!

-->

!IMG\_0455.PNG|width=1668,height=2224!

Then, once a product is scanned that has confirm signature toggle enabled, a pop-up box will appear on the screen, prompting the user for a signature:

!Screen Shot 2022-04-06 at 11.05.31 AM.png|width=594,height=795!

The employee will then have to sign to box before the iPad will continue functionality. After signature is captured, the box will slide off of the screen and the product will be added/iPad will be ready for next employee:

!IMG\_0457.PNG|width=1668,height=2224!

If product is to be payroll deducted, the process will remain the same.

Issue Key: PL-798

Summary: Allow delete employees option for shared/ cloned companies

Description: we will need to change the delete employee logic, if possible. We would want to chage only one aspect->If a company is cloned, we want to be able to delete

employees for the cloned company. This would not affect parent company, right? So, if I cloned "jbsdemo" and created "jbsdemo1" I would like the ability to delete all employees from jbsdemo1 without affecting jbsdemo, the parent company. Is this possible?

Also, we still need to block delete all employees feature for companies with EDI. So, if a company is EDI active, we will not have a button available to delete all employees for this company.

If an EDI company is cloned, we should be able to delete employees from the cloned company, unless EDI is ran to the child company. However, if this is not easy to update, we can simply block employee deletion ability for cloned EDI companies too-this is no problem. So, if tystxamaharb is cloned and it is difficult to change status of child company (let's call it tystxamaharb1), then it is okay to block delete all employees

feature for tystxamaharb1 as well.

## Summary: Aramark Data Request - Aramark Usage Report - More Aramark Locations

Description: We need to pull the Aramark Usage report for:

- \* JBS Grand Island

- \* JBS Souderton

- \* JBS Cactus

- \* JBS Green Bay

However, we only need to most recent transaction for each asset (if this is possible to filter for. If not, I can filter each Excel document so that only the most recent scan for each asset is present). We need this information from October 1 of 2021 through March 31 of 2022. Also, if possible, can we have each location in a separate Excel document?

This will be similar to  
[<https://izhips.atlassian.net/browse/PL-768>|<https://izhips.atlassian.net/browse/PL-768>|smart-link].

Summary: Changing Comments on Fuel Checks for JBS Tolleson

Description: In jbstolazymp, several Truck Zone transactions have comments of "0," however, we need to change the comments to say "Notify Driver" (when fuel level option of "1/4" is selected). We only need to adjust the comments if possible for these transactions. The transaction comments need to be changed by two two employees:

# Angelica Davila - #601082

# Torieaun Hilbert - #3095415

The specific transactions are in a document attached to this ticket. There are seven transactions that need the comments changed from “0” to “Notify Driver.”

Please let me know if you need anything else/more information.

Issue Key: PL-795

Summary: Cloning EDI System - Jbscactxtoob

Description: We want to clone [http://Jbscactxtoob.izhips.com|http://Jbscactxtoob.izhips.com|smart-link] , however, I was not sure if cloning an EDI company is okay to do currently. We want all information (categories, pictures, employees, etc.) but do not want report history to move over (This is the current functionality for cloning non-edi companies in master admin). This cloned company should have CRN of jbscactxtrain and be called JBS Cactus Training Program. We also want EDI to feed this system, just as it feeds jbscactxtoob, which I will reach out to Shadab to fulfill this requirement. Please let me know if you need any more information.

-----

Issue Key: PL-791

Summary: Creating New CRN System Without Static CRN Value - Front End

Description: We want to enhance security by changing our current CRN system. Currently, to log into a system, we go to the admin and simply type in the CRN for that system, which always stays the same. For example, for izstoreroom, we simply type “smp” into the iPad for the CRN.

However, we want to have the CRNs change daily, so that a user must use the master admin to get the current numerical CRN to log into a particular system.

These CRNs should change daily. We already have a CRN randomizer in the master admin:

!Screen Recording 2022-04-20 at 3.52.53 PM.mov|thumbnail!

We simply want existing CRNs to change on a daily schedule, so that the CRN for each system changes daily. We should have a toggle next to each CRN that we want to change daily, which would look like this:

Current:

!Screen Shot 2022-04-20 at 3.52.06 PM.png|width=1887,height=944!

!Screen Shot 2022-04-20 at 3.52.16 PM.png|width=936,height=116!

Desired:

!Screen Shot 2022-04-20 at 4.02.36 PM.png|width=1101,height=132!

When this toggle is selected, the CRN will change daily, so that the CRN for this same system from yesterday will not allow users to log into this system today.

Issue Key: PL-787

Summary: Creating Auto-Expiration Feature - Back End

Description: We want to add the ability to set up auto-expiration for products once issued. This means that once a product is issued via station zone, zone screen, etc. whatever expiration time that is set for this product will auto-set. For instance, if this auto-expiration is set for a hard hat, for 3 months, and the hard hat is issued on June 1st, the expiration for this product will be set for September 1st. This expiration item will act as a normal expiry item, so it will populate on the expiration report. The user will just not have to set the expiration date from the application. For the admin, this auto-expiration option should be built in product attributes, next to "Expiration Date."

!Screen Recording 2022-04-06 at 11.12.05 AM.mov|width=1920,height=1080!

Once this option is selected:

!Screen Shot 2022-04-06 at 11.32.22 AM.png|width=1207,height=659!

The user will be prompted to enter the number of months until the product is expired.

Summary: Dynamic Report Back end - Report Filter API

Description: We would like to have the ability to create a report with customizable inputs. This report will have several inputs that we would be able to select to be included in the data generation:

!IMG\_4777.HEIC|thumbnail!

At the top of this report, we should have several fields that we can select from. These fields will be the criteria that we can select to be included in the report. This criteria should consist of:

\* Employee Name

\* Employee ID

\* Date Range

\* Product Name

This report will give the user the ability to select which inputs will be generated within the “data population” area.

For instance, if the user wants to see employee name, employee ID, and a date range, these three items would be selected and when the user hits “go,” the data would populate in the space titled “data population.”

Issue Key: PL-778

Summary: Changing the Bulk Upload Sample Sheet, so Product Descriptions Can be Added

Description: With 8.3.2 release, we gave users the ability to bulk upload products in the company admin. However, we need to update the sample sheet, so that customers can add more product information when using the bulk upload feature. Current:

!Screen Recording 2022-04-11 at 2.52.29 PM.mov|width=2880,height=1800!

Need to add a sample sheet similar to:

[^Product Upload Sample File.xls]

The only current way to upload product descriptions is to download a product list from another company on 8.3.2, then change the product information. However, we need to update this sheet so that customers can bulk upload products with product descriptions. We also need to make sure that they do not have to change formatting of the sheet/ensure that products can be bulk uploaded without having to change the sample excel sheet.

Summary: Adding the Quick Time Links to the Remainder of Portal Reports

Description: We want all portal reports to have the “time links” that allow users to

easily set the time ranges to 11:59 PM:

!Screen Shot 2022-04-11 at 2.42.10 PM.png|width=169,height=53!

The following portal reports do not have these quick time links:

|Customer Report|Truck Zone Report|

|Loaner Report|iUniform Zone Report|

|Equipment Report|iUniform - Unissued Garment Report|

|Equipment Group Report|iUniform - Duplicate Issued Report|

|In/Out Report|Expiration Report|

|Payroll Report|SAP Transfer Report|

|Clerk Transactions Report|Stores Inventory Adjusmtment Report|

|Issue Report|Stores Issue / Return Report|

|Department Report|Cintas Payroll Report|

|Unissued Garment Report|Invoice Zone Report|

|Charge Out Report|Training Zone Report|

|Duplicate Issued Report|Daily Transactions Report|

|Multiple Garment Issue Report|Missing Garment Report|

|Portal Activity Report|Inventory Adjustment Report|

|Product Breakdown Report|Uniform Zone Report|

|Aramark Inspection Report|SAP Inventory Adjustment Report|

|Aramark Usage Report| |

We want to add thee quick time links to each of these reports, as well as all new reports moving forward.

Issue Key: PL-775

Summary: Creating Hyperlink for Status Icons in Customer Admin (Clerk, Supervisor, Etc.), so Employees Can be Organized by Status

Description: We want the ability to add a Hyperlink for Status Icons in Customer Admin.

Current Layout: Nothing happens when you hover over the logos:

!Screen Shot 2022-04-11 at 2.11.03 PM.png|width=992,height=489!

Adjusted Layout: Selectable cursor appears over Supervisor, Clerk or Inspector:

!Screen Shot 2022-04-11 at 2.12.56 PM.png|width=990,height=485!

Adjusted Functionality: When Supervisor, Clerk, or Inspector is selected, the Employee File filters by selected icon. Example: Selecting the Clerk Status:

!Screen Shot 2022-04-11 at 2.17.37 PM.png|width=994,height=487!

→ → →

!Screen Shot 2022-04-11 at 2.18.05 PM.png|width=995,height=487!

Thus, the employees are organized based now on clerk status.

Status: Done

Issue Key: PL-774

Summary: Removing All Turned on Reports Upon Initial Company Creation, Except for Employee Report (Master Admin)

Description: We want to change the default reports that are turned on when a new company is created. Current:

!Screen Shot 2022-04-11 at 2.07.06 PM.png|width=866,height=427!

Desired:

!Screen Shot 2022-04-11 at 2.05.31 PM.png|width=1440,height=790!

We only want the “Employee Report” toggled on upon company creation. We want to make this change to the application and web-based reports. So, once a company is created, the only web and application reports that would be toggled on is the Employee Report.

Status: Done

-----

Issue Key: PL-773

Summary: Adding a Confirmation Signature Button to the Product List Screen (Customer Admin)

Description: We want to add a Confirmation Signature Button to the Product List Screen in the Customer Admin. Here is the current layout:

!Screen Shot 2022-04-11 at 1.59.12 PM.png|width=1020,height=496!

What we want:

!Screen Shot 2022-04-11 at 1.59.24 PM.png|width=1013,height=499!

Functionality: User selects products (blue check marks on the far left), selects "Confirmation Signature Button", and selects "Apply" from a simple pop-up menu

!Screen Shot 2022-04-11 at 1.59.51 PM.png|width=1034,height=506!

Product(s) selected with confirmation signature will now have it applied to their product details

!Screen Shot 2022-04-11 at 2.00.01 PM.png|width=1033,height=507!

Issue Key: PL-765

Summary: Highlighting All Fields That Must be Changed When Cloning a Company

Description: We need to highlight all fields that must be changed for a company when the clone company feature is used. We would need to highlight these fields by implementing a red box around the perimeter of these items and not allow the user to select "Save and Continue" or "Save and Exit" when trying to clone a company without

changing this information. This includes company name, email, CRN, phone number, etc. Any field that needs to be changed must be highlighted in red. This red box around the perimeter should appear as soon as the user selects the clone feature from the company list and the “Add Company” screen appears.

Current:

!Screen Recording 2022-04-07 at 1.31.11 PM.mov|width=1920,height=1080!

Desired:

Once select clone company option:

!Screen Shot 2022-04-07 at 1.33.54 PM.png|width=1304,height=735!

Issue Key: PL-764

Summary: Data Hoop Controller should release lock when finished

Description: During testing for doorway reader vr-fa51f8, Colton would check out a tag on an issue hoop, then try to return the item using the doorway reader, but get a red

LED blink. Tail'ing the log on vr-fa51f8, we saw:

```
{noformat}2022-04-06T23:14:06.260267+00:00 vr-fa51f8 python[2331]: 2022-04-06
23:14:06,258 [vr-fa51f8] INFO send_tag_transaction - 681 : Post
send_tag_no_badge_transaction: {'Items': {'RSSI': 59, 'ReadCount': 1, 'EPC':
'E28068900000000085025FA2', 'Antenna': 'A3'}, 'appMode': 'continuous-mode',
'appDb': 'datahoopdemo', 'spec': 0, 'VPN-ip': '10.8.0.172', 'IP': '10.0.0.161', 'ApVersion':
'v2.5.1', 'uuid': '418b3c12-b5ff-11ec-a583-3414b5fa51f8', 'Hostname': 'vr-fa51f8',
'ItemCount': 1, 'DateTime': '2022-04-06T23:14:06.256Z'}
```

```
2022-04-06T23:14:07.056795+00:00 vr-fa51f8 python[2331]: 2022-04-06 23:14:07,054
[vr-fa51f8] INFO send_tag_transaction - 685 : send_tag_no_badge_transaction response:
{'msg': 'This asset insertion in progress, hence lock could not be acquired, potentially
duplicate scan', 'Items': []}{noformat}
```

Looking in 'app/Http/Controllers/HoopController.php' we can see that

`send_no_badge_transaction()` and `send_no_badge_transaction_app_mode_7()` release the cache lock when done. However, `send_transaction()` and `custom_send_transaction()` do not release the cache lock when done. Instead the lock has to timeout (5 seconds).

Not a big wait, but not releasing a lock when finished is a concurrency mistake. Also, theoretically, it could cause user confusion. For example, read a tag on a return hoop (or doorway reader) but get blocked because someone read a different tag on an issue hoop less than 5 seconds ago.

Issue Key: PL-762

Summary: Creating Auto-Expiration Feature - Front End

Description: We want to add the ability to set up auto-expiration for products once issued. This means that once a product is issued via station zone, zone screen, etc. whatever expiration time that is set for this product will auto-set. For instance, if this auto-expiration is set for a hard hat, for 3 months, and the hard hat is issued on June 1st, the expiration for this product will be set for September 1st. This expiration item will act as a normal expiry item, so it will populate on the expiration report. The user will just not have to set the expiration date from the application. For the admin, this auto-expiration option should be built in product attributes, next to "Expiration Date."

!Screen Recording 2022-04-06 at 11.12.05 AM.mov|width=1920,height=1080!

Once this option is selected:

!Screen Shot 2022-04-06 at 11.32.22 AM.png|width=1207,height=659!

The user will be prompted to enter the number of months until the product is expired.

Issue Key: PL-758

Summary: Development for return Reason for Alert Email Selection - New Table email flow

Description: Currently, we are only able to set up alert emails based on return reason, but not able to select which return reasons trigger an alert email to each email. We want to add more return reasons within the “Alert Email” settings in the company admin. Then, the user should be able to set up alert emails based on each return reason, not just a generic return reason.

Current:

!Screen Shot 2022-04-04 at 2.47.16 PM.png|width=1920,height=1078!

Desired:

!Screen Shot 2022-04-04 at 3.00.13 PM.png|width=1265,height=443!

This way, all return reasons will be available to set up alert emails. If someone only wants to select “missing tip” for email alert, they could do this here. If they want to receive alert emails for all returns, they would also have this option.

Status: Done

Issue Key: PL-744

Summary: Knives Not Showing Up on Knife Life Report

Description: Noticed in  
[<http://jbshyruttoob.izhips.com>]<http://jbshyruttoob.izhips.com>[smart-link] , some knives that were checked in are not showing up in the Knife Life report, even though they were checked in under return reason “Broken Tip” and were not issued back out. I Have

attached a spreadsheet that has knives that were returned as “broken tip” on Knife Life report v. knives checked in on Employee Asset Return. These two reports should match when filtered for “Broken Tip” over same date/time range. On this spreadsheet, I’ve color coded knives that match across both reports and added a column on the end of knives that should be on Knife Life report but are not, but appear on the Employee Asset Return Report for this time period.

Note: I only filtered for knives returned with “broken tip” on both reports with date/time range of 03/23/22 00:00:00-03/23/22 15:05:59.

I want to see if we can find what is causing this discrepancy.

Issue Key: PL-733

Summary: Creating A Customizable Report (Dynamic Report) - Back End

Description: We would like to have the ability to create a report with customizable inputs. This report will have several inputs that we would be able to select to be included in the data generation:

!IMG\_4777.HEIC|thumbnail!

At the top of this report, we should have several fields that we can select from. These fields will be the criteria that we can select to be included in the report. This criteria should consist of:

- \* Employee Name

- \* Employee ID

- \* Date Range

- \* Product Name

This report will give the user the ability to select which inputs will be generated within the “data population” area.

For instance, if the user wants to see employee name, employee ID, and a date range, these three items would be selected and when the user hits “go,” the data would populate in the space titled “data population.”

Issue Key: PL-732

Summary: DepartmentData\_Deleted Department data is available at the APP Side even after Sync is performed

Description: Steps:

Go to Department data in admin screen

Select any department data and Delete the same

Now, go to APP and login with the same company

Navigate to Enroll employee page and look for department dropdown

Validate the list of data available before & After sync

Expected:

After Delete, the department data should be removed from the App Side

Actual:

After Delete, the department data can be seen in the APP even after Sync.

Reproduced in App store build and App Sync build as well.

In APP we can see many junk data which is actually not available in the admin screen.

Eg: Company: QA\_SMP

Summary: Android Device Receipt Print / PDF Toggle

Description: We want to adjust the toggle in the admin that would only affect the Android application. The toggle is in the master admin and will allow companies to either print receipts on android devices (current function), or to generate a PDF, similarly to how the IOS version of the application works. If the toggle is on, the androids would continue to print receipts (current functionality). However, if this toggle is off, the Android application would only generate a viewable PDF, like the IOS application. This new feature will be available for charged items after transaction, as well as in the payroll report only.

Issue Key: PL-724

Summary: Cost Center is Not Populating When Trying to Attach it to a Department

Description: This bug is in the customer admin and the cost center is not populating when trying to attach it to a department, even though the cost center is listed in the data dictionary.

You can add a new cost center in the data dictionary, but the cost center you add +\*will not\*+ populate in the cost center dropdown from the department list

Please see email for more information.

Summary: "No Data Found" for Hammond PD Admin (hamlahamser.izhips.com)

Description: Wyatt emailed to let me know that he was having trouble with hamlahamser. When he signs in on the application, at first it would not reflect jobzone change made in the admin. After signing out then back in, all products had "no data found" error. I believe this is an API issue. Please see email for more information.

Issue Key: PL-721

Summary: Changing Logic So Items Injected Through Injection Zone Are Able to be Returned Through Station Zone

Description: We want to change the logic so that Tool Zone and PPE Zone items that are injected through Injection Zone can be issued and returned through Station Zone.

While we currently have the ability to issue PPE and Tool Zone Items out through Station Zone, we are not able to return these items through Station Zone/must return these items through an employee's inventory.

Please see  
[<https://izhips.atlassian.net/browse/RN-969>][<https://izhips.atlassian.net/browse/RN-969>][smart-link] for more information.

From RN-969:

Tested in [<http://stxtxcopro.izhips.com>][<http://stxtxcopro.izhips.com>][smart-link] . Items that are injected through Station Zone are able to be issued out, but not returned

through Station Zone:

These items were injected into this system via Injection Zone, and we are able to issue these items out through Station Zone. However, when we try to return these items via station zone, we get error message "item has not been checked out yet and must be checked out first...". However, once it is checked out and we try to re-issue, we get message "item has already been checked out...". However, if we also return from the employee's inventory, it does not show up as returned on employee report.

Status: Done

-----

Issue Key: PL-720

Summary: Dynamic Report Front end - Report Layout set up

Description: We would like to have the ability to create a report with customizable inputs. This report will have several inputs that we would be able to select to be included in the data generation:

!IMG\_4777.HEIC|thumbnail!

At the top of this report, we should have several fields that we can select from. These fields will be the criteria that we can select to be included in the report. This criteria should consist of:

- \* Employee Name

- \* Employee ID

- \* Date Range

\* Product Name

This report will give the user the ability to select which inputs will be generated within the “data population” area.

For instance, if the user wants to see employee name, employee ID, and a date range, these three items would be selected and when the user hits “go,” the data would populate in the space titles “data population.”

Issue Key: PL-719

Summary: Items Injected Through Station Zone in Another System Do Not Show Up Correctly on Employee Report

Description: We had three items that were injected via injection zone in [http://qsitnchaser.izhips.com|http://qsitnchaser.izhips.com|smart-link] system (Ironwear (Iron-Fog), Allen Wrenches, and Ironwear Goggles. Then, once issued through Data Hoop pointed to [http://ccdemo.izhips.com|http://ccdemo.izhips.com|smart-link] , and once these items were issued to service rep (1234), the issued items do not show

up correctly on Employee report. Instead, it shows that 3 pairs of Ironwear goggles were issues, which is not accurate. It should show what is issued out like the Foreign Materials report (which is accurate for items not issued through Station Zone):

Issue Key: PL-717

Summary: Items Injected Through Injection Zone Do Not Populate on Foreign Materials Report

Description: Tested in  
[http://stxtxcorpro.izhips.com|http://stxtxcorpro.izhips.com|smart-link] , we noticed that items injected through Injection Zone are not populating the Foreign Materials report if issued through Station Zone, even if the products they were injected as have “hazard item” checked.

The following items were injected through Injection Zone, then issued through Station Zone:

!ff798393-73a9-4f3b-97ec-9e8f1440fbce|width=1440,height=1920!

!b3f8090c-7344-4e25-ab39-ed066089e6ff|width=1440,height=1920!

However, these items are not showing up on the Foreign Materials Report:

!Screen Recording 2022-02-23 at 12.08.42 PM.mov|width=2880,height=1800!

!bd072d0f-866a-4275-9cb1-1e6a347f974a|width=1440,height=1920!

(Note: the knife that shows up in the Foreign Materials report was not injected into the system-only a regular knife issuance).

Issue Key: PL-715

Summary: Department Bulk Upload Bugs

Description: I found several bugs with the Department List bulk upload ( [https://jbshyruttoob.izhips.com/admin|https://jbshyruttoob.izhips.com/admin|smart-link] ). The bulk upload itself only offers the department name, but when you try and upload just the department name, it asks you to add the cost center next to it.. And when you go add a Cost Center column and upload departments and cost centers, it acts like the upload worked, but nothing shows. Here's a link to a video where I walk through this:

[+Department	Bulk	Upload

Issue Key: PL-698

Summary: Changing the Structure of the Alert Attribute Alert Email

Description: We want to change the structure of the alert email that is triggered by an option on a selected alert attribute. Current alert attribute alert email:

!Screen Shot 2022-02-15 at 11.21.15 AM.png|width=835,height=432!

What we want:

!Screen Shot 2022-02-15 at 3.07.44 PM.png|width=1145,height=608!

This ticket will be blocked by [https://izhips.atlassian.net/browse/PL-693|https://izhips.atlassian.net/browse/PL-693|smart-link], which changes the values that are placed into the email. Once that ticket is complete, we want to change the structure of the alert attribute alert email only.

The “Alert Attribute” highlighted in the title will be the name of the attribute that has the alert attribute enabled on it. For instance, if the product is “Fuel Check,” then the highlighted title will be “ALERT\! Fuel Check - 1/4 (selected option on the attribute that triggered the alert).

Next, We want only the company name to appear and not “Company Name: Koch Foods Morton.” Instead, it should be simply “Koch Foods Morton.”

Date and Time can have “Date and Time:” listed, so it will show up as “Date and Time: 02/15/2022 10:04 AM” for example.

Next, Employee name will show as “Employee Name: Colton Carver”

The rest of the lines will be listed as “product attribute name: Option.”

For example, if an attribute on “fuel check” is “Trailer #,” the lines would show as:  
“Trailer #: 00000001.”

Status: Done

Issue Key: PL-696

Summary: CLONE - Station Zone Kit Check Out Quantities Are Not Accurate

Description: When a kit is issued through Station Zone, the kit product quantities are not accurate when the user goes into the employee inventory. While all products seem to be being issues, the quantities always register as only 1.

In the following video, the quantities of products issues through station zone should be:

\* WHITE HARD HAT (1=1EA) - 4

\* EAR PLUGS - 2

\* BLACK PEN - 3

\* RED SQUEEGE - 2

However, only a quantity of \*one\* of each of these items is found in the employee inventory:

!Screen Recording 2022-02-08 at 3.02.22 PM.mov|thumbnail!

This was tested in smp (stage), but seems to affect all companies.

-----

Issue Key: PL-693

Summary: Changing Alert Attribute Alert Email Inputs

Description: As discussed previously, we want too change the inputs that populate on the alert email. We want all alert emails to have these 4 options:

\* Company Name

\* Employee Name

\* Date/Time

\* Product Title

We would also like that if a product that has an alert attribute, we would like any

attributes with a value to populate in the alert email.

Lastly, we want the alert attribute to be the first item on an alert email.

The current alert attribute alert emails:

!image-20220215-033142.png|width=657,height=421!

Desired alert email:

\* Alert Attribute

\* Company

\* Date/Time

\* Product Title

\* Product Attribute 1

\* Product Attribute 2, etc.

Please see emails for details.

-----

Issue Key: PL-690

Summary: Changing Injection Zone Logic

Description: We want to change the injection zone logic, so that items scanned through injection zone will appear as the product that was selected in injection zone across all systems-even if the item was previously injected as another product in a system. For instance, if a tagged pair of safety glasses was injected as a “hook” in [http://izstoreroom.izhips.com|http://izstoreroom.izhips.com|smart-link] , then was injected as “safety glasses” through injection zone in [http://ccdemo.izhips.com|http://ccdemo.izhips.com|smart-link] , we want the item to scan as “safety glasses” in all systems, even if the item was previously injected as another product. Currently, items injected through Injection Zone will be recognized as whatever product they were determined to be in all other systems, except for systems where that particular tag was already injected as another product.

Issue Key: PL-680

Summary: Week 1: Indhuja KT Training and Onboarding

Description: \*Day1: 01/03/2022 (Tuesday)\*

Project Setup:

Need to set up the application in Laravel homestead environment in local machine

Node Version: v14.15.4

NPM Version: 6.14.11

Laravel Version: 8

PHP Version: 8.0^

KT Session: 3:30 pm to 4:30 pm (1 Hour Session)

Access:

Jira Board Access

Confluence Access

SharePoint Access

InnovaZone Leave - Team Up

Added Teams Group & Calls:

Added Morning and Evening Stand-up calls

Added in Dev Team Groups

Sprint Planning Call

Company Weekly Meeting (Every Tuesday)

\*Day 2: 02/03/2022 (Wednesday)\*

Application Overview:

Hip map training overview

KT Session: 3:30 pm to 4:30 pm (1 Hour Session)

Business Wise KT

Jira Board – KT

\*Day 3: 03/03/2022 (Thrusday)\*

Database Overview:

Enterprise Company DB JBSDEMO

Enterprise Master DB

Aramark Company DB Arademo

Aramark Master DB

KT Session: 3:30 pm to 4:30 pm (1 Hour Session)

\*Day 4: 04/03/2022 (Friday)\*

Master Admin functionality: Both Enterprise QA server Login and Aramark QA server Login

Application Overview

KT Session: 3:30 pm to 4:30 pm (1 Hour Session)

Issue Key: PL-676

Summary: Make the Product Export Excel Document The Same Format as Bulk Upload  
Product Sample Excel Sheet

Description: Currently, the product export list exports as:

[^productlist0202202205575119995.xlsx]

While the Bulk Upload Sheet has the following format:

[^ProductSample (1).xls]

We would like to make these formats congruent, so that we could download the product list form one system and re-upload the list into another system.

Status: Done

Issue Key: PL-674

Summary: Creating "Master" Knife Life Report - Plant Selection by Plant - FrontEnd Code

Description: In the Aramark system, we have added the ability for a report to generate with data from different plant locations. We want the ability to see the “Knife Life” report across three different locations:

\* JBS Cactus (JBSCACTXTOOB)

\* JBS Grand Island (jbsgranetoob)

\* JBS Greeley (JBSGRECOTOOB)

This will be a separate report from the generic Knife Life report and should have a similar logic to [https://izhips.atlassian.net/browse/PL-243|https://izhips.atlassian.net/browse/PL-243|smart-link], however this will only be for the Knife Life Report for Enterprise.

-----

Issue Key: PL-669

Summary: Adding Duplicate/Clone Button for Companies in Master Admin

Description: We would like the ability to duplicate systems in the master admin. This duplication can duplicate all employee information, products, jobzones, categories, zones, attributes, etc. Currently:

!Screen Shot 2022-02-01 at 2.13.59 PM.png|width=1920,height=921!

But we want a button similar to how products have a clone button:

!Screen Shot 2022-02-01 at 2.14.28 PM.png|width=1917,height=822!

So, it should look like this, but the box will allow us to clone companies:

!Screen Shot 2022-02-01 at 2.13.59 PM.png|width=1920,height=921!

Issue Key: PL-668

Summary: Adding Employee ID on Foreign Materials Report Export

Description: Colton,

After spending some time this week going through the Foreign Materials Report, I believe we need to add an Employee ID column to the export. There are too many employee's at these buildings with the same name, and when trying to consolidate the data we run into issues with the same name populating and no way to differentiate these.

Let me know your thoughts, and what you think it would take to get this done.

Status: Done

-----

Issue Key: PL-667

Summary: Adding Ability to Export Product List from Each Company Admin

Description: We would like the ability to export a product list from each company. Currently, we are able to export a list of employees and want to add this same functionality to products.

Currently, the product lists look like this:

!Screen Shot 2022-01-31 at 5.23.15 PM.png|width=1914,height=174!

But, we want an “export” button added, like in the employee list that will allow us to download the entire product list, like this:

!Screen Shot 2022-01-31 at 5.23.38 PM.png|width=1909,height=142!

When completed, it will look like this:

!Screen Shot 2022-01-31 at 5.28.46 PM.png|width=1354,height=127!

We would also like the ability to export products that are the same, but also for each size, if possible. For instance, if “white gloves” have size options, such as “small,” “medium” and “large,” we would like the export to include all three sizes as different products.

This export should include:

\* Product Title

\* Model No

\* Barcode

\* Bin Location

\* Category

\* Price

\* amount in stock

\* min

\* max

\* yearly budget

\* measurement

\* PRM

\* SUB

\* Product Conversion

Issue Key: PL-664

Summary: JBS Marshalltown New Hires Not Appearing on the Application

Description: I received a customer support call today stating that the new hires of JBS Marshalltown ([jbsiamarprop.izhips.com|http://jbsiamarprop.izhips.com]) are not showing up on all iPads. However, they are showing up on 3 out of the 4 iPads in this area of this location. When I tried to see if they would show up on my end, I was also unable to see these new hires in the application. I did multiple syncs, CRN quick resets and resets, etc. They would not show up unless I made them a clerk. Then, I could see them even if I removed their clerk status. Here is a list of new hires that we are having trouble pulling up in the application:

!image-20220127-162947.png|width=453,height=430!

\*Note: We have added/removed the clerk status for Jacob Bear and Jerry Dixon JR

Please see attachment for more information:

Issue Key: PL-657

Summary: Deleting all "No Cut Gloves" From JBS Greeleys System.

Description: Karthiyayini, is it possible that you would be able to delete all transactions for these assets for jbsgreeley.izhips.com? Additionally, we would like to delete them from the injection table as well, so that they do not come back into this system when

they are scanned/so there is no history of these items? Is this something you would be able to do? These assets were accidentally picked up/scanned in as "No Cut Gloves," but we do not want tis system to recognize these assets and recognize them as "No Cut Gloves." In order to fix this, we would need to delete them completely from this system, if possible. I have attached a file containing all of the assets that are in the system that we wish to delete. [^deletelist2.xlsx]

-----

Issue Key: PL-654

Summary: Need "Kit Barcode Required" Text in Customer Admin.

Description: With 8.2.0 release, kit barcodes will now be required, as we have added kit barcode scanning capabilities. However, we need to let our customers know that kit

barcodes will be required. Currently, it just grays-out the save/save and continue buttons, so customers believe kits are simply uneditable. Currently, it also incorrectly prompts that "Kit title is required", even though there is a kit title listed. So, we also need to eliminate this text if kit product title is listed.

Issue Key: PL-642

Summary: Attribute screen\_Attribute type related Issues

Description: +\*Issue 1:\*+ \[Attribute type having duplicate values]

Navigate to Company admin-->Product Mgmt--> Attribute screen

Edit any Attribute

Expected:

Attribute type values should display a unique set of values

Actual:

The attribute type has 2 Dropdown values. \[Attached screenshot].

Looks like the First value is Invalid. Attribute type-dependent functionality is working fine as expected when selecting the second Dropdown value.\[Attached recording to confirm the same.]

+\*Issue 2:\*+\[Unable to change attribute type value once it is set as Text-box]

Steps:

1. Edit any attribute
2. Modify the attribute type as Text-box and Save it
3. Once saved, Again Click Edit and try modifying the Attribute type value

Expected:

Attribute type value should be able to modify

Actual:

Attribute type becomes Non-editable once it is set as Text-box. \[Attached screenshot].

Issue Key: PL-641

Summary: API - Transactions Not Going Through in Offline Mode

Description: Discovered in YMP ([izymp.izhips.com](http://izymp.izhips.com)), transactions are not going through when the iPad's data is turned off.

Expected: If transactions are conducted without the iPad being connected to internet, once the iPad regains connection and syncs, these transactions are supposed to go through and be available to see on reports.

Current: Any transactions conducted when the iPad is not online are not being saved/are not showing up on the reports once iPad is synced after gaining connection. Any transactions taking place in offline mode are not being saved/are lost.

Issue Key: PL-632

Summary: Employees are Not Populating in order in Web Portal Reports.

Description: In the web report portals for companies, while employees are populating in alphabetical order, the employee names do not begin at the beginning of the alphabet. For instance, in <https://izstoreroom.izhips.com>, in the employee report the first name to populate is "Zion Williamson" even though this employee's name begins with a "Z." The first employee that populates should be from the beginning of the alphabet. In the case of [izstoreroom.izhips.com](https://izstoreroom.izhips.com), the first employee should be "ABC Company" (disregarding the numerical names). This issue is observed in several companies. Please see attachments for more information:

Issue Key: PL-623

Summary: Aramark Usage Report - BackEnd

Description: This report will look and act similar to the existing Aramark Inspection report. This report will list every single “Vault” reader scan just like the Aramark Inspection report does. The difference is this.

This new report will NOT pull in “Passed Inspection” scans completed by the Data Hoop. It will be strictly the Vault scans that are “Passed Inspection” or “Damaged”.

The new report will also have the “Size and Type” integration that is shown in the Lost and Ruin Report.

I have attached a screenshot with the changes I need in the reporting portal view and an example of what the export will look

Issue Key: PL-621

Summary: Alert Email Sent with a Return Reason of "0"

Description: In the JBS Grand Island (jbsgranetoob.izhips.com), an alert email was sent with the Return Reason of "0." Currently, alert emails were only turned on for "missing tip" returns. Additionally, it appears as if this occurred after the items were returned through the employee inventory. I attempted to recreate this issue in JBSdemo, however, I have not been successful in recreating this issue. This company should only receive alerts from items returned with a return reason of "missing tip." Please see attachments for more details. Is this linked with PL-618?

Issue Key: PL-618

Summary: In the Area Report in the Application, Returned Knives are Populating with a "Broken Tip" Return Reason, Even Though this Return Reason was Not Selected.

Description: This application report error was first noticed in jbsdemo.izhips.com, but it is in other systems as well. The Area report in the Report Portal is accurate, as well as the export are working as expected. This is only seen in the application. This issue is observed with 4.79.5 Bundle v76, with 8.1.0 backend. Please see attachments for more information.

Issue Key: PL-614

## Summary: Aramark Usage Report - FrontEnd

Description: This report will look and act similar to the existing Aramark Inspection report. This report will list every single "Vault" reader scan just like the Aramark Inspection report does. The difference is this.

This new report will NOT pull in "Passed Inspection" scans completed by the Data Hoop. It will be strictly the Vault scans that are "Passed Inspection" or "Damaged".

The new report will also have the "Size and Type" integration that is shown in the Lost and Ruin Report.

I have attached a screenshot with the changes I need in the reporting portal view and an example of what the export will look

Issue Key: PL-612

Summary: Employees are Not Showing Up in Edge Zone Unless Given Supervisor Status

Description: In Swaggerty's system (swatnkodtoo.izhips.com), several employees are not showing up in edge zone, unless the "supervisor" toggle is enabled for them in the company admin. While several employees are showing up, we had a list of 5 employees that we have not given supervisor status to, but I used Richar Arboldea to show you that they will not show up unless given supervisor status. To help identify this issue, I have included a list of 5 employees that show up, as well as 5 employees that are not showing up:

Showing Up:

Richard Byrd

Sergio Garcia

Joe Alamo

Victor Mendoza

Clemente Lopez

Not Showing Up:

Richar Arboldea (is now showing up, since given supervisor status)

Alfredo Sanchez Aleman

Alberto A Duran

Jose Ramierez

Edwin Cortez Garcia

Please see attachment for more information.

Issue Key: PL-610

Summary: Removing an RFID Tag from Cargill (cararsprpro)

Description: Karthiyayini, is there a way we can write a sql query to remove a certain tag that was injected into Cargill's system? We are launching a Data Hoop program, and unfortunately, this tag is continuously being picked up by the Data Hoops. This has caused a few problems for the on-site team. The asset number for this tag is: Asset #-300833B2DDD9014000000000. Additionally, this asset was injected as a "BST Highlighter."

Issue Key: PL-609

Summary: Once the Title of the Alert Attribute is Changed, Alerts Are No Longer Functional

Description: In the company admin, once the title of the "alert" attribute is changed, the alert attribute no longer works, as the options to receive a notification no longer exist in the product attribute screen. We need to be able to change the title of the alert

attribute, so that we can ensure that it is labeled correctly for our customers. For instance, I changed the alert attribute to "Fuel Level Alert," however once this name was changed, the alert attribute was no longer functional. Please see attached video for more information.

Issue Key: PL-606

Summary: At Creekstone Farms, creksarktoob.izhips.com, we had several employees with items issued via a Data Hoop and on the reports, it showed as issued. But, items were not in the employee's inventory in the application

Description: At Creekstone Farms, creksarktoob.izhips.com, we had several employees with items issued via a Data Hoop and on the reports, these items showed as issued out to these employees. But, items were not in the employee's inventory in the application. When these items were issued via scanning through a Data Hoop (should be the same process as issuing through the application), the reports showed items still checked out to the employees. However, when we signed into the application, the employee's inventory did not show any items. When we scanned the items through the Data Hoop, they were then taken off of the Foreign Materials Report. Zack, Taylor and I all logged into the application to confirm that these employee inventories did not have these items in them. We synced, logged out, and all verified. Oddly, other employees that had items issued out did have items in their inventory. I have attached a spreadsheet with the employees that did not have items in their application inventory vs. the employees that did have these items in their application inventories. I will add more information as it becomes available. I have also included a screenshot of the Foreign Materials report from the portal that shows some of the employee's with items not in their inventory, but issued out.

Issue Key: PL-605

Summary: Duplicates of Associates in the Web Report Portal

Description: In the web portal of several systems, we have several versions of the same associates. The different versions of the same associates often have different items issued to their inventories. For instance, in the attachment, there is only one associate named "Jordan Hart," however there are three different employee profiles visible for this one associate. While one of the employee's employee ID has a leading zero, there are still two other profiles for this same associate with the same employee ID. We need to make sure that all associates only have one employee profile in the web portal. Please see attachment.

Summary: QA API Automation - Web Side\_Production Data validation\_Part 2

Description: +Production Data validation for Report API's:+

We have approx 31 Report API's from the Web side,.

The Automation Test Suite will be prepared in such a way that

- \* It will be looped based on the List of Companies mentioned at the time of Execution in a specific Test data file.

- \* The Report's request will have "To date" as the Current date & "From date" can be modified at a place based on the Scope of that day's execution

Below Points will be Validated for all companies in the List,

# Successful Response Validation

# Schema Validation

# Duplicate Data Validation

The Test RUN result will be generated as an HTML report and will be saved under a separate Folder with Execution TimeStamp.

\*Most important Web-based reports:\*

SAP Transfer Report

Store's Inventory Adjustment Report

Store's Issue / Return Report

iUniform Zone Report

Issue Key: PL-556

Summary: The Employee Asset Return/Sharpening Report in Several Tyson Systems, such as [tysialoutcp.izhips.com](http://tysialoutcp.izhips.com), is Not Showing Data Once Filtered to a Single Employee.

Description: In the Employee Asset Return Report, as well as the Employee Sharpening Report, once the report is filtered down to a single employee and ran, there is no data found. This report should show the data for only the selected employee. Additionally, once exported, the data is still missing. This bug was tested in [\[http://tysialoutcp.izhips.com|http://tysialoutcp.izhips.com|smart-link\]](http://tysialoutcp.izhips.com) , [\[tystxamatoob.izhips.com|http://tystxamatcp.izhips.com\]](http://tystxamatoob.izhips.com)

Issue Key: PL-533

Summary: \*\*\*HOTFIX\*\*\* Aramark Damaged Transactions to Update to Passed Inspection

Description: [~accountid:5e60790cab60320af8f87101]

I tried using the query below to update the 1024 transactions that are listed in the text file attached, it was only going to update 356 rows of transactions. We need to update the asset numbers listed in the text file from "Damaged" to "Passed Inspection" for all 1024 of them.

Aramark Damaged to Passed Inspection Query:

```
UPDATE ai_arajbsgrane.iz_order_returns AS s, (SELECT order_return_id FROM  
ai_arajbsgrane.iz_order_returns where asset_no IN ( )and return_comment ="Damaged"
```

AND (created\_at >= '2021-08-27 00:00:00' OR created\_at <= '2021-09-09 23:59:59')

order by created\_at desc) AS p

SET s.return\_comment = 'Passed Inspection'

WHERE s.order\_return\_id = p.order\_return\_id;

Issue Key: PL-532

Summary: More Sync Issues

Description: Three customers have reached out with syncing issues:

Alatrade Phenix City - alatradephenixcity - Price Adjustment / Product Addition

Harrison Poultry - harrisonpoultry - Bin Location

STF Sioux City - seaiasiopro - Product Addition

The customers are adding products, adjusting bin locations, or adjusting prices and the iPads are not reflecting those changes after a sync.

We are continuing to have these syncing issues, we need to identify the root cause of this problem and come up with a solution as soon as possible as it is very frustrating for our customers to constantly have to do CRN Resets to reflect these changes.

Issue Key: PL-520

Summary: Raspberry Pi Backend Adjustments

Description: Team,

We need to make two adjustments in the way that the reporting shows up when an asset is registered as Sharpened through the use of the Raspberry Pi.

Knife Sharpening Report:

We need to map the clerk ID to Clerk Name.

We need to ensure that the product name displays as "Robotic Sharpening"

You can see the difference between the transactions displayed in the screenshot below.

!Screen Shot 2021-09-07 at 12.38.34 PM.png|thumbnail!

## Employee Sharpening Report:

Currently knives that are not issued to an employee will show up as N/A if they are scanned by the Raspberry Pi, in that scenario we need them to show up under "Robotic Sharpening"

If they are issued to an employee the sharpening transactions should show under that employee's profile.

Currently the second aspect of this request is working as expected, we will just need to adjust the report to show "Robotic Sharpening" for assets that are scanned by the raspberry pi but not issued to an employee.

Current Functionality:

!Screen Shot 2021-09-07 at 12.42.16 PM.png|thumbnail!

Desired Functionality:

!Screen Shot 2021-09-07 at 12.42.16 PM.png|thumbnail!

Summary: HIGH PRIORITY - Tyson Louisa County TCP (tysialoutcp). - Mass Association Request

Description: Team,

Please see the attached spreadsheet, we need to associate through station zone logic the asset # given in column B to the employee ID given in column A. We are issuing these asset #'s as the product "Knife" and we should only be creating the "Out" transaction.

Please reach out if anyone has any questions with this request!

Issue Key: PL-515

Summary: e8.0.5 Issues \*\*\*HOTFIX\*\*\*

Description: Issues: [PL-492] Text Box is available to select in Quantity Value screen, yet not available in the product quantity screen. Working Perfectly in JBS Demo, no other companies.

!27c69d32-8cfd-485a-a240-4cce21583fe0.jpg|width=200,height=183!

!12a8d4e4-ebc3-4342-86ea-603e70f2e233.jpg|width=200,height=183!

#### PL-493: Master Admin Creation Issue

Able to create a company with a linked employee database, yet when you build the company it does not turn on the selected Zones from creation. It also does not create the system owner as an Admin User. We are still unable to build these new companies as we cannot add categories because there are no zones being created...

!Screen Recording 2021-08-25 at 4.45.07 PM.mov|thumbnail!

This is the very foundation of our system we NEED this to be identified and fixed\!

Issue Key: PL-512

Summary: Aramark - JBS Souderton Inspection Report Inaccurate

Description: Please see screenshots below:

System: arajbssoupa

Aramark Inspection Report is showing 111,363 Inspection Transactions on 8/19/21 however when I checked the iz\_order\_returns table it showed 1111 transactions for that date. Can we please look into this issue and why the reporting is so drastically inaccurate?

Issue Key: PL-509

Summary: Aramark - Lost and Ruin Report Adjustment

Description: Aramark is requesting to pay for a “Lost and Ruin” adjustment. I don’t believe it is a huge adjustment.

This adjustment is strictly on the excel spreadsheet export. They want the report to “total up” how many of each type of garment are on the export. They have to do this manually every time they export this. I have attached an example export as well.

Summary: Data Hoop App Mode 7 - Continuous Scan Mode (Issue)

Description: We need to create the ability for a new app mode for the data hoop that is continuously radiating and only checks out or issues a product that has been previously associated to an employee.

Scenario:

# Items are issued and associated to employee using UHF RFID Gun through app.

2. Items are then issued by data hoop app mode 7 on to production floor.

3. Items are returned through Data Hoop in App mode 3 Continuous mode.

4. Item needs to still be associated to the employee for issue through Data Hoop mode 7 the following shift.

Note: We need to keep the ability for other app modes to associate a product to an employee with a badge tap.

-----

Issue Key: PL-493

Summary: \*\*\*HOTFIX\*\*\* Master Admin - Company Creation Bug

Description: We created two companies that are having same issue.

The sub-domains are “tysinlogtoo” and “tysiapertoo”. Neither system was created correctly. Please see video of issue below.

[^Screen Recording 2021-08-12 at 9.59.01 PM.mov]

We successfully built “seaiasiomro”.

The main difference was that we tried to connect the employee database during system creation. I am not sure if this would make a difference or not.

Issue Key: PL-489

Summary: Kit Management Bug - Bird Electric

Description: The customer reached out saying they were unable to adjust the products found in their Kits. Please see video attached, I am unable to edit any kit in that system that does not have PPE in the name. Dr. Maqbool and I looked into the issue and saw an error message "Server Error". I checked in the IZ Storeroom system and I was able to

adjust all kits in that system, this seems to be an isolated issue.

Summary: HIGH PRIORITY - JBS SAP Inventory Adjustment Report

Description: This needs to be completed by 8/12/21

Please see development request attached. We need to clone the Store's Inventory Adjustment Report and adjust the column names and export to match what is shown in the development request.

If anyone has any questions about this PLEASE reach out, this is a very specific report as it will be used with a robot so everything has to feed exactly as shown in the request.

Issue Key: PL-475

Summary: QA API Automation - Web Side\_Production Data validation\_Part 1

Description: +Production Data validation for Report API's:+

We have approx 31 Report API's from the Web side,. From that will target to Close 15 API's as part of this Task

The Automation Test Suite will be prepared in such a way that

\* It will be looped based on the List of Companies mentioned at the time of Execution in a specific Test data file.

\* The Report's request will have "To date" as the Current date & "From date" can be modified at a place based on the Scope of that day's execution

Below Points will be Validated for all companies in the List,

# Successful Response Validation

# Schema Validation

# Duplicate Data Validation

The Test RUN result will be generated as an HTML report and will be saved under a separate Folder with Execution TimeStamp.

\*Most important Web-based reports:\*

SAP Transfer Report

Store's Inventory Adjustment Report

Store's Issue / Return Report

iUniform Zone Report

Issue Key: PL-467

Summary: Data Hoop - Return State Color Change

Description: Business Request - Change the resting color of any return state to "Rose".  
This will include app mode 3, 5, and 6 on the data hoop.

In continuous return mode: App Mode 3 Rest in "Rose" instead of "Green"

In Single Hoop Modes: App Mode 5 and 6. When the sensors are triggered activating the return mode the hoop should change to the "Rose" color instead of "Green"

This can be hardcoded as the business has finally decided on this color.

Summary: \*\*\*\*HOTFIX\*\*\*\* NEW Aramark duplicate data

Description: Please see the spreadsheet attached. These are unissued garment transactions that were incorrectly done by the Aramark team. Can you please delete these 1,527 damaged transactions from the Unissued Garment Report?

[~accountid:5e60790cab60320af8f87101] [~accountid:5d654735898be50c0b54755c]  
[^arajbsgreco unissued to be deleted.xlsx] If they are deleted from the “Unissued Garment” Report will they be removed from the “Lost and Ruin Report” also? I need them removed from all reports.

Status: Done

Summary: Aramark Duplicate Data Issue

Description: Team,

It seems that have processed the EDI file from the Appleton MC Datamars API twice on 6/23/21 at 8:00 and at 7:07. We need to identify why the file was processed twice and remove the duplicate transactions.

Please see notes from Barrett below:

Issue Key: PL-446

Summary: Search Filter Data Crossing Systems

Description: going through the reporting for Koch Foods Gadsden and searched for items starting with the letter “p”, we noticed that it was auto generating products that do not even exists in the admin. In fact, these items were overshadowing the normal dropdown of the correct items for Gadsden’s system. I am not even sure what system “PURPLE SLEEVES (\$0.40)”, “PURPLE APRON W TIES (\$0.70)”, “PANTS”, and “PAPER CONE DRINK CUPS” belongs to, but these items have never existed in Gadsden’s system to my knowledge.

Issue Key: PL-442

Summary: \*\*\*HOTFIX\*\*\* Reports Grouping Transactions

Description: When a user issues 3 products in the system and completes the transaction, the system is registering all 3 items in one transaction line in the employee report. You will see in the employee report the transaction line says QTY: 3 yet you will see in the product details of the employee report that only QTY: 1 was issued.

If you look in the employee return inventory all three products will populate.

Desired functionality:

User issues 3 separate products, they each populate their own transaction line with the correct product details and correct quantity.

Status: Done

Issue Key: PL-440

Summary: PRM/SUB Bulk Upload Issue

Description: Here is the bug I am seeing in the bulk upload process for PRM/SUBs. In the admin I can create PRMs and SUBs that have any length. In my example I created a PRM and SUB with 9 digits in the customer admin. When You try and bulk upload a product with a 9 digit PRM and 9 Digit SUB, the user gets an error in the bulk upload log saying the PRM must be 3 digits and the SUB must be 2 digits.

Desired functionality:

Ability to upload and use PRM/SUB of any length in the system without restriction.

Status: Done

Issue Key: PL-438

Summary: \*\*\*HOTFIX\*\*\* Quick Check Functionality

Description: When the user scans a barcode that is registered as a "Product Barcode" through Station Zone the product is populating in the reporting as a knife.

Desired Functionality:

When the user scans a barcode that is associated to a product in the admin, the system should issue that product as if it were scanned using the Quick Scan Feature in the Zones Screen.

Issue Key: PL-435

Summary: Aramark - Department Data Not Showing

Description: Team,

Can you please look into the issue I am seeing? I think it is a bug. IT is for  
gmfortwayne.aramarkinnovazones.com

The exported "iUniform Zone" is not showing all of the data in the "Department"  
column.

Please see the export below. (Yellow column). Below the yellow, you will see that some of the departments are populating correctly.

If you look in the admin, "Mike Jones" does have a department that should be populated in the Report. Please see attached.

Please let me know a timeline when you have one so I can relay that to the questioning customer.

Issue Key: PL-430

Summary: Inventory Report backend changes

Description: CRN : harrisonpoultry

In the inventory report not all of the model #'s are showing up with the product. Robert Luther verified if you search "Sprocket" in the admin, it will show 195 items that all have model #'s. However, in the inventory report, there are about 15 "Sprocket" items that will not populate a model number.

An example of this is in the product "Sprocket (Campbell Sales) 1 -40BS28. There is a model number for this in the admin, but not in the inventory report. The same is true of this if you export to excel.

Issue Key: PL-411

Summary: N/A Transactions pulling employee information in export

Description: I pulled the Knife Sharpening Report for JBS Grand Island for 5/2/21 - 5/8/21. When I pull it, I see 303 N/A transactions:

!Screen Shot 2021-05-10 at 10.06.13 PM.png|thumbnail!

However, when I export this data, the exported report shows an employee's name instead of N/A:

!Screen Shot 2021-05-10 at 10.07.19 PM.png|thumbnail!

Status: Done

-----

Issue Key: PL-410

Summary: Knife transactions not feeding iz\_order\_items (production\_jbsgrecootob)

Description: None of the knife transactions are feeding iz\_order\_items table for jbs greeley (production\_jbsgrecootob).

This is the query to run to find the errored transactions:

```
select item.order_id, item.created_at FROM iz_orders as item WHERE item.order_id NOT
```

```
IN(SELECT outitem.order_id FROM iz_order_items as outitem) AND item.order_type =  
'OUT';
```

It finds OUT transactions in the iz\_orders table that do not have an associated entry in the iz\_order\_items table.

Example order\_id's:

50538720-57e5-e492-9a8d-6099e380495f

50925b8b-f999-7ae9-438f-6099dc3e19a1

80f64bf6-8268-77c7-5ca3-609541868952

This needs to be resolved ASAP.

Summary: Injection Zone / Data Hoop Integration

Description: Current Functionality: I inject asset 1234 through Injection Zone (on react native app) as Safety Glasses. I scan asset 1234 through a hoop, set to default product of "Frock". The hoop will checkout asset 1234 as Frock.

New Functionality: I inject asset 1234 through Injection Zone (on react native app) as Safety Glasses. I scan asset 1234 through a hoop, set to default product of "Frock". The hoop will checkout asset 1234 as +Safety Glasses+ since it was injected through injection zone.

We want to do this by simply populating the injected items from injection zone into the production\_innovazone.iz\_hoop\_transaction table

Summary: \*\*\*\*\*HOTFIX\*\*\*\*\* The new Unissued Garments that...

Description: \*\*\*\*\*HOTFIX\*\*\*\*\*

The new Unissued Garments that were added to the "Lost and Ruin Report" has an issue. The transactions are showing on the report correctly, but the size and type data is not populating on the report.

Matthew shared the GTS database with me and i validated that the particular asset numbers should show a size and type on the report.

I have attached 2 spreadsheets. One is the "Lost and Ruin Report" and is highlighted in the area with issues. the second is the GTS database where I validated the asset #'s off of.

Issue Key: PL-400

Summary: Develop Cycle Count Feature - Backend Development

Description: We need to develop the ability for users to do cycle counts. Please see the attached excel for details.

!Cycle Count Mockup.xlsx|thumbnail!

Note - for the backend component, we need to replicate the inventory report, with additional columns:

\* Cycle Count QTY

\* Cycle Count Date / Time

\* Cycle Count Clerk (clerk of person who did the cycle count)

We also need the ability to “reset” the cycle counts in the report.

Status: Done

Summary: Report Totals - Inaccurate

Description: I am noticing some of the report totals are incorrect:

\* Payroll report:

!Screen Shot 2021-04-12 at 3.51.38 PM.png|thumbnail!

\* Employee Report:

!Screen Shot 2021-04-12 at 3.52.11 PM.png|thumbnail!

I am not sure if other report totals are incorrect, but this is what I have noticed so far. These are both examples from [jbstolaztoob.izhips.com](http://jbstolaztoob.izhips.com) , but I have noticed this issue with other companies as well. This is on e4.83 release.

Issue Key: PL-374

Summary: Employee Sharpening Report Export Fix

Description: See video attached for reference.

System: [jbscactxtoob.izhips.com|http://jbscactxtoob.izhips.com]

Report: Employee Sharpening Report

Date Range:

!Screen Shot 2021-04-06 at 11.28.39 AM.png|width=434,height=105!

On the portal, it showed the correct number of entries for N/A transactions (1,053 transactions). But on the \*exported data (end of video)\*, it seemed that the this was replaced with Amina Hashi's name with 1,053 sharpenings (end of video).

Instead of Amina Hashi, it should show "N/A".

Issue Key: PL-373

Summary: Department Spend Discrepancies

Description: +\*From Taylor:\*+

I was putting together a weekly email to send over to JBS Worthington and came across some department spend discrepancies. In the Weekly Transactions Report in the web portal (for the week of 3/28-4/3), the spend for Department WGT PK Plant is 2,142.20:

!Screen Shot 2021-04-06 at 10.57.12 AM.png|width=777,height=136!

When I pull the Employee Report on the web for the same time frame and pivot the data for department spend I get a total of 6591.46 (attached excel, first tab).

[^Worthington Emp Report 3.29-4.4[24].xlsx]

I have looked over the data in the employee report, and nothing seems to stand out as missing or odd. Is there something going on with the Weekly Transactions report that you can see that would cause this?

+\*From Matthew:\*+

I can see in the database production\_jbsmnworprop that 100 QTY of model\_no 500-371720 were checked out on April 1 (order\_item\_id = 14175d0a-6f83-41f2-af25-773283c990f8). However, the weekly transactions report is only showing a quantity of 1 when I click into the department WGT PK Plant from the Weekly Transactions Report:

!Screen Shot 2021-04-06 at 11.02.34 AM.png|width=1108,height=604!

Why is the weekly transactions report not reflecting the correct quantity for this transaction, and potentially other transactions?

Summary: Reporting Issues - 4.83 Release

Description: I made the 4.83 release to company pilflivpro.izhips.com. I pulled the employee report on the web portal, and it is only showing one transaction line for today (3/31/21) instead of showing all transactions. The same behavior is on the iPad as well. This is also occurring to other reports, such as the SAP Transfer Report. See below for

-----

Issue Key: PL-363

Summary: Fix TCP Daily Audit Report

Description: Company: farinvinpro.izhips.com (LIVE COMPANY - DO NOT RUN  
TRANSACTIONS)

CRN: farinvinpro

I am going into the Foreign Materials App Report on my iPad and filtering for department "Vinc/1/2022" and I select "GO". I show 30 rows of status OUT data total on the iPad. I then select "Confirm Audit" and it says "Audit Completed Successfully".

However, when I go into their TCP Daily Audit Report and export the report, I only see 16 "X" entries for the audit I just did (12:19):

!Screen Shot 2021-03-24 at 11.58.31 AM.png|thumbnail!

I did some comparisons, and it looks like we are missing multiple rows of data. For example, employee "Joseph Thompson" has 9 rows of transactions showing in the foreign materials report on the iPad, but the TCP Daily Audit Report Export only shows 2 rows for this employee.

When I check the database, it correctly shows all 30 entries for this audit (order\_audit\_id = c9036186-a33d-753b-5d0c-605b6629df55).

!Screen Shot 2021-03-24 at 12.02.03 PM.png|thumbnail!

So it seems like the web report / export is not pulling in all of the data from the database.

I have attached the referenced foreign materials report (filtered for Status OUT and department "Vinc/1/2022") and the errored TCP Daily Audit Report.

[^tcp-daily-audit-report-03-24-2021-042628-19886.xlsx]

Issue Key: PL-358

Summary: Add unissued Damage to L&R Report

Description: Add in the Unissued “Damage” to the Lost and Ruin Report under the Damage return reason.

The total damaged should be total iz\_order\_returns damaged with return\_reason “Damaged” for that time period PLUS total iz\_unissued\_garments damaged with return\_reason “Damaged” for that time period.

This should be added to the export as well. See below for an example. It should always be below the regular damage.

Summary: In Equipment Zone (CRN: ww eq) we checked out 10 of...

Description: In Equipment Zone (CRN: ww eq) we checked out 10 of the same items and returned 2. In the exported Equipment Report it shows the original 10 that were

checked out with the correct price, but when we return 2 of those items the "Qty/Return Qty" does not adjust. The price does adjust to 8 items checked out. I have a recording to show you what i am talking about.

I think the report should adjust "Qty/Return Qty" to what is checked out, which would be 8 in for example. If we can can split that one column into two columns it will be best for the customer to keep track of inventory when they export the file. We can have one column say "Return Qty" and the next one say "Qty".

Summary: When filtering for a specific area or department i...

Description: When filtering for a specific area or department in the Foreign material report and completing an audit- the TCP Daily Audit Report confirms an audit for everything on the foreign materials report instead of what the report is filtered for.

\*Reporter\*: Foreign Materials Report/TCP Daily Audit Report

\*E-mail\*: [taylor.vickers@innovazones.com|mailto:taylor.vickers@innovazones.com]

Current Behavior: I checkout asset ABCD to area 1. I checkout asset EFGH to area 2. I pull the foreign materials report, filter for area 1, and select "Confirm Audit".  
{color:#ff5630}The TCP Daily Audit Report shows timestamps for both asset ABCD and asset EFGH which is the issue.{color}

Expected Behavior: I checkout asset ABCD to area 1. I checkout asset EFGH to area 2. I pull the foreign materials report, filter for area 1, and select "Confirm Audit". The TCP Daily Audit Report shows timestamp for just asset ABCD, and does not show asset EFGH.

Summary: e4.82 Release

Description: We need to create a RC for e4.82.

**{color:red}\*Important - THIS SHOULD BE BASED ON 4.81.3 CODE - NOT 4.81.4. WE ARE "THROWING OUT" THE 4.81.4 RELEASE DUE TO ISSUES. \*{color}**

So e4.82 release should contain 4.81.3 code plus only the features outlined in the Jira release e4.82.

Issue Key: PL-336

Summary: Create report for hoop injections - Front End

Description: We need a new report created for enterprise system. Details:

Report Name: Injection Report

Search Box: Asset

!Screen Shot 2021-02-24 at 3.08.02 PM.png|width=206,height=65!

Filters: From Date / To Date

!Screen Shot 2021-02-24 at 3.08.29 PM.png|width=374,height=66!

Columns:

Hoop ID | Product Name | Asset | Injected Date

Example:

!Screen Shot 2021-02-24 at 3.11.36 PM.png|width=998,height=427!

It should pull this data from the iz\_hoop\_transactions table in enterprise database.

Status: Done

Issue Key: PL-332

Summary: New logic for Station Zone product barcode scanning - Testing

Description: Instead of the toggle switch (RN-600) we want to implement different logic for Station Zone Product Barcode Scanning:

Summary: When the user selects “Done and Exit” in Station Zone / Edge Zone, the checked out items will be either 1) the product barcode that is scanned (i.e. quick scan barcode) 2) the dynamically associated asset product or 3) the default product.

Expected Behavior: In edge zone, the default product is “Knife”. The user has another product in Tool Zone, “Hook”, with quick scan barcode of “1000”. The user has also already checked out a third Tool Zone product, “Sharpener”, with assets 2000 and 3000.

The user goes into Edge Zone and registers employee 1. Then, the user scans asset # 1234 and selects "Done and Exit". This will checkout a Knife, since it is the default product and did not match either asset association or quick scan barcode.

The user goes into Edge Zone and registers employee 2. Then, the user scans asset #1000 3 times and select Done and Exit. This will checkout a quantity of 3 Hooks to employee 2, since it matched the quick scan barcode.

The user goes into Edge Zone and registers employee 3. Then, the user scans asset #2000, asset #3000, and asset #1000 and selects Done and Exit. This will checkout 1 QTY of Hook and 2 QTY of Sharpener, since the hook matched the product barcode and the sharpener matched the asset association.

The user goes into Edge Zone and registers employee 4. Then, the user scans asset #5000 3 times, asset #2000 twice, and asset #1000 once, and selects "Done and Exit". When the user presses done and exit, the backend logic notices that asset #5000 is not asset associated OR a product barcode, so it alerts the user that duplicate entries are found (as it does today).

!IMG\_0678.png|thumbnail!

The user removes two of the asset #5000 rows from station zone, then select “done and exit” again. This time, the transaction succeeds, and 1 QTY of Knife is checked out (asset 5000 - default product), 2 QTY of Sharpener is checked out (asset 2000 - asset association), and 1 QTY of hook is checked out (asset 1000 - product barcode).

The user goes into Edge Zone and registers employee 5. Then, the user scans asset #5000 once and asset #2000 once and selects “Done and Exit”. When the user presses done and exit, the backend logic notices that the user is trying to checkout a Station Zone product that has not been returned yet, and gives the alert that the item must be returned first (as it does today).

!IMG\_0679.png|thumbnail!

The user removes asset #5000 from the cart, presses done and exit again, and the

transaction succeeds.

Status: Done

-----

Issue Key: PL-331

Summary: Omnisharp Solution - Backend Development

Description: We are needing to create a custom solution for a knife sharpening service. Our solution would continually mark knives as sharpened in our database by scanning a QR code on the knife during the sharpening process.

After discussions with Operations team, we feel a Raspberry Pi with an attached camera would be the best solution potentially. The Pi could run some simple Python code that

would send the scanned QR code (asset # ) to the backend, which would then process the transaction as sharpening in the iz\_sharpened\_assets and Iz\_sharpened\_products tables as the RN app does today.

I have attached a video of an initial Pi solution that simply logs what it is scanning. Again, we would just need to send this to the backend and process it as a sharpening.

Issue Key: PL-329

Summary: The Employee Sharpening Report on the Web Portal i...

Description: The Employee Sharpening Report on the Web Portal is seperating knives not issued to employee's (N/A) into seperate columns. Then when clicking into to see the asset details of an "N/A" employee, the total # of assests does not match up to what is being displayed in the original search.

This report needs to show the total # of "N/A" knives in one column, and included the correct total of asset #'s in the report details.

Summary: New logic for Station Zone product barcode scanning - Backend Development

Description: Instead of the toggle switch (RN-600) we want to implement different logic for Station Zone Product Barcode Scanning:

Summary: When the user selects “Done and Exit” in Station Zone / Edge Zone, the checked out items will be either 1) the product barcode that is scanned (i.e. quick scan barcode) or 2) the default product.

Expected Behavior: In edge zone, the default product is “Knife”. The user has another product in Tool Zone, “Hook”, with quick scan barcode of “1000”.

The user goes into Edge Zone and registers employee 1. Then, the user scans asset # 1234 and selects “Done and Exit”. This will checkout a Knife, since it is the default product and did not match the quick scan barcode.

The user goes into Edge Zone and registers employee 2. Then, the user scans asset #

9999, twice, and selects “Done and Exit”. The screen will show a message saying “1 Duplicate Asset Removed” and asks the user to confirm YES or NO. Upon clicking YES, the transaction is completed, and one knife is checked out since the assets did not match the quick scan barcode. Both assets cannot be checked out simultaneously, since they are not a product barcode, so only one unique value remains, and the rest are removed.

The user goes into Edge Zone and registers employee 3. Then, the user scans asset #1000 3 times and selects Done and Exit. This will checkout a quantity of 3 Hooks to the employee 3 since it matched the quick scan barcode.

The user goes into Edge Zone and registers employee 4. Then, the user scans asset #5000 3 times, asset #4000 twice, and asset #1000 once, and selects “Done and Exit”. The screen will show a message saying “3 Duplicate Assets Removed” and asks the user to confirm YES or NO. Upon clicking YES, the transaction is completed, and 2 Knives are checked out with assets 5000 and 2000, respectively, as well as one hook.

The user goes into Edge Zone and registers employee 5. Then, the user scans asset #5000 once and asset #4000 once and selects “Done and Exit”. When the user presses done and exit, the backend logic notices that the user is trying to checkout a Station

Zone product that has not been returned yet, and gives the alert that the item must be returned first (as it does today) for asset #5000 and asset #4000.

!IMG\_0679.png|width=1280,height=960!

The user removes asset #5000 and asset #4000 from the cart, presses done and exit again, and the transaction succeeds.

NOTE - Items checked out using Product Barcode method in Station Zone should NOT feed the database with an asset #.

Issue Key: PL-310

Summary: Aramark - New garments should not feed Unissued Garment Report

Description: Aramark wants to “flag” specific garments so they do not populate on the “Unissued Report”.

The way these would be flagged is by the by injection Date. It would then be “flagged”

for the next 3 days.

When a garment is flagged it will not show up on the Unissued Report. It WILL be able to show up on all other reports.

Example situation - A garment is injected into the Innova Zones Vault in Lincoln Nebraska. It is then washed and mixed with older garments. After being washed it is thrown into the vault with other garments and scanned as Passed Inspection. In a normal situation, this garment would go to the "Unissued Report" because it was never issued through the Data Hoop. Because this garment was scanned within 3 days of injection as "Passed Inspection", it would be flagged and not populate on the "Unissued Report".

With the Lincoln facility we would have the injection data from our Innova Zones Vault. All of the other plants would be sending us the data via GTS(They would add the injection date and time to the current feed) and/or IMD(This would be a new feed with IMD).

Please reach out with any questions. We need to get back to Aramark with what this would take in the next few days.

Issue Key: PL-292

Summary: Aramark Data Hoops - Same Issue / Return Time

Description: We are seeing an issue in the Aramark reporting where the same issue and return time exists for an employee, despite the return time being different in DB.

One example is arajbsgrane.aramarkinnovazones.com (DB - ai\_arajbsgrane):

Employee ID: 1031056

If you look in the Uniform Zone Report (included attached) the issue and return date and time stamp are the same for all transactions after the 21st.

I checked the DB for this employee for the transaction on the 7th (asset 300ED89F3350006001293F0A) and found that the OUT transaction in iz\_order\_items is correct and it was checked out on the 7th at 2:46. However, when I did a search for this asset in the iz\_order\_returns table, it shows that it was returned on the 11th. When I look up the order\_id for this return transaction

(d88e7e6c-d70e-907c-221d-e7ece202a7f9), it is incorrectly showing as OUT in the iz\_orders table, which I believe is the problem.

In summary, it looks like a new iz\_orders entry is NOT being made for IN transactions as it should. So the iz\_order\_return entry is incorrectly referencing the OUT iz\_order, which is why the dates are all wrong.

This bug needs to be resolved and then we need to correct the historical data as well.

Issue Key: PL-283

Summary: Station Zone - Cost Center Addition - Backend Development for Transactions

Description: We need to add the ability to associate a cost center (CC Number) with a specific department. Then, if an employee belongs to that department and a transaction is completed, it will checkout that product with their associated CC number UNLESS a CC number is set in the cart.

See details attached.

Example:

Department A is tied to CC 1234.

Matthew is in Department A.

Matthew checks out a pair of safety glasses through PPE Zone without CC (CC selection off) → transaction will show in DB with CC 1234.

OR

Department A is tied to CC 1234.

Matthew is in Department A.

Matthew checks out a knife with asset 850325 through Station Zone (no CC selection ability) → transaction will show in DB with CC 1234.

Issue Key: PL-282

Summary: Station Zone - Cost Center Addition - Add Cost Center Column to Department List

Description: We need to add the ability to associate a cost center (CC Number) with a specific department. Then, if an employee belongs to that department and a transaction is completed, it will checkout that product with their associated CC number UNLESS a CC number is set in the cart.

See details attached.

Example:

Department A is tied to CC 1234.

Matthew is in Department A.

Matthew checks out a pair of safety glasses through PPE Zone without CC (CC selection off) → transaction will show in DB with CC 1234.

OR

Department A is tied to CC 1234.

Matthew is in Department A.

Matthew checks out a knife with asset 850325 through Station Zone (no CC selection ability) → transaction will show in DB with CC 1234.

Issue Key: PL-275

Summary: Fix Employee Sharpening Report - Numbers not adding up

Description: See video attached.

There has been an issue pointed out by the JBS Grand Island building regarding our Employee Sharpening Report. There are employee's that show they have a certain number of sharpening's for the week, but when clicking into to see the sharpening details the total number does not match. It also does not match when exported.

Example: There is an employee named Mohamed Mohamed at Grand Island that shows he had 28 Sharpening's last week, but the sharpening details say that he only had 19. When the report is exported, it also only shows 19 sharpening's.

This is only happening for certain employee's, but it is happening at every building.

After looking into it, it appears to be only happening to employee's that have the same name as someone else in the system. I am not sure if it is confusing the employee's or what is happening, but this is an issue that needs to be resolved at every building.

Issue Key: PL-243

Summary: Aramark Master Report - Plant Selection by Plant Code

Description: Current Functionality: The plant selection in the Aramark Master Report is chosen based on boolean value in is\_Aramark\_master\_report (in iz\_company\_master table).

Ex: "JBS Demo" has value of 1, "JBS Grand Island" has value of 1, "JBS Greeley" has value of 0. Only JBS Demo and JBS Grand Island will show up as plant selection options on report.

Improved Functionality: Plant selection should only show plants that have the same plant code as the company the user is logged into. Plant code is found in the iz\_company\_master table.

Ex: I login to "JBS Demo" company which has a plant code "JBS". It will show plant selections: JBS Demo, JBS Grand Island, JBS Greeley as all of those companies have a plant code value of "JBS".

Ex: I login to "GM Arlington" company which has a plant code "GM". It will show plant selections: GM Arlington, GM Wentzville, GM Spring Hill as all of these companies have a plant code value of "GM".

-----

Issue Key: PL-236

Summary: Vault - Scanned Items are stored as string instead of json.

Description: Items inserted in the table iz\_vault\_transaction in coulumn assets need to be a jason array instead they are stored as string.

The entries look like this

"[\"300ED89F335000B333B8CB4E\", \"300ED89F335000B333B8C447\"]"

Instead of

```
["300ED89F335000B333B8CB4E","300ED89F335000B333B8C447"]
```

used the following query to fix it

```
{code:sql}
```

```
UPDATE iz_vault_transactions SET assets=TRIM(BOTH '' FROM REPLACE(`assets`, '\\', ''))
```

{code}

Then you can pull the data using the following SQL in MySQL 8

{code:sql}

```
select t.product_code, t.size, t.color, x.rfid
```

```
from iz_vault_transactions t
```

```
cross join json_table(t.assets, '$[*]' columns (rfid varchar(50) path '$')) x
```

```
{code}
```

Issue Key: PL-215

Summary: Data Hoop Checkout Override Logic -> iUniform Zone (Aramark)

Description: Expected Behavior: When an asset is checked out through iUniform Zone, it should return any previous transactions that are still “open” as “Passed Inspection”.

Furthermore, if the previous transaction was closed as damaged, it should update the return reason to Passed Inspection instead of Damaged.

Example:

Checkout asset 1234. Do not return asset 1234. Asset 1234 checked out again → create a return entry for first transaction so that the first transaction will show returned at time of second OUT transaction, with return reason as “Passed Inspection” and Inspector “Duplicate Issue”.

Example 2:

Checkout asset 1234. Return asset 1234 as damaged. Checkout asset 1234 again → return transaction will update to show “Passed INspection” instead of “Damaged”.

Status: Done

Issue Key: PL-214

Summary: Vault Reader - Fix Inspection Return

Description: Problem: When an item is returned through the vault reader, it is not populating with the correct value for iz\_order\_return.order\_item\_id :

!Screen Shot 2020-08-27 at 1.51.56 PM.png|width=613,height=46!

Solution: When an item is returned, if it has an associated OUT transaction, it should

put a value in iz\_order\_return.order\_item\_id equal to the order\_item\_id for the OUT order

Status: Done

-----

Issue Key: PL-213

Summary: Resolve is\_completed = 1 issue in uniform programs

Description: Issue in ai\_arajbscactx and ai\_arajbsgreco.

Problem: There are a number of transactions in both databases where the transaction in iz\_order\_items.is\_completed = 1, but there is no associated return transaction in the iz\_order\_return table.

Solution: There needs to be an associated transaction made in the iz\_order\_returns table to return the transaction that is marked is\_completed = 1.

Query to ID error transactions:

```
SELECT item.order_item_id, item.asset_no FROM iz_order_items as item
```

```
WHERE item.order_item_id NOT IN
```

```
(SELECT ret.order_item_id FROM iz_order_returns as ret
```

```
WHERE ret.order_item_id=item.order_item_id)
```

```
AND item.is_completed=1
```

Sample error order\_item\_id transactions from ai\_arajbscactx:

\* 02699945-eac7-82d4-3619-d2ba70730fb9

\* 051f7e65-4d7f-38cc-a1ad-ad0d9608cae5

Issue Key: PL-212

Summary: Return Reason not populating in reports

Description: Current Behavior: I am pulling the tool control report for JBS Grand Island ([jbsgranetoob.izhips.com|http://jbsgranetoob.izhips.com]) and I am finding missing return reasons for a few of the returned transactions. This shouldn't be possible, as the user is forced to select a return reason to return anything. However, there are multiple transactions showing up as returned but no return reason marked. I have attached a spreadsheet (exported employee report) showing 5 such transactions. If you look in the database at these transactions (refer to column Q for order\_number) you will see that the database does contain return reasons. However, it is not populating in the reports (i.e. Tool Control Report, Employee Report).

Issue Key: PL-207

Summary: Dynamic Asset / Product Association - Station Zone & Sharpening Zone

(Enterprise)

Description: Currently the data hoop backend has logic to map the product name to the asset number. It does this based on the most recent transaction for that asset number, and uses that product name.

We want the same functionality (which we will call Dynamic Asset / Product Association) in Station Zone and Sharpening Zone.

Ex: I checkout product “Knife” through PPE Zone and associate asset 1234 in the cart screen to it. Two days later, I scan asset 1234 through Station Zone, which normally would have one “default” product only. However, with Dynamic Asset / Product Association, it would show in reports as “Knife” since asset 1234 was tied to “Knife” product earlier. The same thing would apply to Sharpening Zone and Station Zone Returns.

There should be a master admin toggle as well to toggle on / off this functionality.

-----

Issue Key: PL-152

Summary: Vault Reader - Develop Backend for Tag processing

Description: User selects Inspector and Return Reason from dropdown list on front end.

Then garments are scanned. After scan is submitted, the garments should populate in the database specified with the specific return reason and inspector. \*This should function the same way as the current datamars EDI code does - i.e. if there is a transaction OUT for that garment, return it. Otherwise, it should feed in the improper issued product table.\*

\* Database - selected by user on frontend based on company selection (i.e. JBS Cactus → production\_arajbscactx). It will always be Aramark database.

Status: Done

-----

Issue Key: PL-126

Summary: Trailer Inventory App Report - Empty Trailer should feed Inventory Adjustment Report

Description: Whenever a user selects “Empty Trailer” button on iPad Trailer Inventory App Report, it should feed the inventory adjustment report.

Logic: Trailer 1234 has Product A of 100 Quantity and Product B of 50 quantity. User selects “Empty Trailer” button for Trailer 1234. Trailer will be emptied, and the inventory adjustment report will show clerk’s name that selected empty trailer button along and two rows - one row showing ISSUE of 100 quantity of product A, one row showing ISSUE of 50 quantity of product B.

Status: Done

---

Issue Key: PL-124

Summary: Data Hoop - New Continuous Scan mode

Description: We need a "mode" for data hoop continuous scan where it does not do the IN/OUT/IN/OUT alternation - instead, it would only do returns. Essentially it would check if the item is currently checked out. If yes, it would return it. Otherwise (i.e. item is checked in), it would send it to the improper issued product table (instead of checking back out).

Issue Key: PL-113

Summary: Data Hoop - Logic for Duplicate Issues

Description: User case: Person A gets garment 1234 at 8 AM. Then, person B gets garment 1234 at 9AM, without the garment being returned first.

Expected result: Person A transaction will show on the uniform report as OUT at 8AM. Then, at 9AM when it is issued to Person B, the Person A transaction will be closed - it should be returned as passed inspection at 9AM on the uniform report - and the transaction to person B will be issued OUT on the uniform report as a new row and feed the duplicate issued report.

Issue Key: PL-70

Summary: Product Breakdown Report - Format Attributes Column

Description: Current Behavior: Currently the product breakdown report has an attributes column that feeds any attributes from the transaction. However, it feeds it in a format that is very difficult to read(see screenshot attached).

Expected Behavior: The attributes that feed the reporting should be clean to read. Each attribute should be on a new line on the report for clean display.

Issue Key: PL-36

Summary: Recurring Renewal of Voucher Web Development

Description: Vouchers should have the ability to renew on a set time interval. When a voucher renews, it renews the voucher to the original amount for all applicable employees (based on voucher jobzone).

The start date of the renewal period and renewal interval should be able to be set in the company admin when a voucher is created. Start date is MM/DD (no year) and voucher renewal period is input as an integer, by months. See attached screenshot mockup.

Example behavior of renewal functionality:

Voucher A is created on February 15 2020. It is a \$50 voucher and applies to "SHIPPING" jobzone. Start Date is set to January 1 and the renewal period is 6 months. It is not single use. The voucher should immediately be available to all employees with the SHIPPING jobzone.

Employee 1 uses Voucher A on a \$20 product on March 1. Voucher A will now have a remaining amount of \$30 available for employee 1 to use. However, on July 1 (6 month renewal period), Voucher A will renew and he will have \$50 available to use again. \*NOTE - he will not have \$80 available to use, the vouchers should not "rollover" when renewed\*

Employee 2 uses Voucher A on a \$50 product on March 1. Voucher A will now have a remaining amount of \$0 and therefore should not be an option for the employee to select when logged in. However, on July 1 (6 month renewal period), Voucher A will renew and he will have \$50 available to use again.
